ARMY NATIONAL GUARD

INTRODUCTION

This annual report to Governor Hugh L. Carey for calendar year 1975 is required by Section II of the State Military Law. It covers activities, events, achievements, statistical data and significant changes concerning the State Military Forces during 1975. These forces, under jurisdiction of the Division of Military and Naval Affairs, consist of the New York Army and Air National Guard, New York Naval Militia and New York Guard.

CHIEF OF STAFF TO THE GOVERNOR

Major General Vito J. Castellano was appointed by Governor Hugh L. Carey, as Chief of Staff to the Governor; Commander, New York Army National Guard; Chairman, New York State Civil Defense Commission; and State Director of Civil Defense. He replaced Major General John C. Baker in these assignments, effective 25 December 1975.

DIVISION OF MILITARY AND NAVAL AFFAIRS STAFF

Staff sections in the Division of Military and Naval Affairs office serve

in a dual capacity commensurate with the dual role of the Chief of Staff to the Governor and Commander, New York Army National Guard. Staff officers are responsible for coordinating activities of all components of the State Military Forces and for direct staff functions with relation to the Army National Guard, through appropriate command channels.

For further information on DMNA structure and staff, see Inclosure 1, 2 and 3.

PERSONNEL AND ADMINISTRATION

The mission of this office includes the supervisory and administrative responsibility for all personnel actions applicable to the several components of the New York State Military Forces.

Under provisions of the Reserve Enlisted Program (Rep 63), 1,332 non prior service personnel in the New York Army National Guard attended Initial Active Duty for Training in 1975. This brings the total input for this program to 69,410, from its inception in November 1955 through 31 December 1975.

Statistical information reflecting the activities of this office are outlined in Inclosures 6, 7, 8, 9, 17, 18 and 19 to this report.

STATE MILITARY MUSEUM

The State Military Museum located on the first and second floor of the State Capitol, Albany, N.Y. was visited by 70,000 persons during the year 1975.

37 Civil War Colors were restored during the past year, bringing the total to 547 Civil War Colors that have been restored under the Flag Restoration Program.

OPERATIONS, TRAINING AND INTELLIGENCE

The function of this office is to coordinate all operations, training and intelligence activities as they relate to the State's military forces. It is responsible for supervision of New York Army National Guard units within the scope of these activities and includes specific responsibility over army aviation, electronic communications, the Empire State Military Academy, military support to civil authorities and alert, and mobilization for Federal and State emergencies.

ORGANIZATION

The New York Army National Guard underwent several changes in organizational structure during 1975.

A major reorganization took place on 1 April 1975 with the stationing of all units of the 42d Infantry Division within New York State. The reorganization relieved the 56th Brigade Pennsylvania Army National Guard from attachment to the 42d Infantry Division. The 56th Brigade was replaced as part of the 42d Infantry Division by the 27th Brigade,

which had been assigned to the 50th Armored Division, New Jersey Army National Guard. The realignment of the 42d Infantry Division was accepted with a view towards:

- Increase in its mobilization readiness.
- Improved span of command and control of all its elements.
- Enhanced direction and supervision of its training.
- Insuring an equitable distribution of equipment to all its elements.

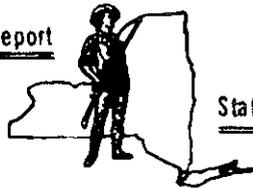

The reorganization resulted in deactivation of:

- 2d Battalion, 69th Infantry
- 3d Battalion, 19th Special Forces Group
- Headquarters and Headquarters Detachment, 727th Maintenance Battalion
- 227th Signal Company
- 205th Light Equipment Maintenance Company

The 1st Battalion, 106th Field Artillery (Honest John) was later redesignated as Headquarters and Headquarters Detachment, 727th Service Battalion (Calibration).

Total impact on the State's military forces was the loss of 12 company size units. By years end, the New York Army National Guard troop strength was reduced from 23,180 to 22,175 for a net loss of 1,005.

During 1975, over 90% of the New York Army National Guard reorganized under the Vertical Army Authorization Document System. The reorganization generally increased the units authorized strength and ability to analyze rapidly,

authorized personnel and equipment.

TRAINING

All units of the New York Army National Guard completed training year 1974-75 with satisfactory ratings evaluated by First U. S. Army. Annual training sites varied from Fort Bragg, North Carolina; Fort Pickett, Virginia; Fort Indiantown Gap, Pennsylvania to Fort Drum and Camp Smith, New York.

In addition to the unit annual training evaluation, First U. S. Army in 1975 introduced a system of unannounced training evaluation visits. The vast majority of units visited projected a favorable image of the New York Army National Guard in the areas of training, logistics and administration.

The Army Training and Evaluation Program (ARTEP) for various organizations was implemented in the New York Army National Guard on 1 October 1975.

The Light Infantry ARTEP was initially introduced with the 105th Infantry upon its reorganization on 1 September 1975. Subsequently all operations and training specialists of the New York Army National Guard attended a Training Management Workshop, conducted at Camp Smith, Peekskill, New York, during the period 7-10 September 1975. Then, Commanders and Training Officers were briefed on 27 September and 25-26 October 1975.

The ARTEP is a single document that provides both the training program and an evaluation of organizations which can be used modularly or sequentially depending on the degree of training readiness of the using organization. The

ARTEP replaces both the Army Training Program and Army Training Test. It is a compilation of the minimum, but frequently performed missions of Army organization in combat. Its central training theme is to train personnel to perform selected TASKS under certain conditions, to a given minimum Army standard. Its major contrast to the former ATP/ATT is the requirement to train to specific standards, with the necessary training time to meet these standards varying among the needs of users.

MILITARY EDUCATION THROUGH SERVICE SCHOOLS

The Army School System is the principal means of individual education and training for all Army personnel. It is an important supplement of other methods of educating military personnel to include troop on-the-job training, individual study, and information programs.

The purpose of the school system and outline of courses conducted are included in the 1974 Annual Report of this Division pages 4-6.

During the current fiscal year, severe cutbacks in Federally supported programs have had a deleterious effect on the overall schools program. In order to insure equitable and efficient employment of the remaining funds, initial priority is being given to career development courses. Under normal circumstances, each functional training course would be rated using the following considerations:

- Operational importance
- Mission support
- Complexity and difficulty
- Trained resource status
- Judgement

Unless Federal funds are at least partially restored, the long-range effect of such fiscal austerity will predictably be a gradually diminishing ability of units to adequately perform their missions.

At the close of the past Federal fiscal year (30 Jun 75), over 1,200 members of the Army National Guard had utilized the Army School System, expending \$986,000 in Federal funds.

Since 1 Jul 75, and to period ending 31 Dec 75, Fiscal Year 1976 funds in the amount of \$690,000 have been either expended or obligated to support this program.

Additional funding of slightly below \$763,000 has been requested to continue the program through 30 Jun 76.

INTELLIGENCE

Under the direct supervision of the Director of Operations, Training and Intelligence, the Intelligence Section continues to be a requisite function in daily and drill status operations.

Coordination is maintained with active military service intelligence sources, federal state and local law enforcement agencies and all elements of the organized militia of the State of New York. Through this coordination, the Intelligence Section collects, processes and disseminates information for the Chief of Staff to the Governor and his staff in all routine and emergency intelligence matters concerning the military forces and facilities of the State of New York.

During 1975, Intelligence Section reports were rendered on the following

incidents:

Demonstrations at DM&NA Facilities -	2
Thefts -	15
Bomb Threats to DM&NA Facilities -	6
Damaged or Forced Entry to DM&NA Facilities -	35
Accidents or personal Injuries -	135

Personnel security actions, a major daily activity, were processed for 2,685 individuals of the New York Army National Guard.

ARMY AVIATION

Army Aviation in the New York Army National Guard has continued to increase in size during the past year.

One hundred and sixty (160) Federal Civil Service employees are presently employed to support the aircraft maintenance and the flight operations of 125 aircraft assigned to the New York Army National Guard. These employees and aircraft are at three Army Aviation Support Facilities located on Islip MacArthur Airport, Long Island; Niagara Falls International Airport; and, Albany County Airport.

In addition to the support of over 200 Army Aviators assigned in the National Guard, with an average of over 100 flying hours provided to each aviator during the year, one-half of the aircraft have been flown to Fort Eustis, VA for a modification update program. The remainder of the aircraft will receive this program during 1976.

Three major training programs for Army Aviators are presently in process. These are:

Mrs. Alice Wolff, Tulare Ca., (left) and Ruth Bartlett Haskins, Garden City, N.Y. replace remnant of 13th Regt. Battle Flag taken by their great grandfather during Civil War and returned by them to New York State.

The first two men to be employed by the New York Army National Guard under a program to increase participation by Blacks as federal technicians were SSG Joseph Windham (left) and SP4 Willie Rogers.

Congressional Medal of Honor recipients who served in the New York Army National Guard were honored by an ESMA Review on the day when 8 buildings at Camp Smith were dedicated with their names. Present for the occasion were Col. Almond E. Fisher, receiving a certificate from MG John C. Baker, and to his right, Col. Charles W. Shea and Richard W. O'Neill. Also honored were Thomas A. Baker, William J. O'Brien, John C. Latham, Michael Valente and Reider Waaler.

1. Instrument qualification and annual re-qualification of all aviators (over 90% completed).

2. Gunnery training and qualification for aviators assigned to units with gun equipped helicopters (100% of required aviators qualified).

3. Nap-of-the-Earth Training (flight below treetop level) of all aviators (less than 10% completed).

A total of 11,618 hours of aircraft flight was performed during 1975.

MILITARY SUPPORT TO CIVIL AUTHORITIES

The function of this section is to develop and maintain state level plans and training for federal mobilization, state duty, Military Support to Civil Authorities and mobilization of the state headquarters as a State Area Command in the event of an actual or anticipated Civil Defense Emergency. The section coordinates with state and local law enforcement officials in developing plans and training programs and otherwise assisting them to increase the capabilities of civilian agencies to cope with civil disturbance, natural disaster or other domestic emergency and nuclear attack.

In addition, all aid to civil authorities operations are coordinated through this section by the Division of Military and Naval Affairs "Emergency Operations Center (EOC)". As the EOC, this section becomes the focal point for control of operations, decisions and briefings for the Chief of Staff to the Governor under actual or simulated emergency conditions. The EOC is the Command Post for the Chief of Staff to the Govern-

nor for conducting statewide operations.

CONFERENCES/SEMINARS/BRIEFINGS

Lieutenant Colonel George Saddle-mire attended the National Guard Bureau Management Conference in Raleigh, NC, 23-25 March 1975.

Colonel Floyd M. White attended the Civil Preparedness Directors seminar conducted in Batavia, N.Y. on 16-17 April 1975.

Colonel Floyd M. White and Captain David A. Arnold attended the Civil Preparedness Directors Seminar conducted in Oneonta, N.Y. on 25 March 1975.

Colonel Floyd M. White and Captain David A. Arnold represented the Military Support to Civil Authorities section and presented a briefing on OPLAN 1, NY-ACOM at the Office of Disaster Preparedness Seminar, Lake Placid, N.Y. on 12-13 May 1975.

EXERCISES/TRAINING EVALUATION

Two representatives from the Military Support to Civil Authorities Section attended the Emergency Operation Simulation (EOS) Exercise conducted by the Office of Disaster Preparedness on 16 January 1975 at the Public Security, Building. The purpose of this exercise was to familiarize personnel manning the State Emergency Operation Center with their duties in the event of an actual emergency.

EMPIRE STATE MILITARY ACADEMY

The Empire State Military Academy, accredited by the Department of the Army on December 14, 1951 as a State Officer Candidate School, has as its

primary mission, the conduct of a rigorous and demanding program of military instruction and leadership training, for officer candidates of the New York Army National Guard and the United States Army Reserve. Of equal importance, the Academy also presents an intensive 15 day course of instruction for junior noncommissioned officers.

Graduation exercises for 1975 were conducted at Camp Smith on August 22nd with Lieutenant Governor Mary Ann Krupsak serving as the Distinguished Guest Speaker and Reviewing Officer. During the exercises, 105 members of OCS Class 1974-75 received their commissions and 207 enlisted men and women graduated from the NCO course.

The Academy, in its 24th year of operation, with 3,055 Officer and 4,816 NCO alumni, is the primary source of junior officers and enlisted leaders for the New York Army National Guard.

The current officer candidate program includes 452 hours of classroom instruction and practical exercises which require the candidates to train with the Academy for two annual training periods of 15 days each and for 12 weekends throughout the year long course. OCS Class 1974-75 reported to Camp Smith in August 1974 with a total enrollment of 143 candidates and had the lowest loss rate (26.5%) of any OCS class in the 24 year history of the Academy.

The 173 member of the Bi-Centennial OCS Class 1975-76 commenced their Phase I instruction at Camp Smith on August 9, 1975. It is anticipated that approximately 110 newly commissioned officers will accept their oath of office during graduation exercises on Aug 20, 1976.

The NCO Course, consisting of 96 hours of instructor and leadership training, was successfully completed by 207 of the 225 enrolled enlisted men and women.

Student representation from minority groups increased to 22% during 1975 and for the first time, included 5 women officer candidates and 8 women NCO students. Required to undergo the same rigorous training and physical activities as the men, these women have established a precedent and it is anticipated that their numbers will increase in future years as adequate facilities are completed. Officer Candidate Janice E. Clement (Troy, NY) was the first woman accepted for Officer Candidate School, ESMA and although the youngest member of OCS Class 1975-76, was also the first woman candidate to receive the honor of being designated as the "Officer Candidate of-the-day" on August 15, 1975. Sp4 Linn M. Sheeran, (Syracuse, NY) the first enlisted woman accepted for the NCO Course was also the first enlisted woman to be designated as an Honor Graduate of the NCO Course.

The Department of the Army and the National Guard Bureau provided support for the Academy by furnishing 15 man-days for each of 114 officers, 45 warrant officers and 246 enlisted persons. The United States Military Academy released 35 first classmen for duty as tactical officers for the officer candidate program.

Annual training 1976 will be conducted at Camp Smith, Peekskill, NY during the period 7-21 August 1976 with anticipated student enrollment as follows:

Phase III, OCS 75-76 (BI-CEN) - - -	110
Phase I, OCS 76-77 - - - - -	200
NCO Course 1976 - - - - -	300
TOTAL	610

LOGISTICS

The Logistics Directorate, consisting of five staff sections, also has staff responsibility for Camp Smith, Peekskill, New York. The Staff sections are: United States Property and Fiscal Office New York; State Maintenance Office; Logistics Services Branch; Facilities Operations Branch; and Facilities Engineering Branch.

The Director of Logistics is responsible for assisting the Chief of Staff to the Governor in matters pertaining to supply, maintenance, transportation, facilities operation, construction and community work programs.

Major activities included the following programs and projects, which are explained in detail in other sections of this report:

- ⊕ Conversion to Automated Pay Systems
- ⊕ Automation of Equipment Maintenance Management Information
- ⊕ Security of Arms and Ammunition
- ⊕ Energy Conservation
- ⊕ State Property Operations
- ⊕ Increased Military and Community Use of Camp Smith

UNITED STATES PROPERTY AND FISCAL OFFICE

GENERAL

The United States Property and Fiscal Office - New York (USP&FO-NY) functions as an activity of the State for federal logistical, fiscal, purchasing and contracting, military and technician pay, automatic data processing, and account examination support.

In addition to the main office located at Building 4, State Campus, Albany, New York, it operates warehouse facilities at Peekskill and Rochester.

During 1975, the USP&FO-NY was authorized one hundred seventy-five (175) federally paid technicians. Funding authorization permitted an average employment of approximately one hundred sixty-seven (167) technicians.

COMPTROLLER

Allotment of Federal Funds for the New York Army National Guard (NYARNG) in Fiscal Year 1974 was \$38,259,758. The Fiscal Year 1975 funding was 40,844,028 of which 40,315,857 was expended as listed below:

APPROPRIATION TITLE	APPROPRIATION SYMBOL	AMOUNT
National Guard Personnel	2152060	\$12,035,974
Operations and Maintenance	2152065	27,633,911
Military Construction	21X2085	645,972
	TOTAL	\$40,315,857

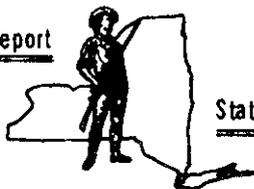

Additional Federal Funding for NYARNG Inactive Duty-Training pay was \$17,600.99.

During Fiscal Year 1974, there was an average of 1,414 Federally paid technicians employed in the NYARNG.

Significant activities during calendar year 1975 in which the Comptroller Division participated are as follows:

a. Conversion to JUMPS-(RC)-Army (Joint Uniform Military Pay System for the Reserve Components of the Army) automated pay system was accomplished for members of the New York State Army National Guard on 1 November 1975.

b. 18,089 individual pay accounts were loaded in the United States Army

Finance and Accounts Center, Fort Benjamin Harrison, Indiana.

c. JUMPS – (RC)-Army automated pay system will provide payment to the members on a monthly basis, checks being mailed to either members home address or financial institution of his choice.

d. Conversion to STARTEPS (Standard Army Technician Payroll System) was accomplished on 1 March 1975. This system will provide proper control of funds, timely preparation of payrolls and related reports, and maintenance of required controls for the Technician Payroll Section.

e. As of 22 April 1975, the disbursing office utilized by the USP&FO-NY was relocated from Fort Hamilton, New York to Fort Dix, New Jersey.

LOGISTICS

All supply activities were expeditiously carried out in support of units to include the Annual Training period. The year 1975 saw the USP&FO-NY Warehouses in Brooklyn and Peekskill, New York combine and the move completed to a new warehouse facility at Camp Smith, Peekskill, New York. In addition, all logistic requisitioning activities have been computerized onto the 1401 Computer. This has resulted in more efficient and responsive supply actions to all units.

PURCHASING AND CONTRACTING OFFICE

Normal procurement activities were conducted in 1975.

For the first time in two years, the Defense Fuel Supply Center contracts for gasoline and diesel fuel assured a

source of supply for 98% of all units.

The five New York Air National Guard bases made progress toward standardization by implementing standard construction contract procedures issued by this office.

2,636 procurement actions were prepared during 1975 as follows:

TYPE ACTION	NUMBER	AMOUNT
Contracts	21	\$ 683,503
Blanket Purchase Agreements	164	154,250
Federal Supply Orders	221	152,085
Delivery Orders	302	257,805
Purchase Orders	1,928	749,872
		TOTAL \$ 1,997,515

AUTOMATIC DATA PROCESSING OFFICE

The past year was a highly successful one in the Automatic Data Processing Office. Technician Payroll, Logistics and the Fiscal Accounting functional areas were converted to the 1401 Computer during January and February.

The JUMPS –(RC)–Army initial load at the US Army Accounting and Finance Center (USAFAC) was delayed as a result of the implementation of the Military Personnel system on the 1401. The Military Personnel system was operational as of August 1975 and provided the basis of loading the JUMPS –(RC)– Army material in November 1975.

At the close of the year, the inventory, still in process at the Peekskill Warehouse, is being processed on the 1401 system.

During 1975, our operating hours increased from 230 hours per month to 500 hours per month. This increase required the 1401 computer system to operate on a three shift basis.

EXAMINATION OFFICE

During 1975, there were forty-two battalion size and sixty-six company size annual or change of command examinations conducted.

Twelve special investigations and/or examinations were conducted in the following areas:

- a. JUMPS-(RC) Quality Assurance
- b. Annual Training Equipment Pool (ATEP)
- c. Signal equipment
- d. Flight clothing
- e. Funds (Recruiting and Retention)
- f. Time and Attendance
- g. Ration accountability
- h. Gasoline
- i. Use of Federal property
- j. Storage of property
- k. Individual Clothing and Equipment.
- l. Typewriters

Two Examiners were assigned to the 42d Infantry Division, NYARNG for 3/4 of the year to assist in the reorganization, relocation of property and inactivation of property accounts.

An internal examination was accomplished for the ammunition account, USP&FO-NY Warehouse located at Camp Smith, Peekskill, New York.

Examiners assisted in the inactivation of the 205th Light Equipment Maintenance Company; 227th Signal Company; 2d Battalion, 69th Infantry; and 1st Battalion, 106th Field Artillery.

An Examiner has been assigned to the NYARNG Annual Training Equipment Pool (ATEP), during the last quarter of the year for reconciling the property

hand received to the ATEP, to include out-of-state units.

An Examiner was assigned to the 1st Battalion, 210th Armor, during the last quarter to assist with the ATEP reconciliation.

Eight Examiners assisted in the Peekskill Warehouse Inventory.

One Examiner was assigned to the 102d Medical Battalion for the last two quarters reconstructing property records.

STATE MAINTENANCE OFFICE

The State Maintenance Office (SMO), located in Building 4 of the State Campus, Albany, New York, is responsible for the operation of the maintenance program in the New York Army National Guard (NYARNG) for Federal funded surface equipment. The responsibilities of the Office are accomplished by the State Maintenance Officer and a Staff of five personnel.

The State Maintenance Office has operational control of:

- Three Combined Support Maintenance Shops (CSMS's) located at Brooklyn; Camp Smith, Peekskill; and Rochester, which are direct support maintenance facilities.

- One Mobilization and Training Equipment Site (MATES) (formerly called Annual Training Equipment Pool-ATEP), located at Fort Drum, which has an organizational maintenance mission as well as a direct support maintenance mission for combat vehicles.

The SMO also provides technical assistance and guidance to forty-two (42)

Organizational Maintenance Shop (OMS's) located throughout the State. Commanders within the Major Commands have operational control of OMS's. An inclosure to this report indicates the locations of all maintenance facilities throughout the State.

A Command Maintenance Management Evaluation team (COMET) Program was initiated in 1974 and has continued through 1975. The results of this program, provide Commanders and Supervisors, at all levels, with an overview of the effectiveness of maintenance programs within their commands and focuses attention on maintenance deficiencies which require additional attention.

The Army Maintenance Management System (TAMMS) has been automated within the Army National Guard and as a result the State Maintenance Office has been tasked with providing edited report data to the USP&FO Automatic Data Processing section for processing. Most of the maintenance programs have been converted to ADP. As a result of the ADP requirement, an additional administrative workload is now imposed on the State Maintenance Office.

To further enhance the maintenance program and improve the management of available maintenance manhours, each Organizational Maintenance Shop must account for, on a Work Request, all man-hours expended, parts used and total cost of each repair or service.

A State Maintenance Office organizational chart and statistical data relating to State Maintenance activities are shown in inclosures to this report.

FACILITIES ENGINEERING

The State Capital Construction Pro-

gram was highlighted by completion of the new million dollar Troop Service Building at Camp Smith in July. Initial use of this fine facility was by the Empire State Military Academy (ESMA), in August.

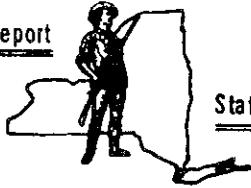

Funds were appropriated by the Legislature for 5 Armory Capital Projects, at a cost of \$682,000, which was a minor increase over the preceding year. The Rehabilitation Program, however, was reduced to a total of \$200,000 for 9 projects. This funding level is considered inadequate to maintain our facilities in a satisfactory state of repair.

A major accomplishment was the awarding of contracts for 10 Capital and 14 Rehabilitation Projects at a cost of \$725,000 and \$317,000 respectively. This included all of the carry-over FY 74-75 and new FY 75-76 projects except three, which was a considerable improvement in speed of contract awards over past years.

Minor State Programs proceeded on schedule, including a crash program started near the end of the year to improve security at 29 Armories by means of magnetic switches on exterior doors, providing window guards and strengthening doors, as required.

Engineering advice and assistance was provided to DMNA Staff and Facilities at an increasing rate.

The Major Federal Military Construction Program (MCARNG) was slowed down by the cancellation or deferral of several projects for which plans had been developed. The Huntington Station Organizational Maintenance Shop (OMS) Project was cancelled and the Lockport OMS and Fort Drum Annual Training Equipment Pool (ATEP) Projects were deferred and may be cancelled. Con-

struction of a new Combined Support Maintenance Shop (CSMS) at the Manor Road, Staten Island Armory site was not started as planned. Instead, the final plans were returned by the National Guard Bureau for substantial reduction in size of the facility and for rescheduling in Federal Fiscal Year 1976 at an estimated cost of \$1,300,000. The only major contract award was for OMS Construction on the Drill Floor of the Kingsbridge Armory in the amount of \$155,000.

Normal progress was maintained in the minor State-Federal Programs. Significant achievement occurred in design of Fiscal Year 76 and 77 projects, including: completion of design for ventilation of drill hall and basement garage, Kingsbridge Road, Bronx (\$130,000); start of design for Albany Airport Army Aviation Support Facility (\$1,800,000); OMS Expansion at Camp Smith (\$92,000); OMS Enclosure on drill hall at 1322 Bedford Avenue, Brooklyn (\$67,000); and same at 184 Connecticut Street, Buffalo (\$84,000). Design was completed on several smaller projects, as well as the remaining Vault Modifications and Intrusion Detection Systems (IDS) in the weapons and ammunition vault security program.

Air National Guard support continued at a high level. Highlight of the program was the start of construction of a Composite Aircraft Maintenance Facility and an Aircraft Engine Inspection and Repair Shop (\$1,100,000) at the Schenectady Air Guard Base.

Environmental matters continued in importance. Division of Military and Naval Affairs provided input to the proposed State Environmental Quality Review Act and cooperated with the U.S. Environmental Protection Agency on water pollution matters and with the State Environmental Conservation Department on air pollution. Energy conservation

features also continued to be emphasized in construction plans.

The overall construction program handled by Facilities Engineering in 1975 included 91 contracts awarded at a cost of \$2,700,000 and 123 contracts completed at a cost of \$2,993,000. Construction costs did not escalate as much as usual and, in some cases, even decreased because of heavy competition on the part of bidders. Details of the construction program can be found in the "Statistical Data" inclosure.

FACILITIES OPERATIONS

The maintenance and operations of all armory, non-armory and training facilities utilized by the New York Army National Guard and developing the future replacement, expansion and alterations of these facilities are the primary responsibilities of Facility Operations. To accomplish the above, funding support involving State, Federal and State/Federal monies is requested in appropriate budget submissions.

During 1975, an agreement was finalized between the State and Albany County whereby fifteen acres will be leased at the Albany County Airport for the construction of an Army Aviation Support Facility. This facility, estimated to cost \$1,800,000 will include a hangar, allied shops, and administrative space, together with exterior tie-down pads. It will support the 29 helicopters, 54 full time federal technicians, and 147 drill status personnel assigned. Construction costs will be federally supported and are now tentatively approved for federal fiscal year 1977. Currently, operations at the Albany County Airport are being conducted from a hangar federally leased from Page Airways.

With the concurrence of the National

Guard Bureau, negotiations are proceeding at Islip-MacArthur Airport, Long Island for the acquisition of a hangar now partially leased by the Army National Guard which will be utilized as an Aviation Support Facility and an armory for those flying and aircraft maintenance in metropolitan New York City and Long Island areas.

At the request of the National Guard Bureau, the United States Army Corps of Engineers has completed an appraisal of the facility. As soon as the National Guard Bureau notifies the State of the approved appraisal price and forwards project approval, meetings will be held with airport and Town of Islip officials to finalize purchase of the hangar and to complete the necessary land lease for the approximate twenty acres required. This facility currently has 47 helicopters and 64 full time federal technicians assigned. Drill status personnel assigned to the aviation and armory facility will total 366. In addition, an Organizational Maintenance Shop will be constructed at the site.

Alterations will be required in the hangar to provide necessary armory space; however, estimated comparative costs for purchasing the existing hangar with alterations versus new construction show an overall savings of \$1,770,000. New construction is estimated at \$4,179,000 federal and \$503,000 state. Purchase and alteration costs are estimated at \$2,622,000 federal and \$289,000 state. It is anticipated that federal funds will be made available for this facility in federal fiscal year 1977.

During 1975, the National Guard armory at 56 West 66th Street New York City and the Naval Militia armories at 52nd Street Brooklyn and Yonkers were closed. Assigned troops were relocated to other armories. The 66th Street National Guard and the Brooklyn Naval

Militia armories will, under provisions of the Military Law, revert to the City of New York. Action by the City is expected early in 1976 in taking over the above armories and the National Guard armory at Sumner Avenue in Brooklyn and the Naval Militia armory at Murray Hulbert Avenue, Staten Island, both of which were previously vacated.

In addition, the Naval Militia armory in Yonkers has been vacated and will, early in 1976, be turned over to the County of Westchester under provisions of Section 178-A of the Finance Law.

In August 1975, a Physical Security Officer was appointed to coordinate all security matters at our National Guard Facilities and to insure compliance with both Federal and State regulations in this important area.

This Federally supported program which was phased over a four year period is nearing completion. At the end of 1975, 97% of our arms vaults had been modified and all but six of the vault Intrusion Detection Systems in our 74 armories had either been installed or were under contract.

Concurrent with the physical security program mentioned above, certain operational matters were updated during 1975. These included key control, announced and unannounced inspections by commanders of vaults and security procedures, storage of weapons parts, and the actual maintenance and operation of the Intrusion Detection Systems. The security of weapons and ammunition will continue to be given the highest priority.

The conservation of energy was continually stressed during 1975. A comparison of the consumption of fuel oil, gas, electric and purchased steam during the periods October 1974-September 1975

MARCH was Minuteman Month

Statewide Recruiting Drive Pays Off

Ft. Ticonderoga
Weekend Training

Saratoga Springs
Open House

Syracuse
Proclamations

and October 1972-September 1973, our base period, indicated an overall reduction of 10%. Emphasis in this area will continue.

Federal support in assisting in the reduction of fuel oil and electricity was obtained when the National Guard Bureau agreed to support with 100% Federal funds the cost of constructing enclosures on assembly hall floors at those armories having Organizational Maintenance Shops in the armory. These enclosures will allow the individual armories to reduce heat on the drill hall floor and provide only the heat required in the enclosed work areas. Lighting will be similarly reduced by concentrating the work area utilized by full time federal technicians.

During the latter part of 1975, the National Guard Bureau advised that plans should be initiated for implementing the Federal Occupational Safety and Health Act. This program will involve those areas in our armory and non-armory facilities which are used on a daily basis by full time federal technicians. Check lists will be developed and inspections made during 1976 to determine if standards are being met and, if not, what corrective action is necessary. The State is to be advised of what federal funding will be made available to correct any deficiencies.

During 1975, the Facilities Management Supervisor continued publication of the Facilities Newsletter which is directed to all armory superintendents and Officers in Charge and Control. Although primarily designed to keep our armory managers aware of matters pertaining to facility operations, other information in areas pertaining to personnel, National Guard recruiting and newly published Federal and State regulations are discussed. This informal liaison with the armories has proven beneficial to the

armories and the Division.

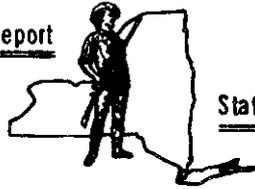

Area conferences with armory superintendents and a three day period of instruction to newly appointed superintendents continue to assist Facilities Operations in educating all participants in both the management and operational aspects connected with all Facilities.

In developing our State budget, emphasis continues to be placed only on those projects considered necessary to keep our Facilities operational and to prolong the life of each. A continual effort will be required to determine realistically the requirements at each facility and to give priority to those considered the most urgent.

LOGISTICS SERVICES

The Logistics Services Section, under the State Quartermaster, is responsible for the following activities:

1. State Property Management, Inventory and Warehousing.
2. Relief of responsibility for State and Federal property, through Report of Survey and Inventory Adjustment Report action.
3. Non-Military Use of Armories, to include Public Liability Insurance and Surety Bonds.
4. Procurement of Supplies and Materials, Contractual Services and Equipment for all DMNA Facilities.
5. Communications for National Guard Armories and District Offices of Disaster Preparedness.
6. New York State Flag Program.
7. DMNA State Transportation, Insurance and Parking permits.
8. OIC&C of Bldg 22, - Facility

Maintenance and Operation.

In addition, special missions and projects are assigned to and accomplished by this Section as directed by the Director of Logistics.

STATE PROPERTY ACCOUNTING DATA

As of 31 December 1975, the following equipment records were being maintained:

- 1900 Active Stock Record Cards.
- 217 Memorandum Receipt Accounts, including 112 State Armory (SA) Accounts, 84 State Guard (SG) Accounts, 2 Critical Items Pool Accounts, 13 Riot Battalion Accounts, 6 District Offices of ODP.
- 1,372 Information Cards, in addition, were maintained in the Weapons Serial Number File and 550 Information Cards in the Typewriter Serial Number File.

During the year, 608 Vouchers were processed covering purchases and transfers of property, including vouchers for disposition of salvage equipment. Disposition of Excess Property continued at a normal rate. This program is continually being purified to include only those items worthy of transfer. By use of the State Inspection and Survey Officers, 3,311 unserviceable items normally offered as excess were removed from the system.

FEDERAL PROPERTY - RELIEF FROM PECUNIARY RESPONSIBILITIES

Working in conjunction with NGR and AR 735-11 (Accounting for Lost, Damaged and Destroyed Property) documentation pertaining to Federal Pro-

perty relief of the State and members of the State's Military Forces from financial responsibility involved processing 101 Reports of Survey. (See Statistical Data Chart). In addition, 985 DA Forms 444 (Inventory Adjustment Reports) were processed for units sustaining certain types of equipment loss or damage. The Blanket Position Bond obtained to provide coverage against loss or liability for property, for all property connected positions, was continued.

STATE PROPERTY - RELIEF FROM PECUNIARY RESPONSIBILITIES

A total of 6 reports of Survey and 12 Certificates of Droppage were executed by custodians of State Property and processed to this office for adjustments.

NON-MILITARY USE OF ARMORIES

A total of 1,090 agreements were processed during the year covering Commercial, Non-Profit, Charitable, and Youth Activity rental categories. Updating of regulations and complete standardization of forms is still in process. Public Liability Insurance, protecting the State of New York, is in force for the year covering all locations and events. The premium is recovered by charging a pro-rata share to the individual lessees. A "Blanket" Surety Bond has been obtained to protect rental charges and damage to State Property during the course of non-military use. This replaces the individual Surety Bonds originally required from each lessee. As is the case with the Public Liability Insurance, the premium for this Surety Bond is also recovered by charging a pro-rata share to the individual lessees.

PURCHASING

This Section is responsible for pro-

curement of supplies and materials, contractual services and equipment for all DMNA facilities. During the year a total of 5,500 Purchase Orders were processed. Other aspects concerned with purchasing include purchase awards, specifications, contact with vendors, contract and non-contract items, and all types of correspondence on matters pertaining to procurement.

COMMUNICATIONS

This Section handles all requests from National Guard Armories for installation, removal or changes in telephone equipment. We set the table of allowance for the amount of telephone instruments to be installed and coordinate the individual fixed and toll charges for budgeting purposes.

NEW YORK STATE FLAG PROGRAM

Distribution of New York State Flags to servicemen overseas for the year totaled 120. National, State and Distinctive type flags were procured and distributed for interior use of armories, special displays and authorized donors. Loan of flags to civilian organizations, and honoring requests for miniature flags made to the Governor by school children, continued.

TRANSPORTATION

During 1975, a total of 177 requests for use of State Sedans required for the DMNA were processed to the Bureau of Fleet Management, Office of General Services. The annual insurance coverage for State and Federal vehicles operated by this Division was processed during the year.

The issuance of Parking Stickers for lots surrounding the Public Security Building is another responsibility of this Section.

We have currently issued a total of 284 Parking Stickers.

FACILITY MAINTENANCE AND OPERATION

The State Quartermaster is also the OIC&C of Building 22. In this capacity, the Logistics Services Section handles all requests for building maintenance and operation. In addition, the OIC&C is the designated contact with the State Office Building Campus Manager on general matters of concern to all employees working on the Campus Complex.

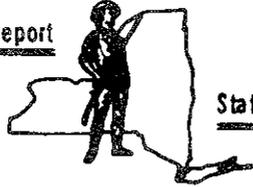

COMMUNITY WORK PROJECT PROGRAM

The Community Work Project Program was initiated in the Division of Military and Naval Affairs in June 1971 under the Department of Defense Domestic Action Program. It involves the use of military manpower and equipment resources to assist community organizations in ecology, educational, cultural and recreational activities. Since June 1971, seven hundred and sixty three (763) community work projects have been processed. During 1975, two hundred and twenty (220) projects have been processed. Program objectives are:

- To develop public understanding and community support;
- Assist recruiting and personnel procurement;
- Develop a sense of community responsibility and participation on the part of the individual members of the State Military Forces.

CAMP SMITH

Camp Smith is operated seven days per week, year round, to fulfill its three-fold mission:

1. Weekend Training Site for Guard and Reserve Units.
2. Annual Training Site for Guard and Reserve Units.
3. Host and landlord for twelve tenant activities.

When not fully committed to reserve component training, certain of the Post facilities are made available to youth and community activities.

UTILIZATION - MILITARY

Weekend training commenced on 11, 12 January with the 133rd Maintenance Co. performing equipment and vehicle maintenance.

On 31 additional weekends, units of the Army and Air National Guard, Sailors and Marines of the Naval Militia, New York Guardsmen, and other reserve components conducted combat and civil disturbance training, weapons firing, disaster and emergency relief training, engineering and maintenance tasks.

The Post hosted six Annual Training periods this year as compared to two in 1974. Four of these periods were for Army National Guard and Navy Sea Bee Construction units, and resulted in the accomplishment of major self-help projects which would otherwise not have been possible. Among the major projects undertaken were the rehabilitation of a rifle range which had become ineffective, erection of a prefabricated vehicle storage and maintenance building, installation of a heating system in one building, complete reroofing of four buildings, installation of an outdoor basketball court, extensive road rehabilitation in the maneuver areas, installation

of a costly drainage system for the USP&FO Warehouse, and the rewiring of two large vehicle storage buildings.

The other two periods saw the Army Reserve's 356 Civil Affairs Brigade conduct a community assistance training exercise, and the Empire State Military Academy conduct Phase I and Phase III of its school year, and graduate its 23rd class.

UTILIZATION - LAW ENFORCEMENT

Agents of the New York City Office of the Federal Bureau of Investigation maintained a training school at Camp Smith for law enforcement officers of federal, state, county and other municipal agencies from the entire northeastern United States and Canada, Training, consisting of one and two week refresher courses and recruit schools in weapon proficiency and classroom instruction in various facets of law enforcement, commenced on 10 February and terminated 19 December. Facilities utilized by the FBI are on a lease-agreement basis and are maintained and serviced by that agency without cost to New York State. Included are a pistol range and a combination shot gun, skeet and machine gun range, which were constructed by the FBI.

Troop K, Poughkeepsie Barracks, New York State Police, conducted weapons proficiency training for its officers on a range constructed by its own members which it uses throughout the spring and fall of each year.

The United States Postal Services also held its semi-annual spring and fall firearms training for inspectors and investigators of the agency.

LADIES DAY AT ESMA

It's all over for the Class of '75

UTILIZATION - COMMUNITY

Use of the Camp facilities in 1975 by youth organizations was marked by a special encampment for disadvantaged youths from major New York metropolitan areas. The Division of Military and Naval Affairs, in conjunction with the New York State Department of State and the Division for Youth, programmed the Camp's facilities to accommodate 213 youths for a week-long summer vacation. Planned cultural, recreational and educational activities were organized and supervised by personnel of the YMCA of Greater New York, together with representatives of various other community service agencies from throughout the State. It was the first extended youth program to be conducted at Camp Smith in some years, and although planning time was limited, the encampment was termed a great success.

As in previous years, the Camp was used by many other youth organizations such as Naval and Marine Cadets, Boy and Cub Scout Troops, elementary schools (outdoor education programs), a community college football team, and an ROTC unit from Fordham University.

In addition to providing indoor and outdoor facilities to several community groups and government agencies, the Post extended itself in accommodating private organizations, particularly in the area of environmental studies.

Youth and civic usage accounted for 6,062 mandays during 1975.

Notable among veteran organization use was an officers training school conducted by the New York Headquarters of the Veterans of Foreign Wars of the U.S. 199 members of VFW groups from throughout New York State convened at Camp

Smith from 31 October through 2 November for a concentrated session of administrative instruction.

Taking place on 20 August was the dedication of 8 permanent buildings in honor of Congressional Medal of Honor recipients who served in the National Guard. Posthumously honored were LTC William J. O'Brien and Sergeant Thomas A. Baker. Others honored were LTC's Almond E. Fisher and Charles W. Shea, LT Richard W. O'Neill, Sergeants John C. Latham and Reider Waller, and Private Michael Valente.

TROOP SERVICES

A troop Service Center was completed and opened in July. An integral part of the training and retention program of the organized militia, Baker Hall houses a gymnasium which is convertible to a theatre/auditorium or two classrooms; a photographic dark room; Post Exchange; barber shop; snack bar; Non-Commissioned Officer's Club; and troop lounge.

All services provided to the troops, are non-appropriated fund activities which are self sustaining.

FISCAL AND PERSONNEL SUPPORT

Maintenance and operation of the Post is funded from three sources, the State Purpose budget, the Service Contract, and the Weekend Training/Annual Training Site Contract; the latter two sources being 75% and 100% Federal funds, respectively. In 1975 the total operating budget for the Post was \$808,700, an increase of \$149,400 over 1974; of this increase, the State Purpose share was \$9,000.

Of the thirty-seven full time Post employees, fifteen are supported solely by the State, with twenty-two from the Service Contract (75% Federal - 25% State) and AT/WETS Contract (100% Federal).

The tenant activities listed on enclosure employ approximately 150 Federal employees.

COMPTROLLER

GENERAL

The Comptroller is responsible for the Fiscal, Civilian Personnel, Data Processing and Management Engineering operations of the Division. He also serves as advisor to the Chief of Staff to the Governor and other Staff Directors on matters of financial management.

FISCAL

Fiscal operations include the budgeting, assignment, control, expenditure and accountability of State and Federal appropriated funds.

The State Funding programs are:

- Administration
- Special Services Activities
- Army National Guard
- Air National Guard
- New York Naval Militia
- New York Guard
- Disaster Preparedness

The Federal funding programs are:

- National Guard Personnel, Army
- Operations and Maintenance, Army National Guard

CIVILIAN PERSONNEL

Civilian Personnel operations include all payroll and personnel actions involving State employees and the processing of payrolls and related documents for National Guard personnel activated during a New York State military emergency.

DATA PROCESSING

Data Processing operations include the processing of data for existing programs and the continuous updating of all such programs. Feasibility studies, programming and the designing and implementation of new EDP systems tailored to improve and support the functional activities of the Division are accomplished as required.

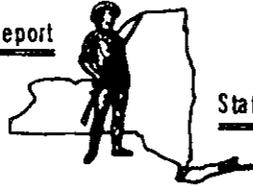

MANAGEMENT ENGINEERING

Management Engineering operations include the use of administrative and organizational management analysis techniques in providing procedural and systems analysis, space and layout studies and management and manpower studies to improve the effectiveness and efficiency of Division policies, organization, program objectives and administrative processes.

SIGNIFICANT ACTIVITIES

Significant activities during calendar year 1975 in the Office of the Comptroller were:

- Implementation of the Joint Uniform Military Pay System for Reserve Components of the Army (JUMPS-(RC)-Army) on 1 November 1975. Conversion to this system centralizes, with the U.S. Army Finance and Accounting Center, payments for all NYARNG Inactive Duty

Training pay with payment on a monthly basis and successfully culminates about one year of staff effort.

- Revision of State funding programs to more properly reflect the fiscal activities of the Division.
- Reduction in force of 26 positions effective 1 July 1975.
- Elimination of State financial support to the Civil Air Patrol.
- Development of a proposal to reduce State appropriations in the State/Federal Cost Sharing Agreements by obtaining Federal cash advances.

LEGAL

The Legal Office is responsible for all legal matters concerning the Division and the Organized Militia. These include the following: Legislation, Real Property transactions, contracts, leases and agreements, Third party claims against the Militia and the Division, Line of Duty injuries affecting the Militia, Administration of Military Justice, Coordination with other State and Federal agencies, Litigation, Labor law and labor relations.

STATE LEGISLATION

There were no new laws enacted in the 1975 Session affecting the Division of Military and Naval Affairs and the organized militia.

FEDERAL LEGISLATION

The federal Privacy Act of 1974 (PL 93-579 approved 31 December 1974, effective in 1975) relating to release of personal data from federal records affects the administration of those records of the National Guard prescribed by federal

laws and regulations.

The National Guard Technician Retirement Act of 1975 (PL 94-126), effective 1 December 1975 benefitted those federal employees of the New York Army and Air National Guard who were technicians on or subsequent to 1 January 1969 by increasing retirement credit for previous state employment with the National Guard from 45 percent to 100 percent, less any retirement benefits which accrued under state law for such employment.

CLAIMS

During 1975, under the provisions of Titles 32 and 38, United States Code, and under Section 216 of the State Military Law, a total of 336 line of duty investigations were processed for injury and disease to National Guardsmen while engaged in training or State active duty:

Approved LOD	249
Disapproved LOD	9
Approved VA Benefits	5
Not in LOD	9
Pending NGB	19
Approved LOD State Duty	2
Pending from Units	43

There were 59 Motor Vehicle accidents involving National Guard vehicles and third parties during 1975. One of these claims is now in litigation.

There were 27 claims arising out of the use of armories by third parties. One of these claims is now in litigation.

On 13 June 1975, there was an accident on the NYS Thruway when military vehicles were travelling in convoy to Ft. Drum for AT 75. Serious physical injuries were sustained by SP5 James F. Abel, a passenger in a military ambulance.

Moderate physical injuries were

sustained by SP5 John T. Caltabiano, driver of the ambulance. SP5 Abel retired with total disabilities due to his injuries.

On 24 June 1975, there was a single car accident on the NYS Thruway when 2LT Joseph J. Abbruzzese was returning in his personal automobile to his home after a training assembly at the Poughkeepsie, NY Armory. He suffered extensive, serious injuries. He qualified for benefits administered by the Veterans Administration because he was not in a duty status when injured.

On 6 December 1975, SP4 William H. Haltermann, Sr. Battery Aidman, performing duty in Newburgh, NY, was sent to assist another guardsman who was involved in a motor vehicle accident enroute to the Kingston Armory. SP4 Haltermann was along side of his vehicle rendering medical aid when a third vehicle struck him. He was taken to Arden Hill Hospital, Goshen, NY, where he underwent extensive surgery for severe leg injuries. It is possible that an amputation may be necessary.

TECHNICIAN PERSONNEL OFFICE

The Technician Personnel Office is responsible for the administration of and the personnel services for approximately 2500 New York Army and Air National Guard Technicians. The Technician Program is federally funded and authorizes 2738 positions throughout the State. Budgetary limitations, however, restrict employment to approximately 90 percent of the authorized level.

In February, due to a mission change in the 106th Fighter Wing, reduction in force procedures were implemented resulting in the downgrading of a number of technicians. No separations were required. However, a similar action was

necessary in the 107th Fighter Group in April, resulting in the separation of 32 technicians.

In May, two Army National Guard Battalions were removed from the troop list, requiring reduction in force procedures. While there were some downgradings, no separations were required.

In August, the Technician Personnel Office was reorganized and a Labor-Management Section established.

After more than four years of negotiation, an agreement was signed on 15 September 1975 by the Chief of Staff to the Governor and the employee organization, the Association of Civilian Technicians, Inc. The Agreement is for two years and became effective 3 October 1975. During the year there were seven formal complaints of Unfair Labor Practices filed by the employee organization. One was dismissed by the Department of Labor and the remainder are still under consideration.

There were significant increases in the number of Incentive Awards approved as well as in Outstanding and Excellent performance ratings, reflecting a greater awareness on the part of supervisors as to their responsibilities in this area.

During the year there were 241 new technicians appointed and 305 separations. Included among the separations were 46 retirements and 6 deaths. At the close of the year there were 2473 technicians employed in 63 communities throughout the State.

SENIOR ARMY ADVISOR

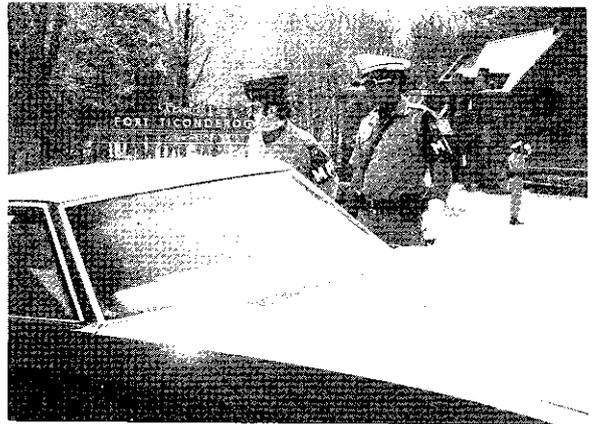

The mission of the Senior Army Advisor and his subordinates is to represent and act as spokesmen for the Active Army in all reserve component matters under

COMMUNITY SERVICE

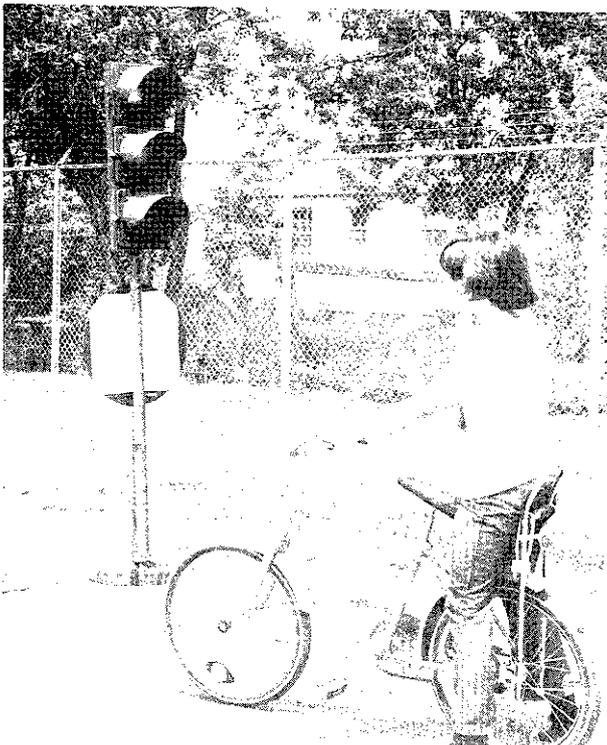

State Fair

Ft. Ticonderoga
Bicentennial Celebration

Join "Nat Guard" for - - -
Bike Safety

the purview of the Commander, Army Readiness Region I; render professional military advice and assistance to NY-ARNG Commanders in military matters concerning the organization, operations, training, and readiness of the units; and monitor the use of and assist in the management of Federal resources in support of the New York Army National Guard. The Senior Army Advisor serves as the Military Advisor to the Chief of Staff to the Governor when so designated.

The need for improved readiness was stressed. Advisors were directed to become actively involved as advisors and participants in all areas pertaining to readiness. Commanders were encouraged to improve readiness through maximum use of the assistance available from Army Readiness Region I.

Advisor strength at the close of 1975 was 29 (15 officers - 14 enlisted).

STATE EQUAL OPPORTUNITY OFFICE

The Equal Opportunity Office is tasked with the dual responsibility of ensuring equal opportunity and treatment in the National Guard and within the technician program, as well as providing a system of redress, if required. The dual status of the programs within its purview necessitates reporting and liaison with both the National Guard Bureau and the Civil Service Commission.

In addition to a full-time staff of four

in the State Equal Opportunity Office, over 40 personnel in the technician structure function in a collateral duty status as counselors and Program Coordinators to assist in delineating and achieving affirmative action program objectives for the Commander. Affirmative action objectives are developed annually to complement designated missions, and provide for maximum participation and utilization of personnel and resources.

Two special emphasis programs directed toward the Spanish speaking and women, have been expanded to include representatives of each group from both the Army and Air National Guard. Additionally, an Equal Opportunity Advisory Council has been established to provide a broader base for the submission of recommendations to effect gains.

Race Relations personnel are currently assigned on each Air Base and in each headquarters of Group/Brigade size, or larger. Technical schooling and qualification, conducted primarily at the Defense Race Relations Institute, Patrick Air Force Base, Florida, was initiated this year with 11 personnel completing the course to date.

Internal evaluation programs conducted by National Guard Bureau and the various headquarters insures continual updating and modification of Equal Opportunity programs to achieve determined goals, and has had a positive effect on the program.

AIR NATIONAL GUARD

GENERAL

The year 1975 was one of consolidation and recognition for the New York Air National Guard. Two mission changes took effect, reflecting the logical, sensible role of the Air National Guard as full time member of the USAF total force.

- The 109th Tactical Airlift Group (Schenectady) was assigned the responsibility for providing logistical support to the Greenland IceCap radar sites.

- Known until 1975 as the 106th Fighter Interceptor Group, programmed for deactivation only one year earlier, the 106th (Suffolk) became the 106th Aerospace Rescue and Recovery Group (Military Airlift Command), and traded its F-102 Delta Darts for HC-130's and HH-3 Helicopters.

In its new mission, new also to the Air National Guard, the 106th is responsible for air and sea rescue in the North Atlantic and Eastern North areas. It is one of two Air National Guard units with this humanitarian mission. The other is in California.

Honors and special awards for combat readiness and mission excellence came to the 105th Tactical Air Support Group (White Plains), the 107th Fighter Interceptor Group (Niagara Falls), the

108th Tactical Control Squadron (Syracuse), and the 274th Mobile Communication Squadron (Roslyn). Details follow under the report on component units.

As a result of a mission change and an administrative reorganization, the NYANG lost, and gained a Wing Headquarters in 1975. The 106th Fighter Interceptor Wing (Suffolk) was deactivated. Tactical Air Support units in Baltimore, Ohio, and White Plains were organized into the 105th Tactical Air Support Wing, with Headquarters at White Plains.

Concern about a possible move and mission change for the 174th Tactical Fighter Group, from Syracuse to Griffiss AFB was relieved when Syracuse Congressman Hanley announced that the "Boys from Syracuse" would remain at Hancock Field.

Recruiting and retention continued to be a major area of activity in NYANG in 1975.

OPERATIONS

All NYANG flying units, except for the 106th ARRG at Suffolk, are qualified as combat ready (C-3 status or better).

In its new rescue mission, aircraft and crews of the 106th ARRG provided

back-up support during the Apollo-Soyuz space event, and during President Ford's return from an international economic conference in Europe.

LEADERSHIP

Leadership of New York Air National Guard units as of 31 December 1975 is listed in enclosure,

FISCAL

The New York Air National Guard continued to be one of the most productive investments of the State of New York. Federal fiscal support rendered directly to NYANG during Fiscal Year 1975 approximated \$34,200,000. This figure does not include fiscal support rendered indirectly for centrally funded supplies and equipment; overhead costs for service schools; depot level maintenance of aircraft and equipment; and other cost factors.

In terms of the investment of the State of New York of approximately \$760,000 during the fiscal year, the State derives a return not only in direct Federal support, jobs and tax revenue, but also in economic, social and cultural areas. The tax dollars generated by the substantial federal investment, as well as the business income it generates contributes substantially to the New York State economy.

PERSONNEL

Major command changes during 1975 included the following: Colonel Robert C. Chambers was appointed Commander, 105th Tactical Air Support Wing. Lt Col Hugh A. Ward was appointed Commander, 105th Tactical Air Support Group. Colonel

Curtis J. Irwin resumed command of the 174th Tactical Fighter Group. Colonel John B. Conley was appointed Director of Operations, NYANG Headquarters Staff. Brig Gen John C. Campbell, Jr., was appointed Commander, 106th Air Recovery and Rescue Group. Brig Gen. Raymond C. Meyer retired as Deputy Commander, NYANG, 19 October 1975.

COMPONENT UNITS OF THE NEW YORK AIR NATIONAL GUARD

105th TACTICAL AIR SUPPORT WING

The 105th Wing was activated in ceremonies on 14 June 1975. Colonel Robert C. Chambers assumed command. Director of Operations, Lt Col James H. Hughes; Director of Materiel, Lt Col M. V. Misevic.

105th TACTICAL AIR SUPPORT GROUP

The 105th was a recipient of the coveted National Guard Bureau's Distinguished Flying Unit designation. It was one of five ANG units so honored in 1975. The award is given in recognition of an outstanding flying record, high percent of aircraft operationally ready, a high percent of aircrews qualified as combat ready, a satisfactory percent of airmen reenlistments, unit manning, skill level qualification, etc. The award was presented to Colonel Chambers, Wing Commander, at the NGAUS annual Conference.

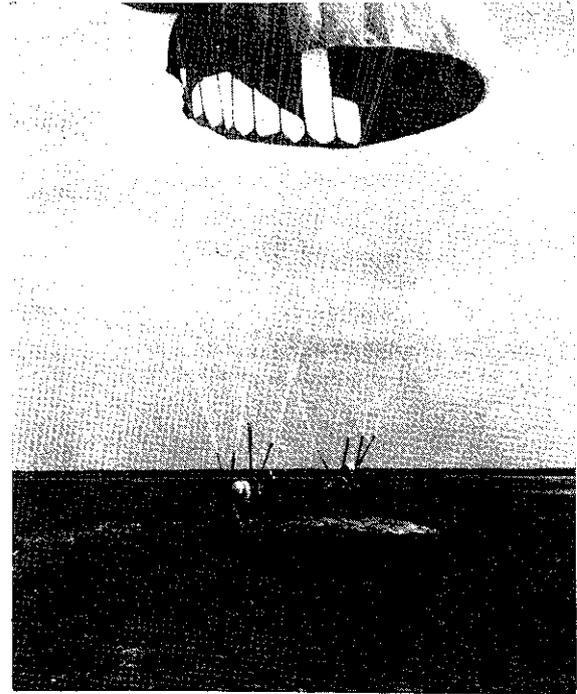

The 105th received kudos from its community, as well. During the year its members and equipment aided numerous civilians in distress including search and rescue of downed civilian aircraft, and reporting water pleasure craft afire in Long Island Sound, leading to rescue of those aboard.

NEW MISSION

106th Aerospace Rescue and Recovery Group

Two Touchdowns

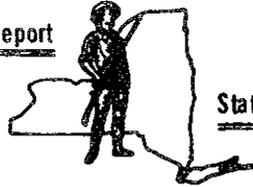

Hercules in Flight

"P J's"

Jolly Green Giant

The 105th Direct Air Support Center (DASC) reached C-2 combat readiness status, the first Air National Guard DASC unit to be so recognized. Members of the 105th Tactical Air Support Squadron (TASS) participated in Exercise Brave Shield X, and received special commendation from the U.S. Army units they supported.

106th AIR RESCUE and RECOVERY GROUP

The 106th new mission is to be responsible for rescue missions in the North Atlantic and Eastern North American Region. Actually, the 106th, with HC-130 aircraft, has the capacity to save lives anywhere in the world, anytime. During the Apollo-Soyuz space mission, an HC-130 manned by the 102nd ARRSq, was assigned to Pease AFB, N.H., on alert during the Apollo space craft take off. Its mission was to refuel rescue helicopters in case of an abort. This was the first time that an Air National Guard unit participated in a live Air Rescue and Recovery mission. A 106th HC-130 served in operation "Duckbutt", intercepting and escorting Air Force One until it was safely over the CONUS carrying President Ford back from an international conference in Europe.

SSGT Paul Bellissimo is the 106th's first ANG non-air technician to complete the rigorous nine month pararescuer training program, and become fully qualified. A New York City Policeman in civilian life, Sgt Bellissimo received intensive physical, medical, parachute, survival, scuba diving and helicopter rescue training.

SSGT George Gonzales, technician, was awarded the Silver Star for gallantry in action, and devotion to duty in Vietnam as a USAF Pararescuer.

107th FIGHTER INTERCEPTOR GROUP

The Aerospace Defense Command's "A" Award, the highest recognition by ADC of a fighter interceptor unit, was presented to the 107th FIG on 5 June 1975, by Lt Gen R. Baker, Vice Commander, ADC, and Maj Gen R. Robinson, Commander, 21st Air Division.

Further recognition of the 107th's combat readiness was made in August with the presentation to the unit of the NYANG "Governor's Trophy", symbolizing the NYANG's outstanding flying unit of the year.

Other awards to the 107th included the NORAD - 21st Air Division's Commander's Flight Safety Award for 1974, and a Certificate of Meritorious Achievement from Headquarters, USAF Defense Command.

109th TACTICAL AIRLIFT GROUP

As of 1 July 1975, the 109th gaining command changed from the Tactical Air Command to the Military Airlift Command. On leaving TAC, the 109th received a special commendation from the Tactical Air Command for its "superb performance in the Atlantic Command's "Soft Shield '75", from 24 May to 8 June. Involving Airmen, Soldiers, Sailors, and Marines, this was the largest joint forces exercise ever held by the Atlantic Command.

In its new mission of resupply of the Greenland Icecap's radar stations, the 109th is now equipped with 5 C-130 D's (ski equipped) and 6 C-130-6's.

152nd TACTICAL CONTROL GROUP

Honors came also to the 152nd, in

the form of a "Joint Readiness Certificate," from the U.S. Joint Chiefs of Staff for its "Joint combat skills as displayed in 'Brave Shield XII', at Fort Hood, Texas, 11-31 August.

The 152nd's 108th Tactical Control Squadron at Syracuse won, for the second consecutive year, the award as "Outstanding Unit" of the 152nd Group. Competition for the award is among seven units of the 152nd Group located in New York, Ohio, and Pennsylvania. Major John Ianuzzi won the USAF Commendation award for outstanding work in radar operations. Major Ianuzzi is a pioneer in the field of live aircraft control for the 108th Tactical Control Squadron.

The 113th Tactical Control Flight was honored for Outstanding Performance in Joint Chiefs of Staff Exercise Brave Shield XII.

174th TACTICAL FIGHTER GROUP

TSGT Walter J. Barfield of the 174th Combat Support Squadron was named NYANG Airman of the Year for 1974. TSGT Frederick S. Richards was a Distinguished Graduate of the ANG NCO Academy, and was honored by being chosen Class Speaker.

The 174th sponsored the relocation of two South Vietnamese refugee brothers to Syracuse, where they were able to join the rest of their family. Jobs, and homes were found under "Operation Homecoming."

Again, the 174th gave outstanding support to the New York State Fair in Syracuse. A highlight of the 1975 Fair was the appearance of the USAF Thunderbirds aerial demonstration team.

The possibility of moving the 174th

to Griffiss AFB was dropped, according to an announcement 1 October by Congressman Hanley. A vigorous local effort had been mounted to keep the unit in Syracuse.

213th ELECTRONICS INSTALLATION SQUADRON

The outstanding performance of the 213th earned this unit the 1974 NYANG Commander's Trophy.

For the third consecutive year, the 213th annual inspection was passed with no major findings. This sets a new record.

274th MOBILE COMMUNICATIONS SQUADRON (Contingency)

The 274th collected many honors during 1975. Most significant was being selected by the Air Force Communications Service (AFCS) as one of 19 "Outstanding Units." The group included 12 regular Air Force units, and seven ANG units.

The 274th was also designated "Outstanding Unit" of its parent 253rd Mobile Communication Group, Mass ANG, for the second consecutive year. The competition was for a two year period, 1 Jan 73 to 31 Dec 74. In the announcement, the 274th received a special commendation from the 253rd Commander, Colonel Paul Sullivan for, "A superior level of support in providing a vital AN/TRC-97A link during JCS Exercise Solid Shield 75. Of particular significance is the total cooperation and conscientious and professional attitude displayed by all members of the 274th.. the 274th .. is definitely a first line unit. Their performance during Solid Shield 75 has demonstrated the ability of the Air National Guard to respond to a real world situation, and interface with active forces under a

274th Airman First Class Anthony Cucchiara was named 253rd Group “Airman of the Year.”

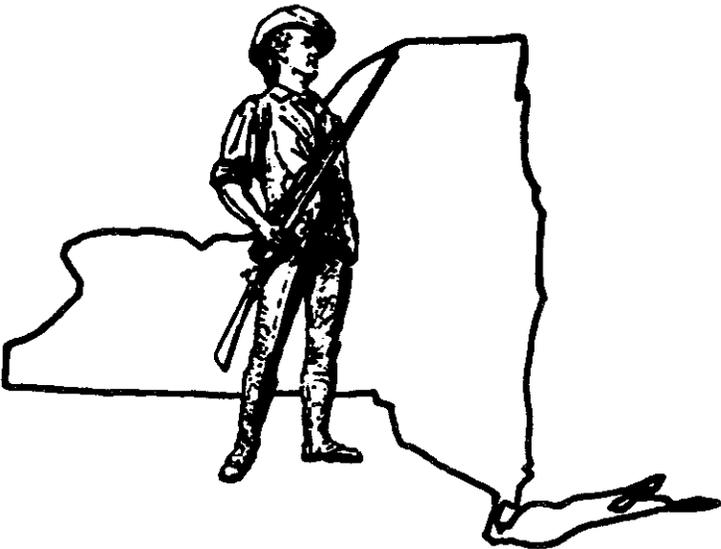

552nd USAF BAND

The NYANG Band played concerts and special appearances at 14 locations

during the year. Events included the Militia Association of New York, Columbus Day Parade in Yonkers, Retirement Ceremony for Brig Gen Raymond C. Meyer, three days at the New York State Fair, among many others.

Band Commander, CW4 Joseph Losh received his 35 year New York State Long and Faithful Service Medal.

NAVAL MILITIA

ORGANIZATION

The Naval Militia is a military organization composed of Ready Reservists of the US Naval and US Marine Corps Reserves. The New York State Military Law prescribes that personnel be assigned to units which are organized in accordance with US Naval and Marine Corps Reserve Tables of Organization. Because of almost continuous reorganization of the US Naval Reserve structure over the past two years, strict compliance with this directive has been impossible. However, effective 1 April 1976, all then organized units of the New York Naval Militia will be in strict compliance.

MISSION

The Naval Militia has a dual federal-state identity in law and may alternately execute federal and state functions:

- To be ready to respond to the call of the Governor in the event of natural or man-made disaster, domestic or internal emergencies.

- To support and assist in training personnel and units as our contribution to our overall national defense.

OPERATIONS AND TRAINING

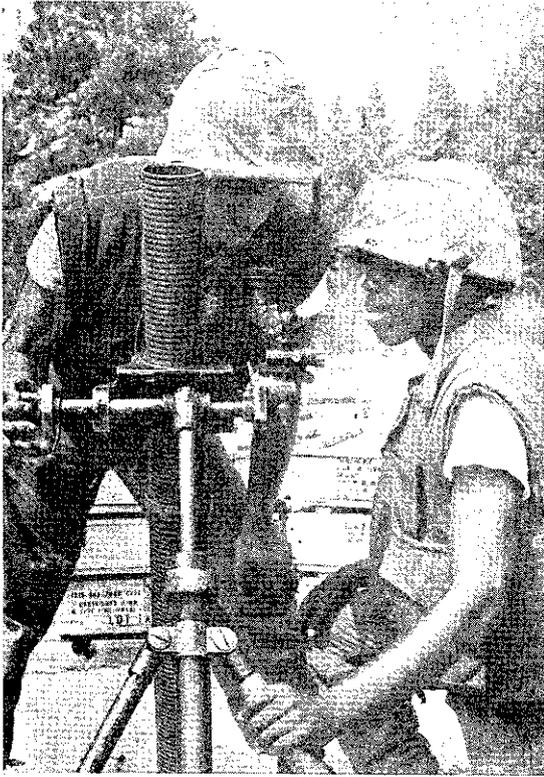

Since the last report, the Naval Militia has been reacting to the protracted restructuring and reorganization of the Naval Reserve program. The Marine Corps Branch organization is firm and at the moment, except for the continuing fight to recruit quality personnel, is healthy and presents few problems. The next 12 months will be a period of consolidation and rebuilding for the Naval Reserve and strengthening the organization of the Naval Militia in order to maintain its ability to respond promptly and in force to state emergencies.

LOGISTICS

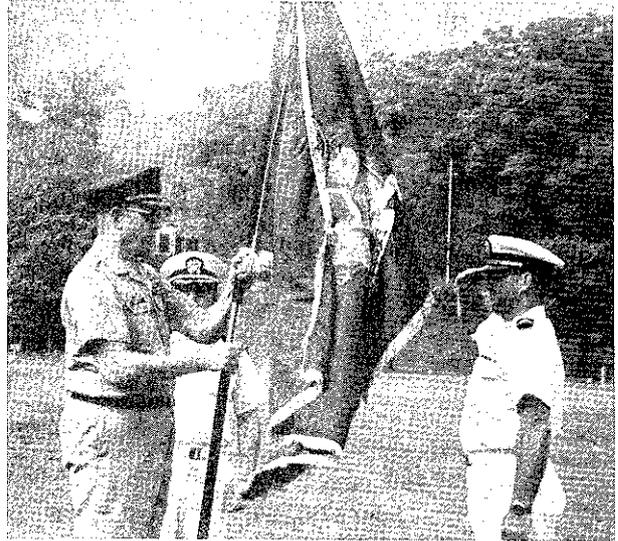

The Naval Militia does not have any state funded military supplies and equipment. All materiel support for training is supplied and fully funded by the US Government. Title 10, USC S7854 authorizes the use of federal equipment and materiel by the Naval Militia in performing state missions.

FACILITIES

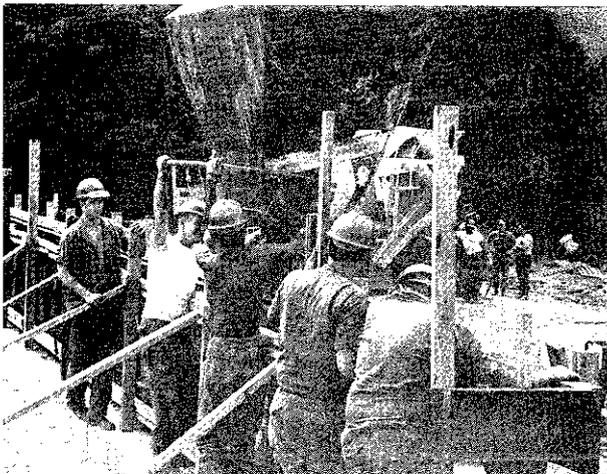

To complement the Naval Reserve reorganization and to effect necessary economies, four Naval Militia armories were deactivated during the year. This was accomplished without affecting the readiness of the Naval Militia. The

Marines Camp LeJeune, N.C.

106 RR Crew USMCR/NYNM
2 Bn 25th Marine

troop strength from the Rochester and Summerville Naval Militia armories was consolidated into the new Navy and Marine Corps Reserve Center in Chili, New York. The troop strength from Yonkers was moved and consolidated with the personnel in the New Rochelle armory. The troop strength from the Brooklyn 52nd Street armory made an interim move to the RC Building in the former New York Naval Shipyard, pending completion of a new Armed Forces Center at Floyd Bennett Field.

At this writing, a total reconsideration of federal and state plans and requirements regarding all Naval Militia armories is under review with 31 March 1976 set as firm target date for implementation.

The Navy has in the planning stages new construction for the Buffalo Naval Militia/Reserve Center. This contemplates building on the site of the present armory and would be accomplished without disruption of training at the present location.

Eight armory employees are involved in the day-to-day use and control of the armories at the payroll cost of \$92,927, half of which is reimbursed to the state by the Navy. This matter is also under

current review and will be resolved by 31 March 1976.

FUNDING

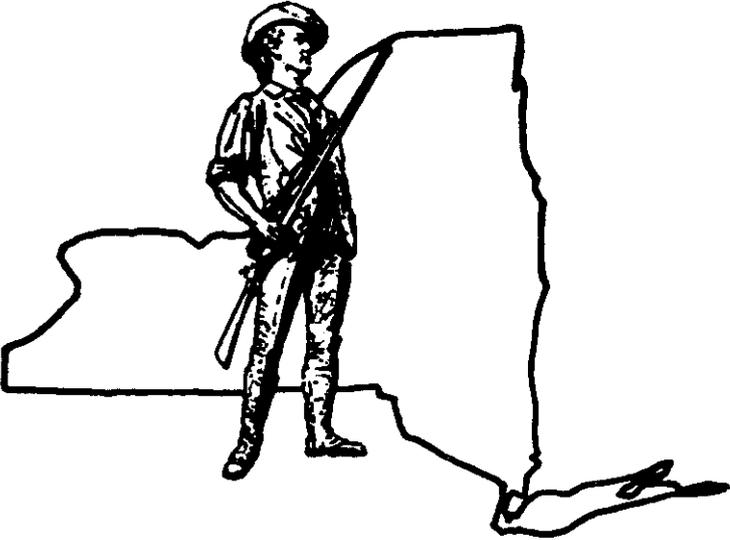

The Department of the Navy provided \$11,810,308 during FY 1975 to support the personnel, training and facilities of the Naval Militia. These funds cover drill pay and pay for active duty personnel located at Naval Militia locations, rentals for facilities of approximately \$99,615 paid to New York State logistic support for training and civilian salaries.

State support for the direction, administration and control of the Naval Militia was approximately \$235,134 or less than \$0.01 per citizen, per year.

AWARDS AND HONORS

The New York Naval Militia sponsors and administers the Josephthal Trophy. These awards are presented to Naval Militia units in order to enhance their readiness. Due to the continuing Naval Reserve reorganization and restructuring in 1975, the Burke, Gillies and Naval District awards remain suspended pending the completion of the Naval Reserve reorganization.

NEW YORK GUARD

ORGANIZATION

The New York Guard has an authorized cadre force of 846 Officers and Enlisted Men, assigned to 82 units, with a minimum of one cadre unit in each of the 74 State armories. The authorized and actual strength for Headquarters, New York Guard, and each Regimental Command is listed on an inclosure to this report. Should mobilization of the New York Guard be required, this number would be increased promptly to approximately 11,000 Officers and Enlisted Men, by authority of the Governor.

MISSION

The New York Guard is a State Military Organization whose primary mission is to replace, and assume the State duties and responsibilities of the New York Army National Guard if and when it is ordered into active Federal Service.

Objectives of the New York Guard also include furnishing aid to Civil authorities in the event of disaster, emergency, or domestic disturbance; to provide military assistance to the Office of Disaster Preparedness, and to render support to neighboring States, if and when needed.

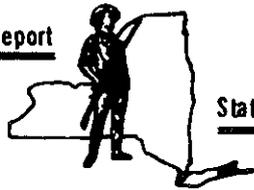

TRAINING

A Commanders Conference was conducted on 22-23 Feb 75, at Camp Smith, Peekskill, NY, for purpose of completing the Annual Training Program for 1975; to review the status of Command Recruiting Programs; scheduled unit administrative and training proficiency. Thirty-six officers and EM representing Headquarters, New York Guard and each of six (6) Regimental Command Headquarters, attended the conference.

ANNUAL ACTIVE TRAINING 27-28 SEPTEMBER 1975

The Annual Active Training was conducted 27-28 Sep 75, at Camp Smith, Peekskill, NY, 276 officers and men were in attendance. The primary objective of this training program was the continuation of the 1974 program in the utilization, familiarization and operating proficiency of current signal equipment, to insure proper communication techniques, and readiness.

To prepare for meeting the AT-75 objective, a training program was issued to include pre-AT-75 Home Station armory training requirements in Signal Communications and Techniques and establishment of a training exercise for conduct

at Camp Smith, which dealt with emphasis on signal communication, and:

- The organization of units at Company level.
- Establishment of primary and alternate Command Posts.
- Setting up defense perimeters.
- Establishment of S1-S2 situation maps.
- Posting of grounds, buildings and bridges.
- Setting up observation Posts and Roadblocks.
- Conducting ground reconnaissance.
- Offensive movement of Company forces.
- Gathering of intelligence information.

The successful implementation of the above program required the full support and cooperation of the Headquarters, Division of Military and Naval Affairs, and the New York Army National Guard, with respect to making available the necessary signal equipment and advisory personnel.

Also on Saturday, 27 September 1975, the New York Guard conducted a Military Review in Honor of MG John C. Baker, Chief of Staff to the Governor. The New York Military Academy Band participated in this review. Also, on Sunday, 28 Sep 75, a competitive pistol match in Honor of BG Arthur G. Eckert was conducted, with teams representing HQ NYG and each Regiment.

OTHER TRAINING AND RELATED ACTIVITIES

Other training activities and related military functions that New York Guard personnel participated in throughout the

year in addition to regular weekly drills were as follows:

- Support rendered to the Old Guard of the City of New York with the attendance of over 110 New York Guardsmen, and their wives, at the 149th Annual Anniversary Ball of the Old Guard, on 25 January 1975. These members represented Headquarters New York Guard and four of the six Regimental Commands.

- Twenty-four officers representing HQ NYG, the 9th, 14th and 56th Regts, attended the Annual New York Militia Association Spring Dinner, conducted in New York City, on 25 April 1975.

- Involvement of the New York Guard in the Militia Association of New York. Eighteen officers, their wives, family and guests totaling over 65 people, representing HQ-NYG and four of the six Regimental Commands, attended the 91st Militia Association Conference, conference, conducted at Swan Lake, NY, 2-5 October 1975.

- More than twenty members of the 2d Regt supported the 247th Medical Company-NYARNG "Open House", at the State Armory, Saratoga, 22 Mar 75, and many members of the 14th Regiment co-sponsored an "Open House" with the 242d Signal Battalion-NYARNG, at the State Armory, Hempstead, NY, on 16 Mar 75. Both "Open House" activities were directly connected with the "March is Minuteman Month" program.

- Visitation by many New York Guard unit Commanders and members located throughout the State, to various veterans organizations and military schools for purpose of explaining the mission and objectives of the New York Guard, and as invited guests as review-

ing officials in conjunction with Annual Military Reviews, and celebrations.

- In support of the New York Guard's objectives, Senior New York Guard Officers were in attendance at six separate Seminars/Conferences conducted by the Office of Disaster Preparedness, DMNA, during the months of March, April, May and October 1975.

- Over 20 members of the 56th Regiment participated in a Regimental week-end Field Training Exercise, conducted at the Woodland Valley State Campsite, Phoenicia, NY, on 12-13 Apr 75. Training, in Communications, Map Reading and Small Unit Operations, was stressed. In support of the 210th Armored Battalion, NYARNG, over 20 members of HQ-NYG and the 2d Regiment attended a week-end range firing exercise at the Guilderland Rifle Range, Guilderland, NY, on 19-20 Apr 75. In addition to pistol and machine gun firing, a very complete course on First Aid Techniques and application was conducted.

- Ten members of the 3d IS Bn, 3d Regiment, participated in a week-end training program conducted by the 2d Bn, 392 Regiment, 3d Bde, 98th Division-USAR, on 3-4 May 75, within the Chemung County area. Also, members of the 9th and 14th Regiments participated in the BG George B. Schatz, Pistol Match, conducted at the 14th Street Armory, New York, NY. Further, many members of the 14th Regiment, attended the 28th Anniversary Dinner of the Fifth Division's Officer Association-NYG, in Brooklyn, NY.

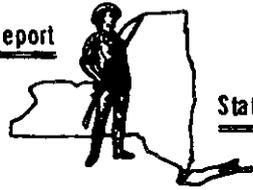

- In commemoration of the US Army's 200th birthday, the 14th Regiment and 242d Signal Bn, NYARNG, sponsored a Military Ball, at the State Armory, Hempstead, NY, on 7 Jun 75. Over 200

guests attended this very successful tribute to the United States Army. On 24 Jun 75, the 14th Regiment, also, conducted its Annual Regiment Review, at Hempstead, NY. The Commander, 74th Regiment, with several of his senior staff officers, formed an inspection and review team, on 1 Jun 75, at the request of the Stellar Niagara Cadet School.

- The 2d Regiment conducted its annual week-end training exercise at the Guilderland Rifle Range, on 19-20 Jul 75. Over 50 New York Guardsmen including several senior officers of HQ-NYG attended this training, which included such varying subjects as First Aid, Close Order Drill, Range Firing, Radio, Communications, and Mobilization Procedures.

- Nine members of 3d IS Bn, 3d Regiment, responded to the flood emergency of 26-27-28 Sep 75, in the Chemung and Steuben County areas, by assisting local authorities and NYARNG units. These New York Guardsmen, who volunteered their services in a civilian status worked continuously for 72 hours, and performed such tasks as filling and placement of sand bags, picking up and delivering of much needed medical supplies and personnel. The 14th Regt. conducted pistol qualification matches, at the Freeport State Armory, on the 7th and 21st of Sep 75. Also, many members of HHC-74th Regiment attended Signal Communications Instruction, conducted by the 1 Bn, 174th Inf, NYARNG, on 18-25 August and September 1975, in Buffalo, NY.

- A member of the 56th Regiment participated in a range firing program, on 18 Oct 75, conducted by Co B, 102d Medical Bn, NYARNG, at Camp Smith NY.

- All units of the New York Guard successfully conducted its Annual Muster of personnel during the week of 11 Nov 75.

- Thirty United States Army Sub-Courses were successfully completed by New York Guardsmen in conjunction with the New York Guard educational program.

COMMUNITY ACTIVITIES

HHC-NEW YORK GUARD:

To assist the public in becoming more aware of the organized militia, and the roll the New York Guard plays, HHC-NYG planned for and coordinated the New York Guard's participation in the 1975 Armed Forces Day Parade, in New York City, conducted on 17 May 1975. Over 100 New York Guardsmen representing HHC-NYG, and units of four Regiments, proudly participated in this annual event. Also, the Information Section of HHC-NYG developed for display at the annual New York State Fair, at Syracuse, NY, 27 August thru 1 September 1975, a 10 X 20 foot pictorial display and, an audio-visual presentation, depicting the history of the New York Guard and its service rendered to the citizens of the State of New York since 14 August 1917. For recruitment purposes, hand-out pamphlets of varying types were reproduced and distributed; the display was manned by officers and non-commissioned New York Guard personnel during the period noted.

2D REGIMENT:

Personnel of this Regiment participated in a great number of local community activities to include Memorial Day Parades in Rensselaer, Albany and Hoosick Falls, NY.; Veterans Day

Parades; the Rensselaer Bicentennial Parade where over forty-five Guardsmen marched; the Loyalty Day Parade in Manchester Center, Vermont; Flag Day ceremonies conducted in Albany and Hoosick Falls, NY.; and by furnishing a Colonial Color Guard for the Annual Albany Tulip Festival, on 10 May 75.

3D REGIMENT:

Personnel of the 3d Regiment participated in many community parades to include, Memorial Day Parades in Johnson City, the Veterans Day Parades in Syracuse and Binghamton, The Loyalty Day Parade in Endicott, the American Legion, 4th of July, parade in Candor, NY. For the Memorial Day Parade conducted in Syracuse, New York Guard personnel were assigned as Parade Officials and Marshalls.

9TH REGIMENT:

Personnel of this Regiment participated in the Armed Forces Day Parade and the Dr. Martin Luther King Parade in New York City, and were well represented at the Old Guard Ball conducted in New York City, and participated fully in the annual Sleepy Hollow Cemetery Memorial Services, in Tarrytown, NY, honoring New York Guardsmen who died in the State Service during WWII.

14TH REGIMENT:

Personnel of this Regiment were very active by their participation in the 1975 Annual Pilgrimage to the Sleepy Hollow Cemetery, Tarrytown, NY, in honor of the past members of the New York Guard personnel who lost their lives in WWII; The Armed Forces Day Parade in New York City; Flag Day

Ceremonies at the Freeport Armory; participation during a Red Cross mock disaster drill at Freeport; attendance at each Nassau County Bicentennial Commission meeting; participation with personnel of the American Legion Forest Hills Post 630, during memorial services for the deceased from past wars; attendance at Memorial Services in remembrance of Pearl Harbor Day, at Rockaway Beach, NY. The 14th Regiment and 242d Signal Battalion, NYARNG, conducted its Annual Christmas Party for needy children, at the Hempstead Armory, Hempstead, NY, on 13 Dec 75. Over 150 needy children, from Brooklyn, NY, were presented with toys and clothing, and treated to ice cream, soda, and food. Many business firms, schools and fraternal organizations contributed to make this event very successful.

56TH REGIMENT:

Personnel of this Regiment participated in the Armed Forces Day Parade and Memorial Day Parade conducted in Peekskill, NY, attended the Old Guard Ball, in New York City,; the Annual Memorial Services conducted at the Sleepy Hollow Cemetery, Tarrytown, NY, in honor of the New York Guardsmen who died in State Services during WWII, and the Dutchess County Bicentennial Celebration in Poughkeepsie, NY.

74TH REGIMENT:

Personnel of this Regiment participated in many community type activities to include - the Regimental Commander acting as Reviewing Officer for the Ve-

terans Day Parade, in Williamsville, NY; members of his staff forming part of the Reviewing Officials, and furnishing a Color Guard for the Veterans Day Parade, in Blasdell, NY; a Senior Officer of HQ 74th Regiment named to the Buffalo Armed Forces Week Board of Directors; the Commander, 74th Regiment as principal speaker at the 1st Polish Armor Division Association's 30th Anniversary Dinner in Honor of Victory in Europe; the Regimental Commander and members of his staff forming an inspection and reviewing team during the Polish American Citizen Organization observance at Niagara on the Lake, Ontario, Canada, on 15 June 75, honoring of those Polish soldiers who trained at Fort George, during WW II. The Regimental Commander was Honory Chairman of the Polish Veterans Annual Convention, in Buffalo, NY, on July 1975, and over twenty personnel of the 2d Internal Security Battalion marched in the Memorial Day Parade, the American Legion and Aqua Festival Parades, held in Rochester.

CHANGES IN KEY PERSONNEL (CHRONOLOGY)

Colonel David Katz relieved from Executive Officer and Acting Commander, 56th Regiment, and reassigned as Commander, 56th Regiment, 27 Jan 75. LTC Joseph C. Weaver reassigned as Executive Officer, 56th Regiment, 27 Jan 75. Colonel Anthony J. Carrano, appointed Colonel-New York Guard, and assigned Assistant Chief of Staff G-1, HHC-NYG, effective 30 Jun 75.

LTC Joseph C. Weaver, Executive Officer, 56th Regiment, promoted to Colonel, effective 8 Dec 75.

OFFICE OF DISASTER PREPAREDNESS

DISASTER PREPAREDNESS

ORGANIZATION AND MISSION

The Office of Disaster Preparedness carries out the functions associated with the responsibilities assigned to the Division of Military and Naval Affairs by the Executive Law and the State Defense Emergency Act, as amended by Chapter 931, Laws of 1973, for:

1. Coordination of natural and man-made disaster assistance.
2. Civil Defense measures for protection against and recovery from attack.

ODP supervises and coordinates preparedness activities of the local governments throughout the State which will have to make the initial response in a disaster. Pursuant to the Defense Emergency Act, counties and cities have established 74 local civil defense offices, of which 57 are county or consolidated county-city offices, and 17 which are city offices staffed with local employees. These local civil defense offices also coordinate local natural and man-made disaster responses. Six ODP district offices have been established, each responsible for coordination of a group of local offices.

In addition, ODP coordinates the preparedness activities of the various State departments and agencies which will provide State assistance if the local governmental response is inadequate to cope with an emergency. ODP also coordinates the State-local preparedness program with Federal agencies, including the Defense Civil Preparedness Agency, Federal Disaster Assistance Administration and Federal Preparedness Agency, and with non-governmental agencies which provide disaster assistance such as the American Red Cross and the Salvation Army.

MAJOR DISASTER ASSISTANCE

The Federal government provides assistance in major disasters to supplement State and local efforts. Statutory authority for such assistance exists in Public Law 91-606, the Disaster Relief Act of 1970, with respect to major disasters declared by the President prior to April 1, 1974, and in Public Law 93-288, the Disaster Relief Act of 1974, with respect to major disasters declared by the President after April, 1974.

At the beginning of 1975, ODP was processing Federal assistance under five major disaster declarations, four under Public Law 91-606 and one under Public Law 93-288. During 1975, Federal assistance payments were completed

under Disaster No. 311, which had been declared on September 13, 1971 under Public Law 91-606. A total of \$4,118,437.72 was paid to 207 applicants in 13 counties.

During 1975, acting on the Governor's request, the President, on October 2, 1975, declared a major disaster under Public Law 93-288 as a result of floods caused by Hurricane Eloise. A summary of activities associated with Hurricane Eloise is included at the end of this section of the Report.

The status of Federal financial assistance for the six major disasters is provided in an inclosure to this report.

OTHER DISASTER ASSISTANCE

A number of lesser emergencies occurred during 1975, including severe weather conditions, localized flooding, accidents, water shortages and similar problems. Many of these required only local responses, although ODP monitored the situations in the event State or Federal assistance might become necessary. In some instances, ODP or other State resources were used to provide technical advice or assistance to local officials. In thirteen instances, equipment from the State civil defense engineering stockpile was loaned to local governments or State agencies.

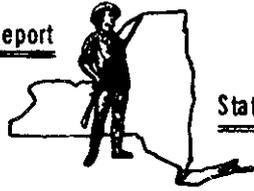

A severe snow storm on April 4, 1975 stranded motorists in several locations in the central and western parts of the State. Local civil defense offices, working with Red Cross and other agencies, cared for approximately 450 people, including over 350 who were sheltered in National Guard armories in Batavia and Cortland. ODP's Western, Lake and Central District offices were in touch with the local officials to assure that additional State assistance would be provided if needed.

Flooding occurred in Dutchess, Sullivan and Ulster Counties during various dates in July 1975. Following the Governor's request for Federal disaster assistance, representatives of the Federal Disaster Assistance Administration, other Federal agencies and ODP conducted a field assessment of damage. The Administrator, FDDA, determined that the situation did not warrant major disaster assistance under Public Law 93-288. However, on September 9, 1975, the Administrator, Small Business Administration, acting under his own statutory authority, declared a disaster which made property owners in Dutchess and Ulster Counties eligible to apply to SBA for loans for physical damage and economic injury resulting from this flooding.

Similar declarations by SBA were issued by the Administrator on September 24, 1975, to assist property owners in Erie County affected by flooding during the weekend of August 30, 1975, and on December 8, 1975, to assist property owners in Erie County and Chautaugua County affected by lakeshore flooding on November 10, 1975. ODP assembled information concerning the effects of these floods which were used to support the Governor's request for Federal assistance.

PLANNING AND TRAINING

Four counties were provided with On-Site Assistance Programs during 1975, bringing the total of local offices of civil defense involved to date to twenty. Six additional programs are planned for 1976, of which four have already been scheduled. Under an On-Site Assistance Program, at the request of a chief executive of a county or city an evaluation is made of local disaster response readiness. The Office of Disaster Preparedness arranges and super-

vises the work of a team of Federal and State personnel who interview local government officials, local business and industry representatives and other community leaders. Based on these interviews, a report is prepared for the local chief executive outlining the strengths and weaknesses of his jurisdiction's disaster preparedness. This report is reviewed by the chief executive and forms the basis for a plan and schedule for correcting deficiencies and improving the disaster response capability.

Community Shelter Planning, which involves an analysis of fallout shelter resources of a county as related to population, and the development of a plan for the utilization of shelter resources by the population in an emergency, was continued in 1975 with 100% Federal funding under a contract between DCPA and ODP. Plans have been completed for 50 counties in the State. However, many of these will require updating. In order to facilitate future planning for counties in Standard Metropolitan Statistical Areas for which plans have not been completed, and to update plans which were prepared for counties in SMSA's, a pilot computer-assisted CSP project was underway in 1975 in the Binghamton SMSA. Similar computer-assisted projects are planned for the Albany SMSA, Poughkeepsie SMSA and Utica-Rome SMSA for 1976-1977. Computer services are provided by the Federal Government.

The Federal funding of the CSP activities has been expended to include Crisis Relocation Planning. CRP is an alternative response to threatened attack and would involve selective relocation of people from high risk to lesser risk areas in time of increased international tension. The pilot CRP study undertaken in the Utica-Rome Area in 1974 at the request of the Defense Civil Preparedness Agency was continued in 1975 to study additional

facets of the relocation, reception and care of large numbers of people. In 1976, CRP studies will be initiated in the Albany and Plattsburgh areas under the expanded CSP contract.

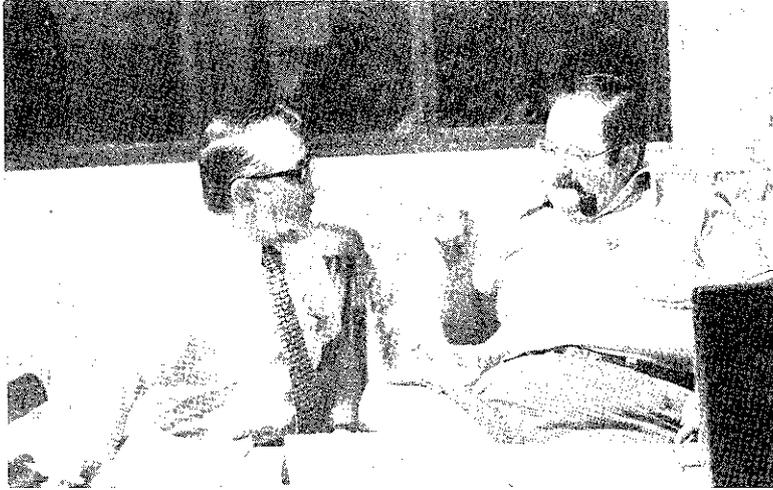

During 1975, a work plan, budget and other substantiating documents were prepared to apply for a \$250,000 development grant available from the Federal Disaster Assistance Administration under Title II, Public Law 93-288. The proposal was submitted to the Division of the Budget for review and concurrence prior to submission to FDAA. The funds will be used to improve State plans, procedures and programs to respond to natural disasters.

The Office of Disaster Preparedness cooperated with the Bureau of Radiological Health, Department of Health, in updating, expanding and distributing the September 1975 revision of the New York State Emergency Plan for major radiation accidents involving nuclear facilities. New material included provision for monitoring agricultural products and water sources in the event of a fixed nuclear facility accident.

During 1975, a change was made in the method of conducting civil preparedness training, utilizing resources available from the Defense Civil Preparedness Agency. In order to manage the training effort more effectively it was decided to use available Federal funds to employ training specialists directly on the ODP staff instead of having the training carried out by New York University and Cornell University under contracts between the universities and DCPA. To implement this change, the contract between DCPA and NYU expired September 30, 1975 and the DCPA contract with Cornell University will expire September 30, 1976. A separate contract was negotiated between DCPA and ODP for the

HURRICANE ELOISE

DMNA Office of Disaster Preparedness established an office in Binghamton in conjunction with Federal Disaster Assistance Administration to advise and assist Flood Victims.

State Officials Discuss Assistance Programs

Local Officials consider courses of Action

period October 1, 1975 to September 30, 1976 under which two training specialists will be employed by ODP with 100% Federal funding support. It is anticipated that a new contract will be negotiated for the period beginning October 1, 1976 to expand the ODP staffing in lieu of the expiring Cornell contract.

During the year, six seminars were conducted by ODP with funding assistance provided by DCPA. Each seminar was 2 1/2 days in duration and one was held in each of the six ODP districts. Local officials were informed on a variety of disaster related matters by speakers representing Federal, State and local governmental levels, non-governmental agencies with disaster roles, and business and industry groups. The success of these seminars resulted in the scheduling of additional seminars for the 1976-1977 period which will include coverage of radiological and hazardous chemical materials, police services in disaster operations, and medical and health aspects of disaster operations.

In addition to the six seminars, specialized training courses for local officials were conducted by Cornell University and New York University under their contracts. Additional training was provided to 45 representatives of local civil defense agencies who attended resident courses at the DCPA Staff College. Other local personnel completed correspondence courses offered by the Staff College.

COMMUNICATIONS AND WARNING

Work continued during 1975 to improve emergency communications and warning systems for operational use. Radio equipment to be used under special emergency frequencies authorized by the Federal Communications Commission was brought to operational condition in the

six district offices. Regular tests were conducted of this system and of other communications and warning media, including the Civil Defense National Teletypewriter System, the Civil Defense National Radio System, the National Warning System, and the State's Interim Radio Network.

The value of the dedicated land-line voice network, the National Warning System, and the National Weather Service teletypewriter service were demonstrated amply during 1975 by frequent and extensive use to provide State agencies and local governments with advance information concerning potential severe weather conditions and to provide continuing information during emergencies such as Hurricane Eloise.

RADIOLOGICAL PROTECTION

During 1975, activities were continued to develop and maintain a State-wide radiological capability to respond to nuclear attack and to utilize civil defense radiological technical and operational resources at all levels in connection with peacetime radiological incidents. The dual use of radiological personnel and resources, maintained with Federal financial support, will make it possible to satisfy peacetime and wartime requirements at less cost to the State, and will sustain program interest, continuity and readiness for wartime emergency.

Local jurisdictions in which nuclear facilities are located were asked to review the status of their radiological resources to determine the suitability and readiness of the resources for response to major nuclear accidents. This evaluation will continue in 1976.

Provision was made in State plans for utilization of Civil Air Patrol and

civil defense radiological resources in support of the State Health Department in the event of a major nuclear accident.

The Radiological Annex to the State Emergency Operations Plan was reviewed and rewritten.

Three new appendices to the State Aerial Radiological Survey Plan, showing preplanned aerial radiological survey points for each civil defense jurisdiction in three districts, were prepared and distributed to local jurisdictions, CAP and State Police units. With the completion of these three appendices the task of preparing preplanned aerial radiological survey missions for each civil defense jurisdiction in the State has been completed.

The radiological plans of 27 local jurisdictions were reviewed and updated with respect to aerial radiological survey capability, fixed and mobile monitoring capability and staffing resources.

Six Aerial Radiological Survey Courses were conducted, each of eight hours duration, for CAP and civil defense personnel. Three of these courses were given by ODP staff and the remainder by locally approved instructors. A total of 130 students completed the courses.

Under the Radiological Training Assistance Program, utilizing funds provided by the Defense Civil Preparedness Agency through the Radiological Maintenance and Calibration contract to reimburse locally approved instructors, 42 radiological monitoring courses of various types were conducted, which graduated 648 students in 16 local jurisdictions.

Ten new instructors were approved to conduct courses under the program.

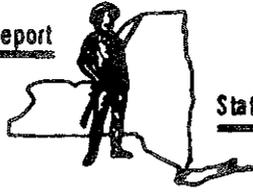

A Radiological Defense Officers Course, conducted by the University of Lowell, was held in Ossining, New York in August. This is the first course of its kind to be conducted in the State since such training was discontinued by NYU and Cornell University.

Through the DCPA Home Study Course, Introduction to Radiological Monitoring, 58 students during the year completed the equivalent of eight hours of training leading to completion of the 16 hour Radiological Monitoring Course.

The nuclear technology presented in the civil defense radiological training courses is basic to an understanding of problems associated with either wartime fallout or peacetime nuclear accidents. Therefore the civil defense radiological training for school teachers and in the public school curricula and the conduct of radiological courses for civil defense and other personnel should benefit the State in connection with promotion and acceptance of its growing peacetime nuclear programs. Such radiological training will also provide for a more informed and responsive public in the event of nuclear accidents or attack.

In support of local training and operational requirements, 27,000 copies of manuals and forms and 58 training films were distributed in response to local requests.

Approximately 22 new visual aids were prepared for use by State and local radiological personnel in conducting training courses. A new bibliography of Radiological Intelligence Section publications and some 44 revisions to Radiological Defense Advisory Manuals (RDAM's) and Radiological Defense (RAD) Forms were also prepared and distributed to local jurisdictions.

The radiological instrument maintenance and calibration activities continued to be 100% funded during 1975 under contract with the Federal Defense Civil Preparedness Agency (DCPA). In August, a new contract was negotiated with DCPA in the amount of \$230,060 for the statewide instrument maintenance and calibration program for the period September 1, 1975 through August 31, 1976.

The On-Site Inspection program conducted under the contract makes provision for local jurisdictions to employ part-time help at the rate of \$3.15 per hour in support of the State instrument maintenance program.

The purpose of the OSI program is to inspect local shelter facilities and fixed radiological monitoring stations and to exchange radiological instruments at these facilities for maintenance and calibration in accordance with schedules published by the Radiological Intelligence Section of ODP. During 1975, local inspectors were paid a total of \$22,317 under the OSI program through Federal funding. Inspections were made of 5900 shelter facilities and 700 fixed monitoring stations in local jurisdictions to determine readiness of radiological personnel, facilities and instruments. This activity generated a maintenance and calibration work load of 7100 shelter kits and 1900 FMS kits for the Radiological Instrument Maintenance and Calibration Facility in Albany. Data on State-wide radiological resources, compiled from OSI reports, is submitted to the DCPA computer facility for inclusion in the RADEF Data Bank, a nationwide inventory of radiological resources.

During 1975, 7200 CDV-715's were retrofitted bringing the total number of instruments retrofitted since April 1972

to 29,239. The 1975 production has been placed into 1100 FMS kits (CDV-777) and 5,000 shelter kits (CDV-777-1). The total kits now containing retrofitted instruments are 3,933 FMS kits and 19,800 shelter kits leaving 853 FMS kits and 7,800 shelter kits to be done.

In New York City, 1,093 shelter radiological kits were removed from low security fallout shelters for stockpiling at centralized storage locations. At year's end, the number of kits removed from shelters since June 1972 totaled 5,891 for crisis distribution in accordance with plans to be developed by the City.

CIVIL AIR PATROL

The New York Wing of Civil Air Patrol provides support to the State and local disaster preparedness programs in connection with search and rescue, natural disasters, attack caused disasters or other emergencies.

During the year, 130 CAP members completed the 8-hour Aerial Radiological Monitoring Course. The statewide total of CAP manned aerial survey bases is now 28.

The annual CAP/CD Effectiveness Test was conducted on September 20 and 21, 1975. The ODP Radiological Intelligence Section prepared the exercise problems and plan and coordinated state-wide participation in the exercise. CAP personnel participated at the State Emergency Operating Center and throughout the State performing missions in support of simulated State and local emergency requirements. Over 900 CAP members were involved with their aircraft flying over 145 hours on 125 sorties. CAP members operated 87 fixed radio bases and 111 mobile radio units. Missions included aerial radiological survey, photo

reconnaissance for damage assessment, ground traffic movement surveys, cargo and passenger transport, and communications support of civil defense. The CAP organization again demonstrated its unique capability to perform emergency missions for State and local government whether in a wartime or natural disaster emergency.

At year's end, resources of the New York Wing CAP included approximately 1,805 cadets, 2,225 senior members of which 1,140 are pilots, 23 corporate aircraft, 271 member owned aircraft, 60 vehicles, 710 radio units, 28 aerial radiological survey instruments, and 97 sets of portable radiological survey meters.

HURRICANE ELOISE

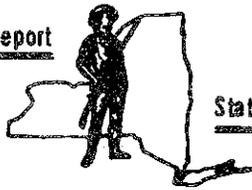

On September 23, 1975, the office of Disaster Preparedness, in coordination with the National Weather Service and the State Department of Environmental Conservation, began monitoring potential problems from the storm system associated with Hurricane Eloise. ODP's district offices and local civil defense agencies were alerted to the flooding potential. Flooding occurred in New York State during the period September 25 to 27, 1975. The State Emergency Operating Center was activated with selected personnel and remained in operation on a round-the-clock basis during this period. ODP district offices were also in operation and contact was maintained with appropriate Federal and State agencies, non-governmental relief organizations and with affected local civil defense offices. ODP staff personnel were sent to selected local civil defense offices in the most severely affected areas to work directly with local personnel.

During the emergency period six pumps and associated equipment were issued from the State civil defense engineering stockpile. In addition, the loan of eight pumps and attachments was obtained from the Federal stockpile through the Defense Civil Preparedness Agency.

Data were obtained to support the Governor's request for a Presidential major disaster declaration under Public Law 93-288. The President declared a major disaster (FDAA 487 DR) on October 2, 1975. Sixteen counties (Allegany, Broome, Cayuga, Chemung, Cortland, Madison, Onondaga, Oswego, Putnam, Queens, Rockland, Steuben, Tioga, Tompkins, Westchester and Yates) were eventually designated as eligible for Federal aid under this declaration. In addition, Richmond County was designated as eligible for Small Business Administration disaster loan assistance. Such disaster loans were also available for eligible property owners in the 16 counties designated under the major disaster declaration.

On October 3, 1975, ODP established a State Coordinating Office at the Federal Coordinating Office established by the Federal Disaster Assistance Administration in Binghamton. First priority was given to setting up One-Stop Assistance Centers at which individuals and families could obtain advice and assistance with flood related problems. Eight civilian and volunteer agency personnel, were in operation for periods varying from two to eight days. A total of 2,900 applicants registered for various forms of assistance at these centers.

Beginning October 6, 1975, a series of briefings for political subdivisions was conducted by ODP-FDAA teams in the counties designated for major di-

saster assistance. These briefings were designed to inform public officials of the procedures to be followed by them in applying for Federal disaster financial assistance for the repair and restoration of eligible public and certain non-profit private property. Joint Federal-State damage surveys began at the same time. As project applications were submitted to the State Coordinating Office they were reviewed and submitted to FDAA for approval. Approximately 200 political subdivisions and State agencies were expected to submit project applications under this disaster. The initial

estimate of anticipated requests under this program was \$6,000,000. Information concerning the status of project applications as of December 31, 1975 is provided in a separate inclosure dealing with Federal Financial assistance under major disaster declarations.

The response to Hurricane Eloise involved approximately 25 State Departments and agencies, Federal agencies and non-governmental organizations, in addition to the local offices of civil defense in the affected counties.

PUBLICATIONS PRODUCTION FIGURES**

Production figures pertaining to the main activities of the Office Support Branch of the Administration Division for the calendar year 1975.

STATE PUBLICATIONS AND FORMS:

Total individual publications and blank forms reproduced, collated and distributed. (Job items).	9,650
Total number of copies, publications and blank forms reproduced, collated and distributed.	4,455,385
Individual State Forms	518
Copies of State Forms	925,800

Individual jobs completed involved the following activities:

Paper and Metal Masters	35,285
Transparencies for Training Aids	1,192
Individual offset masters	35,285
Individual signs	378
Estimated impressions by duplicating machines	10,000,000
Individual blue prints	2,136

Casual copies service included:

Brunning 2000	19,125
Xerox 4000s	464,314

FEDERAL PUBLICATIONS AND BLANK FORMS:

Individual publications and blank forms received from Federal sources for initial distribution.	1,974
Individual copies of publications and blank forms initially distributed	590,200
Individual DA Forms 17 edited (Requisition for resupply)	7,420
Individual line items of publications and blank forms edited for resupply	120,000
Individual copies of publications and blank forms received, stored and issued as resupply.	3,388,260
Individual copies of publications and forms received from Federal sources as initial distribution and resupply.	3,979,460
Individual DA Forms 12 edited (Requisition for initial distribution of new or revised publications).	270
Individual blocks of DA Forms 12 edited	37,500

PAPER CONSERVATION PROGRAM:

Estimated number of sheets of salvaged paper and forms processed for reuse by cutting, padding and/or overprinting.	325,000
Number of scratch pads made	4,000
Estimated impressions printed to effect necessary overprinting.	225,000

DIVISION OF MILITARY AND NAVAL AFFAIRS
MILITARY SUPPORT TO CIVIL AUTHORITIES
PUBLICATIONS AND EMERGENCY ACTIVITIES

The following are the Operation Plans, Publications and Emergency Activities initiated by this section during the year:

PUBLICATIONS

OPLAN 75 - 1 (GOLD PLUM)

Prepared in March 1975 to provide military assistance, critical to sustaining human life, for insuring continuity of operations in NYS Department of Correctional Facilities affected in the event of job actions by Council 82.

OPLAN 75 - 2 (GAMBLÉ PILOT)

Prepared in March 1975 to provide military assistance critical to sustaining human life, for insuring continuity of operations at State Department of Correction, Department of Mental Hygiene, Department of Health and Division for Youth facilities and installations in the event of work stoppage by state employees represented by CSEA.

OPLAN 75 - 3 (GEM PARADE)

Prepared in March 1975 to provide military assistance to the Department of Correctional Services for maintaining essential services at Dannemora, NY in the event of job actions by Correctional Officers.

OPLAN 75 - 4 (GATE PERMIT)

Prepared in July 1975 to provide military assistance to the New York City Department of Sanitation in the removal of refuse which was rapidly approaching disaster proportions.

EMERGENCY ACTIVITIES

4 - 5 April 1975: Authorization was granted to use the state armory at Batavia, NY for housing stranded motorists during the snow emergency. The Armory at Cortland, NY was also used to house victims of the snow storm.

26 September 1975: A flood duty alert was issued to the Army Aviation Support Facility #3, Albany, NY for possible assistance in the southern tier counties affected by flooding. Planning was initiated, however military assistance was not required.

**ARMY NATIONAL GUARD
STATE MAINTENANCE OFFICE
STATISTICAL DATA**

The total Federal funds expended in support of the NYARNG maintenance program for repair parts and contractual repair was \$1,698,663.00.

Densities of equipment having a high degree of maintenance significance and which require the major effort of the maintenance facilities are:

Surface Equipment (trucks, truck tractors, combat vehicles and engineer construction equipment)	5,958
Electronic Equipment (radar, radio, etc.,)	15,884
Artillery Weapons	713
Small Arms	30,204
Vehicular Trailers	3,056
Sighting and Fire Control Equipment	5,970
Ancillary Equipment (generators, pumps, canvas)	12,072
Calibration Items	4,156
Chemical/Medical	<u>24,267</u>
	102,280

The following indicates the work performed by the three CSMS's and MATES during CY 1975:

<u>CATEGORY</u>	<u>WORK ORDERS COMPLETED</u>
Small Arms	8,842
Artillery	2,247
Instruments	2,983
Tank-Automotive	9,077
Electronics	<u>5,721</u>
	28,870

FEDERAL CIVIL DEFENSE FINANCIAL AND PROPERTY ASSISTANCE

Federal civil defense financial and property assistance programs are designed to assist State and local offices of civil defense to develop and maintain operational readiness. These programs, authorized under the Federal Civil Defense Act of 1950, as amended, are administered for the Federal government by the Defense Civil Preparedness Agency, and for the State by ODP. Assistance obtained under these programs is intended to prepare for emergencies resulting from attack. However, these resources are also used in peacetime to respond to natural and man-made disasters and other peacetime emergencies. During 1975, the following Federal civil defense financial and property assistance was involved:

1. **Personnel and Administrative Expenses** – The State and 41 local Offices of civil defense were eligible for \$3,462,403 as the 50% Federal share of salaries of civil defense employees and other administrative expenses.
2. **Systems Maintenance and Services, Supporting Systems Equipment and Emergency Operating Centers** – Federal matching funds for recurring and maintenance costs for civil defense warning systems and the procurement of certain equipment and facilities amounted to \$706,592.
3. **Excess Property Loans** – Equipment valued by the Federal government at \$427,223 was obtained on a loan basis for periods up to five years.
4. **Surplus Property** – Equipment with a Federal acquisition cost of \$1,803,156 was obtained for assessments which totalled \$91,573.
5. **Contracts** – Federal funding at 100% is provided under contracts between DCPA and ODP for the following periods and purposes:
 - a. **Community Shelter Planning**

October 1, 1974 to September 30, 1975	\$48,266
October 1, 1975 to September 30, 1976	\$66,823
 - b. **Radiological Maintenance and Calibration**

August 1, 1974 to August 31, 1975	\$221,000
September 1, 1975 to August 31, 1976	\$230,060
 - c. **Training**

October 1, 1975 to September 30, 1976	\$ 59,567
