## INTRODUCTION

This annual report to Governor Malcolm Wilson for calendar year 1973 is required by Section 11 of the State Military Law. It covers activities, events, achievements and statistical data concerning the State Military Forces during 1973. These forces, under jurisdiction of the Division of Military and Naval Affairs, consist of the New York Army and Air National Guard, New York Naval Militia and New York Guard.

## DIVISION OF MILITARY AND NAVAL AFFAIRS STAFF

Staff sections in the Division of Military and Naval Affairs office serve in a dual capacity commensurate with the dual role of the Chief of Staff to the Governor and Commander, New York Army National Guard. Staff officers are responsible for coordinating activities of all components of the State Military Forces and for direct staff functions with relation to the Army National Guard, through appropriate command channels.

## PERSONNEL AND ADMINISTRATION

The mission of this office includes the supervisory and administrative responsibility for all personnel actions applicable to the several components of

the New York State Military Forces; the preparation and publication of all documents of instructional, control and stocking processes for all state and federal forms and publications; and the maintenance of personnel records and records system for all officers, warrant officers and enlisted personnel of the State Military Forces.

Statistical information reflecting the activities of this office are outlined in the appropriate inclosures of this report.

## RECRUITING AND RETENTION

The recruiting and retention effort saw a great surge when Operation "No Business As Usual" was launched on 29 October 1973. The NYARNG gained a net of 553 during November and December 1973. A second campaign has been launched to capitalize on the momentum built up as a result of the 1973 effort.

In addition to vigorous unit efforts, a force of extended term recruiters has assisted the full-time staff in prosecuting the successful recruiting drive. Many of these recruiters are responsible for not only recruiting but publicity, administration, and coordination of unit efforts.

To help project a favorable image of the New York Army National Guard a van, two 1/4 ton trucks, and a bus have been painted red, white and blue. Experience has shown that the American public is generally unaware of the existence of the National Guard. To overcome this defi-

ciency, a program of painting vehicles for recruiting and publicity purposes was authorized by the Chief-of-Staff to the Governor.

## **OPERATIONS, TRAINING AND INTELLIGENCE**

The function of this office is to coordinate all operations, training and intelligence activities as they relate to the state's military forces. It is responsible for supervision of New York Army National Guard units within the scope of these activities and includes specific responsibility over alert and mobilization for federal and state emergencies, Army aviation, air defense, electronic communications, the Empire State Military Academy and military support to civil authorities.

Pursuant to Chapter 931, New York State Laws of 1973, the Department of Transportation relinquished the functions of civil defense to the Division of Military and Naval Affairs, effective 1 Oct 73. Accordingly, the Chief of Staff to the Governor assumed the position of Chairman, New York State Civil Defense Commission and Director of Civil Defense. The Civil Defense function was integrated into the structure of the Division of Military and Naval Affairs as a separate subprogram entitled "Office of Disaster Preparedness."

The radiological functions and coordination of related Civil Air Patrol activities, formerly the responsibility of the Director of Operations, Training and Intelligence, then became a function of the Office of Disaster Preparedness. A record of these activities can be found in the section of this report pertaining to that Office.

## **ORGANIZATION**

Several minor changes were affected during the Calendar Year, all of which

were accomplished to increase organizational efficiency by relocation or disbandment of overplus units.

Effective 9 May 73, the 187 Engineer Company (Float Bridge) was deactivated and Co E (Bridge), 102 Engineer Battalion, 42 Infantry Division, was relocated from New York City and reorganized at Niagara Falls, absorbing the personnel and assets of the deactivated unit. This change was accomplished by DMNA General Orders 137, 9 May 73.

Effective 1 Aug 73, the 4 Battalion, 258 Field Artillery was deactivated and a new unit, 1 Battalion (Honest John), 106 Field Artillery of the 42 Infantry Division was organized with the headquarters and Battery A in Buffalo and Battery B in Rochester.

At the same time, the 172 Signal Company and the 102 Field Service Company were deactivated.

Residual personnel were reassigned to new units with no attenuation of grades or personnel.

These changes were accomplished by DMNA General Orders 208, 16 July 1973.

## **TRAINING**

All units of the New York Army National Guard completed the training year with satisfactory ratings by the First US Army evaluation team. In many cases the leadership displayed by the commanders and staffs of our battalions and brigades was singled out for laudatory comment. In particular the 42d Infantry Division was commended on the conduct of an ambitious, well planned and executed training program.

## **EUTROPHICATION SURVEY**

During the month of October 1973, 168 volunteer Army National Guardsmen completed the sampling phase of the EUTROPHICATION SURVEY being conducted by the US Environmental Protection Agency (EPA). The sampling of 240

streams which flow into the 25 New York State lakes and reservoirs selected for this survey was accomplished every month, starting in November 1972. The findings of this survey, in addition to furthering a national environmental program, will be made available to the New York State Department of Environmental Conservation. The New York Army National Guard, due to the geographic dispersion of its units, was ideally suited to accomplish this community project without additional cost to the government and with minimum interference with normal training.

In December, two representatives of the EPA, Dr. Robert R. Payne and LTC Louis Dworshak, visited the Division of Military and Naval Affairs to express appreciation for the efforts of Guardsmen in completing their tasks in all kinds of weather and under some difficult circumstances. They presented a certificate to the National Guard and commendations for the dedicated effort of participating personnel.

## INTELLIGENCE

Under direction of the Director of Operations, Training and Intelligence the Intelligence Section has General Staff responsibility for all matters pertaining to military intelligence functions. The Intelligence Section appointed as Security Manager for the Chief of Staff to the Governor is responsible for an effective Information Security Program by:

Advising the Chief of Staff to the Governor on matters pertaining to the classification, downgrading, declassification and safeguarding of security information.

Recommending procedures for assuring that all persons who handle classified material are appropriately instructed and cleared. The clearance status of each

individual is recorded in a master security access roster maintained by the Intelligence Section.

Advising and assisting officials on individual classification decision problems and in development of appropriate classification guidance.

Insuring preparation and maintenance of classification guides for assigned classified plans, programs, or projects.

Executing a program of document review to reduce unneeded classified holdings. To this end a continuing downgrading and declassification review program is carried out.

Supervising or conducting security inspection spot checks to inform the Chief of Staff to the Governor regarding compliance with security regulations and other directives.

Assisting and advising the Chief of Staff to the Governor in matters pertaining to the enforcement of regulations governing the dissemination, reproduction, transmission, safeguarding, and destruction of classified material.

Recommending action to be taken on requests for visits to and from subordinate and higher headquarters on security matters.

Acting as the single point of contact within the Division of Military and Naval Affairs to coordinate and act on individual classification or declassification problems.

During 1973 the Intelligence Section processed over 4250 personnel security actions from units of the New York Army National Guard and civilian employees of the Division of Military and Naval Affairs.

In coordination with other staff sections of the Division of Military and Naval Affairs, the Intelligence Section revised and improved the system for the prompt reporting of incidents and accidents related to Division of Military and Naval Affairs personnel, facilities and equip-

ment. In 1973 over 100 such incidents were reported and acted upon.

Training conducted by the Intelligence Section includes the conduct of security briefings and debriefings for military and civilian personnel of the division, classes at the Army Area Intelligence Schools and participation in Civil Defense training exercises. Training in general is geared to assist the unit commander and his security officer in formulating and establishing sound security programs.

The Intelligence Section each week compiles a listing of state military forces in training on the coming weekend. This listing allows the Chief of Staff to the Governor a ready listing by location of those forces available in the event of an emergency situation requiring military support.

#### MILITARY SUPPORT TO CIVIL AUTHORITIES (MSCA)

The mission of this section: "Provide a planning staff to develop and issue plans relating to the supplemental support provided by all components of the military services within the state (active and reserve). Plan, coordinate, and control all resources made available by all services for Military Support to Civil Authorities in domestic emergencies."

#### PLANS

Plans prepared, published and distributed by this section remain the same as reported in Inclosure 11, Division of Military and Naval Affairs Annual Report, 1972. All of them are monitored continually and updated as required by changing troop structures, operational capabilities and other factors.

#### PUBLICATIONS

OPLAN 73-1 (Griffin Portal) was prepared in March 1973 to assist the Depart-

ment of Correctional Services in restoring law and order at New York State correctional facilities.

OPLAN 73-2 (Grove Pattern) was prepared in March 1973 to assist the Department of Correctional Services in maintaining essential services at New York State correctional facilities in the event of a job action.

OPLAN 73-3 (Gallon Plug) was prepared in December 1973 to assist civil authorities in the removal of commercial motor vehicles that may obstruct public highways in New York State.

#### EMERGENCY ACTIVITIES

Requests from various civil agencies for emergency use of troops and equipment were coordinated throughout the year

During the period 16-18 March 1973 the Office of Natural Disaster and Civil Defense maintained liaison with the Division of Military and Naval Affairs Duty Officer relative to flood conditions along the shore line of Lake Ontario. This area was declared a disaster area by the President of the United States on 21 March 1973. No military assistance was required.

On 28 April 1973 a request was received for 25 Military Policemen to assist in a search for a homicide victim in the Town of Steuben. Personnel were furnished by the 102 Military Police Battalion. The body was found by National Guard Personnel on 29 April 1973.

On 29 June 1973 the Emergency Operations Center was opened as a result of a request from civil authorities in Walton, New York, for the use of a truck mounted crane and a team of operators to assist the town in clearing debris from Third Brook Stream, accumulated as a result of flooding conditions in Walton, New York. Two officers and four enlisted men from Detachment 1, Company A, 204 Engineer Battalion, New York Army National Guard,

# THE NEW YORK ARMY NATIONAL GUARD'S

# FIRST WOMAN---

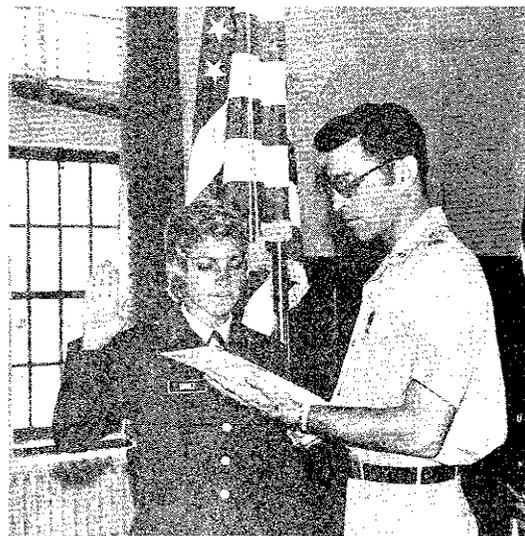

- - - Cpt Sandra K. Campbell. Governor Rockefeller administers the oath of office on 1 March as MG John C. Baker observes.

- - - to enlist, Pvt Donna Eldridge is sworn in by LTC Michael T. Sullivan, HHC 221 Engr Gp, Buffalo.

- - - to attend annual training at Cp Drum, Pvt Pamela Putnam of HHC 27th Spt Center RAO, Albany.

- - - to be appointed as a federal technician, SSG Celeste Ibanez, HHC 727 Maint Bn, and assigned to the USPFO.

were ordered to state active duty for two days on 29-30 June 1973.

During the period 17-19 December 1973, a severe ice storm in Nassau and Suffolk Counties caused a lack of heat, light and telephone service in that area. The National Guard opened facilities to refugees at the Roslyn Air National Guard Station and the armories located in Bay-shore and Hempstead, New York.

#### SPECIAL PROJECTS

During the year, the following special projects have been the responsibility of the Military Support to Civil Authorities Section.

Military Support Plans Officer was designated Action Officer for Memorial Services conducted at the State Capitol for former President Lyndon B. Johnson.

Personnel from the section, assisted by selected personnel from 1 Battalion 156 Field Artillery, New York Army National Guard, presented civil disturbance control training to the New York Guard at Camp Smith, New York, on 15 September 1973.

Selected personnel from this section presented a block of instruction on civil disturbance control at the Federal Bureau of Investigation Municipal Police Training School, Camp Smith, New York, during October and November 1973.

An evaluation was completed of storage and maintenance of all riot battalion packages and other civil disturbance equipment assigned to both the 27 Support Center, Rear Area Operations and the 42 Infantry Division. Seventeen riot battalions and both critical item pools were inspected during May and June 1973.

Personnel from the section participated in liaison visits to inspect the readiness condition of Civil Defense District Offices and Emergency Operation Centers at Queensbury, Poughkeepsie, Oneonta, Oneida, Batavia and Newark, New York.

During October 1973 the Military Support to Civil Authorities Section coordinated with the Staff Aviation Officer to compile information in the event helicopter operations are required at New York State Correctional Facilities.

#### CONFERENCES/SEMINARS/BRIEFINGS

On 28 March 1973 personnel from the Military Support to Civil Authorities Section attended a Flood Emergency Practice Exercise in Herkimer, New York. The exercise was presented by the Corps of Engineers from the New York District.

During July 1973 personnel from the Military Support to Civil Authorities Section made liaison visits to United States Army Reserve units at Batavia, Binghamton, Kingston, Fort Totten and Fort Hamilton, New York, to discuss the provisions of OPLAN 1, NYACOM. Also visits were made to United States Air Force and United States Air Force Reserve units at Niagara Falls, Syracuse, Rome, Plattsburgh and Schenectady, New York, to discuss this plan. These visits are scheduled annually.

Personnel from the Military Support to Civil Authorities Section attended the First United States Army Military Support Plans and Operations Officers' Conference held in Concord, New Hampshire, from 3-5 October 1973.

This section conducted a briefing on OPLAN SKYHAWK for personnel of Headquarters, New York Army National Guard, on 24 October 1973.

On 26 October 1973, a briefing was given to Brigadier General William J. Gallagher, Deputy Adjutant General of Pennsylvania; Colonel Lloyd O. Michaels, Military Support Plans and Operations Officer, Pennsylvania Army National Guard; Mr. Charles Johnson, Assistant to the Lieutenant Governor of Pennsylvania; and Mr. Eugene Knoop, Executive Assistant to the Lieutenant Governor of Pennsylvania. Subject of briefing was the organization

of Division of Military and Naval Affairs and the assimilation of Civil Defense into this division.

On 11 December 1973, Training officers from the 27 Support Center, Rear Area Operations and the 42 Infantry Division attended a briefing conducted by the Military Support to Civil Authorities Section on the concept of Domestic Emergency Standing Operating Procedures.

#### EXERCISES/TRAINING EVALUATIONS

Personnel from the Military Support to Civil Authorities Section participated on inspection teams from Headquarters, New York Army National Guard, to evaluate riot control training at task force level and determine the operational readiness of these nine task force headquarters.

**Oplan Nadrel Joint Exercise:** The purpose of the exercise was to provide joint training for civil authorities and New York Army National Guard personnel in the procedures involved in the conduct of a joint natural disaster relief operation. Task Force Lake, Rochester, New York, held its exercise during November 1973. Attendees included 21 military personnel from Task Force Lake and 20 individuals from the various local government agencies located in that district. All other task force headquarters will conduct similar exercises prior to April 1974.

#### SERVICE SCHOOL ATTENDANCE

The following personnel of the Military Support to Civil Authorities Section attended resident courses of instruction as indicated:

Captain David A. Arnold - Civil Defense Management Course, Battle Creek Michigan, 25 February - 2 March 1973.

Lieutenant Colonel George Saddlemire - Civil Disorder Management Course,

San Luis Obispo, California, 15-20 April 1973

Colonel John F. Kennedy - Construction Battalion Disaster Recovery Training Course, Davisville, Rhode Island, 22 April - 4 May 1973.

Lieutenant Colonel Robert E. Bartell - Civil Preparedness Planning and emergency Operations Course, Battle Creek, Michigan, 30 September - 5 October 1973.

Colonel John F. Kennedy - Civil Disturbance Orientation Course, Fort Gordon, Georgia, 11-16 November 1973.

#### ARMY AVIATION

The year 1973 has been one of continual growth and change in Army National Guard Aviation. The increase in assigned aviators and aircraft that began in 1972 has continued throughout 1973. Aviator strength has increased 15% from 1972 with 201 aviators now assigned and it is anticipated that the goal of 221 will be attained in early 1974.

Army National Guard aircraft ferry crews have continued to pick up and deliver helicopters from many points in the United States to New York State without accident.

The New York Army National Guard at the end of 1973, had on hand 86 helicopters of the same category and type as those in the active army. All turbine powered, there were 39 OH6 observation and 47 UH1 utility helicopters.

Thirty-one additional aircraft are programmed to be received in 1974. 15 OH6 observation and 16 UH1 utility helicopters are expected.

Transition training of Army Aviators, in the new type of helicopters, has been completed during the past year. A new training program has been initiated to qualify all assigned aviators to fly helicopters under instrument conditions. This

program is progressing very satisfactorily with 35% qualified and the program continuing.

The effect of the 20-25% reduction in use of fuel, caused by the national energy crisis, near the end of 1973 is not known at this time. A revised plan to conserve fuel, yet continue to provide maximum aviator readiness, has been implemented.

Army Aviation hangar and aircraft parking facilities continue to be a problem. One major installation, formerly located at Zahn's Airport on Long Island, has been relocated to Islip MacArthur Airport, as an interim measure, until additional facilities can be obtained. At a second major installation, located at Albany County Airport, some additional space has been obtained. However, the facilities are still extremely inadequate. The facility program requirements, for Army Aviation, have not been met during 1973.

Flight missions performed in support of federal, state and non-aviation activities remained approximately the same in 1973 and accounted for 178 flying hours.

#### AIR DEFENSE

During the year 1973, the 1st Battalion (HERC) 244th Air Defense Artillery continued to perform the mission of providing combat ready on-site missile units in the Army Air Defense Command New York/Philadelphia Defense.

Armed with the Nike Hercules Surface to Air Missile, the three on-site Batterys provided round the clock protection of the aerial sovereignty of the New York City area.

The three firing units successfully conducted Annual Service Practice at McGregor Missile Range, New Mexico, with Battery A, Farmingdale, New York achieving a score of 96.4%

In order to remain current on latest changes and modifications in equipment, technique and doctrine many full time

technicians attended various courses of instruction at Army Service schools during the past year. The number of technicians attending service schools in 1973 was somewhat lower than in previous years due to the fact that back-up training in critical skills has finally been accomplished.

The attrition rate of full time technicians within the Air Defense units was the same as for 1972, 10.7%. Technician manning at the year's end saw Battery A, Farmingdale, New York at 94%; Battery B, Rocky Point, New York at 95% and Battery C, Orangeburg, New York at 94% of authorized strength.

#### EMPIRE STATE MILITARY ACADEMY

The Academy has produced a total of 2,831 commissioned officers and is the primary source of officers for the units of the New York Army National Guard. Of the 1,625 officers now assigned, 65%, or approximately 1,056 are graduates of the Academy. Many officers who were commissioned by the Academy have served in Vietnam and at various posts throughout the United States.

The current OCS training program consists of 296 hours of mandatory instruction and examinations, 156 hours of additional subjects, review periods and practical exercises are prescribed for the candidates of the Empire State Military Academy to better prepare them for duty as commissioned officers.

OCS Class 1972 - 73 was graduated at Camp Smith on 17 August 1973. Of the original enrollment of 279 candidates, 194 successfully completed all phases of training. Commissions, in the New York Army National Guard, were presented to 176 of these graduates. Certificates of Eligibility were awarded to three candidates and 15 were commissioned in the United States Army Reserve, Class attrition rate was 31.5% (The lowest attri-

tion rate since 1954).

OCS Class 1973-74 reported for Phase I at Camp Smith, 4-17 August 1973. Initial enrollment was 188 candidates. 153 completed Phase I successfully and entered Phase II at Branch Schools in October 1973. 135 of these candidates remain enrolled in Phase II on 18 December 1973. It is estimated that 125 candidates will graduate on 16 August 1974.

The conduct of the Officer Candidate School is the primary mission of the Empire State Military Academy. As a secondary mission, the Academy has graduated 4,360 enlisted men for duty as noncommissioned officers. This is accomplished simultaneously with OCS Phase I and III at Camp Smith.

During Annual Training at Camp Smith, 278 enlisted men were added to the rolls of graduates of the ESMA NCO Course and were certified for accelerated promotion to the next higher enlisted grade.

The Department of the Army and the National Guard Bureau provided 6,334 mandays for staff, faculty and overhead to support the Annual Training period.

The United States Military Academy, West Point, N.Y., furnished a total of thirty-seven First Classmen who were utilized as Tactical Officers for the Officer Candidate School.

Annual Training for 1974 is scheduled for Camp Smith during the period 3-17 August 1974. Student enrollment is programmed for:

Phase I, OCS	300
Phase III, OCS	200
NCO (Basic Course)	300
<b>TOTAL</b>	<b>800</b>

Phase I and III officer candidates from New Hampshire and Vermont will perform their Annual Training with the Empire State Military Academy in 1974. Initiated by the Academy, this consolidation will conserve federal funds by the elimination

of overlapping and duplication of support mandays and funding for the three Military Academies.

## MILITARY OCCUPATION SPECIALITY

"Doing it right" is the mark of a professional and professionalism is the story of today's modern National Guard. The goal is a National Guard manned by well-trained, properly equipped, professionally competent enlisted personnel.

A major aspect of professionalism is MOS (Military Occupation Speciality) proficiency and a measure of this proficiency is the annual MOS Evaluation Test; a test designed to determine the individual's ability to perform critical tasks related to his overall job.

During the four test quarters of 1973 the MOS Test Control Office tested 6609 enlisted men of the New York Army National Guard.

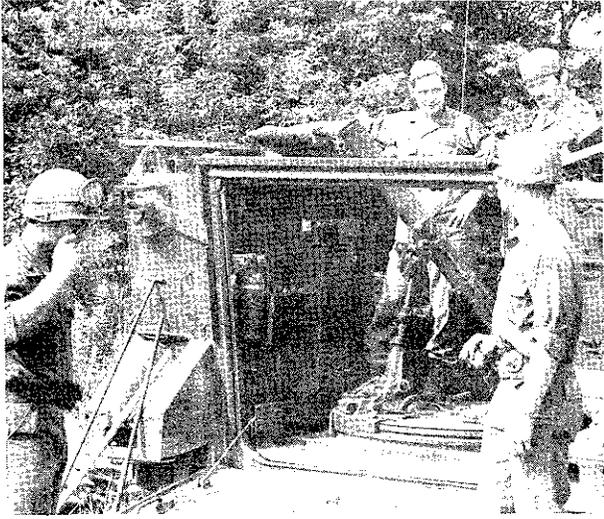

There were 17.5% failures. The percentage of failures for New York was extremely low compared to the national average, and compared favorably with most active army units.

## MILITARY EDUCATION THROUGH SERVICE SCHOOLS

During Calendar Year 1973, the Army structure was reorganized. A portion of the reorganization, which was effective in July 1973, placed supervision of Army schools under the newly activated Training and Doctrine Command (TRADOC) located at Fort Monroe, Va. TRADOC exercises either individual or joint supervision over three colleges, sixteen branch schools and fourteen specialist schools operated by the Army and provides personnel for all joint service schools.

This program operates without cost to the State of New York. Funding to support attendance by members of the New York Army National Guard is provided by the federal government. Operation of the

# ANNUAL TRAINING 1973

--- A 4.2 MORTAR CREW TAKES A BREAK

--- A LINEMAN STRINGS WIRE

--- A RIFLE GRENADIER MOVES INTO POSITION

--- A TERMINAL SERVICE TRANSPORTATION CO. LOADS A CARGO SHIP

--- MEDICS LOAD A HELICOPTER

schools and cost of attendance is fully funded.

During calendar year 1973, we experienced some short fall in funding which was mandated by Congress. Early in 1973, the level of funding fell to the point demanding curtailment of the program. A system of priorities was developed utilizing rating factors. Each functional training course was rated, using the following factors:

- Operational Importance
- Mission Support
- Complexity and Difficulty
- Trained Resource Status
- Judgement

With Initial priority being given to the career development pattern, with minor exceptions all other courses were rated individually to permit judicious utilization of the available funds. In April 1973, additional funding was provided to permit a measure of relief, reopening the program to 100 percent utilization.

At the close of the federal Fiscal Year, 30 June 73, over 800 members of the Army National Guard had utilized the Army School System, expending \$871,000 in Fiscal Year 1973 Federal funds.

Since 1 Jul 73, and to period ending 31 Dec 73, Fiscal Year 1974 funds in the amount of \$911,000 have been either expended or obligated to support this program.

An important adjunct to the Military Schools Program is the conduct of the Senior Officers Civil Disturbance Orientation Course conducted by the U.S. Army Military Police School, Ft Gordon, Georgia. Begun in 1968, this course brings together high level military planners with civilian counterparts including police at all levels, sheriffs, fire departments, mayors, legislators, civil defense coordinators and city managers. The course, conducted 22 times each year, serves to coordinate the planning of military and

civilian officials on all aspects of civil disturbance and natural disaster operations.

## LOGISTICS

The Logistics Directorate, consisting of five staff sections, also has staff responsibility for Camp Smith, Peekskill, New York. The staff sections are: United States Property and Fiscal Office-New York; State Maintenance Office; Logistics Services Branch; Facilities Operations Branch; and Facilities Engineering Branch.

The Director of Logistics is responsible for assisting the Chief of Staff to the Governor in matters pertaining to supply, maintenance, transportation, facilities operation, construction, community work programs.

Major activities included the following programs and projects, which are explained in detail in other sections of this report:

- Energy conservation.

- Relocation of Army Aviation Support facility from Zahn's Airport to MacArthur Airport, Ronkonkoma, New York.

- Continuation of facilities security programs.

- Construction projects, completed and in process, at Camp Smith, New York.

- Relocation of some functions of the United States Property and Fiscal Office-New York (USP&FO-NY) from Brooklyn to Albany, New York.

- Conversion of the Automatic Data Processing Section of the USP&FO-NY to the IBM 1401 Tape Drive System.

- Improved program for disposition of excess state property-

- Processing of 332 community work projects.

**UNITED STATES PROPERTY  
AND FISCAL OFFICE**

GENERAL

The United States Property and Fiscal Office is co-located at the New York State Arsenal, 201-64th Street, Brooklyn, New York and Building #4, State Campus, Albany, New York. It is expected that in early 1974 all operations and functions will be transferred from Brooklyn to Albany.

During 1973, the USP&FO-NY was authorized one hundred fifty-nine (159) federally paid technicians. Funding authorization permitted an average employment of approximately one hundred and forty-two (142) technicians.

COMPTROLLER

Allotment of Federal Funds for the New York Army National Guard (NYARNG) in FY 1972 was \$28,197,520. The FY 1973 funding was \$37,225,002. of which \$37,114,096 was expended as listed below:

APPROPRIATION TITLE	APPROPRIATION SYMBOL	AMOUNT
National Guard Personnel	2132060	\$ 11,857,014
Operations and Maintenance	2132065	\$ 23,171,960
Military Construction	21X2085	\$ 2,085,102
	<b>TOTAL</b>	<b>\$ 37,114,096</b>

Additional Federal Funding for NY-ARNG Inactive Duty Training pay was \$14,369,670.00.

During FY 1973 there was an average of 1459 federally paid technicians employed in the NYARNG.

2674 actions for supplies and services were prepared with a total value of \$1,243,085.

Service contracts in the amounts indicated were issued:

Air National Guard	\$1,222,800
Army National Guard (other than Annual Training/Weekend Training Sites)	\$ 764,800
Army National Guard Annual Training Weekend Training Sites	\$ 256,100

Twenty construction contracts for

various locations were prepared amounting to \$160,204.

Nine contracts for other than construction such as refuse removal, aluminum truck caps, etc., were prepared and issued amounting to \$57,494.

Utilities contracts for Hercules Sites covering electric and water were issued as follows:

UTILITY	NO. OF CONTRACTS	TOTAL COST
Electric	4	\$ 94,689
Water	4	\$ 2,015

Communications costs for 48 federal telephone, 2 TWX machines and 1 Switchboard 608A1, amounted to \$53,631.

LOGISTICS

Normal supply activities were conducted during 1973. Annual training 1972 was supported as in past years without incident. Several functions previously handled at the Brooklyn location have been transferred to Albany, New York in line with the relocation of the entire office to the Albany area. Many employees have left the USP&FO-NY to accept positions in other federal agencies in the metropolitan area.

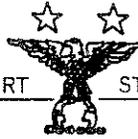

AUTOMATIC DATA PROCESSING CENTER

IBM 1401 Tape Drive System equipment received in new location, Albany, New York. Training of personnel and conversion of all programs to new system will take place during early part of 1974.

All plans finalized for relocation of Data Processing activities to Albany, allowing for minimum time loss in routine operations.

All operations during past year were accomplished. Training of new personnel in data processing has commenced.

Data processing conference in Ohio covering new IBM 1401 system was attended by supervisory personnel. Conversion problems were discussed and demonstrations given. Conference was successful and all states attending were satis-

fied new system will meet all requirements for reports, payroll, etc.

During the year, machine utilization average 1,107 hours of monthly operation.

#### EXAMINER'S OFFICE

During the first half of 1973, operations were devoted to inventory examinations of 27 Battalion Property documents and 69 unit activity property accounts. Two Battalion accounts and seven unit activity accounts were accomplished during the period 1 September to 31 December 1973. This decline was necessary due to loss of employees who did not desire to relocate to Albany. Examiners were required to function in other areas to maintain continuity of operations in services and supplies-

New employees are now being cross trained in logistical functions which will return the Examiner's office to full operation of responsibilities early in 1974.

#### STATE MAINTENANCE OFFICE

The State Maintenance Office, located in the Public Security Building, State Campus, Albany, functions under the direction of the State Maintenance Officer.

The State Maintenance Officer has operational control of the following direct support maintenance facilities:

Three Combined Support Maintenance Shops (CSMS's) located at Brooklyn; Camp Smith, Peekskill; and Rochester.

One Annual Training Equipment Pool (ATEP) located at Camp Drum.

In addition, technical assistance and guidance is provided to forty-three (43) Organizational Maintenance Shops (OMS's) located throughout the State which are under the operational control of designated organization Commanders. An inclosure to this report indicates locations of all maintenance facilities throughout the State.

To further enhance the maintenance effort, the State Maintenance Officer is continuing the Maintenance Assistance and Instruction Team (MAIT) Program, which provides commanders and supervisors, at all levels, with a means of identifying and resolving problems relating to maintenance, repair parts and maintenance management at the local level.

The mission of a CSMS is to provide maintenance support for federally owned materiel issued to units in the NYARNG which exceed their own organic repair capability. CSMS's provide direct and general support to units within specified geographic areas of responsibility.

The ATEP at Camp Drum, NY, is responsible for the receipt, issue, storage and maintenance of heavy construction equipment as well as combat vehicles authorized by the Chief, National Guard Bureau. This facility also issues equipment to out-of-state National Guard units and Reserve Components attending Annual Training at Camp Drum. Use of ATEP equipment is becoming greater as a result of increased usage of Camp Drum as a Weekend Training Site. It is anticipated that continued use of ATEP equipment for weekend training will considerably increase the maintenance requirements and repair parts cost for the ATEP operation.

Organizational Maintenance Shops are responsible for providing organizational maintenance repairs and services to assigned units. Organizational repairs and services are similar to those performed at a commercial service station.

General maintenance guidance is provided to Major Commands of the NYARNG by the State Maintenance Officer and his Staff, through MAIT feedback information, Performance Data Report Analyses and reports and data developed as a result of OMS Bi-Annual visits by the Organizational Maintenance Officer.

A State Maintenance Office organizational chart and statistical data relating

to State Maintenance activities are shown in inclosures to this report.

## FACILITIES ENGINEERING BRANCH

This Branch is responsible for design, contract administration and construction at all DMNA facilities except Air National Guard Bases. In the latter case, engineering assistance is provided to the Bases as needed.

State-Federal Major Construction continued at a high level in 1973. During the year, construction was started on the new \$1,300,000 USP&FO Warehouse at Camp Smith and a \$150,000 Tonawanda Motor Vehicle Training Building. Expansion of the Dunkirk Armory and an addition to Combined Support Maintenance Shop "A" at Camp Smith were completed. The flood damaged Corning Armory was repaired at a cost of over \$150,000. Design started on three new OMS's; Kingsbridge Armory in the Bronx, Huntington Station and Lockport. Construction of these is scheduled to start in 1974. Design was started on a new \$1,300,000 Combined Support Maintenance Shop (CSMS) at Station Island and a \$950,000 expansion of the Annual Training Equipment Pool (ATEP), Camp Drum. Both were included by the National Guard Bureau in the FY 75 Military Construction Program.

In the various State and Federal Minor Construction Programs, 83 projects totaling \$750,000 were contracted in the cost range of less than \$50,000 per individual project.

Planning and environmental impact studies continued for the proposed Schenectady Airport Army Aircraft Support Facility (AASF), but were terminated later in the year after it was decided to remain at the Albany County Airport. Studies were also initiated for a Long Island Area AASF. Geneva Armory replacement progressed to the schematic design stage, but no further progress was made.

The State Construction Program was highlighted by a \$950,000 appropriation in the Supplemental Budget for a new Troop Service Building at Camp Smith. Final design was completed with award of contracts and start of construction scheduled for early 1974.

State appropriations for Capital and Rehabilitation Projects showed a considerable improvement over the previous year, but were still short of requirements. The sum of \$200,000 for Rehabilitation Projects was raised by Division of the Budget to \$414,000 after reclama submitted by DMNA. The Capital appropriation totalled \$325,000 for three projects.

Air National Guard support continued at a high level. Contracts were awarded for a \$160,000 Waste Water Treatment Plant at Schenectady and a \$160,000 Corrosion Control Facility at Hancock Field Syracuse. Design was completed for an Aircraft Engine Inspection and Repair Shop and a Composite Aircraft Maintenance Facility, both at Schenectady, with an estimated total cost of about \$1,500,000.

During the year, much of the in-house work load was involved in design of Vault Improvements and Intrusion Detection Systems. Federal contracts for environmental improvement (wash slabs with grease interceptors), safety (carbon monoxide exhaust systems) and new equipment (diesel fuel storage and dispensing systems for multi-fuel vehicles) were also emphasized.

The energy crisis superceded environmental impact as a major area of concern during the year. This was reflected in increased attention to energy conservation features in new construction and to studies of ways of saving fuel and electricity in existing facilities.

## FACILITY OPERATIONS

The energy crises was the most significant event affecting our Facilities

during 1973. Fortunately, each Facility was advised as early as January 1973 that fuel conservation actions should be implemented. Detailed instructions were published on 5 November 1973, with each Facility required to lower thermostats in all building areas, eliminate unnecessary lighting, conserve water, especially hot water, and, in general, take positive action to reduce the demand for fuel and electricity.

The response from our Facilities has been uniformly excellent, and it is anticipated that when the first survey of demands for comparable 1972/1973 months is made on or about 1 February 1974 an overall reduction in fuel and electricity consumption will be evident.

To affect future fuel conservation, we will be completing surveys on the requirements and practicality of dropping ceilings in some offices of our older armories. Additionally, the necessity for caulking windows, for exterior masonry pointing, and for installing zoned heating controls where required are all being studied. The Office of General Services is assisting us in the heating survey.

The problem of Army Aviation Support Facilities in the Long Island area was temporarily alleviated when the National Guard Bureau authorized the Corps of Engineers to negotiate a Federal Lease with Flight Line Incorporated at Mac Arthur Airport, Ronkonkoma, New York for interim flying and maintenance facilities. This allowed us to relocate all flying activities from Zahn's Airport, Amityville, New York on 1 October 1973.

Similarly, at the close of 1973, the Corps of Engineers was completing negotiations with Page Airways at Albany County Airport for flying and maintenance facilities. The proposed move from Albany to Schenectady County Airport was not able to be made, pri-

marily because of environmental problems encountered.

Permanent sites for construction at both Long Island and Albany are now being evaluated by the Division.

The age of our armories and the resultant requirements for rehabilitation and capital projects to correct deficiencies in electrical and heating systems, roofs, and exterior masonry leaves minimum funding available for the improvement of troop use areas. The recruiting efforts of the National Guard are aided considerably when troop areas in the armories are adequate, well maintained, and have sufficient equipment to support the units. All funding which can be made available has and will continue to be directed towards providing better mess facilities, class rooms, and recreational areas.

Security at our Facilities continues to be a major concern. The installation of Intrusion Detection Systems is progressing, together with structural modifications to Federal storage areas where required.

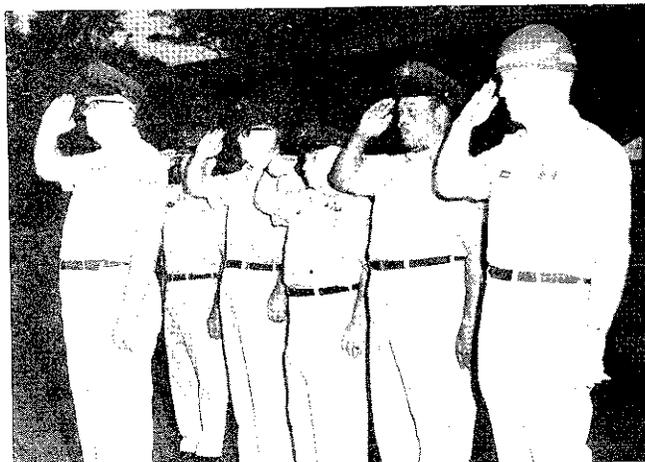

In addition, the six District offices of the Office of Disaster Preparedness are now a part of the Facility inventory of this Division. The maintenance and management of these offices will be the responsibility of Facilities Operations.

Continued emphasis has been placed on improvement to the administration, operations and management of our facilities. These functions, the responsibility of the Armory Management Supervisor, are accomplished through personal contact with the armory superintendent and his staff, area management conferences and publication of a monthly Facilities Newsletter. During 1973, considerable effort was expended in areas of employee relations, preparation of employees for promotional opportunity, and modification of employee promotion procedures expanding

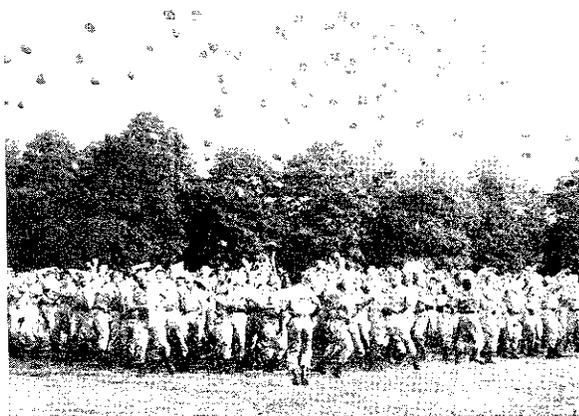

# EMPIRE STATE MILITARY ACADEMY

- - a non-commissioned officer student and instructor discuss tactics

- - senior staff NCOs salute during a review parade.

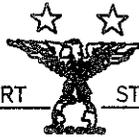

- - "Hats off" for 194 new Second Lieutenants.

- - a test of team work and initiative on the leaders reaction course

- - an officer candidate learns about machine guns.

the use of a promotion board to interview and recommend applicants for armory mechanic as well as superintendent vacancies.

The mission of Facility Operations will continue to be to provide well managed, secure, functional Facilities for the National Guard and the Office of Disaster Preparedness.

### LOGISTICS SERVICES

The Logistics Services Section, under the State Quartermaster, is responsible for the following activities:

1. State Property Management, Inventory and Warehousing.
2. Relief of responsibility for State and Federal property, through Report of Survey and Inventory Adjustment Report action.
3. Non-Military use of Armories, to include Public Liability Insurance and Surety Bonds.
4. Procurement of Supplies and Materials, Contractual Services and Equipment for all Division of Military and Naval Affairs Facilities.
5. Communications for National Guard Armories and District Offices of the Office of Disaster Preparedness.
6. New York State Flag Program.
7. Division of Military and Naval Affairs State Transportation, Insurance and Parking permits.
8. Officer in Charge and Control of Bldg 22, - Facility Maintenance and Operation.

In addition, special missions and projects are assigned to and accomplished as directed by the Director of Logistics.

#### STATE PROPERTY ACCOUNTING DATA

As of 31 December 1973, the following equipment records were being

maintained:

1,786 Active Stock Record Cards.

240 Memorandum Receipt Accounts, including 115 State Armory (SA) Accounts, 90 State Guard (SG) Accounts, 2 Critical Items Pool Accounts, 27 Riot Battalion Accounts, 6 District Offices of Office of Disaster Preparedness.

1,372 Cards in addition were maintained in the Weapons Serial Number File and 550 Cards in the Typewriter Serial Number File.

During the year 456 Vouchers were processed covering purchases and transfers of property, including vouchers for disposition of salvage equipment. Disposition of Excess property continued at a normal rate. This program has been purified to include only those items worthy of transfer. As a result, 56 line items (consisting of 376 individual articles) were reported as Excess Serviceable during the year. By action of the State Inspection and Survey Officers, many "junk" items normally offered as excess have been removed from the system.

#### FEDERAL PROPERTY RESPONSIBILITY

National Guard Regulation (NGR) 735-11 (Federal Property - Accounting for Lost, Damaged and Destroyed Property) was implemented in February 1973, causing several changes in accounting for Federal Property losses caused by reasons other than fair, wear and tear.

#### RELIEF FROM PECUNIARY RESPONSIBILITIES

Documentation pertaining to Federal Property relief of the State and members of the State's Military Forces

from financial responsibility involved processing 92 Reports of Survey. In addition, 325 DA Forms 444 (Inventory Adjustment Reports) were processed for units sustaining certain types of equipment loss or damage. A total of 6 Reports of Survey and 61 Certificates of Droppage were executed by custodians of State Property and processed to this office for adjustments.

The Position Bond originally obtained for individual commanders providing coverage against loss or liability for property was changed to a "Blanket" bond covering all property connected positions. This action obviated the administrative requirement to periodically change responsible officers because of changes in their military assignments.

#### NON-MILITARY USE OF ARMORIES

During July 1973, the responsibility for non-military use of armories was transferred to this Section. A total of 1114 agreements were processed during the year covering Commercial, Non-Profit, Charitable and Youth Activity rental categories. In addition, rearrangement of files and readjustment of rental rates has been completed. Updating of regulations and complete standardization of forms is in the process of being completed. Public Liability Insurance, protecting the State of New York, has been procured covering any event at any location every day of the year. The premium is recovered by charging a pro-rata share to the individual lessees.

A "Blanket" Surety Bond has been obtained by this Division to protect rental charges and damage to State Property during the course of non-military use. This replaces the individual Surety Bonds originally required from each lessee. As in the case of the Public Liability Insurance,

the premium for this Surety Bond is recovered by charging a pro-rata share to the individual lessees.

#### PURCHASING

The responsibility for procurement of supplies and materials, contractual services and equipment for all Division of Military and Naval Affairs facilities was transferred to this Section in July 1973. During the year a total of 5904 Purchase Orders was processed. Other aspects concerned with purchasing include purchase awards, specifications, contact with vendors, contract and non-contract items and all types of correspondence on matters pertaining to procurement.

#### COMMUNICATIONS

This Section handles all requests for installation or removal of telephone equipment throughout the State. We set the table of allowance for the amount of telephone instruments to be installed and together with the Fiscal Agency coordinate the individual fixed and toll charges.

#### NEW YORK STATE FLAG PROGRAM

Distribution of New York State Flags to servicemen overseas for the year totaled 191. National, State and distinctive type flags were procured and distributed for interior use of armories, special displays and authorized honors. Loans of flags to civilian organizations and honoring requests for miniature flags, made to the Governor by school children, continued.

#### TRANSPORTATION

During 1973, a total of 132 requests for use of State sedans re-

quired for the Division of Military and Naval Affairs was processed with the Bureau of Fleet Management, Office of General Services. The annual insurance coverage for State and Federal vehicles operated by this Division was processed during the year.

One hundred and seventy two (172) parking stickers for lots surrounding the Public Security Building have been issued by this section. With the upcoming move of the USP&FO offices to Albany, a temporary rearrangement of parking spaces became necessary. The situation will correct itself upon move of USP&FO to Building 4, State Campus, Albany.

#### FACILITY MAINTENANCE AND OPERATION

The State Quartermaster is also the Officer in Charge and Control (OIC and C) of Building 22. In this capacity, the Logistics Services Section handles all requests for building maintenance and operation. In addition, the OIC&C is the designated contact with the State Office Building Campus Manager on general matters of concern to all employees working on the Campus Complex.

#### COMMUNITY WORK PROJECT PROGRAM

The Community Work Project program was initiated in the Division of Military and Naval Affairs in June 1971 under the Department of Defense Domestic Action Program. It involves the use of military manpower and equipment resources to assist community organizations in ecological, educational, cultural and recreational

activities. Since June 1971, three hundred and thirty two (332) work projects have been processed.

Type of projects include, but are not limited to the following:

Construction, rehabilitation or repair of facilities for youth groups, organizations supporting the underprivileged, or public facilities used for the benefit of the entire community.

Conduct of schools or classes for youth groups or the underprivileged in mechanical skills and crafts, safety, first aid, hygiene and similar subjects that are within the normal mission capability of a unit or its individuals.

Assistance to underprivileged community supported youth groups or organizations working with retarded or underprivileged children in conducting trips to recreational, historical, or educational centers, to include transportation support.

Loaning of equipment such as water trailers, tentage, mess equipment, power generators, and the like, to overcome temporary emergency problems such as failure of water supply, or power failure at youth camps.

A wide variety of activities were undertaken by State Military Forces throughout New York. Although the bulk were accomplished by the largest component, the Army National Guard, many others were completed by the Air National Guard and the Naval Militia.

Projects are too numerous to list in this report, but are all on record in the Logistics files of this office. However, a sampling of them follows:

- Nine fund raising projects involving the March of Dimes, Easter Seal and American Cancer Society

were supported by furnishing personnel and equipment for control of traffic and participants on routes of march for walk-a-thons, providing water supplies, establishment of communication control points and emergency evacuation of injured.

- Camping type equipment (tents, water trailers) were furnished for use at several Boy Scout Camporees. Also two tents were provided by the 221st Engr Gp to the City of Buffalo for use in the Inner City Fresh Air Program.

- The rifle range at the Schenectady Armory was made available for a Rifle and Shotgun Merit Badge Program for scouts of the Governor Clinton Council.

- Members of Co C, 50th Maint Bn assisted the City of Ilion, N.Y. in a cleanup in connection with a severe wind storm.

- Members of HHC, 205th Spt Gp, in a volunteer status assisted the Greater Troy Chamber of Commerce in the erection and dismantling of bleachers used during the Uncle Sam Invitational Tournament of Drums held in conjunction with Troy Flag Day Celebrations.

- 1 Bn 187th FA – participated in a Community Health Fair sponsored by Health Resources Commission in Brooklyn. 2700 people underwent 12,000 medical tests. – Blood pressure, visual and hearing acuity, electro cardiogram, breast cancer check, glaucoma, and general dental exam.

- 109th TAC Alft Gp – furnished transportation for retarded and handicapped children from Scotia and Altamont areas enabling them to participate in a "Special Olympic Program" in Troy.

- About sixty percent of the projects involved bus and truck transportation. Busses were provided for movement of youth groups for camping, recreational and athletic activities. Some of the youth groups supported were: Boy and Girl Scouts, inner city youth organizations, various youth clubs, elementary and high school students. Truck transportation was provided to community organizations and youth groups for movement of camping gear, water trailers, supplies, environmental and glass/paper recycling projects and many other miscellaneous activities.

- At the request of the Rotterdam and Rochester Junior Chambers of Commerce, furniture was moved to Hurricane Agnes flood victims in Elmira.

- Assistance in the pick up of food donations for shipment to Nicaragua earthquake victims was rendered by members of 205th Spt Gp.

- Support of the Salvation Army in movement of food, furniture and clothing to needy families.

- Engineer units assisted youth organizations and State agencies in a number of construction projects, such as:

- a. A combined effort by members of the Naval Militia and 204th Engr. Bn, construct a Little League ball field in South Troy.

- b. Construction of tent platforms for use at Boy Scout Camp Dittmer, Phelps, N.Y.

- c. Assisted Governor Clinton Boy Scout Council in construction of a road and rifle range at Camp Rotary, Poestenskill.

- d. Assistance to Coxackie Correctional Facility, Hudson, in the enlargement of a firing range.

- Fifteen requests from Federal, State and Municipal agencies were

honored such as:

- a. NYS Dept. of Health, Albany. Personnel of HHC 205th Spt Gp conducted survey in Troy for Community Immunization Programs.
- b. Oneida County Solid Waste Agency, Utica. Co C, 50th Maint Bn Assisted in removal of junk cars.
- c. Civil Defense, Smithtown, Long Island. 10 volunteers and 3 trucks from 1st Bn, 142d AR assisted in relocation of supplies and equipment of two reserve hospitals.
- d. Monroe County Conservation Council, Rochester, 18 members of 1st Bn 209th FA, using 9 trucks, assisted in the collection of 12,050 pounds of newspapers in connection with a recycling program.
- e. Model Cities Program, Buffalo. Doctors and other members of Co C, 50th Med Bn performed diagnostic physicals for inner city children.

## COMPTROLLER

The Comptroller is responsible for the Fiscal, Civilian Personnel, Data Processing and Management Engineering operations of the Division. He also serves as advisor to the Chief of Staff to the Governor and other Staff Directors on matters of fiscal management.

Fiscal operations include the budgeting, allocation, control, expenditure and accountability of State and Federal appropriated funds.

The State funding programs used are:

- Administration
- Staff Support
- ARNG Armory Operations
- Related ARNG Missions
- Air National Guard
- Naval Militia
- New York Guard
- Disaster Preparedness

The Federal funding programs used are:

- National Guard Personnel, Army
- Operation and Maintenance, Army National Guard

Civilian Personnel operations include all payroll and personnel actions involving State employees and the processing of payrolls and related documents for personnel alerted during a New York State military emergency.

Data Processing operations include the processing of data for current programs and the updating of all such programs as required. Feasibility studies, programing and implementation of EDP programs to improve and support the various functional activities of the Division are accomplished as required.

Management Engineering operations include the use of administrative and organizational management analysis techniques in providing procedural and systems analysis, space and layout studies and management and manpower studies to improve the effectiveness and efficiency of Division policies, organization, program objectives and administrative processes.

Significant activities during calendar year 1973 in which the Office of the Comptroller participated are as follows;

- Oct. - The assignment of the Office of Disaster Preparedness to the Division.

The Office of Disaster Preparedness has 80 classified Civil Service State employees, of which 19 are 100% and 61 are 50% federally supported. Thirty-four persons were transferred to the Office of Disaster Preparedness effective 1 Oct. from State agencies, and 32 persons have since been employed.

- Moving of the USP&FO administrative operations from Brooklyn to Albany, New York.

- Upgrading of 39 Armory Mechanic IIIs, SG-7, in the 6- and 7-man armories to Armory Mechanic II, SG - 9.

Data on expenditures of State and Federal appropriations are shown in charts included in the "Inclosures" section of this report

## LEGAL

The Legal Office is responsible for all legal matters concerning the Division and the Organized Militia. These include the following:

- Legislation
- Real property transactions
- Contracts, leases and agreements
- Third party claims against the Militia and the Division
- Line of duty injuries affecting the Militia
- Administration of Military Justice
- Coordination with other state and federal agencies
- Litigation
- Labor law and labor relations

### STATE LEGISLATION

There were three (3) laws enacted in the 1973 Session affecting the Division of Military and Naval Affairs and the organized militia.

Chapter 110 of the Laws of 1973 amended Section 130.15 relating to non-judicial punishment provided for in the Code of Military Justice. It authorized an officer of General or Flag rank to impose such punishment. The purpose of the amendment was to avoid amendments to this section whenever there was a reorganization in the organized militia.

Chapter 502 of the Laws of 1973 amended Section 217 of the Military Law relating to pensions. It authorized a pension for a dependent parent rather than the limitation of dependent mother, which was in the previous statute.

Chapter 931 of the Laws of 1973 designated the Division of Military and Naval Affairs as the State natural disaster coordinating agency and provided for the transfer to the Division of the Office of Natural Disaster and Civil Defense and the functions of the State Civil Defense Commission. The Chief of Staff to the Governor was designated as the chief executive officer. This consolidation would provide for prompt response in an emergency to minimize loss of life or property.

### FEDERAL LEGISLATION

There were several proposals introduced in the first session of the 93rd Congress which were deemed meritorious and would benefit the organized militia. However, the great majority of these bills were still in committee at the close of the 1st session. Full-time Servicemen's Group Life Insurance for members of the Reserve Components was passed by the House of Representatives; however, the Senate has taken no action on this desirable legislation. Legislation has also been introduced to lower the age for Title III retirement for over 20 years service to age 55. In addition,

there are bills to provide for survivor benefits for those members who have completed over 20 years service, but have not reached the statutory age for retirement. Another proposal would grant National Guard Technicians 100% retirement credit for those years served as a technician prior to the enactment of PL 90-486. All of these proposals have merit and would be beneficial to the organized militia.

#### CLAIMS

During 1973, under the provisions of Titles 32 and 38, United States Code, and under Section 216 of the State Military Law, a total of 213 line of duty (LOD) investigations were processed for injury and disease to National Guardsmen while engaged in training or State active duty:

Approved LOD	147
Disapproved LOD	0
Approved VA Benefits	2
Not in LOD	0
Pending National Guard Bureau	7
Approved LOD State Duty	0
Pending from Units	57
	<u>213</u>

There were 88 motor vehicle accidents involving National Guard vehicles and third parties during 1973. Three of these claims are now in litigation.

On 21 May 1973, one member of the Company C, 152nd Engineer Battalion, NYARNG, was killed as a result of an automobile accident while in a duty status.

On 15 June 1973, a member of the 2nd Brigade, 42nd Infantry Division, NYARNG, was killed when the jeep he was a passenger in jackknifed while enroute to Camp Drum.

On 16 July 1973, a member of the 1st Battalion, 108th Infantry, NYARNG, sustained a fatal myocardial infarction (heart attack) at home while on full-time training duty.

On 13 October 1973, a member of the 205th Support Group, NYARNG, was killed in an automobile accident while returning home from drill. This investigation is pending the approval of the National Guard Bureau.

There were 17 claims arising out of the use of armories by third parties. One of these claims is now in litigation.

There are 6 miscellaneous claims now in litigation, arising from a variety of incidents, involving the operations of the organized militia.

#### TECHNICIAN PERSONNEL OFFICE

The Technician Personnel Office is responsible for the administration of, and the personnel services for, approximately 2600 New York Army and Air National Guard Technicians. The Technician Program is federally funded and authorizes 1841 Army as well as 1300 Air National Guard positions. However, budgetary limitations restrict employment to 85% of the authorized level.

Reclassification of technician positions to align them with federal standards for similar jobs was completed on 15 August 1973. As a result, 59 positions were downgraded, affecting 262 technicians. Appeals were submitted by 71 but were not sustained by the Classification Section of the National Guard Bureau.

Phase II of a program of instruction for supervisors was completed in November. This concluded an 80 hour course attended by 245 first-line supervisors.

In October the Equal Opportunity Office was staffed with the Opportunity Officer, an Opportunity Specialist and a

Clerk-Typist. The office has a dual role in ensuring equal opportunity in the National Guard as well as equality in employment in the Technician Program.

No progress was made in 1973 in reaching agreement with the Association of Civilian Technicians, Inc., the employee organization. The major bar to agreement continued to be the requirement for the wearing of military uniforms by technicians. In October the authority to grant exception to this was removed from the Chief of Staff to the Governor and now rests solely with the Chief of the National Guard Bureau.

Four complaints of Unfair Labor Practice were filed by the employee organization in November. A petition for dismissal was submitted by the Division of Military and Naval Affairs. The Department of Labor had not answered the petition at the end of December.

Under the Incentive Award Program, one suggestion was adopted resulting in a \$75.00 award. There were two Quality Salary Increases approved, with four awaiting final approval from the National Guard Bureau. Outstanding Performance Ratings were approved for thirteen technicians. Length of Service Awards were as follows:

10 Year -	78
20 Year -	140
30 Year -	5

During the year, there were 417 technicians appointed and 292 separated. Included in separations were 69 retirements and 11 deaths.

As the year closed there were 2558 technicians employed in 68 communities in New York State.

### SENIOR ARMY ADVISOR

The mission of the Senior Army Advisor and his subordinates is to re-

present and act as spokesman for the Active Army in all reserve component matters under the purview of the Commander, Army Readiness Region I; render professional military advice and assistance to NYARNG Commanders in military matters concerning the organization, operations, training and readiness of the units and monitor the use of and assist in the management of Federal resources in support of the New York Army National Guard. The Senior Army Advisor serves as the Military Advisor to the Chief of Staff to the Governor when so designated.

Under the reorganization of the Army effective 1 July 1973, which redirected the Active Army Advisor effort to the Army National Guard, the U.S. Army Advisor Group was deactivated as a TDA unit and became an element of Army Readiness Region 1 (ARR 1) at Ft. Devens, Massachusetts. All battalion advisors were reassigned as a consequence but advisors were retained at Group, Brigade and Division level. Aviation advisors were added at the Flight Facilities in Albany, Niagara Falls and Ronkonkoma. Thus the number of authorized advisors to New York Army National Guard units was reduced from 88 to 31 (17 Officers - 14 Enlisted). Many of the battalion advisors were reassigned to Army Readiness Groups at Fort Hamilton and Seneca Army Depot which were activated as elements under Army Readiness Region 1 at Ft. Devens.

The Army Readiness Regions and Readiness Groups introduce a new concept to the Active Army advisor support to the Reserve Components. This concept is designed to furnish more advisory expertise across a wider spectrum - than the past system provided - so as to improve unit training and operational

**RECRUITING** – BG Francis J. Higgins reenlisting men during annual training.

**STATE FAIR** – Gov. Malcolm Wilson and Commissioner of agriculture Frank Walkely are escorted by MG John C. Baker.

**ATHLETICS** – It was a “strike” for this happy Guardsman at annual DMNA Bowling Tournament.

**MARKSMANSHIP** – A young visitor to the DMNA air rifle range at the State Fair.

readiness. Simply speaking, the advisory/assistance function of the Army Readiness Region is organized in three echelons: (1) Unit advisors with the major Reserve Component elements (State Adjutants General, ARCOMs, Divisions, Brigades, Groups and certain high priority units), (2) Readiness Groups with mobile training teams tailored to meet the training, logistical and administrative needs of Army National Guard and United States Army Reserve units within the Readiness Group's geographical area, and (3) Readiness Coordinators at the Army Readiness Region Headquarters who direct and coordinate the Region-wide assistance effort.

Advisors assigned to NYARNG major units will continue to provide advice and assistance as in the past. Additionally, they will coordinate with Army Readiness Region 1 and the Readiness Groups through the Senior Army Advisor to obtain assistance for areas requiring specialized efforts at the request of the respective NYARNG unit commanders. Readiness Groups, composed of specially tailored mobile training/assistance teams, will provide the bulk of the technical assistance previously given by battalion advisors. These teams will be composed of officer/enlisted branch specialists to include logistical and administrative personnel. The combined resources of the Advisor element and the Readiness Groups improve the effectiveness of support rendered to New York Army National Guard units.

#### **CAMP SMITH, PEEKSKILL CHANGE OF COMMAND**

Colonel Lawrence P. Flynn was appointed Post Commander on 17 May, replacing Colonel Arthur F. Sulger who had

been commander of the Post since September 1969.

#### **UTILIZATION**

##### **MILITARY**

Inactive Duty Training commenced on 20 January and concluded on the weekend of 15-16 December. Throughout that period, the Camp was used to near capacity on most weekends by units of the New York Army and Air National Guard, New York Naval Militia, New York Guard, and United States Army, Navy and Marine Corps Reserves.

Training on weekends was devoted mainly to weapons marksmanship, driver training, and field exercises, although many camp improvement projects were also undertaken by Mobile Construction Battalion 19 USMCR/NYNM and engineers of the New York Army National Guard as a part of their weekend training.

The 2d Bn, 25th Marines, conducted Infantry Company Tactical Tests for each of its line companies on five weekends; and the New York Air National Guard held Air-Ground Close Air Support Training exercises on three occasions.

On the weekend of 23-25 March, the 42d Infantry Division, NYARNG, held its second annual First US Army Command Post Exercise. Participating in the Exercise were the staffs of major commands, including those of the Pennsylvania Army National Guard. Personnel numbering 626 were ordered to Full Time Training Duty for the Exercise.

Two Annual Training periods were scheduled for the summer of 1973, the first of which was Co C 152d Engineer Bn (Cbt) NYARNG. Supporting the Engineers were NYARNG units consisting of HHD, 569th Trans Bn (MT); 719th Trans Co (Med Trk Cgo); and the 1569th Trans Co (Lt-Med Trk). Several major camp projects were either completed or

started during the Engineers' Annual Training which took place from 19 May to 2 June.

The Empire State Military Academy conducted Phases I and III of its Officer and Noncommissioned Officer Candidate Schools from 4 through 18 August. Support units for the school included HHD, NY-ARNG (-); 243d Med Co (Clr) (-); 199th Army Band (42 Pc); and the 138th Pub Info Det (Fld Svc). The Academy held its 21st Graduation Exercises and Review on Friday, 17 August.

#### LAW ENFORCEMENT

Commencing earlier than usual, the New York City Office of the Federal Bureau of Investigation opened its 1973 instruction program on 8-9 February. Week-day classes in firearms proficiency, defensive tactics, mob and riot control, and various other facets of law enforcement, were held throughout the year until mid-December.

The schools, which were conducted in two-week series, for the most part, were attended by law enforcement officers from various Federal, state, county and local agencies from the entire northeastern United States and Canada.

Range and other facilities utilized by the FBI in connection with its training schools at the Camp are maintained and operated by the FBI without expense to the State.

The New York Division of State Police also conducted marksmanship training for its own personnel on various weekdays through the year.

#### COMMUNITY USE

To promote more favorable community relations, the Camp completed an unprecedented year in accommodating various civilian and youth organizations. Significantly, the year 1973 opened with a Boy

Scout Troop encampment on 6-7 January, and similarly, closed on 15-16 December when Boy Scouts were again provided with billeting, messing, and recreation facilities.

In addition to the numerous scout troops which utilized the Camp for hikes, tours, bivouacs, and overnight encampments, Post also accommodated the following youth groups:

Westchester Community College Football Club, Valhalla, NY, which conducts its football practice sessions at Camp Smith annually was again provided billeting and messing facilities, together with storage space and a field area.

US Naval Sea Cadets, George Hollar Battalion, Huntington, Long Island, on two occasions, performed integrated training with MCB 19, NYNM.

Young Marines, Hudson Valley Detachment, Verplancks, NY, performed weekend training on eleven weekends during the year.

Members and faculty advisors of the Athletic Association of Grover Cleveland High School, Queens, NY, conducted a weekend program of recreational activities for handicapped girls.

Elmjack Football League of 125 West 14th Street, New York City, held an overnight encampment under the sponsorship of the 1st Bn, 71st Inf, NYARNG.

Scouts of Troop 272, Boy Scouts of America, Vancortlandtville, NY, were granted permission to perform an Eagle Scout advancement project on the Camp property.

#### QUASI - AND PARA - MILITARY

Other organizations which used the Camp's facilities included the Veteran Corps of Artillery; Eastchester Civil Defense Unit; Old Guard of the City of New York; New York State Rifle and Pistol Association; and Retired Officers of the 253d Civil Affairs, Area "A", USAR.

Accommodated for annual picnics were the 133d Maint Company, NY ARNG; The 27th Division Association; and Centennial Hose Company #4 of the Peekskill Fire Department.

#### CONSTRUCTION

While many construction projects were completed during the past year, the major contracts included the conversion of the Camp's electrical system from 4160 volts to 31,200 volts; expansion and addition to Shop "A", which provides direct support, maintenance, and repair of National Guard equipment for units and Organizational Maintenance Shops extending south from the Canadian border along the eastern boundary of New York to Manhattan.

Currently underway, is the construction of a new USP&FO Warehouse which will replace the one which has been located in Brooklyn since the 1920's. It is anticipated approximately a million and a half dollars in Federal funds will be expended for this project. Completion of the building is scheduled for July 1974, at which time relocation of warehousing activity and personnel from Brooklyn will take place.

Funds for a Troop Service Building at Camp Smith were authorized by the Division of the Budget. The contract award is expected to be made on 6 March 1974. Scheduled completion date for this project is 12 March 1975.

# air national guard

## GENERAL

The United States' first full year of peace in more than a decade found the New York Air National Guard (NYANG) building and strengthening combat readiness to assure its vital role in helping to guarantee that this era of peace is a long and secure one.

While emphasis initiated in 1972 toward increased NYANG involvement in civic action and domestic emergencies continued, a major recruiting effort was launched in 1973 to sustain the input of volunteers in the face of a "zero draft" situation. Under a special NGB-ANG program, each base was authorized to hire a full time recruiter for incremental periods of six months. The program has proved to be moderately successful in its early stages, and it is expected that the real benefits in additional manning will begin to accrue more rapidly in 1974.

All NYANG bases conducted intensive programs to increase NYANG visibility and community involvement, including thousands of mailings to veterans and New York State high school students; production and placement of live radio and television spot advertisements on stations in base communities; erection and maintenance of recruiting display booths in banks and other community and public places; active participation in New York State Fair displays; and, special efforts to attract members of minority groups, and women into NYANG.

Recruiting efforts were coordinated by Lt Col Peter Siciliano, aided by Lt Col Gordon Alexander, the Minority Recruiting Officer.

1973 was the first of recent years with no major mission change for NYANG units. Units changed in previous years consolidated their positions and for the most part, improved their levels of combat readiness.

NYANG's Aerospace Defense Command (ADC) responsibility increased with the improved fighter-interceptor capabilities of our two ADC units, the 107th Fighter Interceptor Group at Niagara Falls, and the 106th Fighter Interceptor Wing (Hqs) and Group, at Suffolk County Airport, Westhampton Beach, L. I.

Tactical Air Command (TAC) units in the NYANG are the 174th Tactical Fighter Group, Hancock Field, Syracuse; the 105th Tactical Air Support Group, White Plains; the 109th Tactical Airlift Group, Schenectady; the 152nd Tactical Control Group, Roslyn ANG Station; and the 552nd USAF Band, also located at Roslyn.

In addition, Roslyn is the home of the 213th Electronics Installation Squadron (AFCS); and the 274th Mobile Communications Squadron (AFCS). The 201st Weather Flight is located at MacArthur Field, Ronkonkoma, L.I., and the 108th Tactical Control Squadron (a unit of the 152d Tac Con Gp) is co-located at Hancock Field with the 174th Tactical Fighter Group.

In response to DOD fuel conservation directives, the NGB reduced flying hour

allocations approximately 20% for the last eight months of FY 74. In addition, all cross country (out of State) flying has been restricted to NGB/DOD directed mission, and other activities classified "mission essential."

## PERSONNEL

Highlighting personnel developments in 1973 were a number of important promotions. NYANG Commander, Major General Raymond L. George, was awarded the second star of a Major General. NYANG Executive Officer and New York's Assistant Adjutant General for Air, Brigadier General Paul J. Hughes was promoted to that rank, as was Brigadier General John C. Campbell, Commander of the 106th Fighter Interceptor Wing. Promoted to the rank of full Colonel were Colonel Gaetano F. Marsella, HQ NYANG, Director of Personnel; Colonel Stanley W. Hemstreet, Commander, 109th Tactical Airlift Group; and Colonel Carl J. Sheusi, HQ NYANG, Air Surgeon.

Lt Col John B. Conley was appointed Commander, 106th Fighter Interceptor Group and Lt Col Norman Graves was appointed Commander, 174th Tactical Fighter Group, succeeding Colonel Curtis J. Irwin. Colonel Irwin continues as Base Detachment Commander, Hancock Field. Lt Col James F. Blake-Lobb was appointed Executive Officer, 106th Fighter Interceptor Wing.

Major General Raymond L. George was appointed to the Air Reserve Forces Policy Committee.

## OPERATIONS

All flying units were combat ready (C-3 or higher) by year's end. Most notable accomplishments were the completed conversion to F-102 aircraft at Suffolk within the programmed time frame, and confirmation of combat ready status of the Nuclear Rocket Equipped ADC Unit (107th) at

Niagara Falls.

The 174th TFGp, NYANG's airborne goodwill ambassador, received national recognition via network television when the unit flew a missing man formation over New York's Yankee Stadium on 4 July during the holiday double-header. Under the supervision of Major Frank Hardy, 138th TFSq Commander, the unit's A-37's arrived over the stadium at precisely the moment the band finished playing the Star Spangled Banner, thrilling more than 60,000 fans present. The occasion was in honor of the Americans missing in action in the Vietnam War.

The 137th Aeromedical Evacuation Flight was inactivated on 31 August. Unit personnel were assigned to other ANG units.

## CIVIL ENGINEERING

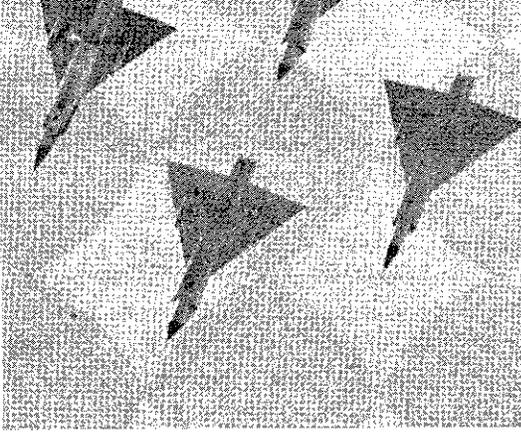

The 105th Civil Engineering Flight cooperated with the 106th FIGp by spending its annual training helping erect the 106th's new Combat Operations Center.

## COMBAT SUPPORT

NYANG units were authorized a Social Action Section, in Combat Support Squadrons. The personnel assigned to this section are responsible for advising and assisting commanders in administering social action programs; planning, organizing and managing social action activities including equal opportunities, drug abuse and alcohol control; and education in race relations programs.

## FISCAL

Federal fiscal support rendered directly to NYANG during FY 1973 approximated \$26,000,000. This figure does not include fiscal support rendered indirectly for centrally funded supplies and equipment; depot level maintenance of aircraft and equipment; overhead costs of service

**FLYOVER** – Formation of F102 Fighter Interceptors of the 106th Group.

**FLYING TIME** – Pilots of the 174th Tactical Fighter Group surpassed, 10,000 hours in their A37Bs in less than two years, an unusual feat.

**ACHIEVEMENT** – TSG Francis C. Fernandes is congratulated by MG I. G. Brown on his selection as Honor Graduate of the Air National Guard NCO Academy, Tennessee.

**HELPERS** – Men of the 109th Tactical Airlift Group transported several truck loads of toys for needy children at Christmas time.

schools; and other cost factors. As for New York State's investment of approximately \$600,000. during the same fiscal year, the State derives a return, not only in direct federal support, but also in the economic, social, and cultural sense. The tax dollars generated by the substantial federal investment, as well as the business and income generated by that million dollar investment more than offset the State's share of the operation.

## COMPONENT UNITS OF THE NEW YORK AIR NATIONAL GUARD

### 105th TACTICAL AIR SUPPORT GROUP

During the year the 105th continued its participation in ecology - anti-pollution inspection flights in support of local agencies in searching for and confirming such events as oil spillage and other polluting events on river or intracoastal waters. An example of the effectiveness of this activity was the identification and confirmation of gasoline spillage from a tanker in the Hudson River, during February.

The 105th was very active in support of area emergency and disaster relief, and law enforcement agencies during 1973. In late February, early March, 105th aircraft participated in air search activities in search of a missing F-106 aircraft in the Adirondacks.

The 105th lost a veteran member of the unit as the result of the untimely death of Lt Colonel James T. Flynn.

Excellence of the 105th Tactical Clinic activity during the 79th Annual Meeting of the Society of Military Surgeons was recognized through a letter of commendation from the National Guard Bureau to MSGT Allen Siegel, Non Commissioned Officer in Charge for "superior performance."

Captain John T. Seddon was assigned

as the 105th's first Social Action Officer TSGT Francis C. Fernandes, and SSGT D. Katz were awarded New York State Commendation Medals for outstanding performance at the Air National Guard NCO Academy, Sgt Fernandes was selected as Honor Graduate; Sgt Katz as Outstanding Graduate.

Lieutenant General D. S. Sweat, Vice Commander, Tactical Air Command, visited the 105th, later reporting that he was pleased with the unit's combat readiness status.

The Air Guard Base at White Plains served again as the VIP host of New York, when members of the nation's First Family, Mrs. Nixon, and her daughter Mrs. Julie Eisenhower visited the facility on their way to the funeral of a Secret Service agent. The Security Police Section provided personal protection, traffic control, and escort duty for the members of the First Family during their brief stopover.

Support and cooperation with local law enforcement agencies included providing off-duty comprehensive tactical training for the Harrison and North Castle Police Departments.

In October, Lt Colonel Jack Goldman, Commander, 105th TAC Clinic, and Westchester County Health Commissioner addressed the New York State Senate, and Assembly Health Committees. He highlighted NYANG support of community projects and discussed potential and availability of resources for future support. Particular mention was made of low-altitude observation and communication capabilities.

### 106 FIGHTER INTERCEPTOR WING AND GROUP

The 106th continued its progress toward combat readiness as a member unit of the Aerospace Defense Command.

A grievous loss was suffered in the sudden and unexpected death of Colonel E. R. Weiler, 106th Wing Executive Officer, in March. Lt Col James F. Blake-Lobb was appointed to succeed the late Colonel Weiler.

Captain Richard Weissbard was recipient of a commendation letter from Major General K. L. Tallman, Commander, USAF Military Personnel Center, citing his efforts and accomplishments as personal family contact officer for Mrs. Eileen Cormier, wife of SMSGT Arthur Cormier, a POW since 16 Feb 1966. Endorsements were also received from Major General I. G. Brown, Major General John C. Baker, Major General Raymond L. George, and Brigadier General John C. Campbell.

The 106th Group conducted an elaborate Armed Forces Day static display, with thousands of participants.

Lt Colonel John Padberg succeeded Lt Col L. C. Flanagan as Commander, 106th Combat Support Squadron.

The 106th inaugurated use of a new mess hall in June.

The "sex" barrier was broken in in NYANG years ago, and today there are a number of "WAF's" in various units. But the 106th is the only organization which can claim a WAF auto mechanic, Airman Leslie A. Wright, of Westhampton, L.I.

#### 107th FIGHTER INTERCEPTOR GROUP

The 107th completed its second year as an Aerospace Defense Command unit, flying the F-101 "Voodoo" fighter interceptor. The 107th operates on a 24 hour-a-day, 365 day-a-year alert as part of the North American Air Defense Command (NORAD). The unit received high commendation in October from 21st Air Division (ADC) Commander Major General Ray A. Robinson, Jr. for its participation in a NORAD-21st AD exercise. The 107th

provided all available operational ready aircraft(11)for 8 exercises. General Robinson's letter stated that the "107th had the best average operationally ready rate, and average turnaround time of all fighter units in the region." In September, 15 of 15 available aircraft fired and were qualified in exercises at Tyndall AFB, Florida.

The 107th lost a distinguished officer in July when Lt Colonel Joseph Fell was killed in an aircraft accident. Major Baer, the other crew member suffered a leg fracture on ejection but was rescued in Lake Ontario.

Headquarters ADC passed the 107th in its initial capability inspection in May, also in its capability and readiness inspection in December.

As of 31 December 1973, the 107th achieved the coveted C-2 status of combat readiness.

An ADC-NYANG community relations effort in March resulted in improved relations between the 107th and its neighboring communities. Six civilian leaders from Buffalo and Niagara Falls were taken by USAF aircraft to NORAD Headquarters, Colorado Springs for a complete briefing on the ADC mission, and the ANG role in it.

#### 108th TACTICAL CONTROL SQUADRON

The 108th is a unit of the 152nd Tactical Control Group, co-located at Hancock Field, Syracuse with the 174th Tactical Fighter Group. Its member units are the 113th and 128th Tactical Control Flights.

A highlight of the 108th's year was a visit to Hancock Field by a MAC C-5A, the world's largest aircraft. The C-5A unloaded all of the 108th's equipment, plus equipment of the 112th Tac Con Sq, PAANG, and the 152d Tac Con Sq. A total of 197,759 pounds of cargo was airlifted for use in exercise EXOTIC DANCER VI.

In October, the role of the 108th was enhanced when Major General Robinson, Commander, 21st Air Division and Lt Col Gaughan, Commander 108th, signed an agreement authorizing the 108th to control regular USAF aircraft assigned to the 21st AD. This gave the 108th the opportunity to control F-106's out of Griffiss AFB. The unit's performance was outstanding, and drew praise from pilots of the 49th FIS, USAF.

#### 109th TACTICAL AIRLIFT GROUP

The 109th celebrated its 25th anniversary as a NYANG unit in 1973.

Recognition of the 109th's outstanding role in disaster relief during the Elmira-Corning flood disaster of June 1972 came at a special ceremony at Albany in January, when Governor Rockefeller pinned New York State's Military Commendation Medal on Colonel Hemstreet, 109th Commander, for meritorious service.

The 109th suffered a serious loss by the sudden death of Lt Colonel George D. Quick, Base Supply Management Staff Officer. Colonel Quick died of a heart attack while giving the Memorial Day address at ceremonies in the city of Scotia. He was a charter member of the 109th.

In spite of difficulties presented in having only four aircraft instead of the programmed 6, the 109th achieved C-2 status during the year.

109th Commander, Colonel Stanley W. Hemstreet, received the Eagles of full Colonel in July.

The coveted Governor's Air Trophy went to the 109th for 1973. This represents the fifth time the unit has won the award, symbolic of NYANG's finest flying unit of the year.

#### 174th TACTICAL FIGHTER GROUP

Lt Colonel Norman Graves was appointed Commander, 174th TFGp succeeding Colonel Curtis J. Irwin. Colonel

Irwin remains as Base Detachment Commander.

C-3 status, sought for months because of handicaps of not having enough aircraft, was finally achieved in November. The 174th was one of a very few ANG units which had achieved C-1, only to have nearly half of its aircraft taken away for project "Enhance Plus."

CMSGT Donald R. Whiting, 174th Cam Sq., was named NYANG Airman of the year. Sgt Whiting also was a graduate during the year of the first class of the USAF Senior NCO Academy. This is a nine week course to prepare senior NCO's for positions of greater responsibility by improving and broadening their leadership and management capabilities and expanding their perspective of the military profession. He was one of three ANG NCO's in the 120 man class. Governor Wallace of Alabama cited Sgt Whiting for his achievement, and named him an Honorary Lieutenant Colonel, Aide-de Camp in the Alabama State Militia.

TSGT Donald Mula won the New York State Championship Rifle Match at Camp Smith-

The 174th was visited by Major General Levi Chase, Commander 9th Air Force in August.

Men of the 174th worked very closely with the Heart Association of Upstate New York in promoting understanding and interest in Cardiopulmonary Resuscitation (CPR), whereby individuals are capable of applying potentially life saving measures to stricken persons.

#### 152nd TACTICAL CONTROL GROUP

Joining other NYANG units, the 152d celebrated its 25th Anniversary in 1973. The Group participated in the JCS directed exercise, EXOTIC DANCER, along with Army, Navy, Marines, and USAF regular units. Men of the 152d also participated in EMBER DAWN VI, augmenting Alaskan

**VISITORS** — A fighter interceptor is on display for the public at Westhampton Beach.

**MECHANIC** — The first woman mechanic in the New York Air National Guard, Airman Leslie A. Wright.

**STUDENT** — SMSGT Patricia Hackett was the first New York WAF to graduate from the Air National Guard NCO Academy.

**ENLISTMENT** — Airman Patti Bellino is sworn in as a member of 106th Fighter Interceptor Gp, by Maj Marjorie Blake-Lobb.

Air Command Forces.

The 152d won the Commander's Trophy as the outstanding NYANG unit for 1973.

SMSGT Patricia Hackett, NYANG's senior female NCO, became the second WAF to complete both two week phases of the NCO Academy Leadership School. She also became the first NYANG enlisted woman to graduate from the ANG NCO Academy.

During the ice storm which devastated Long Island's northern shore in mid-December 73 and deprived that area of electric power, phones, etc., Colonel Saul and his men did an outstanding job of housing local people, providing emergency generators to vital community services, etc. Community leaders were high in their praise of the 152nd during this emergency

#### 201 WEATHER FLIGHT

In March, the 201st received notice that it had been selected as the Outstanding ANG Weather Flight for the year 1972. In a letter from Major General I.G. Brown, Director, Air National Guard, he said, ". . . recognition of excellence by the Commander, Air Weather Service is just one more indication of his intense interest in his ANG Forces."

"Please convey my congratulations to the 201st Flight for winning the Award and my best wishes for a bright future in this most important area." The letter was endorsed by Major General John C. Baker Chief of Staff to the Governor and by Major General Raymond L. George, Commander, NYANG.

The 201st moved from Zahn's Airport to Islip-MacArthur, Airport, Ronkonkoma, N.Y.

#### 213th ELECTRONICS INSTALLATION SQUADRON

The 213th experienced its second year in a row of no deficiencies in the annual no-notice inspection. The 213th's

mission is to attain and maintain an optimum effective capability to install and rehabilitate general communications-electronics and meteorological facilities.

#### 274th MOBILE COMMUNICATIONS SQUADRON

Annual Field Training took place at Bradley Field, Conn., when the unit was tasked to provide communications support for tactical mobile communications system for TAC fighter units. Remote relay sites were at Mt. Tom, Holyoke, Mass.; Brimfield Tower, Brimfield, Mass., and North Smithfield, R.I.

#### 552nd USAF BAND

The Band continues to be one of NYANG's best ambassadors with the New York State Community, largely because of its excellent leadership, and the highly qualified members. However, one of its major problems is getting new members. Despite this, the Band had an outstanding year. Among concerts played were; the Yonkers St. Patrick's Day Parade; Yonkers Loyalty Day Parade; Loyalty Day, and Memorial Day ceremonies at Massapequa, L.I. and other concerts in Lido Beach, L. I.; Tarrytown; Binghamton, N.Y.; State Fair; Port Washington; Brooklyn; and Roslyn. The Band performed at the 152nd Commander's Trophy Ceremonies at Roslyn, 1 December.

#### CHRONOLOGY OF HIGHLIGHTS

##### JANUARY

Colonel Stanley W. Hemstreet received the New York State Military Commendation Medal in January for the outstanding job done by the 109th during the Hurricane Agnes disaster in June 1972.

CMSGT Richard Kisling, Chief Master Sergeant of the Air Force, visited the 174th Tactical Fighter Group in January.

Hqs 152d Tactical Control Group hosted a planning meeting for exercise EXOTIC DANCER VI, AN/TPS-48 training and field training for calendar year 1973.

MSGT Antonio Belez, 274th Mobile Comm Sq was selected outstanding NCO of gaining Group, the 253rd Mobile Comm Gp, Mass ANG.

#### FEBRUARY

Hofstra University ROTC students begin using Roslyn ANG Station's wooded area for tactical training. Some 200 Explorer Scouts held their regional conference at Roslyn.

#### MARCH

O-2's of the 105th performed a State service by transporting cans of mushrooms, suspected of containing Botulin Toxins, to the N.Y. State Department of Health, Albany.

The 107th served its community in an unusual way in March by providing an emergency immunization program for students of Niagara-Wheatfields schools, when it was learned that the School Band could not make a scheduled European trip without being immunized against small pox. The 107th deployed two medical teams to the school's auditorium March 15th, and administered the necessary shots.

Canadian Forces Brigadier General G. Ross Truemner, Deputy Commander of the 21st Air Division, 21st NORAD Region, Hancock Field, visited the 107th in March.

The 109th Tactical Airlift Group received congratulations from TAC Headquarters on completing two years of accident free flying.

#### APRIL

Major Herb Rose of the 105th assisted a lost civilian aircraft in determining its position and effecting a safe landing.

Men of the 106th FIGp marched in a special parade in Riverhead in honor of returning POW Lt Commander Charles Zuhoski, from Jamesport, L.I. In addition, four F-102s of the 106th overflew the ceremony.

Generals Campbell and Hughes received Federal recognition as Brigadier Generals. General George received his Federal recognition as Major General.

152nd units completed their successful participation in Joint Chiefs of Staff (JCS) exercise EXOTIC DANCER on 10 April. This was the first time an ANG unit participated in a JCS exercise (other than on a token basis) since 1964. Operational effectiveness of radar was over 99%.

#### MAY

Aircraft of the 107th FIGp participated with USAF units in a 24-hour joint training exercise overflying parts of southeastern Canada and northeastern U.S. during 8-10 May. Exercise SNOW TIME was part of a continuing program to give NORAD and SAC units realistic training in air defense and strategic operations.

21st Air Division Commander, Major General James L. Price, was killed in an aircraft accident. Many NYANG units worked very closely and effectively with General Price during his command at Hancock Field.

In a special ceremony at Schenectady County Airport, five members of the 109th Tactical Airlift Group received awards for long and faithful service. The five Air Guardsmen's years of accumulated service totalled 90 years.

Eleven men of the 174th spent ten days at Ft. Bliss, El Paso, Texas during April, acting as a special fire protection team for the USAF and the Army during a joint military exercise, operation GAL-LANT HAND '73.

## JUNE

Cooperation between the 105th TASGp, NYANG, and the 102nd Engr Bn NYARNG was exemplified in a joint effort at Westchester County Airport in June. While NYARNG Heavy equipment was being used for grading the westerly side of the airport, 102nd engineers instructed personnel of the 105th Civil Engineering Flight in operation and maintenance of the machinery.

The 174th's Small Bore Rifle Team won the National Small Bore Meet.

Robert Radtke, of Syracuse, an electrical engineer for General Electric in Syracuse, was enlisted in the 174th Tactical Fighter Group as a Staff Sgt. The unusual aspect of the event is that Sgt Radtke, was talked into enlisting by his daughter, Airman Laurie Radtke, a 174th medical technician. Sgt Radtke has served previously with the USAF during the Korean conflict.

## JULY

An informal rocket firing contest between active duty Navy flying units and the 105th TASGp was conducted at Quonset, R. I. and the NYANG pilots took the honors.

## AUGUST

Colonels Stanley W. Hemstreet, Gaetano F. Marsella and Carl J. Sheusi were promoted to Colonel.

The 174th received a letter of appreciation from the National Guard Bureau for attaining allocated flying hour goals for FY 1973 in spite of loss of aircraft in support of project ENHANCE PLUS.

Lt Colonel Norman E. Graves was appointed Commander, 174th Tactical Fighter Group.

The USAF Aerobatic team, the "Thunderbirds" performed at a special open house, 25th Anniversary Air Show of the

109th Tactical Airlift Group, Schenectady County Airport, 19 August. The event was a great success. Instead of just appearing and doing their air act, members of the Thunderbirds became involved in community activities, visiting a hospital, and otherwise participating individually in the open house activities.

## SEPTEMBER

Demonstrating its role as a community resource in a rather different way, the 174th TFGp Civil Engineering Flight's crash rescue team provided emergency reserve for the Stock Car Race at the New York State Fair.

The Air Training Command's "Well Done" trophy went to 2nd Lt Francis P. McConnell while undergoing pilot training for the 174th TGFp at Laredo AFB, Texas. When one engine of a T-38 trainer flamed out while he was on a solo flight, he "exhibited outstanding presence of mind and superb flying skill, thus avoiding the loss of a valuable aircraft and personal injuries." The citation was signed by Lt. General William V. McBride, Commander of the USAF Air Training Command.

## OCTOBER

The 105th TASGp was cited by the Cerebral Palsy Association for its participation in voluntary projects.

The Boy Scouts of America, Westchester-Putnam Council, presented a plaque to the 105th in recognition of its support and service to the scouting movement during 1972-73.

MSGT Alvey J. Moore of the 105th TASGp received from Major General Raymond L. George, NYANG Commander, a citation for special achievement from the National Guard Association.

The 109th Tactical Airlift Group

was awarded the Governor's Trophy as the best flying unit in NYANG in 1973.

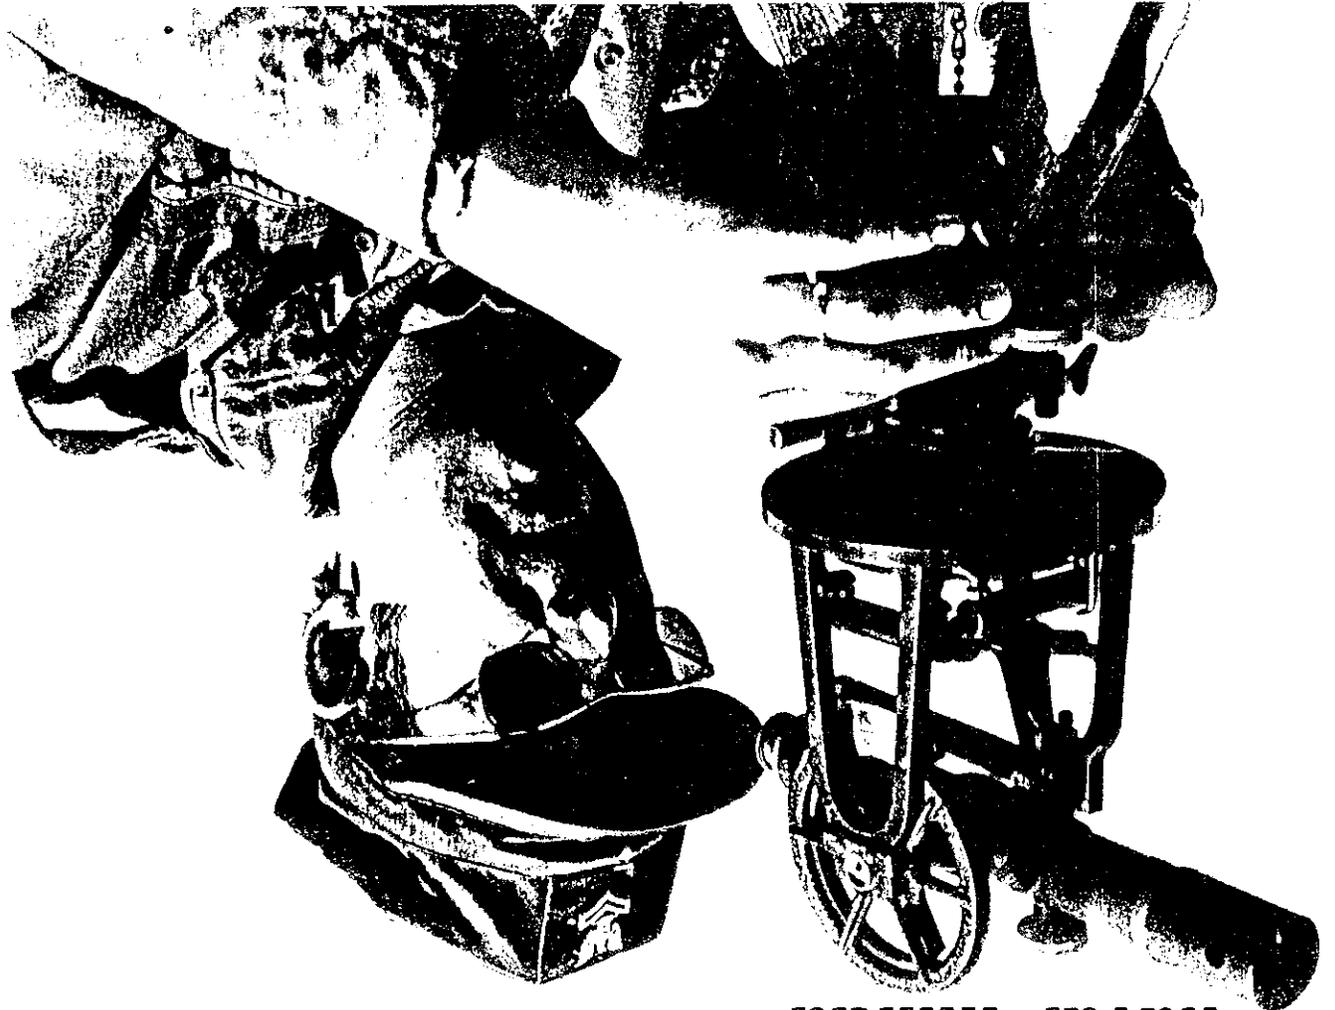

The 109th, and Jaycees of Scotia collaborated in a joint effort to take students from the Cobbs School in Altamont, N.Y. to Storytown, USA, at Lake George for a day of fun and entertainment.

#### NOVEMBER

NYANG's first female security police member is Sgt. Martha A. Vnek, of the 174th TFGp. A former regular USAF member, Sgt Vnek is a student of justice at Onondaga Community College.

#### DECEMBER

On 2 December a USAF C-141 Starlifter landed unannounced at Westchester County Airport and taxied up to the 105th TASGp ramp. The aircraft was there to pick up a load of electronic communications gear to airlift to UN force headquarters at "Kilometer 101" on the Suez-Cairo Highway, at the beginning of talks between Arabs and Israelis following the cease-fire of the October (1973) war. Lt Colonel Misevic coordinated loading and security, and provided 105th support for acquiring the materials, transporting it by surface, loading it on the C-141 and base security.

naval militia

## BACKGROUND

Traditionally and historically, following any major war or conflict, the drilling strength of reserve forces diminishes. With the advent of "No Draft" and the phasing out of the Vietnam Conflict, Recruiting and Retention in the Naval Militia became a major problem and our number one objective. Having survived since 1891, the Naval Militia endured many similar periods and toward the end of the year the on-board strength began to improve.

The Naval Militia, as a forerunner of the Naval and Marine Corps Reserve Programs, began again to emulate the same recruiting efforts following the Spanish American War, World War I and II and the Korean Conflict. With attractive drill pay, more productive two weeks training duty and training and rate structure that produced advancements, the Naval Militia was able to hold its own in the way of "On-Board Strength."

As Citizens of the State of New York, Naval and Marine Personnel of the Naval Militia continue to serve in a dual status. As professional military reservists they stand ready to serve either the President or the Governor in time of emergency.

## ORGANIZATION

The Naval Militia continues to function and operate under five major commands. The Northern and Southern Area

Commands primarily encompass the surface divisions. These are the Navy units that operate mainly at state armories and their members, in most instances perform their annual two weeks training duty as individuals. The Marine Corps Branch (MCB) makes up the second largest command and enlisted-wise, is composed mainly of individuals who have served six months of individual active duty for training with five and a half years remaining in a drill status.

The Fourth Command is made up of the Selected Reserve Crews that serve aboard the Naval Reserve Force ships stationed in New York. Incorporated within this command are members of the SAMAR units (Ship Activation Maintenance and Repair) and RUTU (Reserve Underway Training unit.) The sailors of the Reserve Mobile Construction Battalion (RMCB-19) constitute the fifth and last command. All of these men are professional veterans capable of immediate mobilization and deployment. The present strength of the Naval Militia is approximately 4,500 officers and men.

One of the initial actions taken by the Commanding Officer, New York Naval Militia, Captain James B. Reap, was disestablishment of the Brigade Command, on 30 September 1973. The object of this action was to streamline all units within the Southern Area and to bring complete control within the area's commander.

## MISSION AND PURPOSE

The Naval Militia's mission is two-fold.

First, it supports and plays a positive role in the training of U. S. Naval and Marine Corps Reservists, by providing armories and facilities for weekly, monthly drills and field training.

Second, Naval Militiamen, together with their brothers in arms, Army and Air National Guardsmen, stand ready to serve the State in emergencies involving natural disaster or domestic disturbances.

Purpose: To provide the citizens of the State of New York with a trained, experienced, professional Navy and Marine Force. This force stands ready to carry out its missions as listed and to make available for local communities, armory facilities for youth groups, high school students and other activities.

## TRAINING AND EQUIPMENT

The doctrine, as laid down in the Navy and Marine Corps Manuals, is completely utilized and implemented in the training of the Naval Militia. A major incentive in the Navy and Marine Corps Reserve program has always been advancements and promotions. By careful planning and counseling, enlisted men are guided through correspondence courses and classroom activities. Practical factors become part of a check-list while on training duty and once a man has served time in grade he is eligible for an advancement examination. The majority of Naval Militia Officers and men have accomplished an enviable record in being promoted. All the literature, record keeping - correspondence courses - training aids are furnished, at absolutely no cost to the State of New York. It can be said justifiably and proudly that all Sailors and Marines in the Naval Militia are well qualified and professional drilling reservists.

## FUNDING

Basically the maintenance and administration of the New York Naval Militia is supported by a combination of two State budgets, in addition to Federal funding support for operations, training and logistics. One, the State Purpose Budget which, involves the contribution solely from the State of New York, totals for the year \$310,939. The other, First Instance Budget, which is reimbursed by the United States Navy, comes to \$150,200. In essence, the complete operation of twelve (12) Naval Militia armories, one part-time and nineteen full time employees, comes from a total State Purpose Budget of \$310,939. which comes to less than \$.02 per citizen per year.

In addition to the salaries mentioned above, categories from State Funding also involve Capital Construction, Equipment, Travel and Contractual Services.

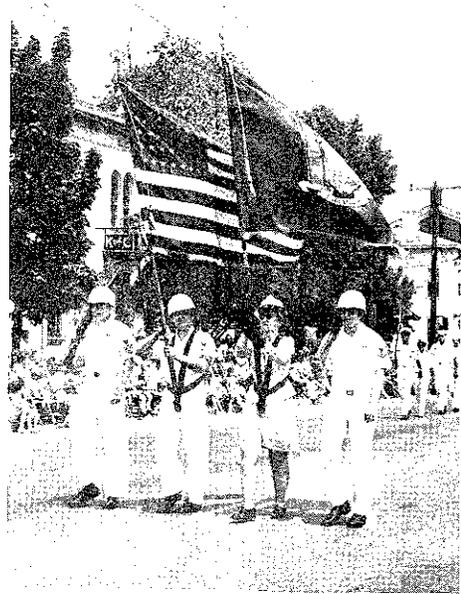

\$8,713,889 was provided in Fiscal year 72-73, by the Department of the Navy, in support of the New York Naval Militia for Armory Maintenance and Operation. Drill Pay, Training Duty Pay, Active Duty Personnel, Training Equipment and Logistics Support.

## COMMUNITY RELATIONS

Without soliciting or advertising, Naval Militia Armories that have the capabilities and facilities enjoy a unique role in community activities. Youth groups that are encouraged to use an armory have proved an asset to recruiting, Sea Scouts and Sea Cadets stationed in Naval Militia Facilities have often been a stepping stone to a Naval Career. Use of a Naval Militia Activity by adult groups has created a better understanding and knowledge as to what the Naval and Marine Corps Program is all about. Without interfering with the drill schedule and reserve training, no community activity has

**COMMENDATION** – Captain James B. Reap presents the New York State Military Commendation Medal to ENC J. R. Noble, Rochester.

**ON PARADE** – Div. 3-86 USNR/ NYNM, Oswego participated in Independence Day activities.

**VISITORS** – Observing week end training activities of NYNM Seabees at Camp Smith were (left to right) Cdr. Fred Anibal, Capt. James B. Reap, Col. Joseph A. Weigel, R. Adm. Philip V. King and Capt William F. Fichter.

ever been refused a license to utilize a State controlled Naval Militia Armory. Almost weekly a news report is released relating to the community support provided by the Naval Militia Sea Bees. This outfit will tackle and accomplish any job from hurricanes to rebuilding homes and scout camps in a professional manner.

### AWARDS

As an incentive for recruiting, attendance, advancement, retention and general overall efficiency, Naval Militia Units compete for several major prizes or awards during the year. Perhaps the major Naval Award comes in Federal Reserve Competition. This competition is based on both District and National Standing. For the last several years, in Naval District Competition, a Naval Militia Unit has finished among the top three in each category; namely large, medium and small units. Down through the years Naval Militia units have on several occasions been designated as number one in the country. Marine Units have also earned their share of recognition in reserve competition.

Sponsored and awarded solely by the Naval Militia is the Josephthal Trophy. The Burke Trophy and Gillies Trophy have their ground rules developed by the Navy and are awarded by the Navy. To enhance the degree of readiness in reserve competition both the Burke Trophy and Gillies Trophy are contributed by the New York Naval Militia.

### MAJOR COMMAND CHANGES

Operating on the Navy and Marine Corps Policy of changing unit commanding officers every two years, the Naval Militia experiences a tremendous turnover of command. This involves Officers-in-Charge and Control, Division and Company Commanding Officers, as well as Battalion Commanding Officers. The prime purpose of this rotation is to permit young, qualified, outstanding officers an opportunity to command. Both the Naval Reserve and Marine Corps Reserve have utilized this concept to the advantage of all personnel and by experience it has proved to be an asset.

On 15 July of 1973, the Commanding Officer of the Naval Militia, Captain Robert T. Connor, resigned and the following day, Captain James B. Reap, of Westchester, was appointed. Captain Reap, as the present Commanding Officer, brings to the Command, experience and exposure to the Naval Militia of almost seventeen years. He has been a Unit and Commanding Officer and Officer-in-Charge and Control of Naval Militia Activities. His active duty includes the Korean conflict and a wide variety of active duty for training.

Another major command change involved the southern area. On 15 November of this year Captain Bud Holman relieved Captain Albert Sobel as the Southern Area Commanding Officer, New York Naval Militia. Other major command changes are listed in enclosures to this report.

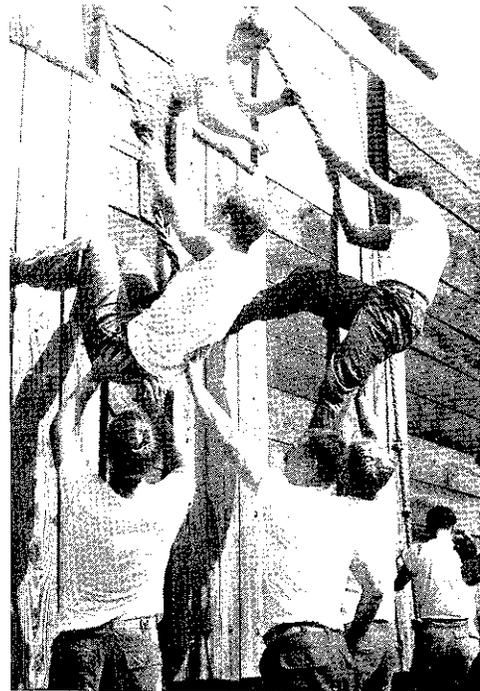

**FIELD RATIONS** — A NYNM “Seabee” tries a little nourishment at the Seabee Training Center Gulfport, Miss.

**LOADING** — Marines descend a cargo net to a landing craft during amphibious training.

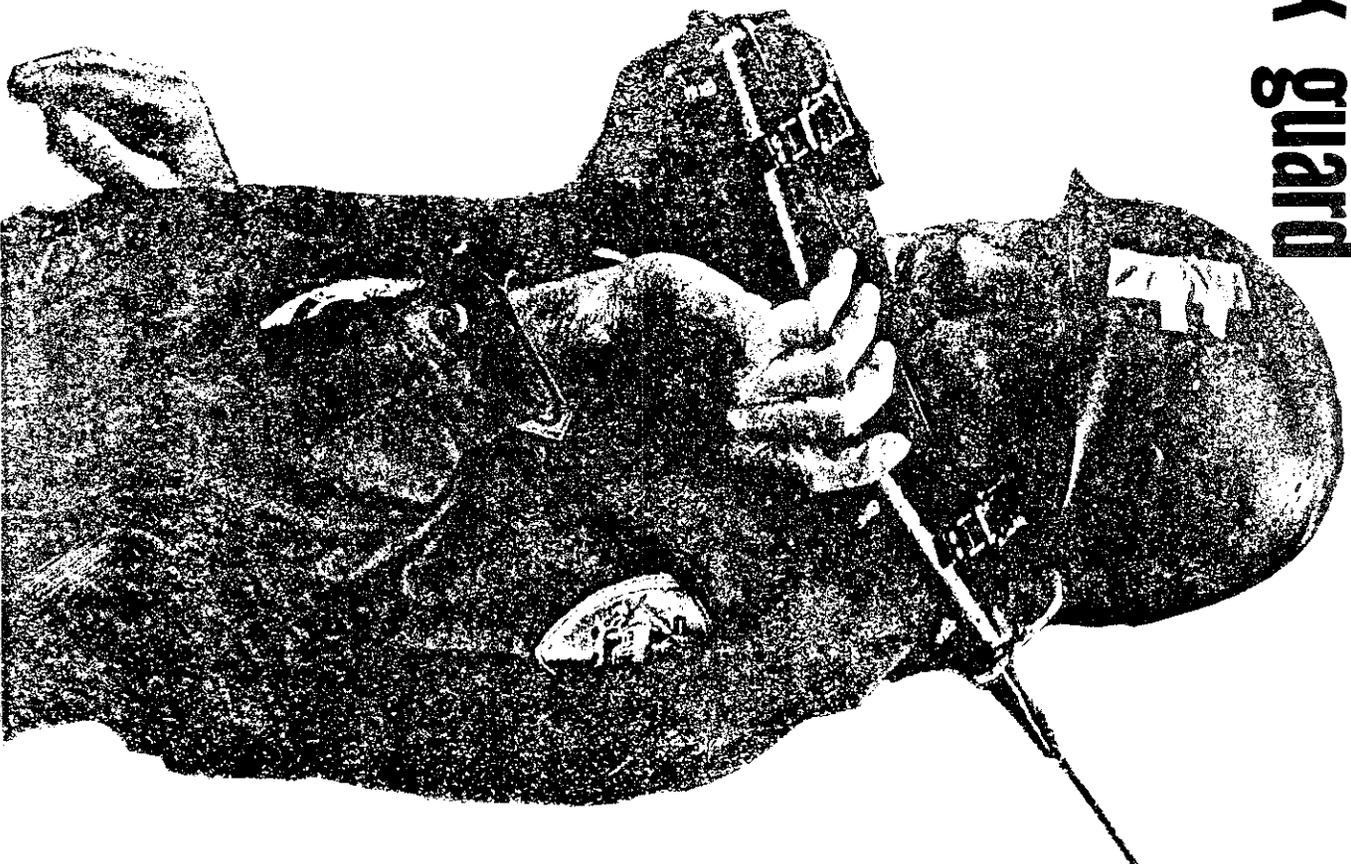

**ASSAULT** — Participating in an amphibious exercise, New York Naval Militia Marines hit a beach.

**PHYSICAL TRAINING** — Marines negotiate an obstacle course during annual training.

# new york guard

## ORGANIZATION

The New York Guard maintains a cadre force of approximately 620 Officers and Enlisted Men. Should an occasion arise requiring mobilization of the organization to full strength, the number could be increased promptly to approximately 11,000 officers and enlisted men by authority of the Governor. With its Headquarters in Albany, the New York Guard maintains at least one cadre unit in each of the 75 State armories.

## TRAINING

The Commanding General of the New York Guard conducted an Administrative and Training Conference on 25 February 1973 at the Washington Avenue Armory, Albany, New York. Thirty-five officers representing Headquarters, New York Guard and each Regimental Headquarters attended the conference. The purpose of the conference was to discuss and initiate action to resolve the following primary areas of concern:

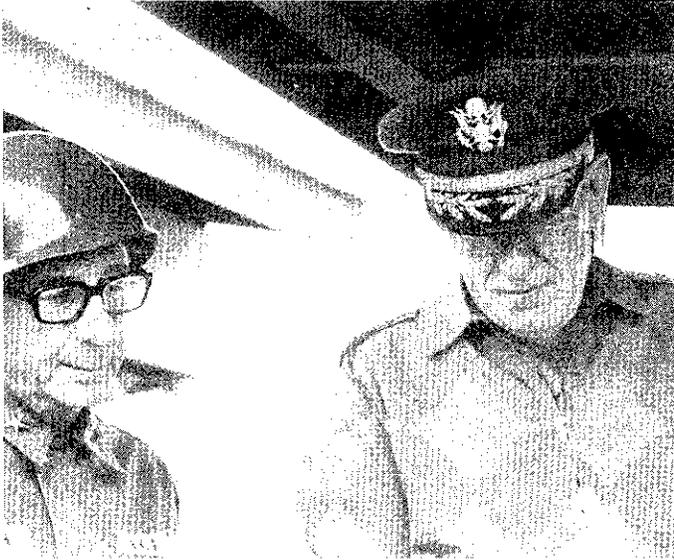

- a. New York Guard Cadre and Mobilization Missions.
- b. Recruiting and Retention Programs.
- c. Establishment of a new

uniform master training program.

- d. Desired NYARNG participation during NYG Annual Training at Camp Smith, Peekskill, N.Y., 15-16 September 1973.
- e. Announcement and issue of publications effecting various administrative procedures.

The Annual Active Training was conducted 15-16 September, at Camp Smith, Peekskill, with 315 Officers and Men attending. This year's training program included a field training exercise. The purpose of the exercise was to emphasize the following:

- a. The organization of a Task Force.
- b. Conduct of ground reconnaissance.
- c. Setting up defense perimeters.
- d. Posting of grounds, buildings, bridges, etc.
- e. Offensive movement and the conduct of the Task Force.

**COMMAND CONFERENCE** — MG John C. Baker (center) and BG Amato A. Semenza study plans of tactical exercise at Camp Smith.

**MOVEMENT** — Troops involved in Camp Smith exercise prepare for next phase of operation.

**NEW GENERAL** — BG Ross A. Griffen (center) is congratulated by MG John C. Baker, on his promotion as MG Andrew J. Malatesta looks on.

**COMMUNICATIONS** — Units participating in training are coordinated by radio.

- f. Communications
- g. Procedures for searching of buildings, etc.
- h. Setting up observation posts.
- i. Establishment of Command Post.
- j. Gathering of intelligence information.

On 15 September at Camp Smith, the Military Support to Civil Authorities Section of the NYARNG conducted a Civil Disturbance control training program for New York Guard personnel. The three hour program consisted of lectures, conferences, and demonstrations of civil disturbance control operations and equipment. The objectives of the program were as follows:

- a. To orient personnel of the New York Guard on organization and concepts of civil disturbance control operations.
- b. To acquaint New York Guard personnel on the principles and techniques of employment of personnel in civil control operations.
- c. To familiarize personnel of the New York Guard with various types of equipment used in civil disturbance control operations.

The New York State Police, also, conducted a very worthwhile demonstration on 16 Sep., at Camp Smith. The purpose of the three hour training program was to acquaint personnel with homemade bombs and incendiary devices.

Other training exercises NYG personnel participated in throughout the year were as follows:

- a. On 24 Mar., 18 officers and EM of the 2d Regiment observed a Civil Disturbance Training program by 1st Bn, 210th Armor NYARNG, at Schaghticoke, N.Y.
- b. On 14 and 15 April, a total of twenty officers and men, of the 2d Bn, 9th Regiment attended a CPX at the State Armory 2366 - 5th Avenue New York, N.Y. The CPX included administrative classes, first aid and rifle instruction.
- c. On 22 May, twenty officers and men attended a four hour CBR refresher course at the Headquarters of the 56th Regiment.
- d. On 9 and 10 June, the Guilderland Rifle Range was used by the 1st and 2d Bn, 2d Regiment for rifle and pistol familiarization.
- e. On 21 Sep, several officers and men of Co D, 3rd Bn, 3d Regiment participated in a Civil Defense exercise held in Elmira, N.Y.
- f. On 11 Dec and 18 Dec, the 2d Bn, 74th Regiment held classes on Riot Use of the Combat Battalion.
- g. Training in pistol marksmanship was given at the Freeport Armory on the first and second Wednesday of each month, in which many offi-

cers and men of the 14th Regiment participated.

- h. In early spring several members of the 2d Regiment participated in field problems with Special Forces at Nassau, N.Y.
- i. A total of 31 officers completed various Army Correspondence Sub-Courses, in conjunction with the established Army Correspondence Program, to further their military education.

## COMMUNITY ACTIVITIES

2d Regiment – Personnel of the 2d Regiment participated in many events during 1973. The 2d Regt Color Guard, Co. E 1st Bn participated in various activities at Albany, Hoosick Falls and Rensselaer, Personnel also participated in the Memorial Day and Veterans Day Parades in Albany. Major Libbey, Cdr, 2d Bn, 2d Regt. was the Chief of Staff of the latter parade and Maj. Ryan represented COL Sillery at the banquet held for civic and military officials. During January several members of the Regt acted as honorary guards at the Cerebral Palsy Telethon in the Washington Avenue Amory, Albany.

3d Regiment – Personnel of the 3d Regt acted as Division Marshals for Memorial Day Parade in Syracuse. General Tasker was on the Reviewing stand and other personnel participated in the parade. Personnel of the Regt also acted as Division and Parade

Marshals in Binghamton. In Sennett, N.Y. members of the 3d were judges for the Firemen's Parade. In Syracuse the Regt participated in the Veterans Day Parade and in services on Armistice Day. In still another activity, they helped the American Legion with a Christmas Party for underprivileged children in the area.

9th Regiment – Personnel of the 9th Regt attended the Old Guard Ball on 27 Jan. Several officers made the 55th Annual Memorial Pilgrimage to Sleepy Hollow Cemetery to honor the men of the First Provisional Regiment of the New York Guard. On 13 May many officers and men participated in the Martin Luther King memorial parade in New York City. On 10 June, personnel of the 2d Bn, 8th Regt, participated in the "Harlem Children Day" parade, and presented toys and games to the children.

14th Regiment – The year 1973 was a very active one for personnel of the 14th, which participated in the Grand March at the Old Guard Ball in New York City, and the Armed Forces Day Parade. The 3d Bn provided the Color Guard for the NYG at this event. The Regiment also held its annual Christmas party in conjunction with the 242d Sig Bn, NYARNG, for underprivileged children at Hempstead. Personnel of the 3d Bn, 14 Regt participated in the Annual Memorial Day services and parade in Flushing. The 3d Bn also participated in the Annual Martin Luther King Memorial Day Parade in NYC.

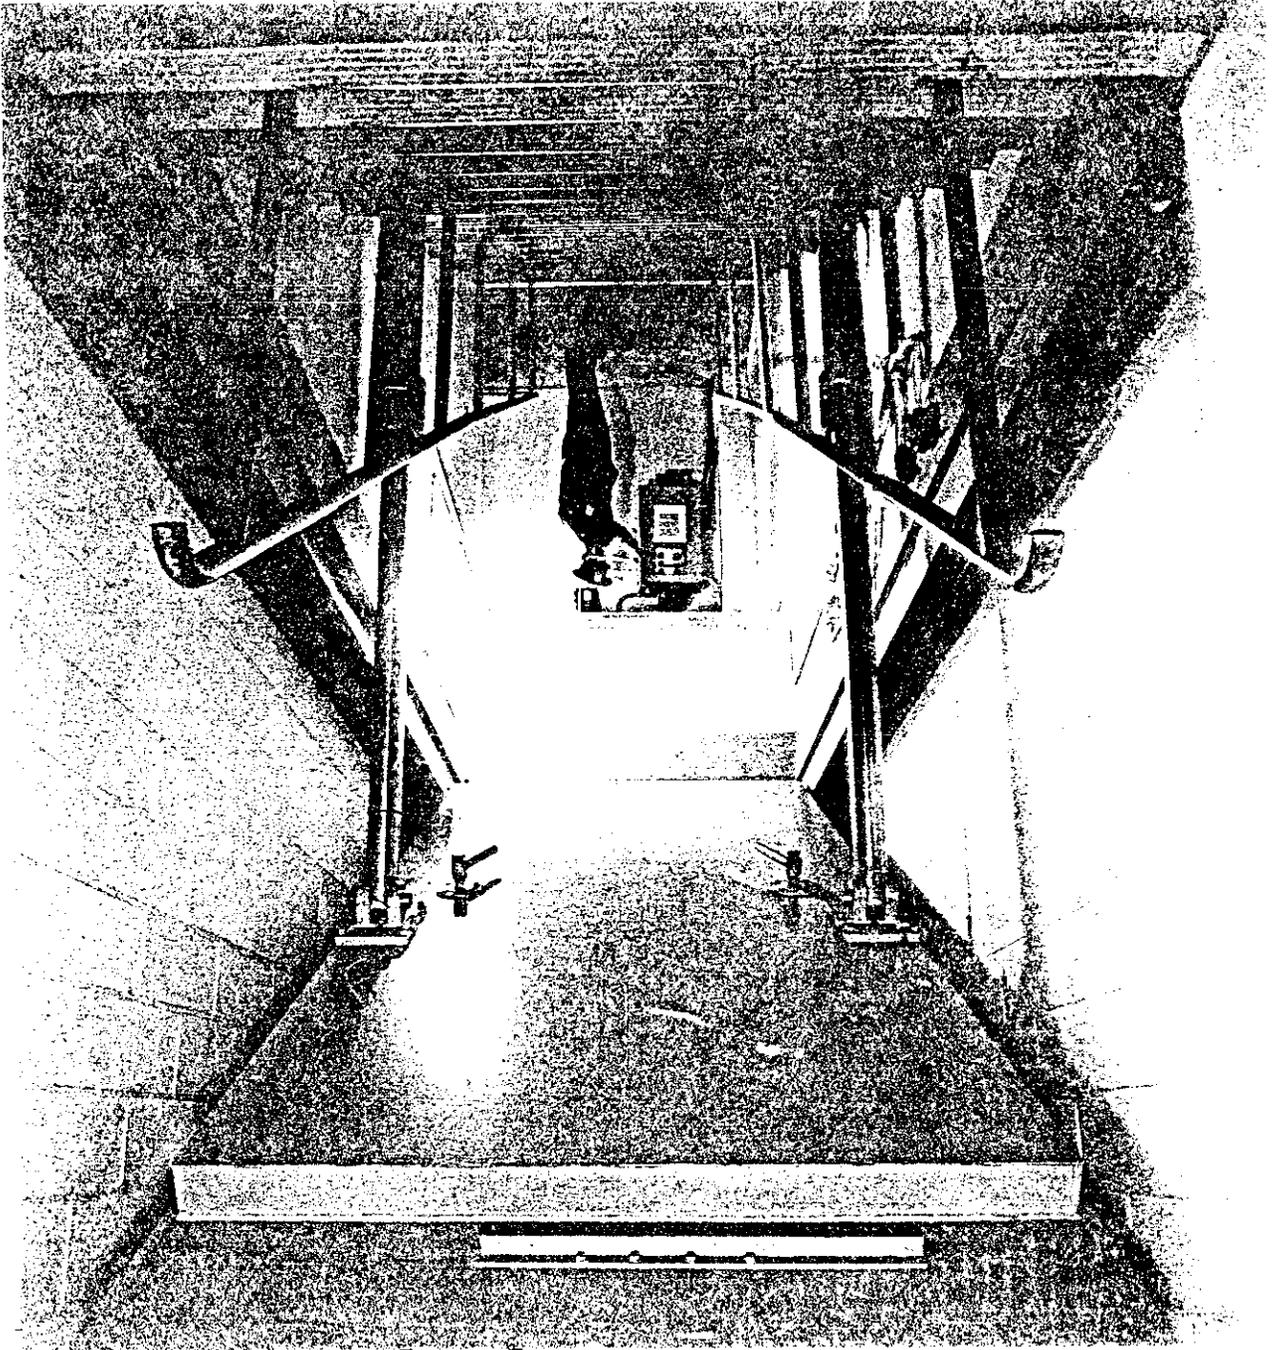

56th Regiment – Personnel of the 56th Regt participated in the Armed Forces Day Parade in New York City

and the Memorial Day Parade in Peekskill. Personnel of the 2d Bn participated in the Fourth of July Parade in Poughkeepsie. Several officers and men gave instructions to the Junior Marines on the rifle range and in other military areas.

74th Regiment – Personnel of the 74th Regt participated in many events in their area. Various officers of the command reviewed and judged Memorial

Day Parades at Blasdell and Williamsville. COL Rapp and other officers of the 74th reviewed the American and Polish War Veterans Parade at their International Convention held at Fort George. Officers of the 74th attended a military ball welcoming the 106 Field Artillery back to Buffalo. Several officers also attended the Armed Forces Day luncheon in Buffalo. On 9 Dec 73, 2d Bn, 74th Regt, again held its annual memorial observance of Pearl Harbor Day.

**Office of disaster preparedness**

## DISASTER PREPAREDNESS

### ORGANIZATION AND MISSION

Pursuant to Chapter 931, Laws of 1973, responsibility for the State's disaster preparedness program was assigned to the Division of Military and Naval Affairs effective 1 October 1973. The principal provisions of Chapter 931 include:

1. Amendment of the State Defense Emergency Act (Chapter 784, Laws of 1951, as amended) to transfer the State Civil Defense Commission from the Department of Transportation, to which it had been transferred by Chapter 73, Laws of 1971, to the Division of Military and Naval Affairs.
2. Designation of the Chief of Staff to the Governor as Chief Executive Officer of the Civil Defense Commission, to exercise all functions, powers, duties and obligations of the State and Civil Defense Director.
3. Transfer to the Division of Military and Naval Affairs of functions which had been transferred to other State agencies by Chapter 73, Laws of 1971.

4. Assignment to the Division of Military and Naval Affairs of the responsibility for formulating a plan for the coordination and integration of Federal, State and local assistance in event of a natural or man-made disaster.
5. Amendment of Section 10 of the Executive Law to designate the Division of Military and Naval Affairs as the State natural and man-made disaster coordination agency.

The functions related to natural and man-made disaster response and to civil defense were integrated within the program structure of the Division as a separate subprogram, the Office of Disaster Preparedness. Civil service employees performing civil defense duties in the Department of Transportation, Division of Military and Naval Affairs and Office of General Services were transferred to the Office of Disaster Preparedness. Existing appropriations and Federal contract funds supporting various program elements were also transferred, and an additional appropriation was provided for the period 1 October 1973 to 31 March 1974. This permitted modest expansion of the staff, including reopening the six Civil Defense District

Offices (Batavia, Glens Falls, Newark, Oneida, Oneonta and Poughkeepsie) which had been inactivated in April 1971.

## MAJOR DISASTER ASSISTANCE

A continuing function of the Office of Disaster Preparedness is assistance to applicant political subdivisions and State agencies in obtaining Federal disaster assistance under Public Law 91-606, the Federal Disaster Relief Act of 1970. As of 31 December 1973, four Presidential major disaster declarations were in effect in New York State. Two of these resulted from disasters prior to 1973; tropical storm Doria in August 1971 and tropical storm Agnes in June 1972. In March 1973, flooding along the shores of Lake Ontario caused extensive damage to lake front property. In June 1973, heavy rains caused flooding in six counties in the Hudson River Valley and Catskill Mountain areas.

The functions of the Office of Disaster Preparedness include evaluating information concerning the emergency situation, coordinating State agency assistance, advising political subdivisions on procedures for requesting Federal assistance, evaluating requests to the Governor for a request by him to the President for a major disaster declaration under Public Law 91-606, recommending to the Governor whether such a request should be made and obtaining necessary supporting data, conducting briefings for applicant political subdivisions if a major disaster is declared, coordinating damage surveys, reviewing and processing project applications, assisting applicants to prepare project applications and other documentation, processing Federal payments, assisting applicants with appeals and requests for time extensions, coordinating final inspections, audits and payments, coor-

inating State and local actions with the Federal Disaster Assistance Administration, and furnishing such other assistance as may be required.

The status of the four major disasters is summarized in an inclosure to this report.

In addition to the four major disasters, a number of lesser emergencies occurred during 1973, including windstorms, ice jams, tornadoes, water system breaks, sleet storms, power failures and localized flooding. Most of these required only local response, with the Office of Disaster Preparedness monitoring the situation in the event State or Federal assistance became necessary. In several instances, State resources were utilized to provide technical advice and assistance. In the storm of 16 December 1973, which caused power outages on Long Island, State Department of Transportation provided crews to assist local governments to remove trees and debris. The Division of Military and Naval Affairs and other State agencies made available facilities to shelter homeless persons. During 1973 equipment from the State civil defense engineering stockpile was loaned to political subdivisions on twenty occasions.

## FEDERAL CIVIL DEFENSE FINANCIAL AND PROPERTY ASSISTANCE

Federal civil defense financial and property assistance programs are designed to assist States and political subdivisions to attain and maintain their operational readiness. These programs are administered for the Federal Government by the Defense Civil Preparedness Agency, and for the State by the Office of Disaster Preparedness. The State, and the 75 local Offices of Civil Defense established by law, are

eligible applicants under these programs. During 1973, Federal assistance was provided under the following programs:

1. Personnel and Administrative Expenses – The State and 41 local Offices of Civil Defense are eligible for Federal reimbursement of 50% for salaries of civil defense employees and administrative expenses. Federal funding in 1973 was \$2,380,873.
2. Systems Maintenance and hardware – Matching funds under these programs are for annual recurring and maintenance costs for civil defense warning and communications systems and for the procurement of emergency equipment. Federal funding in 1973 was \$590,553.
3. Excess Property Loans – To reduce expenditures for the purchase of equipment, the Federal Government will loan appropriate equipment for up to five years. During 1973, equipment valued by the Federal Government at \$5,893,420. was loaned to local Offices of Civil Defense in this State.
4. Surplus Property – Surplus property donations of major equipment have been reduced substantially, since much of the major equipment which is usable is now obtained through excess property loans. Nevertheless, surplus property valued by the Federal Government at \$1,148,977 was obtained for Civil Defense use. During 1973 elements of the Federal medical stockpile were also made available as surplus property as a

result of a policy decision to disband the stockpile. The State obtained 48 Federal Packaged Disaster Hospitals and eight rotation stock units, valued at \$1,225,194. These were allocated to the local Offices of Civil Defense which had been serving as custodians under the Federal pre-positioning program.

5. Contracts – Federal funding is provided under contracts between the Defense Civil Preparedness Agency and the Office of Disaster Preparedness for the Community Shelter Planning program and the Radiological Maintenance and Calibration program. During 1973, the Federal Government provided \$92,263. and \$202,970., respectively.

## PLANNING

A major program designed to help communities help themselves is the On-Site Assistance program, a joint Federal-State effort to analyze local capabilities and recommend appropriate local actions. Local Offices of Civil Defense are selected for this program on the basis of level of civil preparedness efforts, disaster hazards, and expressed desire to participate. The program is initiated with a joint Federal-State briefing of the responsible local chief executive and his civil defense director. Preliminary analysis is made of the area and its resources and a schedule of interviews with local governmental and nongovernmental officials is developed. During the survey phase, Federal and State personnel interview the local officials to ascertain their roles in the local preparedness program their understandings of

hazards which the local area may expect to face, and their views on required actions. A summary and recommendation report is then prepared by the personnel who conducted the interviews. This report is furnished to local officials for review in terms of future actions. An Action plan is then developed, based on the recommendations found by the local officials to be most pertinent and useful in terms of what they feel realistically can be accomplished. A schedule for carrying out the actions is established, and periodic follow-up is made regarding implementation.

During 1973, surveys were conducted in five counties, (Chemung, Seneca, Steuben, Warren and Washington). Five summary and recommendation reports were submitted to county officials (Chemung, Otsego, Seneca, Steuben and Warren). One report (Washington County) is in preparation. Action Plans were prepared for three counties (Chemung, Otsego and Rockland) and are in preparation for two counties (Steuben and Warren).

Community Shelter Planning (CSP) involves an analysis of the fallout shelter resources of a county, as determined in the National Fallout Shelter Survey, as related to population, and the development of a plan for the utilization of the shelter resources by the population in an emergency. Step I of the process is the evaluation of shelter resources and population by local geographic areas. Step II is the development of the allocation and utilization plan and preparation of instructions to be issued to the public in an emergency. During 1973, seven CSP Step I's were in process (Allegany, Cortland, Delaware, Genesee, Steuben, Tompkins and Wyoming Counties); six Step II's were in process (Chenango, Fulton, Oswego, Otsego, Tioga and Warren Counties); and six

plans were completed (Clinton, Madison, Montgomery, Putnam, St Lawrence and Sullivan Counties).

## TRAINING

Training support is provided by the Civil Defense University Extension Programs which are Federally funded under contracts between the Defense Civil Preparedness Agency and Cornell University and New York University. During 1973, the Civil Defense University Extension Program personnel of these universities conducted seven natural disaster seminars, eight planning and operations courses, eight local and one State-level emergency operations simulation exercises, six conferences for public officials, six preparedness conferences for industry, and four miscellaneous courses.

## RADIOLOGICAL PROTECTION

During 1973, the Director of Radiological Intelligence prepared a number of operational and training documents, including:

1. Plan for Cooperation between Civil Defense, Civil Air Patrol and Red Cross.
2. Memorandum of Understanding between New York Wing, Civil Air Patrol, and New York State.
3. Technical reference data for radiological defense officers.
4. Appendices to Aerial Radiological survey plan.
5. Training material for aerial radiological survey activities.

As a result of Defense Civil Preparedness Agency (DCPA) plans to discontinue radiological training through the University Extension program and the Adult Education Program, provision was made in the instrument maintenance and calibration contract for funds in the amount of \$3,200. for reimbursement of local radiological instructors during the period January through August 1974. This funding for a Radiological instructor Reimbursement Program will be used to conduct training in those geographical areas where little or no radiological capability has been developed by a community to date, and in communities around a nuclear power plant.

Through the DCPA Home Study Course, Introduction To Radiological Monitoring, 35 students during the year completed the equivalent of eight hours of training leading to completion of the 16-hour Radiological Monitoring Course. Students who complete the home study course will be given, in the future, eight hours of practical classroom work on the use of instruments by a qualified local radiological instructor under the instructor reimbursement program. This home study training method reduces the number of hours required in classroom work by both the instructor and students. During the coming year emphasis will be given to accelerating the enrollment of local monitor students in the home study course and incorporating training on peacetime radiation accident and incidents in all radiological training activities. The new Radef I, II, and III training courses will replace the RMI and RDO courses for the training of radiological instructors and radiological defense officers.

During the year, approximately 1200 manuals, 10,000 forms, and 29 training films were distributed to local jurisdictions in support of training and operational requirements.

The Technical Support Branch of the Radiological Intelligence Section is responsible for the acquisition, periodic inspection, maintenance and calibration of radiological instruments which have been available on grant to the State of New York by the DCPA.

Utilizing Federal contract monies, the Technical Support Branch operation during 1973 was supported 100% by the Federal Government, in the amount of \$202,970. Under this Federal contract, local jurisdictions were able to employ part-time help at the rate of \$3.00 per hour to exchange radiological instruments at shelters and fixed monitoring stations (FMS) in accordance with schedules published by the State Office. Through this activity, known as the On-Site Inspection Program, approximately 7,000 shelter kits and 1,650 FMS kits were processed through the shop for maintenance and calibration; and inspections were made at 7,676 shelter facilities and 1,132 fixed monitoring stations in local jurisdictions to determine the readiness of radiological personnel, facilities, and instruments.

Since April 1972, the Technical Support Branch's Radiological Maintenance and Calibration Shop has completed the retrofit of 14,423 CD V-715 instruments which are placed in 2,393 FMS kits (CD V-777) and 10,637 shelter kits (CD V-777-1). As a result of the retrofitting operation, it is now possible to schedule mobile monitoring and shelter kits for maintenance and calibration once every 4 years instead of every two years. The hard core operational sets utilized for dual use purposes will continue to be serviced every two years. Throughout the State there are currently 27,105 shelter kits (CD V-777-1) and 4,677 fixed monitoring station kits (CD V-777) that will

**PRESIDING** — A meeting of the New York State Civil Defense Commission is conducted by MG John C. Baker and Mr. Arnold Grushky.

**EMERGENCY RATIONS** — An employee of the Office of Disaster Preparedness (ODP) checks condition of storage items in the Emergency Operations Center.

**STATE CIVIL DEFENSE COMMISSION** — Some of the members attending a meeting in the Emergency Operation Center, Public Security Building.

**DISTRICT DIRECTORS** — Newly appointed Directors of the six ODP districts are (left to right) Jerry D. Horton, Roger H. Winner, Marie E. Barbuti, Roy Erlandson, James H. Oliver and Joseph M. Broderick.

be affected by this improvement.

The DCPA Regional Office in June 1972 approved a new concept of distribution for the 17,430 shelter kits located in New York City. Since that time there have been 1,878 shelter kits removed from low-security fallout shelters for future stockpiling at centralized storage locations. Crisis Distribution plans have yet to be developed by New York City Civil Defense. Approximately 6,000 shelter kits will remain in place for dual-use purposes at schools, hospitals, fire and police stations and other public buildings. Of this total, 3,038 have been replaced with retrofitted shelter kits.

Computerization of data pertaining to each monitoring location will be accomplished by the National Civil Defense Computer Facility in conjunction with the inspection/exchange of equipment from each operational monitoring location or shelter. Data will be obtained in sufficient detail so that an analysis can be made of the operational capability available at each location. Eventually, the computer will be able to prepare radiological exercises involving these monitoring locations for testing by State or local jurisdictions.

Sixteen jurisdictions renewed their State radioactive materials licenses which enable them to process and use Cobalt-60 radiation source sets for training purposes. The Maintenance and Calibration Shop completed the replacement of fifty new Cobalt-60 sets that were over ten years old.

During the routine exchange of instruments, obsolete instruments were replaced on a one-for-one basis with current standard instruments from the State's float stock. The disposal of 600 obsolete radiological instruments has been accomplished by distributing them to educational institutions for use in school science classes.

The procurement of large quantities of new instruments from the Federal depots will no longer continue. Two of the three Federal depots were discontinued during the year, and as a result large quantities of radiological instruments were distributed by bulk allocation of each State. New radiological monitoring kits will be assembled from the State's instrument float stock upon approval from DCPA.

During November 1973, a new contract was negotiated with the Federal DCPA in the amount of \$142,302. for the period 1 January 1974 through 31 August 1974 which includes provision for radiological monitor training in addition to the periodic servicing of radiological instruments. Plans are to reimburse local instructors at the rate of \$7.00 per classroom hour to conduct various types of radiological training, for both monitors and radiological defense RADEF officers.

DCPA has also developed a new policy on types of monitoring stations which provides for "Radiological General Support Stations", or mobile radiological survey stations. In order to procure a radiological support kit for mobile monitoring purposes, the requirement for two radiological monitors has been reduced to one under the new criteria, and the PF requirements have been relaxed.

#### CIVIL AIR PATROL

In December an agreement was executed between New York Wing of Civil Air Patrol (CAP) and the State of New York to provide for cooperation and mutual support between CAP and DMNA. The agreement is designed to enhance the State's ability to carry out more effectively any emergency operations

involving search and rescue, natural disasters, enemy caused disasters or other emergencies.

During the year, 78 CAP members completed the 8-hour Aerial Radiological Monitoring Course, and one aerial survey base was established in Clinton County bringing the total of CAP manned aerial survey bases to 26.

The annual CAP/CD Effectiveness Test was conducted on October 27 and 28. The Director of Radiological Intelligence prepared the exercise problems and plan. CAP personnel participated at the State EOC and throughout the State performing simulated missions in support of State and local CD requirements. Over 1100 CAP members were involved with their aircraft flying over 280 hours

on 256 sorties. CAP members operated 69 fixed radio bases and 92 mobile units. Missions included aerial radiological survey, photo reconnaissance for damage assessment, ground traffic movement surveys, cargo and passenger transport, and communications support of civil defense. The CAP organization again demonstrated its unique capability to perform emergency missions for State and local government whether in a wartime or natural disaster emergency.

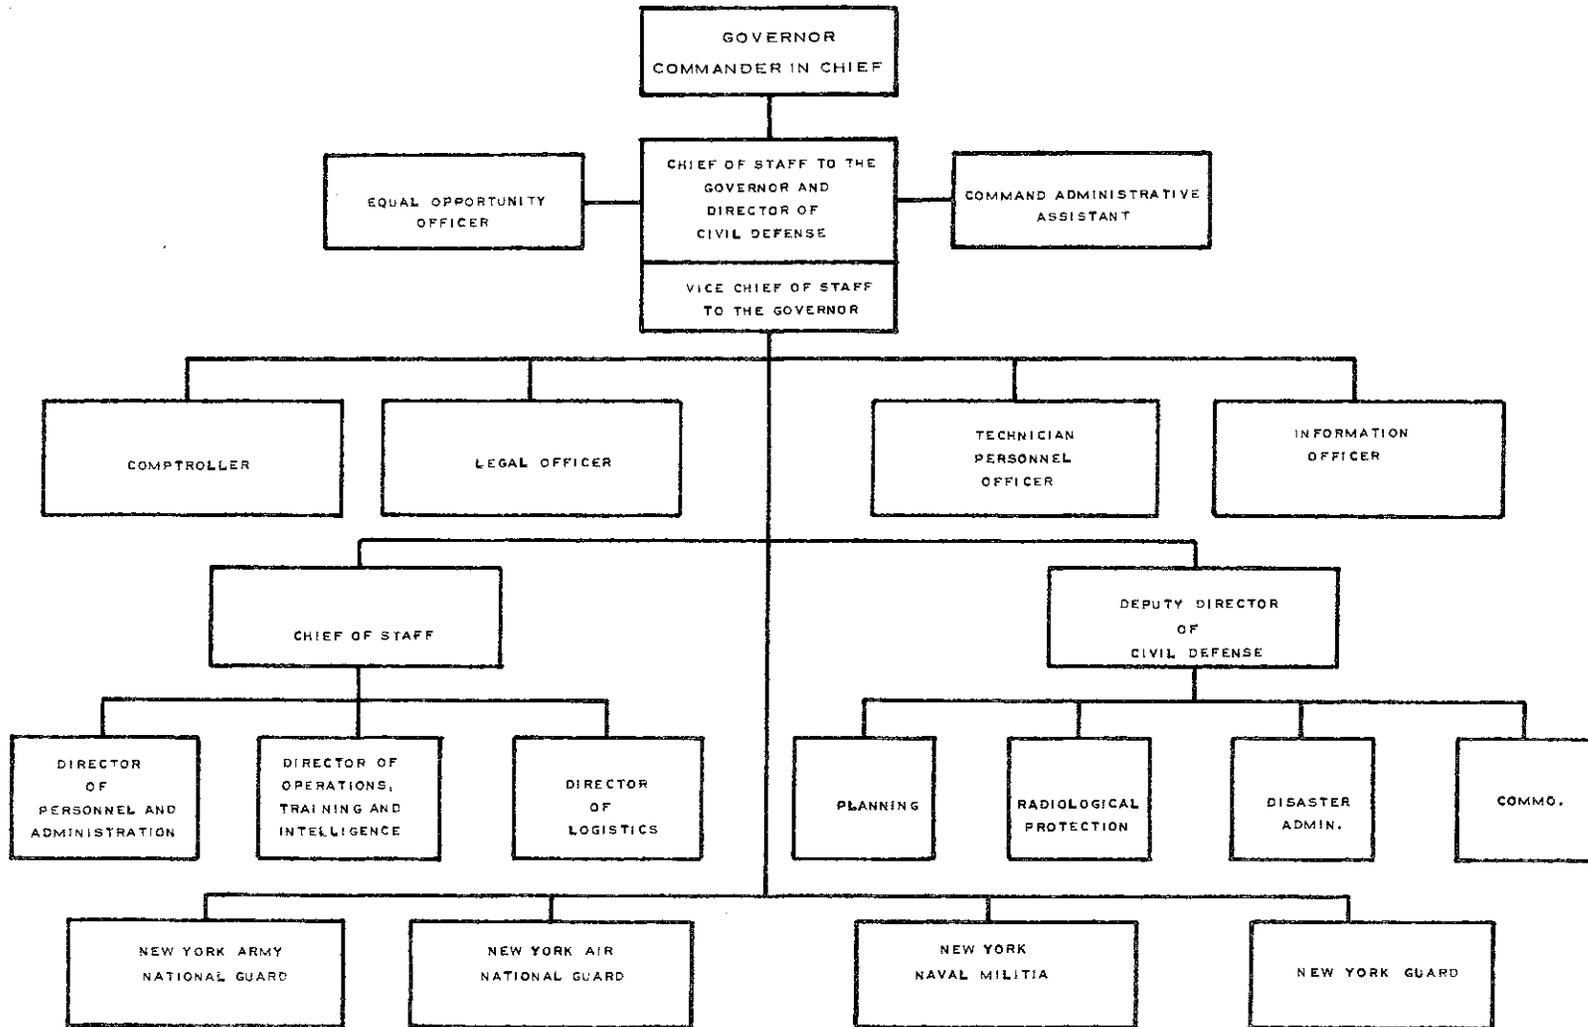

At years' end, resources of the CAP N.Y. Wing included approximately 2,100 senior members of which 1,112 are pilots. Also 1,770 cadets, 25 corporate aircraft, 293 member owned aircraft, 57 vehicles, 680 radio units, 26 aerial radiological survey instruments, and 97 sets of portable radiological survey meters.

**STATE MAINTENANCE OFFICE  
STATISTICAL DATA**

The total funds expended in support of the NYARNG maintenance program for repair parts and contractual repair were \$1,077,930.00 (Federal).

Densities of equipment having a high degree of maintenance significance and which require the major effort of the maintenance facilities are:

Surface Equipment (trucks, truck tractors, combat vehicles & engineer construction equipment	5,150
Electronic Equipment, radar, radio, etc.	12,406
Artillery Weapons	817
Small Arms	34,180
Vehicular Trailers	2,785
Sighting & Fire Control Equipment	5,922
Ancillary Equipment (generators, pumps, canvas)	12,604
Calibration Items	2,008
Chemical/Medical	24,339
<b>TOTAL</b>	<b>100,211</b>

Work performed by the three Combined Support Maintenance Shops during CY 1973:

<b>CATEGORY</b>	<b>WORK ORDERS COMPLETED</b>
Small Arms	13,538
Artillery	1,938
Instruments	4,408
Tank-Automotive	8,709
Electronics	6,651
