ARMY NATIONAL GUARD

INTRODUCTION

This annual report to Governor Hugh L. Carey for calendar year 1976 is required by Section II of the State Military Law. It covers activities, events achievements, statistical data and significant changes concerning the State Military Forces during 1976. These forces, under jurisdiction of the Division of Military and Naval Affairs, consist of the New York Army and Air National Guard, New York Naval Militia and New York Guard.

CHIEF OF STAFF TO THE GOVERNOR

Major General Vito J. Castellano was appointed by Governor Hugh L. Carey, as Chief of Staff to the Governor; Commander, New York Army National Guard; Chairman, New York State Civil Defense Commission; and State Director of Civil Defense on 25 December 1975.

DIVISION OF MILITARY AND NAVAL AFFAIRS STAFF

Staff sections in the Division of Military and Naval Affairs office serve in a dual capacity commensurate with the dual role of the Chief of Staff to the Governor and Commander, New York Army National Guard. Staff officers are

responsible for coordinating activities of all components of the State Military Forces and for direct staff functions with relation to the Army National Guard, through appropriate command channels.

For further information on DMNA structure and staff, see Inclosure 1, 2 and 3.

PERSONNEL AND ADMINISTRATION

The mission of this office includes the supervisory and administrative responsibility for all personnel actions applicable to the several components of the New York State Military Forces.

Statistical information reflecting the activities of this office are outlined in Inclosures 8, 9, 16 and 17 to this report.

OPERATIONS, TRAINING and INTELLIGENCE

The mission of this office is to coordinate all operations, training and intelligence activities as they relate to the State Military Forces. These activities, as pertain to the New York Air National Guard and New York Naval Militia, are delegated to these Force Commanders with information copies of major items furnished to the Operations and Training Directorate. This Directorate is responsible for staff supervi-

sion of all New York Army National Guard and New York Guard units with regard to organization, operations, training, intelligence, alert and mobilization, aviation activities, communications, qualification testing, schools, chemical, biological and radiological training and military support to civil authorities.

ORGANIZATION

There were no major reorganization changes to the New York Army National Guard in 1976. Those changes which took place consisted of minor activities such as change of location or consolidation of small company size units.

TRAINING

All units of the New York Army National Guard participated in the required Annual Training at various military installations such as Fort Drum, Camp Smith and the United States Military Academy at West Point, Out of state locations varied from Fort Bragg, North Carolina; Fort Pickett, Virginia; Fort Sam Houston, Texas; Red Stone Arsenal, Alabama; to Fort Dix, New Jersey.

Two units, the 646th Medical Company (Ambulance) and 138th Public Information Detachment, participated in the Joint Chiefs of Staff Exercise Brave Shield XV at Eglin Air Force Base, Florida, during the period 9-23 October 1976. Both units were highly acclaimed for their cooperative attitude and display of high professionalism in accomplishing each assigned task.

The majority of New York Army National Guard units now perform their Inactive Duty Training on weekends, using multiple unit training assembly concept. The mode of training results in more outdoor training on a year round basis. Training outdoors year round affords the units the opportunity to train in varied climatic conditions.

UNIT READINESS

The Joint Chiefs of Staff require each battalion and separate company of the military forces to submit biannually statistics on which to evaluate unit readiness to perform unit mission.

Of the 66 reporting units in the New York Army National Guard, four are considered fully ready. Eighteen units have met or exceeded their authorized level of readiness, as prescribed by the Department of the Army. Although not fully ready, this is an acceptable condition based upon factors beyond control or influence of the unit. Of the 44 units failing to achieve their authorized level of readiness, 41 failures were due to lack of equipment which is controlled by the Department of the Army. Two failed because of equipment serviceability and one due to low strength.

INTELLIGENCE

The Intelligence Section functions as a daily activity under the direct supervision of the Director of Operations, Training and Intelligence.

Liaison has been established and frequently coordinated with the various Federal Defense Investigative Services, Federal, State and Local Law Enforcement Agencies and contiguous states.

Information developed from these various sources is processed and mutually exchanged. During 1976, incidents and activities of the following nature were reported:

Demonstrations at DMNA Facilities	- 2
Thefts	- 16
Bomb Threats to DMNA Facilities	- 10
Damage or Forced Entry to DMNA Facilities	- 20
Accidents (Personnel, Automotive, Aircraft)	- 96

An additional function coordinated by the Intelligence Section was that of DMNA participation in our Nation's Bicentennial Celebration. Our State Military Forces supported 172 Bicentennial activities.

EMPIRE STATE MILITARY ACADEMY

On 20 August 1976, at impressive ceremonies conducted at Camp Smith, New York, the Empire State Military Academy graduated its 3,158th Officer and the 5,009th Noncommissioned Officer student.

Officer Candidate Janice E. Clement, RD #4, Troy, New York, the first woman applicant to be accepted for the Academy OCS Program, received her commission as a Second Lieutenant, Signal Corps, HHC, 205th CS Gp. Other women graduates of the first "co-ed" class were:

2LTDiana L. Martin, 1209th USAG,
USAR (Syracuse)

2LT Virginia Morrison, HHD, 1st
Bde, 98th Div, USAR (Schenectady)

2LT Catherine Rand, HHC, 411th
Engr Bde, USAR (Ft Totten
USARC)

The Empire State Military Academy, in its 25th year of operation, was accredited as a State Officer Candidate School on 14 December 1951 and is the primary source of officers for the New York Army National Guard. US Army Reserve members are also eligible to earn their commissions as second Lieutenants by completion of the Academy OCS program.

The current officer candidate program includes 452 hours of classroom instruction and practical exercises which require the candidates to train with the

Academy for two Annual Training periods of 15 days each and for 12 weekends throughout the year long course.

The 173 members of the Bicentennial OCS Class 1975-76 commenced their Phase I instruction at Camp Smith on 9 August 1975. The rigorous and demanding leadership and academic instruction reduced the class to the 103 graduates who received their commissions or certificates of eligibility on 19 August 1976.

In addition to the OCS Program, the Academy initiated a training program in 1956 to provide basic military leadership training for enlisted personnel who have potential to become noncommissioned officers. Referred to as the "ESMA NCO Course," 96 hours of intensive leadership and instructor training is provided during a 15 day Annual Training period at Camp Smith. 193 of 204 enlisted students successfully completed the course during 1976 and were awarded 20 promotion "points" toward their future promotions.

The OCS Class of 1976-77 reported for Phase I at Camp Smith on 7 August 1976. Of the initial enrollment of 175 candidates (168 men and 7 women), 158 candidates (152 men and 6 women) completed all Phase I training and were certified for Phase II, commencing 1 October 1976.

As of 31 December 1976, OCS Class 1976-77 consists of 139 candidates (133 men and 6 women) who are attending Phase II instruction at ESMA Branch Schools in New York City, Syracuse, Troy and Buffalo. It is estimated that approximately 110 will successfully complete Phase II and will be candidates for commission on 19 August 1977.

As a method to provide additional practical experience in military leader-

ship, the 1975 Academic Board authorized the Superintendent and the Commandant to utilize the Class of 1976 to receive and organize the Class of 1977. Phase III, or Senior, candidates were assigned to positions of command in the Phase I companies for the first three days of the Annual Training period. This operating technique was reviewed by the Academic Board at the Annual Meeting on 4 December 1976, and was approved for continuance and will become standard operating procedure for future classes.

The Academic Board has prescribed additional operational changes for 1977 to include:

a. Relocation of Branch School Nr 2 from 125 W. 14th Street, New York, NY to Camp Smith, effective 1 September 1977.

b. Operation of all Branch Schools on the following weekend schedule with overnight accomodation of candidates at ALL Branch Schools, effective 1 September 1977:

Saturday 1220 - 2200 hours
 Sunday 0730 - 1600 hours

c. The utilization of selected personnel from the Military Academy Section, HHD, NYARNG to supplement the operation of the Branch School at Camp Smith.

To support the Academy during Annual Training, 7-21 August 1976, at Camp Smith, NY, the Department of the Army and the National Guard Bureau provided additional Annual Training periods for 112 officers, 38 warrant officers and 272 enlisted personnel. A total of 28 first classmen of the US Military Academy were employed as Tactical Officers in the Officer Candidate companies.

Annual Training 1977 will be conducted at Camp Smith, Peekskill NY during the period 6-20 August 1977. Estimated student enrollment is:

Phase III, OCS Class 1977	- - - - -	110
Phase I, OCS Class 1978	- - - - -	250
NCO Course, 1977	- - - - -	300
Total (estimated)		660

MILITARY EDUCATION THROUGH SERVICE SCHOOLS

The Army School System is the principal means of individual education and training for all Army personnel. The school system provides a balance between the principal methods of educating military personnel:

On one side, resident instruction; on the other, education through troop on-the-job training, individual study, and information programs.

The purpose of the Army School System is to prepare selected individuals to perform those duties which they may be called upon to carry out in war or in peace; to conduct research; to participate in the formulation of military doctrine; and to promote the highest standards of military competence.

Each course presents a curriculum developed and approved by a service to meet a military educational and training requirement of that service. Many of these courses provide skills which may be utilized in development of civilian pursuits and employment.

Supervision of Army schools is the responsibility of the Training and Doctrine Command (TRADOC) located at Fort Monroe, VA. TRADOC exercises either individual or joint supervision over three colleges, sixteen branch schools and fourteen specialist schools operated by the Army and provides personnel for all joint service schools.

This program operates without cost to the State of New York. Funding, to operate these schools and to support attendance by members of the New York Army National Guard, is provided by the Federal government. During the current fiscal year, severe cutbacks in Federally supported programs have had a deleterious effect on the overall schools program. In order to insure equitable and efficient employment of the remaining funds, initial priority is being given to career development courses. Under normal circumstances, each functional training course

ANNUAL TRAINING

would be rated using the following considerations:

- Operational importance
- Mission support
- Complexity and difficulty
- Trained resource status
- Judgement

Unless Federal funds are at least partially restored, the long-range effect of such fiscal austerity will predictably be a gradually diminishing ability of units to adequately perform their missions. The trend, as evidenced by the following figures, is most obvious--fewer applicants can be accommodated, and the cost per capita, is on the rise.

During calendar year 1976, the Federal government adjusted the period which formerly encompassed its fiscal year. While Fiscal Year 1976 ended on 30 June 1976, Fiscal Year 1977 did not begin until 1 October 1976. In between was a separate fiscal period requiring separate budgeting--Fiscal Year 1975 marked this transition period.

At the close of Fiscal Year 1976, more than 860 members of the Army National Guard had utilized the Army School System, expending \$1,208,420 in Federal funds.

During the Transition period (1 Jul - 30 Sep 76), 135 members were accommodated, and \$384,450 in Federal funds were expended.

Since 1 Oct 76, and to the period ending 31 Dec 76, Fiscal Year 1977 funds in the amount of \$820,680 have been either expended or obligated to support this program.

COMPETITIVE MARKSMANSHIP PROGRAM

1976 marked the resurgence of the Competitive Marksmanship Program. While adequate funding is a problem, renewed statewide interest in the program and recognition of its inherent value as a retention and recruiting tool mandates support.

Utilization of indoor ranges in State armories, availability of small bore rifles and pistols, ammunition and allied equipment through federal supply channels enables conduct of the program with relatively small additional cost.

Among the several individual and team honors evidencing the quality and dedication of the people who make up the Marksmanship Program were:

SFC Richard A. Crawford, HHD, 106th Maint Bn - Selected as the National Guard representative on the All-Service Pistol Squad competing in the 1976 Summer Olympics at Montreal, Quebec.

NYS Composite Pistol Team - First Place in the FORSCOM Region I Matches, Ft Meade, Md.

M-60 Machine Gun Team (Co C, 1st Bn, 69th Inf) - First place in the 1976 Winston P. Wilson Matches, Camp Robinson, Little Rock, Arkansas.

Participation in such events as the Chief of the National Guard Bureau Indoor Rifle and Pistol Postal Match and the Governor's Trophy Match enables units to utilize the convenience of indoor facilities and the U.S. Postal System to compete at little cost to the State. The latter match pairs Junior Shooters (17 years of age and under) with active state militiamen in competition against similar teams, statewide, a most effective means of attracting young people into the State Military Forces.

An interesting aside is the continuing unit rivalry between 1st Bn, 69th Inf, NYARNG, and the 101st Inf, MAARNG, which dates back to Civil War days. The Logan-Duffy Rifle Match has been an "annual" on-again, off-again event since 1936 - - It is, nevertheless, a well-fired and fiercely competitive match, attested to by the fact that since 1936 the 69th has won the competition 15 times and the 101st 7 times. To the victor goes rotating

possession of a five gallon capacity silver bowl with matching tray, currently valued at over \$4,000. The 69th Inf has current possession of the trophy.

Future plans include reviving the Annual State Matches, to be held at Camp Smith, Peekskill, New York.

CHEMICAL - BIOLOGICAL - RADIOLOGICAL

During 1976, the Office of the Chemical Officer inspected the annual Civil Disturbance Training of seven of the Battalion size units in the state. All units inspected were rated as satisfactory or better and all units inspected were found to be ready to perform their civil defense mission.

At Fort Drum this year, for the first time, the annual CBR School was cut from the usual 80 hours to 40 hours. This change was well received by the units. The quotas for each period were filled and in some cases oversubscribed.

In the later part of the year, ten of the 13 Battalion CIP packages located throughout the state were inspected as to readiness, serviceability and training of the personnel in the use of this equipment. All packages inspected were found to be serviceable and ready for use.

ARMY AVIATION

Army Aviation in the New York Army National Guard has continued to increase in size during the past year. This has been due mainly to the increase in the number of Army Aviators assigned - year end strength being 232 aviators assigned or in final process of being assigned.

The major programs, in addition to maintenance of normal flying skills by individual aviators, consisted of initial helicopter instrument training for newly acquired personnel, requalification for all those previously qualified and continuation of initial qualification in Nap-of-the-Earth Flight (flight below treetop levels). Yearly requalification is an ongoing requirement for both instrument and Nap-of-the-Earth Flight qualifications.

A large effort has again been expended during 1976 in update of required aircraft modifications. Those programs started in previous years have continued to near completion during 1976, and a new program of depot on condition maintenance (OCM) has been implemented. This new program requires ferrying aircraft from New York State to Corpus Christi Army Depot located at Corpus Christi, Texas. Each trip for a helicopter has averaged from six to eight days of ferry time. Twenty-eight aircraft have completed this program.

At the end of 1976, New York Army National Guard has 122 helicopters and 3 twin engine fixed wing aircraft assigned. The maintenance required on these aircraft to keep them airworthy is performed by 156 Federal Civil Service employees. New York Army National Guard unit members, during their training assemblies, perform maintenance within their capability and available time under the supervision and instruction of the Federal Civil Service employees.

A total of 13,264 hours of aircraft flight time was performed in 1976 - an increase of 1600 hours over 1975.

The Army National Guard has an ex-

cellent aviation safety record of 2.78 aircraft accidents per 100,000 flight hours, as compared to Active Army's rate of approximately 13 per 100,000 flight hours.

LOGISTICS

The Logistics Directorate, consisting of four staff sections, also has staff responsibility for Camp Smith, Peekskill New York. The staff sections are: State Maintenance Office; Logistics Services Branch; Facilities Operations Branch; and Facilities Engineering Branch. Responsibility for the Office of the United States Property and Fiscal Office-New York, was removed from Logistics in January 1976.

The Director of Logistics is responsible for assisting the Chief of Staff to the Governor in matters pertaining to supply, maintenance, transportation, facilities operation, construction and community work programs.

Major activities included the following programs and projects, which are explained in detail in other sections of this report:

- Maintenance of Surface Equipment
- Security of Arms and Ammunition
- State Property Operations
- Increased Military and Community Use of Camp Smith

STATE MAINTENANCE OFFICE

The State Maintenance Office (SMO) is a Federally funded activity located in Building #4 of the State Campus, Albany New York, responsible for the operation of the Federally funded surface equipment maintenance program in the New York Army National Guard (NYARNG). The responsibilities of the office are accomplished by the State Maintenance Officer and a Staff of five personnel.

The State Maintenance Office has operational control of the following Federal Technician manned direct support

maintenance facilities:

Three Combined Support Maintenance Shops (CSMS's) located at Brooklyn; Camp Smith, Peekskill; and Rochester.

One Mobilization and Training Equipment Site (MATES) located at Fort Drum which has an organizational maintenance mission as well as a direct support maintenance mission for combat vehicles.

The SMO also provides technical assistance and guidance to forty-one (41) Organizational Maintenance Shops (OMS's) located throughout the State. Commanders within the Major Commands have operational control of OMS's. An inclosure to this report indicates the location of all maintenance facilities throughout the State.

A Command Maintenance Management Evaluation Team (COMET) Program was initiated in 1974 and has continued through 1976. The results of this program, provide Commanders and Supervisors at all levels, with an overview of the effectiveness of maintenance programs within their commands and focuses attention on local maintenance deficiencies which require special attention.

The mission of the CSMS is to provide direct maintenance support of federally funded materiel issued to units in the NYARNG which cannot be accomplished within the organic maintenance capabilities of the owning units. CSMS's provide direct support maintenance to assigned units within specified geographic areas of responsibility.

The MATES at Fort Drum, New York, is responsible for the receipt, issue, storage and maintenance of heavy construction equipment as well as combat vehicles authorized by the Chief, National Guard Bureau. This facility also issues equipment to out-of-state Army National Guard units, and U.S. Army Active and Reserve Components in the performance of training at Fort Drum. Use of MATES

equipment has become greater each year as a result of increased utilization of Fort Drum as a Weekend Training Site.

The primary mission of the Organizational Maintenance Shops (OMS's) is to provide Federal Technician backup organizational maintenance services and repairs to supported units in the NYARNG which cannot be accomplished within their military organic capability. Organizational repairs and services require no special tools or test equipment and are best described as being similar to those minor repairs and services performed at a commercial service station.

General maintenance guidance is provided to Major Commands of the NYARNG by the State Maintenance Officer and his Staff, through maintenance regulations, COMET feedback information, maintenance bulletins and reports/data developed as a result of frequently scheduled OMS visits by the Organizational Maintenance Officers.

To further enhance the maintenance program and improve the management of available maintenance manhours, each Organizational Maintenance Shop accounts for, on a Maintenance Request, all man-hours expended, parts used and total cost of each repair or service.

A State Maintenance Office organizational chart and statistical data relating to State Maintenance activities are shown in inclosure to this report.

FACILITIES ENGINEERING

The Facilities Engineering Branch is responsible for design, contract administration and construction at all Division of Military and Naval Affairs facilities except Air National Guard Bases. In addition, a wide range of technical assistance

is provided to the Division of Military and Naval Affairs staff and to all facilities, including the Air Guard Bases.

A major accomplishment this year was the award of contracts totaling over a million dollars in Federal funds for construction of Combined Support Maintenance Shop "B" at the Staten Island Armory.

State funds were appropriated by the Legislature for 5 Capital Projects at an estimated cost of \$699,000 and for 9 Rehabilitation Projects at an estimated cost of \$250,000. This level of funding is not considered adequate to accomplish all work necessary to preserve Division of Military and Naval Affairs facilities in good condition. It definitely does not provide the capability for modernization and improvement. State Share and First Instance funds were appropriated in the amounts requested for Federally supported projects.

An expedited program of Intrusion Detection Systems and Structural Security Improvements at 29 Armories was over 90% completed by the end of the year. Start of construction of Combined Support Maintenance Shop "B", noted earlier, highlighted the Federally supported Military Construction, Army National Guard (MCARNG) Program. In addition to this project, numerous projects costing less than \$50,000 were designed and placed under contract.

Major emphasis was placed upon design of a proposed \$2,300,000 Army Aviation Support Facility at the Albany County Airport. Preliminary and final design stages were completed and bid documents in preparation for bidding early in 1977.

WEEK END TRAINING

Emphasis was also placed upon completion of design for projects scheduled for contract award early in 1977. These include Organizational Maintenance Shop (OMS) Enclosures on Drill Halls of Armories at 1322 Bedford Avenue, Brooklyn; and 1402-8th Avenue, Brooklyn and 184 Connecticut Street, Buffalo, as well as OMS Additions at Camp Smith. These projects are all estimated to be in the \$100,000 price range. Design started for other Minor Fiscal Year 1977 projects at various locations.

Start of a proposed Army Aviation Support Facility at MacArthur Airport and two projects at Fort Drum (Combined Support Maintenance Shop and Unit Training Equipment Site) was delayed pending resolution of real estate and other program problems. Nevertheless, Architect/Engineer Agreements were prepared between Division of Military and Naval Affairs and Office of General Services for approval by the National Guard Bureau early in 1977. Detail design data was developed by Facilities Engineering for Office of General Services use in preparing project plans and specifications. The goal is to award construction contracts for these three (3) projects in the latter part of 1977 at a total estimated cost of about \$4,000,000.

In the latter part of 1976, the National Guard Bureau initiated a crash program to improve the Intrusion Detection Systems protecting Armories and Logistical Facilities. Facilities Engineering started initial phases of design and will continue with in-house design and contracting procedures for award of contracts as early in 1977 as possible. This will be a program of considerable magnitude, involving over 70 locations at an estimated cost of \$500,000, 100% Federally funded.

Looking at longer range projects, design information was prepared for new

Organizational Maintenance Shops at Lockport and Farmingdale, both included in the Fiscal Year 1978 Federal Construction Program.

In the early part of the year. A Grade 23 Senior Mechanical Engineer was terminated for Budgetary reasons. The Facilities Engineering Branch has now lost the services of a Senior Mechanical Engineer, two Assistant Architects and one Senior Clerk in the past several years. Despite this, in-house design work continued at a high rate to meet requirements. This was accomplished at the expense of field inspections which were not conducted as frequently as they should be. This lack of field information can be expected to have an increasingly adverse effect in the future.

Environmental matters continued at both the State and Federal levels. In compliance with a new National Guard Bureau Regulation, the Facilities Engineering Officer was appointed State Environmental Monitor. An Environmental Committee was also appointed to meet Federal requirements. On the State level, the State Environmental Quality Review Act became effective for State Agencies on 1 September 1976. A Division of Military and Naval Affairs implementing regulation was forwarded to the Secretary of State for promulgation and was issued to Division of Military and Naval Affairs elements for implementation.

The overall construction program handled by Facilities Engineering in 1976 included 108 projects awarded at a cost of \$2,243,941 and 114 projects completed at a cost of \$2,776,694. The number of contracts processed was considerably larger than the number of projects because as many as 4 contracts (Construction, Heating, Plumbing and Electric) are awarded for each project over \$50,000.

Details can be found in the "Statistical Data" inclosure.

Another inclosure, "Capital Construction Appropriations," graphically compares State FY 75-76 Capital Appropriations with Federal Allotments

FACILITIES OPERATIONS BRANCH

The Facilities Operations Branch is responsible for the maintenance and operation of all armory, non-armory, and training facilities utilized by the New York Army National Guard and for the development of future replacement, expansion and alteration requirements at these facilities. Federal, State and State/Federal Programs are formulated on a short and long term basis and are requested in appropriate budget submissions.

During 1976 prior long range planning to improve our logistical support and aviation facilities has resulted in the awarding of a contract for a new Combined Support Maintenance Shop at the Staten Island Armory Site and the approval of the National Guard Bureau to receive bids for a new Army Aviation Facility at Albany County Airport in the Spring of 1977. Both of these projects are supported primarily with 100% Federal funds.

Upon receipt of approval from the Division of the Budget to negotiate a land lease with the Town of Islip in November of 1976, the Division proceeded with the necessary steps to acquire an existing hangar at Islip-MacArthur Airport for use as an Army Aviation Facility, Armory, and Maintenance Shop. Again, support for the purchase and required alterations to the hangar will be with Federal Funds, now estimated at \$2,800,000. The State share is estimated at \$289,000. The Army National Guard is currently leasing a portion of the hangar we propose to purchase; however, adequate space is not available for the required flying and other military activities. Upon completion of the above mentioned projects,

the Army National Guard will have three modern Combined Support Maintenance Shops at Staten Island, Camp Smith, and Rochester. Similarly, three Army Aviation Facilities at Niagara Falls, Albany, and Islip, all meeting the latest construction standards, will be in our inventory. Significantly, Federal support has or will total approximately \$5,600,000 for the three projects.

Tentative approval for construction of a fourth Combined Support Maintenance Shop and a Unit Training Equipment Shop at Fort Drum, N.Y. has also been received from the National Guard Bureau, which has given a high priority to the work. Current estimate for the 100% Federally supported projects is \$3,000,000.

In February of 1976, the Corning Glass Works requested a meeting with this Division to discuss the possibility of exchanging the existing armory at Corning for a new armory and site in the Corning area. Our present Corning armory is adjacent to the Corning Glass Works and future plans by Corning include utilizing the 2.8 acres now owned by the Division for expansion of their facilities.

Soon after approval to negotiate with Corning was received from the Director of the Budget, several meetings were held, both in Corning and Albany which resulted in an approval of a fifteen acres site by the Division, a desired site and building layout, and an agreement between the State and Corning Glass Works incorporating the necessary conditions of the exchange. The Division will benefit greatly as a result of the exchange, obtaining a new, functional armory with adequate civilian and military parking facilities and other exterior facilities not available at our old site. By the close of 1976, an Agreement and final drawings and specifications were approved. Construction is scheduled to begin in the early spring of 1977. No State funds are involved in the exchange with Corning.

During 1976 final contracts for the phased program to install Intrusion Detection Systems for all weapons storage areas in our armories were awarded. This program will now be extended to include arms storage areas at Logistical Facilities. In addition, those systems now installed in our armories under 1969 design standards will be upgraded to meet 1977 standards at Federal expense.

In 1976, the Comptroller of this Division obtained sufficient funding to improve structural standards in our armories and extend Intrusion Detection Systems for areas other than arms vaults. This enabled the Division to eliminate twenty-four hour coverage at twenty-nine armory locations. The reduction in shift coverage was accomplished without encountering major difficulties and no incidents involving security at the selected armories has occurred.

The reduction of communication costs throughout the Division was undertaken during 1976. This effort, coordinated by the Office of General Services, consisted of an overall survey of fixed equipment and the eventual reduction of this equipment both in Albany and in our facilities throughout the State. A listing of facilities utilized by the Army and Air National Guard, the Naval Militia and the Office of Disaster Preparedness is included as an inclosure to this report.

LOGISTICS SERVICES

The Logistics Services Section, under the State Quartermaster, has responsibility for the following activities:

1. State Property Management, Inventory and Warehousing.
2. Accounting for Lost, Damaged or Destroyed property through Inventory Adjustment Report and Report of Survey action, as follows:
 - a. Federal property on loan to the State.
 - b. State Property
3. Non-Military Use of Armories Rental Program.
4. Purchasing and Procurement of Supplies and Materials, Contractual Services and Equipment for all DMNA Facilities.
5. Communications for National Guard Armories and District Offices of the Office of Disaster Preparedness.
6. New York State Flag Program.
7. State Transportation.
8. Officer in Charge and Control and Building Safety Director of Building 22, State Campus, Albany, N.Y. - Facility Maintenance, Operation and Evacuation procedures.

In addition, special missions and projects are assigned to and accomplished by the Logistics Services Section as required by the Director of Logistics.

STATE PROPERTY ACCOUNTING DATA

As of 31 December 1976, the following equipment records were being maintained.

1900 Active Stock Record Cards
 217 Memorandum Receipt Accounts, including 112 State Armory (SA) Accounts, 84 State Guard (SG) Accounts, 2 Critical

Items Pool Accounts, 13 Riot Battalion Accounts and 6 District Offices of the Office of the Office of Disaster Preparedness.

1372 Weapons Serial Number File Cards.

550 Typewriter Serial Number File Cards

During the year, 431 Vouchers were processed covering purchases and transfers of property, including vouchers for disposition of salvaged equipment. The Excess Property Program continued at a normal rate, prompted by property withdrawn from former New York Naval Militia facilities. More than half of the Naval Militia's state property is still to be collected and reissued.

By use of the State Inspection and survey Officers, 1219 unserviceable items, normally offered as excess, were removed from the system. This program is continually being purified to include only those items worthy of retention.

State Quartermaster Warehouse personnel completed the program of collecting all excess state weapons from facilities.

FEDERAL PROPERTY - RELIEF FROM PECUNIARY RESPONSIBILITIES

Working in conjunction with NGR and AR 735-11 (Accounting for Lost, Damaged and Destroyed Property) documentation pertaining to Federal Property relief of the State and members of the State's Military Forces from financial responsibility involved processing 82 Reports of Survey. (See Statistical Data Chart). In addition, 1,063 DA Forms 444 (Inventory Adjustment Reports) were processed for units sustaining certain types of equipment loss or damage. The Blanket Position Bond obtained to provide coverage against loss or liability for property for all property connected positions was continued.

STATE PROPERTY - RELIEF FROM PECUNIARY RESPONSIBILITIES

A total of 6 Reports of Survey and 14 Certificates of Droppage were executed by custodians of State Property and processed to this office for adjustments.

NON-MILITARY USE OF ARMORIES

A total of 1,096 agreements were processed during the year covering Commercial, Non-Profit, Charitable, Youth Activity, Secondary Schools and Governmental rental categories.

Public Liability Insurance, protecting the State of New York was in force for the year covering all locations and events. The premium is recovered by charging a pro-rata share to the individual lessees.

The "Blanket" Surety Bond, protecting rental charges and damage to State Property during the course of non-military use, was continued. The premium is also recovered by charging a pro-rata share to lessees.

Those portions of Military Regulations No. 17 and DMNA Pamphlet 210-1, as related to non-military use of armories are being revised.

The DMNA Form 99 (Request for Approval to Execute Armory Use Agreement) and the DMNA Form 18 (Agreement for Use of Armory) have been updated and implemented.

PURCHASING

The Purchasing Section is responsible for procurement of supplies and materials, contractual services and equipment for all DMNA facilities. During the year approximately 5000 Purchase Orders were processed.

EMPIRE STATE MILITARY ACADEMY

This Section is also concerned with purchase awards negotiated by the Office of General Services, specifications, contract with vendors, contract and non-contract items, preparation of all correspondence on procurement matters and telephone instruction to facility personnel providing guidelines in the coding procedures and preparation of purchase orders.

COMMUNICATIONS

The Logistics Services Section controls the following communication items:

- Coordinates removal, installation or change in telephone equipment for National Guard Armories and State Campus Buildings 22 and 4.
- Established tolls of allowance for all telephone equipment.
- Coordinates fixed and toll charges for budgeting purposes.
- Periodically updates Organizational and Alphabetical listings for the State Telephone directory.
- Processes Telephone Credit Cards.
- Assigned personnel attended telephone service management class to maintain proficiency in telecommunications matters.

NEW YORK STATE FLAG PROGRAM

Distribution of New York State Flags to servicemen overseas for the year totaled 55. National, State and distinctive type flags were procured and distributed for interior use at armories, special displays and authorized honors. Loan of flags to civilian organizations, and honoring requests for miniature flags made to the Governor by school children, continued.

TRANSPORTATION

During 1976, a total of 155 requests for use of State Sedans required for DMNA were processed to the Bureau of Fleet

management, Office of General Services. The annual insurance coverage for State and Federal vehicles operated by this Division was processed during the year.

The issuance of Parking Stickers for lots surrounding the Public Security Building is another responsibility of this Section. We have currently issued a total of 222 Parking Stickers.

FACILITY MAINTENANCE AND OPERATION - BLDG. 22

This section handles all requests for Building maintenance and operation.

The State Quartermaster is the designated contact with the Campus Manager on matters of general concern to all employees.

In coordination with the Campus Manager, an antique artillery piece was permanently placed in front of Bldg 22. In addition, an employee outdoor lunching area was established adjacent to the path leading to State University property.

CAMP SMITH

Camp Smith is the principal and most complex State owned and operated military training and logistic center in New York. It houses thirteen year-round tenant activities, and provides training and support facilities for National Guard and Reserve units for Weekend and Annual Training periods.

The organization of the Post Operations and Maintenance force is shown in the inclosures to this section, together with separate listings of tenant activities, facilities, and manday utilization.

Highlighted for inclusion in this report are the Performance Measurements for 1976:

Weekend Training (# of Trainees) -
39% Increase over 1975

Annual Training-(# of Trainees) -
34% Increase over 1975

Operational Costs (Telephone) -
26% Reduction over 1975

Increased Productivity -
Post Work Force 10% Less Than 1975

Operational Improvements (At No
Cost to New York State) -
Senior Bachelor Enlisted Quarters
Quarters for 50 Women
Post Public Safety Center

Maintenance and operation of the Post is funded from three (3) sources, the State Purpose Budget, the Service Contract, and the Training Site Contract; the latter two sources being 75% and 100% Federal funds, respectively. In 1976 the total operating budget for the Post was approximately \$900,000, two-thirds of which is provided by the two (2) Federal contracts.

Not included in the above figures, are the personal service costs of the approximately one hundred fifty (150) Federal employees working at the Post tenant activities.

COMMUNITY WORK PROJECT PROGRAM

The Community Work Project Program was initiated in the Division of Military and Naval Affairs in June 1971 under the Department of Defense Domestic Action Program. It involves the use of military manpower and equipment resources to assist community organizations in ecology, educational, cultural and recreational activities. Since June 1971, nine hundred and thirteen (913) community work projects have been processed. During 1976, one hundred and fifty (150) projects have been processed.

UNITED STATES PROPERTY AND FISCAL OFFICE

GENERAL

The United States Property and Fiscal Office - New York (USP&FO-NY) functions as an activity of the State for federal logistical, fiscal, purchasing and contracting, military and technician pay, automatic data processing, and account examination support.

In addition to the main office located at Building 4, State Campus, Albany New York, it operates warehouse facilities at Peekskill and Rochester.

During 1976, the USP&FO-NY was authorized one hundred eighty-two federally paid technicians. Funding authorization permitted an average employment of approximately one hundred sixty-five technicians.

A significant achievement of the USP&FO-NY was the installation, acceptance and operation of the Interim Remote Terminal facilities located at Building 4.

LOGISTICS

The new free turn in policy was instituted on 25 August 1976 by the USP&FO-NY and to date has resulted in the recovery of \$150,000.00 of Federal property.

The Quick Supply Store (QSS) was established at the USP&FO-NY Storage and Distribution Branch located at Rochester. This store establishes issue of selected Class IX repair parts on a "free issue basis" utilizing summary accounting techniques. Items selected for the store have a unit price of less than \$5.00 per item. This store relieves much of the administrative workload in regard to requisitioning Class IX repair parts.

National Guard Bureau (NGB),

through the USP&FO-NY, has made issue of forty-three tanks, Combat M60 to the 1st Battalion 210th Armor. This is the only New York Army National Guard unit in possession of the M60 Tank.

M880 Series 1 1/4 Ton Commercial Truck Systems. The US Army Tank Automotive Materiel Readiness Command will issue 807 of the M880 Trucks during calendar year 1977 to the New York Army National Guard. This vehicle is a commercial designed vehicle programmed to replace the M37 3/4 Ton Truck which is a tactical vehicle. This issue represents a new position by the Department of the Army in which commercial vehicles are replacing tactical vehicles. Reason for the new position is reduction in procurement and maintenance cost.

PURCHASING AND CONTRACTING OFFICE

The Defense Fuel Supply Center, through the Office of the Small Business Administration, consummated an unprecedented number of gasoline contracts with small businesses with impressive results. The Purchasing and Contracting Office was able to supply approximately 50% of New York Army and Air National Guard fuel requirements through the services of small business enterprises.

The Army National Guard Procurement Officer and three Air National Guard Procurement Agents were appointed as Contracting Officers with an authority limitation of \$10,000. These appointments decentralize the small purchase contracting activity and facilitate efficiency in contract administration by localizing the entire procurement cycle.

A quarterly local purchase summary report was designed by Purchasing and Contracting Office to summarize installation procurement buying throughout the State to identify the close economic relationship between New York Air and Army National Guard units and facilities and the communities in which they are domiciled.

TYPE ACTION	NUMBER	AMOUNT
Contracts	63	\$1,708,418
Blanket Purchase Agreements	649	207,964

Federal Supply Orders	725	536,876
Delivery Orders	1,084	1,156,693
Purchase Orders	2,761	785,049
Imprest Fund Purchases	1,626	57,276
TOTALS	6,908	\$ 4,452,276

DATA PROCESSING INSTALLATION

The Data Processing Installation has operated for one continuous year supporting all of the National Guard Computer Center standard systems. Military Pay (JUMPS-RC) was the last major program applied.

Statistically our 1401 Computer has averaged 400 hours a month running on a three shift-five day week basis. Logistics at 40% of total hours continues to be the largest customer followed by Military Personnel at 25%.

Progress in management techniques, specifically computer scheduling, has allowed us to continually accept more applications and provide output with increased productivity. Continued emphasis will be required next year to meet new demands on available hours.

One additional event is planned for the Data Processing Installation in 1977 that is the exercising of our Contingency Plan. Tentative arrangements have been made with the USP&FO of Massachusetts to implement our Cross Service Agreement.

EXAMINATION OFFICE

During Calendar Year 1976, there were forty-two battalion size and sixty-four company size annual or change of command examinations conducted.

There were nine special investigations and/or examinations conducted in the following areas:

- a. MATES special account update
- b. Special report on vehicles for insurance purposes
- c. POL accountability at Fort Drum, New York
- d. Special report on Inactive Duty Training and Full Time Training Duty

- e. Special review of MATES Hand Receipt Annexes
- f. Special review of protective masks
- g. Examination and review of hardening kits
- h. Review of tool inventory for MATES-NY
- i. Inquiry on individual clothing at the 1st Battalion 69th Infantry

There were twenty liaison visits conducted during the year to check on hand receipts, Reports of Survey, Inspector General Discrepancies and Inventory Discrepancy Listings.

Two personnel attended the Internal Review Course conducted at Little Rock, Arkansas and another is scheduled during the early part of 1977.

The Supervisory Accounting Technician attended the Military Accounting Course conducted at Fort Benjamin Harrison, Indiana.

Air examinations and cross training was conducted at the 107th Fighter Interceptor Group and 109th Tactical Air-lift Group, New York Air National Guard, during 1976.

Internal reviews were conducted in the areas of data processing, time and attendance, recruiting and retention and Blanket Purchase Agreements.

A temporary Examiner was assigned in December 1976 for a period of sixty days.

An Examiner and Warehouse Supervisor exchanged positions during the year.

COMPTROLLER

The Comptroller is responsible for the Fiscal, Civilian Personnel, Data Processing and program management re-

view and analysis for operations of the Division. He also serves as advisor to the Chief of Staff to the Governor and other Staff Directors on matters of financial management as pertains to the cost effectiveness for both State and Federal programs.

FISCAL

Fiscal activities include the budgeting, assignment, control, pre-audit, expenditure and accountability of State and Federal appropriated funds. Total funds administered during the period include \$13,607,400 in State appropriations, \$58,160,600 in Federal allocations for the Army National Guard Program, and \$1,681,111 for the Air National Guard Service Contract Program.

The State funded programs are:

- Administration
- Special Services Activities
- Army National Guard
- Air National Guard
- New York Naval Militia
- New York Guard
- Disaster Preparedness

The Federally funded programs include:

- Providing personnel, operations and maintenance support for the Army National Guard Program to include Annual Training and Weekend Training Sites, Aviation and Logistical Support Facilities located throughout the State.
- Pay and Allowances for Army National Guard Personnel.

EQUAL OPPORTUNITY

CIVILIAN PERSONNEL

Civilian Personnel activities encompass all aspects of personnel administration to include the payroll processing function for 1,027 State positions authorized this Division. During the 1975-1976 fiscal year, 8,173 personnel/payroll actions and medical/dental claims were processed. In addition to regular State personnel, this office administers the retirement program for sixty (60) former employees under the provisions of the Military Law. During the year, due to State emergencies, 745 members of the Organized Militia were called to State active duty, thereby requiring additional individual payroll actions.

MANAGEMENT ANALYSIS AND REVIEW

Internal reviews of Division operations are necessary and essential to improve the effectiveness and efficiency of Division programs. Studies are conducted to review program policies and objectives, administrative procedures and the Division's organizational structure in an effort to maximize the utilization of all available resources. Various management/audit techniques, systems analysis procedures and other standard criteria are utilized to measure the cost effectiveness and accountability of Division programs. Continual internal reviews of program operations are an effective management tool which provides positive contributions to the attainment of the Division's mandated responsibilities and objectives.

DATA PROCESSING

Data Processing operations include the processing and continuous updating of data for all programs. Feasibility studies, programming, designing and implementa-

tion of new EDP systems to improve effectiveness and support the functional activities of the Division are accomplished as required.

The Division's Data Processing operation has been converted to the Honeywell 6000 computer system maintained by the State Office of General Services. All EDP programs have likewise been converted to this new system. The present system provides this Division with a remote terminal permitting direct access/inquiry into the Central Computer and has also improved the operating efficiency by reducing processing time.

Currently the major portion of the Division's data processing efforts is in the field of military personnel support and the civilian personnel system. The EDP section also assists and supports the USP&FO Federal Data Center. During the past year it has developed new programs to generate reports regarding equal opportunity and recruiting and retention.

SIGNIFICANT ACTIVITIES

Significant activities during calendar year 1976 in the office of the Comptroller were:

- Implementation of an advance payment procedure to the State of New York on 1 April 1976. Conversion to this procedure provides the State with the necessary cash required to support the 75% federal cost of State/Federal cost sharing agreements. The primary advantage of cash advances to the State will be substantial savings in the outflow of State first instance funds.

- Reduction in funding for the Disaster Preparedness Program on 1 April

1976 from a total State regular appropriation basis to approximately 50% and the balance funded through first instance appropriations. This shift to first instance funding was implemented to more properly reflect personnel and administrative expenses eligible for 50% federal reimbursement.

- New data processing programs have been developed and tested as follows:

- To rapidly mobilize key personnel to support emergency operations, a program was written whereby military personnel with critical skills would be alerted immediately.

- A State pay and allowance program was developed to improve the speed of service by which those personnel called to State active duty would be compensated on a timely basis.

- Budgetary cutbacks required the abolishment of 28 positions during this fiscal year. These positions had a significant impact on four (4) major areas of operation, namely Administration, Army National Guard, Air National Guard and Naval Militia.

LEGAL

The Legal Office is responsible for all legal matters concerning the Division and the Organized Militia. These include the following:

- Legislation
- Real Property transactions
- Contracts, leases and agreements
- Third party claims against the militia and the Division
- Line of Duty injuries affecting the militia
- Administration of Military Justice
- Coordination with other State and Federal agencies
- Litigation
- Labor law and labor relations

STATE LEGISLATION

There were five laws enacted in the 1976 session affecting DMNA and the organized militia as follows:

Section 4 of the Military Law was amended to provide that there shall be equality of treatment for members of the militia regardless of sex along with the previous protections contained therein.

Section 130.15 of the Military Law was amended to increase the authority of a commanding officer to impose non-judicial punishment where a forfeiture of pay and allowances was included in the punishment, permitting \$50 instead of the previous limitation of \$25.

Subdivision 1 of Section 189 of the Military Law was amended to delete males from the requirement that armory employees be residents in order to remove the discrimination against females.

Subdivision 2 of Section 217 of the Military Law was amended to substitute "surviving spouse" for "widow" in order to permit a spouse to qualify as a survivor, regardless of sex, for benefits under the provisions therein.

Subdivision 1 of Section 309 of the Military Law was amended to substitute "spouse" for "widow" as a dependent of a person in the military service for the protections contained therein.

FEDERAL LEGISLATION

Public Law 94-286 provided for the Selected Reserve of the U.S. Armed Forces (which includes the New York Army National Guard; New York Air National Guard and members of the New York Naval Militia) to be ordered to active duty involuntarily for not more than 90 days when the President of the United States determines that it is necessary to augment the active forces for any operational mission (10 U.S.C. 673b).

Public Law 94-464 provides for the United States to assume liability for claims for damages for personal injury, including death, caused by the negligent or wrongful act or omission of any medical personnel of the National Guard in fur-

nishing medical care or treatment while acting within the scope of his or her duties for the National Guard during a training exercise. It also established authority and procedures for considering, processing and settling such claims which includes representation by the Attorney General of the United States in litigation arising out of alleged malpractice liability of medical personnel of the National Guard (32 U.S.C. 334).

CLAIMS

During 1976, under the provisions of Titles 32 and 38, United States Code, and under Section 216 of the State Military Law, a total of 484 line of duty investigations were processed for injury and disease to National Guardsmen while engaged in training or State active duty:

Approved LOD	284
Disapproved LOD	7
Approved VA Benefits	4
Not in Line of Duty	14
Pending NGB	36
Approved LOD State Duty	1
Pending from Units	85
Administrative Determination	53

There were 64 Motor Vehicle accidents involving National Guard vehicles and third parties during 1976. Four of these claims are now in litigation.

There were 41 claims arising out of the use of armories by third parties. Two of these claims are now in litigation.

TECHNICIAN PERSONNEL OFFICE

The Technician Personnel Office is responsible for the administration of a federally funded technician program. During calendar year 1976, 2707 New York

Army and New York Air National Guard positions were authorized; due to budgetary constraints actual employment was restricted to approximately 88% of the authorized level.

As a result of several unit reorganizations and reclassification of individual positions, the total number of technician positions authorized the state has been reduced from a previous year end total of 2474. Fortunately, all personnel affected by either of these actions, desiring to remain as technicians, were placed in appropriate positions.

During the first full year of coverage by the Negotiated Agreement with the Association of Civilian Technicians (ACT), 7 Unfair Labor Practices were filed by the labor organization of these 7, 4 were settled informally, 1 is pending hearing results, 2 are in process with the US Department of Labor. A number of Memorandum of Understandings were entered into by both management and labor in seeking to refine issues of contention.

Three courses of mandated instruction touching on all the major aspects of supervision, management and labor relations for all technician supervisors were conducted during the year. As a result of this concerted effort, a minimal number of supervisory personnel are yet to undergo this training. Present estimates indicate that all presently assigned supervisors will have been trained in the forthcoming year.

Under the Incentive Award Program, of 34 suggestions submitted, 3 were approved for a cash award total of \$335.00. Adoption of these suggestions has resulted in first year savings of \$3,725.00. An additional 15 suggestions are awaiting board action or are in the process of appraisal.

The number of Quality Step Increases, Sustained Superior Performance Awards, Outstanding and Excellent Ratings has increased appreciably over previous years. These increases indicate a growing awareness of the tool of recognition available to supervisors, and attainment of expertise in their fields by individual technicians. During the year, there were 222 new hires of technicians to include 4 of the 5 applicants for positions obtained through the Out-Reach Program instituted in 1975. There were 229 separations of which 56 were retirements and 10 were deaths.

At the close of the year there were 2394 technicians employed throughout the state with an annual payroll of \$21,416,000; slightly over a million dollars more than the previous year.

STATE EQUAL OPPORTUNITY OFFICE

The Equal Opportunity Office functions in both the technician and military spheres.

In the technician realm, the office is responsible for implementing the Affirmative Action Program as promulgated by federal law and the regulations of the US Civil Service Commission and National Guard Bureau.

The primary function of the office in a military status is to advise the Commanding General, NYARNG, on the status of the Race Relations/Equal Opportunity/Human Relations Program.

This year's accomplishments included, but were not limited to the following activities:

- Conduct of military and technician staff assistance visits.
- Ongoing training of RR/EO/Human Relations personnel at service schools.
- Review and approval of Affirmative Actions Plans and counseling files, with a view toward monitoring same for CY 1977.

- Award of five NGB Certificates of Achievement for advancement of equal employment opportunity.

- Development of a Social Actions (NYANG) Evaluation Checklist to assist commanders in meeting the responsibilities of program commitment, and pertaining directly to those areas peculiar to the National Guard.

- Selection and placement of Army National Guard personnel for the NGB funded Out Reach Program which is designed to provide skills to the disadvantaged through on-the-job training.

- Completion of a two-week Race Relations/Equal Opportunity Orientation Course for 22 NYARNG personnel at the Defense Race Relations Institute.

- The State Equal Opportunity Staff hosted at Hancock Field, Syracuse, New York, a Social Actions Seminar. The seminar provided attendees (CRD, NGB/DP and Human Relations Officer) information on statistical reporting, awareness development and training, to include counseling and complaint processing.

- Conduct of an Equal Opportunity Seminar for technicians who hold the collateral duty position of Equal Employment Opportunity Counselor.

- The State Equal Opportunity Officer, in conjunction with the US Civil Service Commission, conducted an Advanced Equal Employment Opportunity Counselor Course for both DMNA and other federal agencies in the Capital District.

Race/Human Relations personnel are currently assigned at each Air Base, and in each headquarters of Group/Brigade size, or larger. Internal evaluation programs conducted by NGB and the various headquarters insures continual updating and modification of Equal Opportunity Programs to achieve determined goals, and has a positive effect on the program.

NEW YORK GUARD

SENIOR ARMY ADVISOR

The mission of Advisor personnel is to enhance the "Total Force Concept" by linking the Active Component and the NYARNG under the purview of Commander, US Army Readiness Region I. All Advisors provide assistance in current Army policies and procedures to improve training progress and mobilization readiness of NYARNG. They are actively involved

in the implementation of the Army Training and Evaluation Program (ARTEP). Emphasis is on increased judicious use of the assistance available through United States Army Readiness Region I. This applies not only to unit training but also to individual Military Occupational Speciality (MOS) qualification. The Senior Army Advisor serves as the Military Advisor to the Chief of Staff to the Governor. Advisor strength at the close of 1976 was 25 (13 officers, 12 enlisted men).

AIR NATIONAL GUARD

GENERAL

The American Bicentennial year of 1976 augered well for the New York Air National Guard (NYANG). All five NYANG flying units have vital full time missions which were performed with distinction during 1976 giving testimony to the credibility and effectiveness of the military's "Total Force" policy. One NYANG unit, the 107th Fighter Interceptor Group won the USAF Outstanding Unit award; another unit, the 174th Tactical Fighter Group, received a highly respected Outstanding rating on its Operational Readiness Inspection.

Early 1976 ushered in new leadership to NYANG. Colonel John B. Conley was named Commander of the NEW YORK AIR NATIONAL GUARD. Previously he was Commander, 106th Fighter Interceptor Group and more recently, Director of Operations, NYANG. Colonel Bernard Saul, longtime Commander of the 152d Tactical Control Group, was named Assistant Adjutant General for Air, the number two man in NYANG and the senior full-time NYANG Officer.

The ingredients which give substance and strength to NYANG are its well trained organization of 4500 members and an inventory of 85 aircraft comprised

of 7 different types. Major importance was, and continues to be focused on NYANG's capability to perform its assigned mission and to assure that Air Force resources (facilities, equipment and personnel) are protected and preserved. In addition, these resources have been available when directed by higher headquarters, to assist New York in relief efforts and in support of civil disorders, natural disasters, military attacks or disasters and to fulfill the humanitarian relief responsibilities of commanders.

The various components which make up NYANG consist of units skilled in tactical control, communications, air-lift, tactical airpower for total support of ground forces, and air superiority capability. Substantial effort has been expended to develop and obtain optimum performance from each unit's assets and capabilities.

OPERATIONS

All NYANG flying units, except for the 106 ARRGp at Suffolk County Airport are qualified as combat ready (C-3 status or better.) The 106th will reach C-3 as soon as the unit qualifies the minimum number of para-rescue troops.

LEADERSHIP

Leadership of New York Air National

Guard units as of 31 December 1976 are listed in an Inclosure of this report.

FISCAL

In 1976, NYANG continued to be one of the most rewarding investments of the State of New York. Federal fiscal support rendered directly to NYANG during Fiscal Year 1976 approximated \$39,500,000. This figure does not include fiscal support rendered indirectly for centrally funded supplies and equipment; overhead costs for service schools; depot level maintenance of aircraft and equipment; and other costs factors.

In contrast, the State of New York's investment of approximately \$653,000, derives returns not only in direct federal support, jobs and tax revenue, but also in economic, social, and cultural areas. The tax dollars generated by the substantial federal investment as well as the business income it generates contributes substantially to the New York State economy. This is of particular importance during the current statewide fiscal crisis.

PERSONNEL

Major Command changes during 1976 included the following:

Colonel John B. Conley, director of Operations, Headquarters New York Air National Guard was appointed commander, New York Air National Guard. Colonel Bernard Saul, appointed Assistant Adjutant General for Air, New York Air National Guard. As a result of the deactivation of the Wing Headquarters at Suffolk County, Brigadier General John C. Campbell, Jr., reverted to the rank of Colonel, Group Commander, 106th Air Rescue and Recovery Group. Lieutenant Colonel Hugh A. Ward was appointed Commander,

105th Tactical Air Support Wing which was organized at Westchester County Airport. He was succeeded as Commander, 105th Tactical Air Support Group by Lieutenant Colonel Jack S. Webb.

Lieutenant Colonel William A. Stanley was appointed Commander, 152nd Tactical Control Group.

CW4 Joseph Losh retired as Commander, 552nd USAF Band and was succeeded by Senior Master Sergeant Joseph Corda.

COMPONENT UNITS OF THE NEW YORK AIR NATIONAL GUARD

105TH TACTICAL AIR SUPPORT WING -

Lt Col Hugh A. Ward assumed command of the 105th TASWg, vice Col Robert C. Chambers, who retired.

105TH TACTICAL AIR SUPPORT GROUP

Lt Col Jack S. Webb was appointed Commander, succeeding Lt Col Hugh A. Ward.

Distinguished visitors whose aircraft were staged and serviced by the 105th at Westchester County during 1976 included President Gerald Ford, Vice President Nelson A. Rockefeller, Governor Hugh Carey, Queen Juliana of the Netherlands, and Lord Montbatten of the United Kingdom.

The 105th achieved, a C-2 combat readiness rating. It would have C-1 except for personnel requirements.

AIR NATIONAL GUARD

106TH AIR RESCUE AND RECOVERY GROUP

In its first full year as one of the ANG's two Rescue and Recovery units, the 106th received high praise from its gaining command leadership and from the State of New York.

Although rated C-4 in combat readiness in 1976, the 106 would be C-3 except for the problem in recruiting para-rescue men, a most demanding skill. This is a general problem throughout the USAF and despite its problem, the 106th is well on the way to C-3 manning.

Among its various active missions during 1976, the 106th participated in two Air Rescue and Recovery Service classified missions with the Aerospace Defense Command in exercises in the northeast region. It assisted the US Coast Guard in the search and rescue mission for a prominent balloonist lost at sea.

Men and equipment of the 106th provided back-up for Operation Coronet East 203, a support flight mission of four T-33

Men and equipment of the 106th provided back-up for Operation Coronet East 203, a support flight mission of four T-33's to Yugoslavia.

The 106th received and successfully completed its first Operational Ready Inspection/Management Effectiveness Inspection as an Air Rescue and Recovery Group, and the out-briefing attracted leadership including Major General John Pesch, Director, Air National Guard; Major General Ralph Saunders, Commander, Aerospace Rescue and Recovery Service, United States Air Force; Brigadier General M.E. Carson, Inspector General, Military Airlift Command; John B. Conley,

Commander, New York Air National Guard.

106th paramedic Technical Sergeant Allan Snyder set something of a record in August when he saved three lives locally, directly as a result of his training. He saved the lives of a man who suffered a heart attack in a local restaurant; one who was choking on a piece of meat in a restaurant; and an acute accident victim.

107TH FIGHTER INTERCEPTOR GROUP

Niagara Fall's finest was awarded the United States Air Force Outstanding Unit Award in 1976 for meritorious service in support of military operations from July 1974 to June 1975. It was the 107th's second such honor. The first came during the unit's active duty tour in Vietnam.

Former 107th Air Force Advisor, Colonel George Day was awarded the Nation's highest honor, the Congressional Medal of Honor, for heroism during five years of captivity in North Vietnam. Colonel Day was shot down, captured, escaped, recaptured. He is credited with saving the lives of many fellow aviators who were still flying against the enemy.

On 24 April, Colonel John Blewett, 107th Commander, was presented the Aerospace Defense Command flying safety award for three years, and 11,000 hours of accident free flying, by General Castellano, who had received it for New York Air National Guard from Major General R. H. Schoeneman, Commander, 21st NORAD Region, Air Defense Command. Also, during the year, the 107th received its first visit by General Schoeneman.

An earlier advisory that the unit would convert to F-4's and a tactical fighter mission was recinded. The unit will remain with the F-101's, the Air Defense

Command active mission, and the full time runway alert.

On 2-3 March, the 107th, together with Air Force Reserve's 914 Tactical Airlift Group, assisted the Village of Angola, New York, during the Ice storm in which the Village power supply was cut. The 107th contributed a 100KW generator that was transported by the 914th on a flatbed truck.

109TH TACTICAL AIRLIFT GROUP

The 109th's unusual Air National Guard active force mission continued to get special attention in the news media, and the unit continued to set records for an Air National Guard unit.

AIRMAN magazine published a lengthy article on the ice-cap refueling and resupply mission in the November 1976 issue. It was one of AIRMAN's longest articles on a special unit, and certainly the longest about an Air National Guard unit. The December issue of the AIR RESERVIST also featured a similar article and gave it front cover billing. These articles were deserved recognition to a unit which continued to perform its mission with distinction.

The 21 June issue of AIR FORCE TIMES reported that in the 30-day period preceding that issue, the 109th had flown 205 missions, and delivered 650,000 gallons of fuel to the United States Air Force DYE sites. In doing this the aircraft and crews broke two records: (1) On one mission, elapsed time between touchdown, on loading of 3200 gallons of fuel, and lift off was 18 minutes. (2) In one day, an aircraft flew 18 missions, delivering 57,600 gallons of fuel.

Overall, the 109th flew 386 missions, and delivered 636,800 gallons of fuel and 2,870,097 pounds of materiel to the DYE sites in 1976.

In the midst of the Greenland mission, the 109th kept up its responsibilities as

a member of the community. Its ability to participate locally in ceremonial events was curtailed, but the group did meet many commitments for parades, color-guards, and other activities.

One such activity was firefighting support to local agencies during a severe fire in a 50,000 gallon asphalt storage tank at Glenville. The unit's fire fighting unit was called on a mutual air request and helped put the fire out. Favorable news coverage by local radio, TV and print media resulted.

The 109th maintained a C-1 combat status during the year.

The first black female graduate, Sherrie L. Fowlkes, of the Air National Guard Professional Military Education Center joined the 109th as Social Actions Officer.

The 109th hosted the Spring New York Air National Guard Information-Recruiting Workshop, 22-23 May.

152ND TACTICAL CONTROL GROUP

On 1 April, the 152d was reorganized. The neighbor units, 213th Electronics Installation Squadron, 274th Combat Communication Squadron; 552nd USAF Band are now under the command and administrative direction of Headquarters, 152nd Tactical Control Group.

Lt Colonel William A. Stanley assumed command, 152d, vice Colonel Bernard Saul, assigned Assistant Adjutant General for Air, New York Air National Guard.

The 108th Tactical Control Squadron was reorganized as the 108th Tactical Air Control Flight (FACP-H).

Units assigned to the 152d under the 1 April 1976 reorganization are: 101 TCSq, Mass ANG; 102 TASq, R. I. ANG; 103 TCSq, Conn ANG; 108 TCFt, NY-ANG; 112 TCFt, PA ANG; 113 TCFt,

NYANG; 123 TSFt, Ohio ANG; 124 TCFt, Ohio ANG; 128 TCFt, Wisc ANG.

The 274th CCSq participated in operation Brave Shield XV, Along with the 152d Tactical Control Group. While distant, extensive exercises are not new to the 152d, it is the longest, largest mobility deployment in the 174th Squadrons' history.

Technical Sergeant George McDonald of the 274th was selected New York Air National Guard Outstanding Airman, for 1976. He was also outstanding Airman of the 274th, and 253rd Combat Communications Group, Massachusetts Air National Guard.

In a letter to the Commander, 152d, the Mayor of East Hills, New York stated, "It is our pleasure that the base (Roslyn) is part of this community, and is expected to remain so for a long time."

174TH TACTICAL FIGHTER GROUP

1976 was a banner year for the 174th, the "Boys from Syracuse." First, the 174th won the Governor's Trophy, symbolic of NYANG's Outstanding Flying Unit.

Second, the 174th was awarded a nearly unprecedented "Outstanding" rating on its Operational Readiness Inspection.

Third, President Ford visited the unit on a transition Syracuse flight.

Fourth, the 174th was a host unit at the New York State Fair.

Fifth, the USAF Thunderbirds visited in August, thrilling more than 35,000 area residents with their show.

In terms of praise and plaudits, the Operational Readiness Inspection stands out as the year's most significant event. In receiving their uncommon rating, the 174th received special praise from top commanders:

General Robert Dixon, Commander, Tactical Air Command: "Results of these recently completed tests of your preparedness show me that Boys from Syracuse are true professionals."

Lt General James V. Hartinger, Commander, 9th Air Force: "I was pleased to note the excellent rating the 174th TFGp received for military courtesy and military appearance during the 9 - 13 April Operational Readiness Inspection/Management Effectiveness Inspection. I have heard it couldn't be done, but they did it. Congratulations."

Colonel James Kennedy, 113th Tactical Fighter Wing: . . . "a pace setting performance."

Team Chief, Lt Colonel Edward Skowron: "Our evaluation showed that this unit was doing a job above and beyond that required by regulation, and in a manner that could be emulated and adapted by other units."

The 174th has not only put its CCTV station on line, Station WBFS now has a full program schedule each UTA, with a published program in the base newspaper.

174th Commander, Colonel Curtis J. Irwin, was praised in a nationally recognized report on environmental planning. He was cited as a primary force in environmental planning for Hancock International Airport. He was a leading force in

articulating the airport's environmental needs, and organizing support to implement them.

201ST WEATHER FLIGHT

During the year, monthly drills were coordinated with the 42nd Aviation Bn., New York Army National Guard in order to

provide weather support for flying operations and realistic training. A satellite weather station was in operation at Westchester County Airport in support of the 105th Tactical Air Support Group. While on annual field training, the unit manned the Base Weather Station. The two week period proved sufficient to attain the capability to perform the unit's wartime mission effectively.

NAVAL MILITIA

ORGANIZATION

The Naval Militia is the Naval component of the State's military forces. Its military organization is composed of Ready Reservists of the US Naval and US Marine Corps Reserves. The New York State Military Law prescribes that Naval Militia units be organized in accordance with and conform to the US Naval and US Marine Corps Reserve Tables of Organization. The Naval Reserve restructuring and reorganization, which has been ongoing for the past few years, has made compliance with this directive virtually impossible. However it is expected that the reorganization of the Naval Reserve will be stabilized effective 1 April 1977; consequently the Naval Militia organization will then be in compliance with the State Military Law for Naval

MISSION

The Naval Militia has a dual federal-mission and may alternately execute federal and state functions:

To be ready to respond to the call of the Governor in the event of natural or man-made disaster, domestic or internal emergencies.

To support and assist in training

Naval and Marine Corps Reservists as our contribution to our overall national defense.

OPERATIONS AND TRAINING

The Marine Corps Branch organization is firm and, at the moment, except for the continuing struggle to recruit quality personnel, is a viable force in readiness. The problem of recruiting and maintaining personnel in the Armed Forces has not lessened during the past year, but it may be said that the attitude of the individuals accepting Reserve duty and the obligations that go with it has improved immensely. The Naval Reserve program, with the exception of the Mobile Construction Units, is still consolidating, establishing and reorganizing. However, all indications point to this year as producing stability in the Naval Reserve. Once this mission is accomplished, the demise of our great militia team will have been checked and we will have taken a giant step towards restoring it to its rightful place among the elite State Military Forces, responsive to any state contingency.

LOGISTICS

The Naval Militia does not have any state funded military supplies or equip-

NAVAL MILITIA

ment. Materiel support for services and training is supplied and fully funded by the US Government. The use of federal equipment and materiel by the Naval Militia is authorized by Title 10, USC S7854 in performing state missions.

FACILITIES

To effect necessary economies this past year, all New York State funding for Naval Militia facilities ceased on 31 March 1976 with the cut back of eight (8) Naval Militia armory superintendents. The Navy agreed, at that time, to continue the use of the eight (8) Naval Militia facilities and to pay all costs for their maintenance and operation for the nominal rental fee of \$1.00 a year for each armory.

FUNDING

The Department of the Navy provided \$12,547,852 during FY 1976 to support the personnel, training and facilities of the Naval Militia. These funds cover drill pay and pay for active duty personnel located at Naval Militia locations, logistic support for training and civilian salaries.

AWARDS AND HONORS

The New York Naval Militia sponsors and administers the Josephthal Trophy. This award is presented to Naval Militia units in order to enhance their readiness. Because of the ongoing Naval Reserve restructuring and reorganization in 1976, the Burke and Gillies awards remained suspended pending the finalized Naval Reserve program reorganization.

NEW YORK GUARD

MISSION

The New York Guard is a State Military Force, whose primary mission is to replace the New York Army National Guard when it is ordered into active federal service and is no longer available for State service.

Subject to specific orders from Chief of Staff to the Governor, the New York Guard is prepared to furnish aid to Civil authorities in event of a disaster, or domestic disturbance, as well as to provide military assistance to the Office of Disaster Preparedness.

ORGANIZATION

The New York Guard has an authorized cadre strength of 846 officers and enlisted personnel and an actual strength of 579 members assigned to 82 units, with at least one cadre unit located in each of the 74 State Armories. Should it become necessary for the Governor to authorize the mobilization of the New York Guard to its full strength, its number would then be increased to more than 11,000 officers and enlisted personnel.

The cadre serve the citizens of the State on a purely voluntary basis, receiving no drill pay, no uniform allowance,

and no retirement benefits. The one exception is that of a partial reimbursement for travel expenses which an individual incurs, periodically, in the performance of some assigned official duty.

REORGANIZATIONAL PLANNING

Encouraged by the Chief of Staff to the Governor, the New York Guard, in early February, initiated a staff study for the purpose of redefining its mission(s); of up-dating its organizational structure and of renewing its plans and activities pertinent to training, retention and recruiting and of community service.

After several months of study, self-evaluation and of assessing the current needs, a comprehensive report was prepared and presented to the C/S/G. Contained in the report were several major recommendations addressing themselves to the proposed reorganization of the New York Guard's structure; to the need for increased training participation with units of the New York Army National Guard, in those areas crucial to the Guard's State Mission; and to the appropriate inclusion of the New York Guard in the plans of the State wide operation(s) of the Office of Disaster Preparedness.

TRAINING

A commanders' training session was conducted on 28-29 February 76, at Camp Smith, Peekskill, NY, for the combined purposes of completing all necessary plans for the annual training program scheduled for September 76; to determine the status of Regimental command training and unit reports; to strengthen our retention and recruiting, and to initiate the self-evaluation (staff study) process. Thirty-five officers and enlisted personnel representing Headquarters, New York Guard and each of the six (6) Regimental Command Headquarters attended this training session.

Due to the limitation of State funds allocated for fiscal year 1976-77, the annual training program, originally scheduled for mid-September 76, at Camp Smith Peekskill, NY was suspended. The planned training exercises in Unit Mobilization, Communication, Radiological Monitoring, Staff Section Instruction, although modified, did in fact take place at individual home station (armory) locations during 1976, in which there participated, more than 400 officers and enlisted men.

Among those additional training activities and related military functions in which New York Guard personnel participated throughout the year (besides regularly scheduled armory drills) are as follows:

a. Involvement of the New York Guard in the 150th Anniversary Ball of the Old Guard of the City of New York on 31 January 76. Over 190 New York Guardsmen, and their ladies attended representing Headquarters, New York Guard and four of the six Regimental Commands.

b. Officers from HQ New York Guard, the 9th, 11th and 56th Regiments attended the Downstate Annual New York Militia Association Spring Dinner, in New York City, on 19 March 76. Representatives from Hq New York Guard, the 2d, 3d, and 74th Regiments also attended the Upstate New York Militia Association Spring Dinner, in Rochester, NY, on 24 April 76.

c. New York Guard support rendered to the 92nd Militia Association Conference, held at Kiamesha Lake, NY, on 9-12 Sep 76, by attendance of 21 officers, their wives, family and guests, totaling over 100 people, representing HQ-NYG and five of six Regimental Commands.

d. In cooperation with the National Guard, six officers of the Hq-74th Regiment participated in two (2) separate National Guard Command Post exercises, Conducted during the period 9-11 Jan 76 and 19-21 Mar 76, at Olean and Jamestown.

e. HQ-2d Regiment, NYG, was represented in a Law Enforcement Conference, conducted at the Watervliet Arsenal, Watervliet, NY, on 20 Jan 76.

f. In furtherance, of the New York Guard's objectives, the Commander 3d Regiment, attended scheduled district wide meetings conducted by the Central and Lake District Directors, of the Office of Disaster Preparedness, on 25 Mar and 12 May respectively at Newark and Oneida, NY.

g. The Acting Commander, New York Guard, attended the annual drill competition conducted between the companies of the US Army ROTC Group at the New York Military Academy, Cornwall-on-Hudson, NY, on 23 May 76. On behalf of the New York Guard, a "Commander's Trophy"

was provided and presented to the winning company.

h. On 29 May 76, a total of nineteen members of HQ New York Guard and the 2d Regiment and their ladies, attended the 1st Battalion, 210th Armor, NYARNG Military Ball, conducted at Albany, NY.

i. Eighteen officers and their ladies representing Hq New York Guard and 2d Regiment attended retirement ceremonies in honor of BG Robert F. Murphy, Adjutant General, SNY, on 12 Jun 76, in Albany, NY.

j. On 21 Jun and 13 Jul 76, a representative of VTU 1-2 USMCR made presentations on the subject "Urban Terrorism," to members of the 56th Regiment, at Orangeburg and Peekskill, NY, respectively.

k. At the invitation of the Commander, Co A, 1st Bn, 25th Marines 4th Marine Division, seven officers and men of the 2d Regiment attended as observers, a one day firing exercise conducted by the Marine unit at the Guilderland Rifle Range, on 28 Aug 76.

l. During the period 10-12 Sep 76, thirty members of the 9th and 56th Regiments participated in the joint outdoor field training exercise "Ridge Dancer," with members of the 1st Special Forces Battalion-USAR, This exercise was conducted to test tactics and techniques training.

m. The 2d Regiment conducted an annual training program at the Guilderland Rifle Range, on 9-10 Oct 76. Forty-six members of HQ New York Guard and the 2d Regiment participated in this training program which included instruction and training in such areas as weapons familiarization, and firing; a Radiological Refresher Course, and individual Staff Section responsibilities.

n. The 9th Regiment conducted a Regimental Review in New York City on 9 Nov 76, in honor of its former Com-

manding Officer, who had reached mandatory retirement age.

o. A member of the 56th Regiment qualified as a Radiological Defense Officer by participation in a 2 week course sponsored by Lowell University during the period 23 Aug to 3 Sep 76.

p. The 24th Regiment conducted its annual pistol matches at the Freeport Armory, Freeport, New York in August 76.

q. The Commander, Co D-2d Bn-56th Regiment, participated in a field exercises conducted by the 11th Special Forces Battalion, USAR, at Camp Bruckner, NY, on 13 Nov 76.

r. All units of the New York Guard successfully completed their required Annual Muster during the week of 11 Nov 76.

s. In continuation of the requirement to maintain trained and qualified personnel within the New York Guard, Twenty-seven members satisfactorily completed various U.S. Army sponsored sub-courses, while some thirty-five additional members are currently enrolled and in the process of completing various courses.

COMMUNITY ACTIVITIES

HHC - NEW YORK GUARD

Furthering the involvement of the New York Guard in the 1976 Bi-Centennial celebrations, the HQ, New York Guard, planned for and coordinated the participation of over 110 New York Guardsmen in the annual New York City Armed Forces Day Parade, conducted on 15 May 76. Representation in this outstanding patriotic event included members of HQ-NYG and four Regiments. Also, HQ-NYG developed and coordinated all planning for the establishment of a display at the Annual New York State Fair, at Syracuse, NY, 31 Aug thru 6 Sep 76. In addition to assigning four members to "man" the display, the preparation of the display items, which included a 9 X 18 foot pictorial display,

and an audiovisual presentation required many hours of concentrated effort. To assist in the recruiting area during this event, numerous pamphlets and brochures were prepared and distributed to the general public. As in the past, HQ-NYG, also coordinated the attendance of over forty-five New York Guardsmen and their ladies during the 58th Annual Memorial Services, honoring the men of the First Provisional Regiment-NYG, who served their State in the First World War. This service was conducted at the Sleepy-Hollow Cemetery, Tarrytown, NY, on 2 May 76. Members of HQ NYG also participated in Flag Day Ceremonies in Albany, NY on 13 Jan 76, and in Bi-Centennial Parades in Rensselaer, and East Greenbush, NY, on 30 May and 13 Jun 76, respectively.

2D REGIMENT:

Personnel of this Regiment continued participating in a great number of local community events to include, a bi-centennial banquet in Rensselaer, NY; furnishing a Color Guard for the Albany, NY, Tulip Queen Festival; a fifty-five man marching contingent for the Memorial Day Parade in Rensselaer, NY; a sixty man marching contingent for the East Greenbush, NY, Bi-Centennial Parade; representation in the Flag Day Parade, Troy, NY, to include a Color Guard; fifteen members participating in the Elks Flag Day ceremonies, Albany, NY; furnishing a twelve man detail to join in welcoming the Tall Ships, in Catskill, NY; several members of Co E-1 Bn participated in the Annual Observance of the Battle of Bennington, at the Bennington Monument; and participated in such other activities as the Reserve Officers Association Banquet, held in Saratoga, NY; the American Legion and V.F.W. church services for Veterans, conducted in Rensselaer, NY; the East Greenbush Bi-Centennial Ball; and a presentation to students of

Christian Brothers Academy, Albany, NY, regarding the history and current status of the New York Guard.

3D REGIMENT:

Personnel of this Regiment participated in several local community events to include Memorial Day Parade in Syracuse and Binghamton; the Bi-Centennial Day Parade in Binghamton.

9TH REGIMENT:

This Regiment continued its involvement in local events by furnishing a thirty-five man marching contingent for the Martin Luther King Parade on 23 May; having forty members participate in the Children Day Parade on 13 June 76; assigning a four-man detail to assist in an Easter Seal Telethon on 27-28 March 76; by inviting and hosting fifteen members of the Royal British Navy, on 6 July 76, in observance of the Bi-Centennial Activity, "Operation Sail," and detailing a Color Guard, and a ten-man contingent to participate in the 55th Annual massing of the Colors and Inter-Faith Service, conducted 17 October 76.

14TH REGIMENT:

Personnel of this Regiment participated in, the Military Order of World Wars Command Reception; the Fifth Division's Officers Association Dinner; the Bi-Centennial Celebration Commemorating the Inauguration of General George Washington; the Martin Luther King Parade; Armed Forces Day Parade, in New York City; Memorial Day Parade in Smithtown, NY; Annual Review of the Veterans Corps of Artillery; Queens County American Legion Parade; the 14th Regiment Review; BG Carlson and BG Miga retirement dinners held in Watervliet, NY; 55th annual

massing of the Colors and Inter-Faith Service; Veterans Day Parade; the 14th Regiment's Bi-Centennial Dinner; a Review and reception for the Queens Quasi-Cadets; the conduct of unit Christmas Parties in Freeport and Forest Hills, NY, and by sponsoring and conducting its Annual Christmas Party for over 125 underprivileged children from Long Island and Brooklyn, NY.

56TH REGIMENT:

Units of this Regiment provided Color Guard details for the Dutchess County Bi-Centennial Parade in Poughkeepsie, NY, the City of Poughkeepsie Bi-Centennial Parade and for the Massing of the Colors, at St Patricks Cathedral, NYC, Also members of this command marched in the Armed Forces Parade, in NYC, and participated in the Flag Dedication Ceremonies at the Kingston, NY, Elks Club.

74TH REGIMENT:

Members of this Regiment participated in a great many community events to include Memorial Day Parades held in Williamsville, Blasdell and Rochester, NY; the Bi-Centennial Day Parade and Aqua Festival both held in Rochester, NY; The Armed Forces Week Commission which formed in January 76, and scheduled meetings up through May 76, relative to preparations for the Armed Forces Day Luncheon and Military Ball, at which event an enlisted member of the Hq-74th Regiment was a recipient of an Honor Award. Also, members of this Regiment participated in the Buffalo and Erie County Historical Society's "Operation Sail - 76" program, which include a series of visits by foreign sailing ships at Buffalo, NY; and further detailed a Color Guard for President Ford, during his visit to Buffalo on 31 October 76.

OFFICE OF DISASTER PREPAREDNESS

DISASTER PREPAREDNESS

ORGANIZATION AND MISSION

The Office of Disaster Preparedness carries out the functions associated with the responsibilities assigned to the Division of Military and Naval Affairs by the Executive Law and State Defense Emergency Act, as amended by Chapter 931, Laws of 1973, for:

1. Coordination of natural and man-made disaster assistance.
2. Civil defense measures for protection against and recovery from attack.

ODP supervises and coordinates preparedness activities of the local governments throughout the State which will have to make the initial response to attack or other disaster. Pursuant to the Defense Emergency Act, counties and cities have established 73 local civil defense offices, of which 57 are county or consolidated county-city offices, and of which 16 are city offices, staffed with local employees. These offices also coordinate local responses to natural and man-made disasters. Six ODP district offices serve as an intermediate echelon

between the State and local levels, each district office having responsibility for coordination of a group of local offices.

ODP also coordinates the preparedness activities of the various State departments and agencies which will provide State assistance if the local governmental response is not adequate to cope with an emergency. The State local preparedness program is coordinated by ODP with Federal agencies, including the Defense Civil Preparedness Agency, Federal Disaster Assistance Administration and Federal Preparedness Agency, and with non-governmental agencies which provide disaster assistance, such as the American Red Cross, Salvation Army, and Civil Air Patrol.

MAJOR DISASTER ASSISTANCE

The Federal government provides assistance in major disasters to supplement State and local efforts. Statutory authority for such assistance is contained in:

1. Public Law 91-606, the Disaster Relief Act of 1970, with respect to major disasters declared by the President prior to April 1, 1974.

2. Public Law 93-288, the Disaster Relief Act of 1974, with respect to major disasters declared by the President after April 1, 1974.

Nassau County and Suffolk County
by Hurricane Belle on August
9-10, 1976.

At the start of 1976, ODP was processing Federal disaster assistance under five major disasters, three of which had been declared under Public Law 91-606 and two under Public Law 93-288.

During 1976, acting on requests by the Governor, the President declared four major disasters under Public Law 93-288:

1. Disaster FDAA-494-DR, declared March 19, 1976, as a result of an ice storm and subsequent severe storms and flooding in western New York (the counties of Chautauqua, Erie, Genesee, Livingston, Monroe and Wyoming and the Town of Perrysburg in Cattaraugus County) during the period from March 1 to 7, 1976.
2. Disaster FDAA-512-DR, declared June 29, 1976, as a result of flash-flooding in Chemung County and Steuben County on June 19-20, 1976.
3. Disaster FDAA-515-DR, declared July 21, 1976, as a result of severe storms and flooding on July 11-12, 1976, in seven counties (the counties of Broome, Herkimer, Oneida, Tioga, Tompkins, Warren and Washington) in various parts of the State.
4. Disaster FDAA-520-DR, declared September 3, 1976, as a result of damage caused in New York City,

In order to support the Governor's requests for Federal aid, ODP obtained from local officials in the affected areas, through the local offices of civil defense, and from State departments and agencies, detailed information concerning the effects of the disaster, including damage to public and private property, casualties and numbers of people made homeless, disruption of essential services, and response efforts by local and State governments and non-governmental agencies. Following the declaration of each disaster, a joint Federal-State coordinating office was established in the affected area, staffed by representatives of the Federal Disaster Assistance Administration, ODP, other Federal and State agencies and the Red Cross. Toll-free telephone banks were established by FDAA to be used by individuals requiring assistance. Representatives of FDAA and ODP briefed local government officials on the procedures under which State agencies and political subdivisions could apply for Federal aid for the repair and restoration of public property. Under the direction of FDAA and ODP, teams of Federal and State engineers inspected damage sites identified by local officials to prepare damage survey reports which support the project applications filed by the political subdivisions for Federal disaster aid. Representatives of ODP and local offices of civil defense assisted the political subdivisions with the preparation of their project applications. These were reviewed by ODP and forwarded to FDAA for approval, with appropriate recommendations.

In addition, ODP continued to process supplemental applications, requests

for final inspections, audits and payment vouchers for the five previously declared disasters. This activity was also conducted for the four major disasters declared during 1976.

The Federal-State coordinating offices were closed after damage surveys were completed and all applicants had submitted their initial project applications. Continuing administration of disaster assistance was transferred to ODP's central office in Albany, assisted by appropriate ODP district offices. Hurricane Belle was an example of ODP and DMNA response to an emergency. The progress of the storm was monitored by ODP in cooperation with the National Weather Service. State agencies and local officials were alerted and informed of the path of the storm, its estimated arrival time, and areas which could be affected.

On August 9, ODP representatives went to New York City, Nassau County and Suffolk County, the area expected to receive the brunt of the hurricane, to provide direct contact with local officials during the emergency period. The State Emergency Operating Center and ODP's Southern District Office were activated on a round-the-clock basis on August 9-10. Selected units and personnel of the State's military forces were alerted and mobilized to be prepared to provide assistance to civil authorities in New York City and on Long Island for disaster operations due to the anticipated effects of the hurricane. The Chief of Staff to the Governor and the Deputy Director of Civil Defense accompanied the Governor on an over-flight of the area following the storm's passage, and met with local officials to ascertain their needs for assistance, which led to the Governor's request for, and the President's declaration of, a major disaster.

The status of Federal financial assistance for the nine current major disasters is provided as an inclosure to this report.

OTHER DISASTER ASSISTANCE

A number of lesser emergencies occurred during 1976, including ice jams, small stream flooding, fires, explosions, train derailments, water shortages, severe weather conditions and similar problems. Most of these required only local responses, although ODP monitored the situations in the event State or Federal assistance might become necessary. In some instances, ODP or other State or Federal resources were used to provide technical assistance to local officials. In eighteen instances, equipment from the State civil defense engineering stockpile was loaned to local governments or State agencies.

During the year, the Administrator of the Small Business Administration, acting under his statutory authority and in response to the Governor's requests, declared six SBA disasters as a result of ice jams, flooding or severe weather conditions which caused extensive damage to private property. Under these declarations, property owners became eligible to apply to SBA for physical damage and economic injury loans. ODP assembled information which was used to support the requests for such assistance.

SBA disaster declarations during 1976 included:

- Ulster County and adjacent counties as a result of ice jams and flooding January 27-29, 1976.
- Chautauqua County and adjacent counties as a result of heavy rains, fast thaw, ice jams and flooding February 16-17, 1976
- Ulster County and adjacent counties as a result of high wind damage March 21, 1976.
- Essex County, Warren County and adjacent counties as a result of flooding April 1-2, 1976.

- Monroe County, Wayne County and adjacent counties as a result of flooding April 15-16, 1976.

- Rockland County and adjacent counties as a result of flooding on June 20, 1976.

SBA loans were also made available under the Presidentially declared major disasters discussed previously.

PLANNING AND TRAINING

Four On-Site Assistance projects were initiated during 1976, covering four county and two city Offices of Civil Defense, bringing the total of local Offices of Civil Defense involved to twenty-six. Under the On-Site Assistance Program, at the request of a chief executive of a county or city, an evaluation is made of the local disaster readiness posture. ODP arranges and supervises the work of a team of DCPA, ODP and other State agency personnel who interview local government officials, local business and other community leaders. Based on these interviews, a report is prepared for the local chief executive outlining the strengths and weaknesses of his jurisdiction's preparedness capabilities. This report is reviewed by the Chief executive and provides a basis for a plan and schedule to correct deficiencies and improve the disaster response capability. Under a Nuclear Civil Protection Planning contract with the Defense Civil Preparedness Agency which provides 100% Federal funding, two alternative contingency plans are being developed:

1. Community Shelter Plans, which provide for the assignment of population to fallout shelter in event of nuclear attack.

2. Crisis Relocation Plans, which provide for the movement of high-risk area populations to areas of lesser-risk in the event of a threat of nuclear attack, and for their care and protection in the lesser-risk host areas.

During 1976, a prototype crisis relocation plan was completed for the Utica-Rome area, which was selected by DCPA as one of several pilot-study areas throughout the country, and the plan was submitted to DCPA. Additional work included the development of a State crisis relocation planning and studies in the Massena and Plattsburgh areas. Community shelter plans were updated for Cortland County and Franklin County community shelter plan was completed. Orientation seminars were conducted for local officials in ODP's Eastern, Central and Northern Districts to inform them about crisis relocation planning, provide a forum for obtaining local input for the planning process and encourage inter-governmental coordination and cooperation for this activity.

ODP continued to cooperate with the Bureau of Radiological Health, Department of Health, in connection with peacetime nuclear accident planning. ODP and Department of Health representatives met with representatives of the Nuclear Regulatory Commission and other Federal agencies to review the State's emergency plan for major radiation accidents involving nuclear facilities. ODP assisted the Bureau of Radiological Health in drafting revisions to the State plan based on comments from the Federal representatives and other concerned parties. An ODP staff member appeared as a witness at siting hearings of the Public Service Commission relative to nuclear power plants proposed for construction in Ca-

OFFICE OF DISASTER PREPAREDNESS

yuga County and Suffolk County. A member of the ODP staff participated as a consultant to the Nuclear Regulatory Commission in the latter's program to develop a training program for peacetime nuclear accident responses. A representative of ODP, two members of the staff of the Bureau of Radiological Health and representatives of four local Offices of Civil Defense attended a radiological response planning course conducted by DCPA under NRC sponsorship.

The revised overall State Emergency Operations Plan was distributed in 1976. This plan encompasses State, District and local emergency plans for both attack and peacetime emergencies. Local Offices of Civil Defense are required to complete appendices to the Plan which provide data necessary to their local operations. The Plan will be revised further to incorporate material being developed under the Nuclear Civil Protection Planning contract with DCPA and the natural disaster program development grant funded under contract with the Federal Disaster Assistance Administration.

Under the latter contract, 100% Federally-funded over a two-year period, the State's plans, procedures and programs to respond to natural disasters will be evaluated and improved. State agencies have been requested to develop or update agency disaster response plans and programs in coordination with the project staff. Draft materials were prepared during 1976, including an evaluation of hazards, a Disaster Assistance Guide for local officials and a damage assessment procedure. These are being reviewed for improvement prior to issuance.

Due to a lack of funds, DCPA could not renew the training contract with the State which expired September 30, 1976,

and two training specialists, employed by ODP with 100% Federal funding support, were terminated. However, ODP staff did conduct a number of training programs with other DCPA funding support, including:

Five Conferences for Public Officials.

Three Emergency Operations Simulation exercises.

One seminar for police officials.

Two Planning and Operations Workshops.

Two seminars for personnel concerned with the delivery of emergency medical services.

Three conferences for school officials.

One state-wide conference for local civil defense directors.

Total attendance at the foregoing was approximately 700 people. During October 1976, a joint ODP-US Department of Agriculture conference was held in each of ODP's six District Offices to provide briefings for local officials and USDA field personnel concerning the latter agency's emergency programs and the procedures to be followed in order to obtain assistance.

In September 1976, ODP conducted a State-wide training exercise, involving ODP District Offices, local Offices of Civil Defense, State agencies, National Weather Service and the Red Cross.

Scenarios were developed which presented simulated problems and required solutions to a variety of disaster problems at local, District and State levels. No public participation was involved.

DCPA initiated a Regional-State-local exercise, named Exercise 76-77, which was conducted on selected dates beginning September 30, 1976. The exercise will be terminated in February 1977. No public participation was involved. ODP staff participated in exercise phases covering increased readiness actions, a simulated attack phase, and simulated post-attack procedures.

The annual Civil Defense-Civil Air Patrol effectiveness exercise was conducted in September 1976.

ODP continued to administer the MOBDES program under which eligible military reserve personnel are assigned to training and operational duties with State and local civil defense agencies. Thirty-five military reserve personnel participated in this program in New York State during 1976.

COMMUNICATIONS AND WARNING

Regular tests and maintenance were conducted of existing radio and land-line communications, including the National Warning System, the Civil Defense National Teletypewriter System and the National Weather Teletypewriter System. The value of these systems was again demonstrated during 1976 by frequent use in providing State agencies and local governments with advance information concerning potential severe weather conditions and obtaining and providing information during actual emergencies.

The Emergency Broadcast System, a voluntary broadcast industry operated system sponsored by the Federal Communications Commission received renewed attention during 1976. Meetings were held with the new State Emergency Communications Committee Chairman appointed by the Federal Communications Commission, who is reviewing the status and organization of the Operational Area Emergency Communications Committees consisting of broadcast industry personnel. During early 1977, meetings will be

held in two locations in the State to proceed with the development of plans for expanded use of EBS during emergencies. These meetings will involve ODP, the EBS State Chairman and Operational Area Chairmen, other broadcast industry representatives, FCC, DCPA, the National Oceanic and Atmospheric Administration, and local officials.

RADIOLOGICAL PROTECTION

The State's civil defense radiological protection program is designed to develop and maintain a Statewide capability to respond to nuclear attack and to utilize civil defense radiological resources to support responses to peacetime radiological incidents.

During 1976, the evaluation of the radiological capability in local Offices of Civil Defense continued, with particular attention to those areas within which nuclear facilities are located. Appendices to the Radiological Annex to the State Emergency Operations Plan dealing with peacetime radiation incidents were prepared and distributed. Liaison was continued with the Civil Air Patrol for utilization of CAP resources in support of the State Health Department in the event of a major nuclear accident.

Radiological training continued to receive attention. A set of radiological publications, suitable for school use, was developed. In support of local requirements, 51,000 copies of manuals and forms and 100 training films were distributed.

Eight new Radiological Defense Advisory Manuals were developed, and existing manuals and forms were extensively revised. Some 45 new visual aids were prepared for training courses and two new films were purchased to support radiological training.

The Radiological Annexes of 21 local jurisdictions were reviewed and

updated with respect to aerial radiological survey capability, fixed and mobile monitoring capability and radiological staffing resources.

Three Aerial Radiological Survey Courses, each of eight hours duration, were conducted at three different locations in the State for CAP and Civil defense personnel. One of these courses was given by ODP staff and remainder by locally approved instructors. A total of 33 students completed the courses. Under the Radiological Training Assistance Program, utilizing funds provided by Defense Civil Preparedness Agency through the Radiological Systems Maintenance contract to reimburse locally approved instructors, thirteen radiological monitoring courses of various types were conducted. These courses graduated 230 students in eight local civil defense jurisdictions at a total cost of \$1,430. Four new instructors were approved to conduct courses under the program. Two Radiological Defense Officers Courses, conducted by the University of Lowell under Federal contract were held in New York State. ODP's Radiological Intelligence Section developed and conducted the EOC Radiological Exercise portion of these courses, which were held in Auburn and Ossining. During 1976, 67 new RDO's were trained.

Through the DCPA Home Study Course, Introduction to Radiological Monitoring, 82 students during the year completed the equivalent of eight hours of training leading to completion of the sixteen-hour Radiological monitoring training requirement.

The Radiological Instrument Maintenance and Calibration Unit continued to be 100% funded during 1976 under the

Radiological Systems Maintenance Contract with DCPA. In September a new contract was negotiated with DCPA in the amount of \$165,751 for the State-wide Radiological Systems Maintenance Program, for the period October 1, 1976 through September 30, 1977. The emphasis in this new contract has shifted from one of routine exchange of radiological equipment to on-site in-place operability checks of the instruments with replacement and return of defective equipment. This shift in emphasis resulted from a nationwide program of checking the calibration of instruments which were returned for routine maintenance. After a period of two to four years it was shown that the instruments had retained a better than a 95% reliability rate of operability.

The On-Site Inspection Program conducted under the contract makes provision for local offices of Civil Defense to employ part-time help at the rate of \$3.25 per hour in support of the State Radiological Systems Maintenance Program. The purpose of the OSI Program is to inspect local shelter facilities and fixed radiological monitoring stations, to perform operability checks of RADEF instruments and to exchange any instruments found defective at these facilities for maintenance and calibration in accordance with the schedules published by ODP's Radiological Intelligence Section. During 1976, local inspectors were paid a total of \$20,579.11 under the OSI program. Inspections were made of 4,259 shelter facilities and 549 fixed monitoring stations in local jurisdictions to determine readiness of radiological personnel, facilities and instruments. This activity generated a maintenance and calibration work-load of 7,000 shelter kits and 1,938 FMS kits for the Radiological Instrument Maintenance and Calibration Facility in Albany. Data on Statewide radiological

resources, compiled from OSI reports, is submitted to the DCPA computer facility for inclusion in the RADEF Data Bank, a nationwide inventory of radiological resources.

During 1976, 3,363 CDV-715's were retrofitted bringing the total number of instruments retrofitted since April 1972 to 32,602. The 1976 production has been placed into 400 FMS Kits (CDV-777) and 2,563 shelter kits (CDV-777-1). The total kits now containing retrofitted instruments are 4,333 FMS kits and 22,363 shelter kits leaving 453 FMS kits and 4,937 shelter kits to be done.

In New York City, 746 shelter radiological kits were removed from low security fallout shelters for stockpiling at centralized storage locations. At year's end, the number of kits removed from shelters since June 1972 totaled 6,417 for crisis distribution in accordance with plans to be developed by the City.

CIVIL AIR PATROL

The New York Wing of Civil Air Patrol provides support to the State and local disaster preparedness program in connection with search and rescue mission, natural or enemy caused disasters, or other emergencies.

During the year, 17 CAP members completed the 8-hour Aerial Radiological

Monitoring Course. No new aerial survey bases were established during 1976. The Statewide total of CAP manned aerial survey bases is now 28.

The annual CAP/CD Effectiveness Test was conducted on September 17 and 18, 1976. The ODP Radiological Intelligence Section prepared the exercise problems and plan and coordinated Statewide disaster preparedness participation in the exercise. CAP personnel participated at the State EOC and throughout the State performing missions in support of State and local requirements. Over 860 CAP members were involved with 43 aircraft flying over 150 hours on 130 sorties. CAP members operated 16 fixed radio bases and 58 mobile radio units. Missions included aerial radiological survey, photo reconnaissance for damage assessment, ground traffic movement surveys, cargo and passenger transport, and communications support of civil defense. The CAP organization again demonstrated its unique capability to perform emergency missions for State and local government whether in a wartime or natural disaster emergency.

At year's end, resources of the New York Wing, CAP, included approximately 2100 cadets, 2,442 senior members of whom 1,140 are pilots, 24 Wing-owned aircraft, 80 vehicles, 710 radio units, 28 aerial radiological survey instruments, and 91 sets of portable radiological survey instruments, and 91 sets of portable radiological survey meters.

PUBLICATIONS PRODUCTION FIGURES**

Production figures pertaining to the main activities of the Office Support Branch of the Administration Division for the calendar year 1976.

STATE PUBLICATIONS AND FORMS:

Total individual publications and blank forms reproduced, collated and distributed. (Job items).	12,558
Total number of copies, publications and blank forms reproduced, collated and distributed.	4,984,430
Individual State Forms	624
Copies of State Forms	1,130,900

Individual jobs completed involve the following activities:

Paper and Metal Masters	35,535
Transparencies for Training Aids	1,135
Individual offset masters	35,535
Individual signs	217
Estimated impressions by duplicating machines	10,500,000
Individual blue prints	2,545

Casual copies service included:

Brunning 2000	11,177
Xerox 4000s	414,911

FEDERAL PUBLICATIONS AND BLANK FORMS:

Individual publications and blank forms received from Federal sources for initial distribution.	1,855
Individual copies of publications and blank forms initially distributed	600,100
Individual DA Forms 17 edited (Requisition for resupply)	7,918
Individual line items of publications and blank forms edited for resupply	126,000
Individual copies of publications and blank forms received, stored and issued as resupply	3,765,315
Individual copies of publications and forms received from Federal sources as initial distribution and resupply	4,128,340
Individual DA Forms 12 edited (Requisition for initial distribution of new or revised publications).	220
Individual blocks of DA Forms 12 edited	38,625

PAPER CONSERVATION PROGRAM:

Estimated number of sheets of salvaged paper and forms processed for reuse by cutting, padding and /or overprinting	419,500
Number of scratch pads made	4,195
Estimated impressions printed to effect necessary overprinting	315,000

NOTE: Effective 1 October 1976, the Federal Fiscal year was changed from 1 July - 30 June to 1 October - 30 September and a three month transition period was authorized and separately funded. During this transition period, 1 July - 30 September 1976, Federal allotment in the amount of \$13,213,411 was authorized, of which \$13,110,849 was obligated; IDT pay funding was \$4,600,000.

ARMY NATIONAL GUARD

UNITED STATES PROPERTY AND FISCAL OFFICE

COMPTROLLER DIVISION

Federal allotments authorized by the National Guard Bureau (NGB) through the USP&FO for the New York Army National Guard (NYARNG) during Fiscal Year 1976 amounted to \$41,274,934 of which \$41,112,082 was obligated as listed below:

APPROPRIATION TITLE	AMOUNT
National Guard Personnel	\$ 10,644,580
Operations and Maintenance	28,953,206
Military Construction	1,514,296

TOTAL \$ 41,112,082

Additional Federal funding for NYARNG Inactive Duty Training Pay during Fiscal year 1976 was \$18,400,000.

During Fiscal Year 1976, there was an average of 1,390 federally paid technicians employed in the NYARNG.

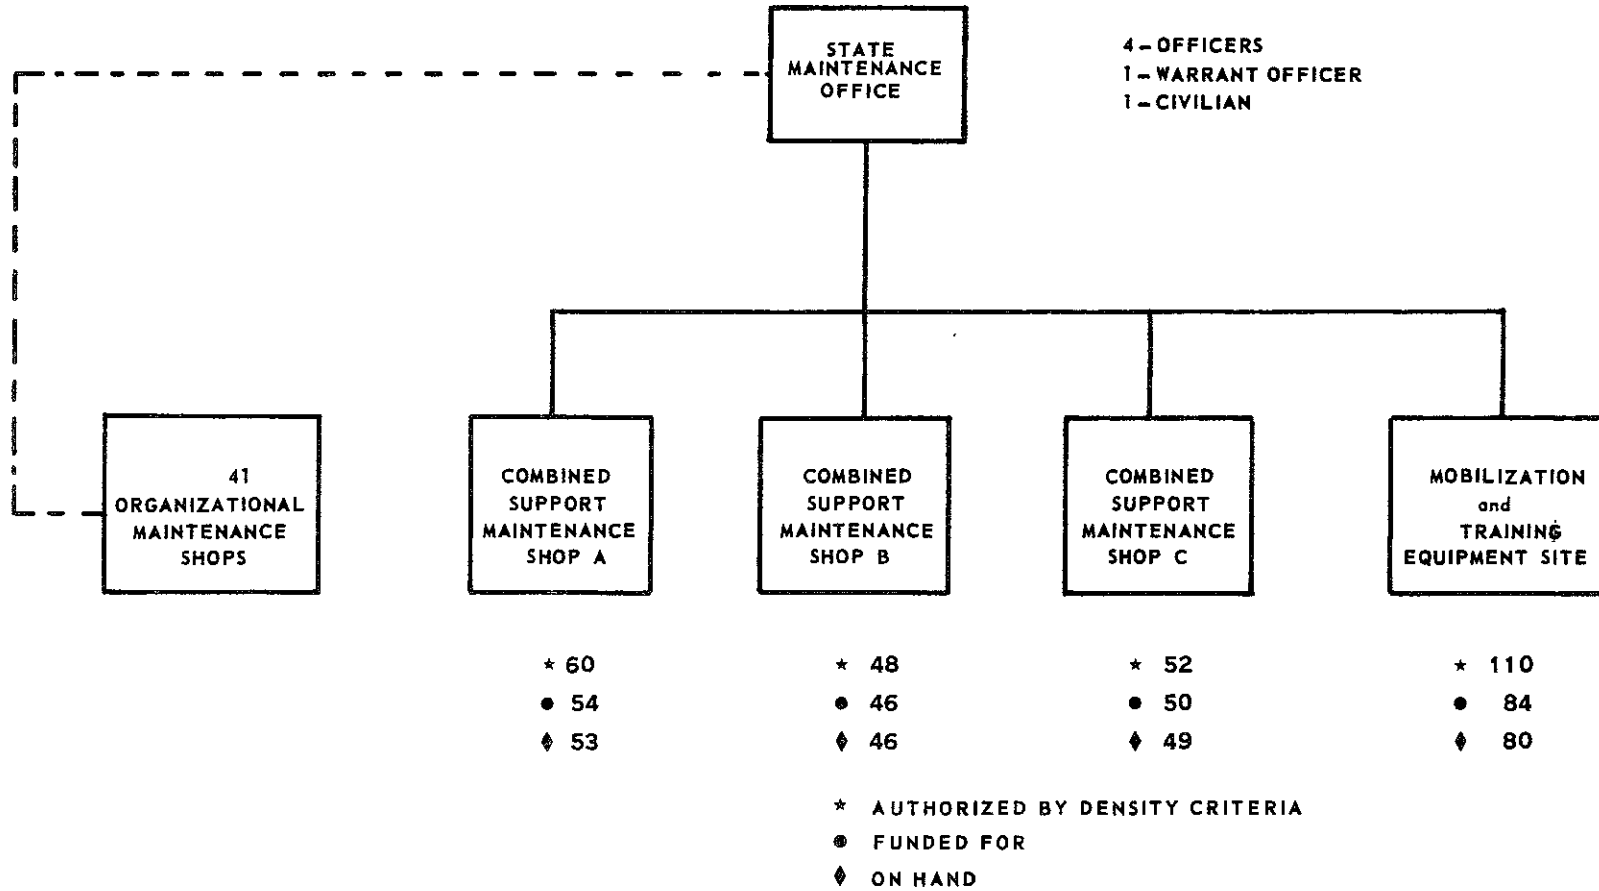

Significant activities during calendar year 1976 in which the Comptroller Division participated are as follows:

a. All payroll records of Federal technicians employed in this State prior to 1 January 1969 (PL 90-486 converted technicians to the Federal Civil Service System) were microfilmed and retained under current regulations.

b. Retroactive military pay claims based on the October 1972 pay raise continue to be processed.

c. Withholding of New York City Income Tax from Federal technicians was implemented during April 1976 with the introductions of a new program in the Automatic Data Processing System.

**ARMY NATIONAL GUARD
STATE MAINTENANCE OFFICE
ORGANIZATIONAL CHART**

LEGEND - - - - - INDICATES TECHNICAL ASSISTANCE ONLY.

**ARMY NATIONAL GUARD
STATE MAINTENANCE OFFICE
STATISTICAL DATA**

The total Federal funds expended in support of the NYARNG maintenance program for repair parts and contractual repair was \$1,422,233.

Densities of equipment having a high degree of maintenance significance and which require the major effort of the maintenance facilities are:

Surface Equipment (trucks, truck tractors, combat vehicles and engineer construction equipment)	4,881
Electronic Equipment (radar, radio etc.)	14,838
Artillery Weapons	226
Small Arms	29,847
Vehicular Trailers	2,791
Sighting and Fire Control Equipment	3,499
Ancillary Equipment (generators, pumps, canvas)	4,699
Calibration Items	5,934
Chemical/Medical	24,267
	<u>90,982</u>

The following indicates the work performed by the three CSMS's and MATES during CY 1976:

CATEGORY	WORK ORDERS COMPLETED
Small Arms	12,236
Artillery	1,638
Instruments	2,686
Tank-Automotive	9,860
Electronics	6,694
	<u>33,114</u>

**NAVAL MILITIA
CHRONOLOGY OF HIGHLIGHTS**

JANUARY

On 24 January, SMR 6402 conducted Annual Active Duty for Training at Floyd Bennett, Brooklyn aboard YR 64, Repair Barge.

FEBRUARY

On 2 February, SMR 6302 conducted annual Active Duty for Training at Floyd Bennett, Brooklyn aboard YR 64, Repair Barge.

On 6 February, the Commanding Officer, New York Naval Militia met with representatives of Naval Facilities Engineering Command in Philadelphia to finalize the plans for the Navy's takeover of the maintenance and operation of Naval Militia facilities.

On 28 February, Reserve Mobile Construction Battalion departed for annual Active Duty for Training at Camp Lejeune, North Carolina.

MARCH

On 20 March, Co A and Co D, 1st Bn, 25th Marines, together with Comm Co, 6th Comm Bn, departed for Annual Training Duty at 29 Palms, California.

APRIL

On 1 April, the Navy Department assumed full responsibility for the maintenance and operation of the New York Naval Militia facilities.

On 3 April, COMDESLANTDET 202 departed for annual Active Duty for Training at Charleston, South Carolina.

On 12 April, Colonel George M. Wilson, USMC relieved Brigadier General Bernard E. Trainor as Director of the 1st Marine Corps District.

On 24 - 25 April, the 2nd Battalion, 25th Marines conducted Annual Rifle Requalification at Camp Smith, Peekskill, New York.

MAY

On 1 May, at Camp Smith, Peekskill, New York, the 6th Communications Battalion conducted a Pass in Review and Change of Command Ceremony.

On 8 May, the 2nd Battalion (-) 25th Marines departed for Annual Training Duty in the Panama Canal Zone.

On 15-16 May, the remaining elements of 2nd Battalion, 25th Marines were administered Company Tactical Test at West Point, New York.

On 31 May, Naval Militia units and personnel participated, throughout the state, in Memorial Day Ceremonies.

JUNE

On 5 June, at Camp Smith, Peekskill, New York, Reserve Mobile Construction Battalion-13 dedicated their new Pasco Building in honor of Chief Sanchez, who gave his life fighting a fire in Brooklyn, New York.

JULY

On 8 July, a contingent of New York Naval Militia personnel attended a briefing and tour of two Israel Naval Missile Boats in New York City.

On 10 July, Headquarters Company, 6th Communications Battalion departed for Annual Training Duty at Camp Pendleton, California.

On 17 July, 2nd Battalion (-) 25th Marines departed for Annual Training Duty at Bridgeport, California.

FEDERAL CIVIL DEFENSE FINANCIAL AND PROPERTY ASSISTANCE

During 1976, civil defense financial and property assistance programs, administered by DCPA for the Federal government and by ODP for the State, continued to be utilized to support eligible activities of State and local offices of Civil Defense, as follows:

1. Personnel and Administrative Expenses – The State and 45 eligible local Offices of Civil Defense shared \$2,676,599 in Federal matching funds.
2. Systems Maintenance and Services, Supporting Systems Equipment and Emergency Operating Centers – Federal matching funds amounted to \$767,228.
3. Excess Property Loans – Property valued by the Federal government at \$1,595,000 was obtained on a loan basis, including a portion of the Federal engineering equipment stockpile formerly maintained by DCPA at Romulus, New York, which was phased out in 1976.
4. Surplus Property – Property with a Federal acquisition value of \$1,348,673 was obtained by eligible civil defense donees for assessments totalling \$121,018.
5. Contracts – The following ODP activities were 100% Federally-funded under ODP-DCPA contracts:
 - a. Nuclear Civil Protection Planning (formerly Community Shelter Planning)

October 1, 1975 to September 30, 1976	\$ 66,823
October 1, 1976 to September 30, 1977	\$ 136,500
 - b. Radiological Maintenance and Calibration

September 1, 1975 to September 30, 1976	\$ 195,000 (as amended)
October 1, 1976 to September 30, 1977	\$ 165,751
