NELSON A. ROCKEFELLER
GOVERNOR
COMMANDER-IN-CHIEF

MAJOR GENERAL A. C. O'HARA
CHIEF OF STAFF TO THE GOVERNOR

Honorable Nelson A. Rockefeller
Governor of the State of New York
Executive Chamber
State Capitol
Albany, New York

Dear Governor Rockefeller:

With a sense of mission accomplishment I am pleased to forward this report on the activities of the New York State Military Forces during 1968. It was a year of challenge for all our people and they proved more than equal to it.

The Army National Guard, faced with a major reorganization which deactivated the historic 27th Division, accomplished the task smoothly and without any difficulty.

The Air National Guard had two of its tactical fighter units mobilized for active duty - one going directly to Korea and to Viet Nam. In this latter assignment the unit flew daily missions in direct support of military operations. They demonstrated very clearly the proficiency and combat readiness of the National Guard.

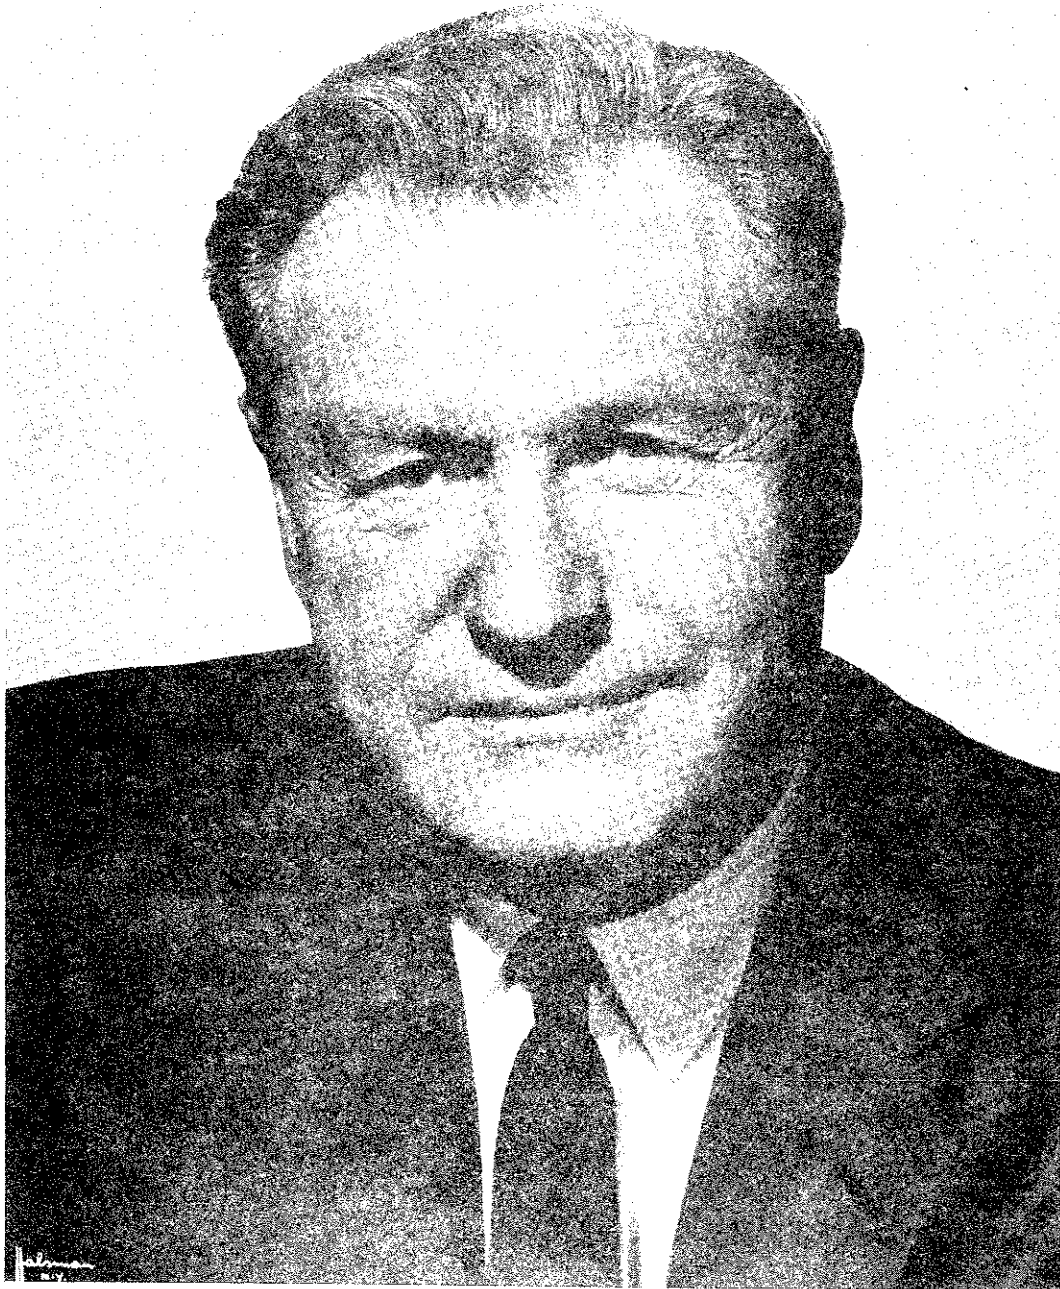

You may be assured that all components of the State Military Forces are prepared to accomplish their federal and state missions, to whatever extent may be required.

Respectfully,

A handwritten signature in cursive script, appearing to read "A. C. O'Hara".

A. C. O'HARA
Major General, NYARNG

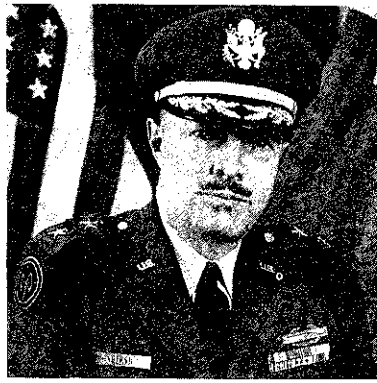

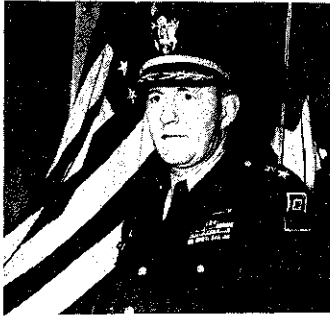

GOVERNOR NELSON A. ROCKEFELLER

COMMANDER-IN-CHIEF OF THE STATE MILITARY FORCES OF NEW YORK

MAJOR GENERAL A. C. O'HARA
Chief of Staff to the Governor
and
Commanding General
New York Army National Guard

MAJOR GENERAL J. C. BAKER
Vice Chief of Staff to the Governor
and
Deputy Commanding General
New York Army National Guard

BRIGADIER GENERAL J. E. MIDDLEBROOKS
The Adjutant General
of the State of New York
and
Executive Officer
Division of Military and Naval Affairs
(Retired 25 Sep 68)

BRIGADIER GENERAL F. J. HIGGINS
The Adjutant General
of the State of New York
and
Executive Officer
Division of Military and Naval Affairs
(Appointed 26 Sep 68)

MAJOR GENERAL L. A. CURTIS
Commander
New York Air National Guard

REAR ADMIRAL R. C. BURKE
Commander
New York Naval Militia

MAJOR GENERAL A. J. MALATESTA
Commanding General
New York Guard

THESE

DEVELOPMENTS OF

INTELLIGENCE AND

INVESTIGATION

AND

THESE

INVESTIGATIONS ARE

IN ACCORDANCE WITH

MISSIONS:

FEDERAL

In a national emergency, the federally recognized units of the State Military Forces are subject to mobilization by the President of the United States, for active duty. Their primary federal mission is to provide a trained reserve force, organized and equipped as directed by the Department of Defense and capable of participating effectively, in combined military operations with the regular forces of the United States.

STATE

All components of the State Military Forces are available, on order of the Governor only, for assistance to local civic authority in the event of disaster, disturbance or other emergency. Their state mission involves planning and training for employment of troops and equipment, as the situation dictates, to support rescue and relief operations; to aid in recovery from natural disasters; to supplement functions of civil defense agencies; and, to assist civil authority in maintaining law and order, controlling civil disturbance and protecting life and property.

CAMP SMITH UTILIZATION

MILITARY

Inactive duty training commenced on the weekend of 9-10 March and continued up to and including the weekend of 8-9 June with said training resuming on 7-8 September and continuing to the weekend of 16-17 November, inclusive. On each weekend, the Camp was used to full capacity by units of the New York Army and Air National Guard, the New York Naval Militia and elements of the US Army and Naval Reserves.

Annual field training began on 15 June with components of the United States Army Reserves utilizing the camp's facilities for two (2) two-week periods, i.e., from 15 June to 13 July, inclusive. Said troops consisted of men from various parts of New York State, New Jersey, Pennsylvania, Maryland, Ohio, Rhode Island and Minnesota. The Empire State Military Academy conducted the first and second phases of its school at Camp Smith from 3 August to 17 August. Its supporting units consisted of the 199th Army Band, 138th PI Det, 243 Med Co (Clrg), and HDD (-), all NYARNG. The last field training period commenced 17 August with a termination date of 31 August. Troops included in the latter period were from the following NYARNG units: HHC, 221st Eng Gp (-); 204th Eng Bn (Const); 188th Eng Co (Dp Trk); and the 205th Lt Equip Maint Co. Additional to widening the fire break the engineer units improved portions of Camp roads with the replacement of 80 feet of drainage culverts.

The New York Guard, with Area Commands from all over New York State, conducted its annual field training at Camp Smith from 20 September to 22 September.

The annual firing matches of the Old Guard of the City of New York were held on 24 and 25 August.

Cadets of the Reserve Officer Training Corps of the Peekskill Military Academy accomplished their marksmanship and field training mission at Camp Smith on 6 and 7 May.

LAW ENFORCEMENT AGENCIES:

The Federal Bureau of Investigation opened the Camp Smith utilization schedule on 20 February with a series of training schools for its own agents and other law enforcement officers and recruits from various agencies of Westchester and Rockland Counties. Instruction, conducted by agents from the New York City office of the FBI, consisted of training in mob

and riot control, defensive tactics and firearms instruction. The last school of the series was concluded sometime in mid-December. In this connection, agents of the FBI were given about 4,000 man-days of training with other law enforcement officers receiving approximately 2,500 man-days of like instruction.

Pending completion of its Academy in Albany which is scheduled for the spring of 1970, the Division of New York State Police is conducting its recruit training at Camp Smith. New York State Trooper aspirants who attend the school hail from throughout New York State. The Academy's curriculum, in addition to training in the use of firearms and defensive tactics, includes intensive classroom instruction in criminal and civil law, police and court procedures, investigative techniques, civil rights and human relations, accident investigation, public speaking, motor vehicle operation, traffic control, first aid, and the handling of emergency situations. The first of such schools, with recruits numbering approximately 200, was conducted from 6 May until 28 June in an eight-week training program as the first phase of its sixteen week recruit school. The Academy opened its second recruit school at Camp Smith on 14 October in a full sixteen-week program to be terminated on 14 February 1969, at which time it is anticipated 100 recruits will be graduated as New York State Troopers.

CIVILIAN

This past year saw an unprecedented program at Camp Smith with "Operation Opportunity" taking over the facilities of the Camp from 13 July to 2 August. Under the sponsorship of the Office of Economic Opportunity, in concert with the State and local municipalities, the three-week period accommodated some 3,000 underprivileged and disadvantaged youths from the New York metropolitan and Buffalo areas in an experimental program of planned recreation and activities for boys ranging in age from 12 to 16 years.

OPERATION OPPORTUNITY

GENERAL

Operation Opportunity, a State funded project to provide Summer Camp for Young Boys, fully completed during the period 8 July - 2 August 1968 at Camp Smith Peekskill, New York.

The operation was the culmination of planning begun in May 1967. The Governor at that time requested State Agencies to assist in providing summer

programs for inner city youths. The Chief of Staff to the Governor responded by initiating planning and coordination with New York City Agencies thru Metropolitan Office of Economic Opportunity. New York City agencies were unable to coordinate funding for the summer of 1967.

In November 1967, the Chief of Staff to the Governor submitted a draft plan and budget estimate to the Governor's office for a program to be conducted for three weeks during July 1968 at Camp Smith. In March 1968, budget approval for \$100,000.00 to support the project was announced and planning was intensified.

Selection of New York City Youth Organizations to participate and recruitment of campers was delayed due to reservation of New York City Agencies relative to military program and funding. During June 1968 commitments were finalized for staffing, administration and logistical requirements.

ORGANIZATION

The project was planned to accommodate 1000 campers, males, ages 12 - 16 each week. This figure was reduced by difficulties in recruiting experienced by New York City Agencies due to late finalization of plans by Youth Board.

Attendance by periods

- Period 1 13-20 July 68 - 899 Cadet Corps
 - Period 2 2-27 July 68 - 571 Housing Authority
 - Period 3 27- 2 Aug 68 - 967 Contract Agencies
- 2437

(These totals included senior and junior leaders from Youth Organizations; there were 187 repeaters in Period 3)

PROGRAM

The program devised by the Camp Director included the following principal activities: Swimming, touch football, bait casting, volley ball, tennis, hiking, softball, golf, weights and gymnastics, bowling, arts and crafts, demonstrations and entertainment.

Campers were organized in ten college named groups. Two counsellors were responsible for supervision and control of each college group.

Swimming was arranged by the Division of Parks New York State Conservation Department at nearby Mohansic Lake. The Division of Parks provided 5 buses each day to accommodate approximately 500 campers at Mohansic each morning and afternoon.

Demonstrations were conducted by the New York

State Police one evening each week at Camp Smith and during swim periods at Mohansic. The Camp Smith demonstrations included bloodhound tracking, radar detection and braking safety distances for vehicles. At Mohansic scuba diving was demonstrated and campers had an opportunity to use equipment under guidance.

LOGISTICS - FISCAL

Specific responsibilities were designated for the State and New York City Agencies.

STATE

- Staff, Military Cadre and Medical
- Professional Camp Director and Counsellors
- Food and professional catering service
- Camp facilities
- Maintenance and housekeeping supplies
- Recreational equipment

NEW YORK CITY AGENCIES

- Selection of participating youth organizations
- Recruitment of campers, parental consent and physical exams.

- Transportation of campers from and return to New York City Junior leaders at ratio of 1 to 10

- Equipment not available to some campers, e. g. blankets, sheets, towels

Food and necessary supplies and equipment were obtained thru Office of General Service-State purchase. Delivery in bulk, stored and issued to mess halls. Menu was devised by New York City School Luncheon dieticians.

Office of General Service arranged participation in Surplus Food Milk Program.

MEDICAL

A contract surgeon and his wife, a registered nurse were employed to handle medical care and treatment. Patients requiring definitive treatment or X-Rays were transported to the civilian hospital at Peekskill. There were no serious accidents or injuries. A total of 421 patients were treated at the dispensary on the Post. New York City Welfare assumed hospital costs.

PUBLIC INFORMATION

Continuity of Public Information function initiated by DMNA Information Officer, was provided by an assigned New York Guard Information Officer. All

OPERATION OPPORTUNITY

WHAT SO PROUDLY WE HAIL - - the colors, pass in review before the camp counselors during a parade conducted by one group of campers at their own request.

ARTS AND CRAFTS - - proved to be a very popular activity for the inner city youngsters from New York City as they made their own little souvenirs of a pleasant summer camp.

HEADING FOR A DIVE - - into the refreshing pool at nearby Mohansic State Park are these happy participants in the Division of Military and Naval Affairs program conducted at Camp Smith.

news representatives, VIP's and visitors were handled by him. A contract photographer provided coverage as required. A film of program activities was produced by DMNA Information Officer.

SUMMARY

Major proficiencies in the project in addition to the excellent Post Plant:

Availability of swimming facilities at Mohansic to include daily buses provided by Division of Parks.

High grade gymnastic equipment loaned by Lifetime Sports, Inc. and other leading sports equipment sources.

Demonstrations provided at Camp Smith and Mohansic by New York State Police.

Enthusiasm and dedication by all staff members, military and civilian; their intense drive to succeed was paramount factor.

Major difficulties encountered:

Delay by New York City Agencies in firming commitment for their responsibilities.

Failure of New York City Agencies to give timely and accurate information to participating youth organizations.

Inadequate and unqualified junior leaders furnished by Youth Organizations.

Improper screening of campers by participating organizations resulted in:

Campers not physically capable or without physical exams or parental consent.

An age spread of 7-16 which was beyond the program's capabilities.

As a pilot program without precedent, overcoming many obstacles, its success marked an achievement for DMNA. Counsellors, junior leaders and campers all from inner city had opportunity to learn and apply practical leadership thereby increasing their potential in areas where young leaders are in growing demand.

A concluding recommendation is that the project be continued by other State agencies, Division of Youth, Education or Conservation, which have resources and capabilities greater than the military. Military organization does not have the requisite flexibility and the training mission must have top priority for use of the principal State asset for training, Camp Smith.

DIVISION OF MILITARY AND NAVAL AFFAIRS STAFF

Staff sections in the Division of Military and Naval Affairs office serve in a dual capacity commensurate with the dual role of the Chief of Staff to the Governor and Commanding General, New York Army National Guard. Staff officers are responsible for coordinating activities of all components of the state military forces and for direct staff functions with relation to the Army National Guard, through appropriate command channels.

PERSONNEL AND ADMINISTRATION

The mission of this office includes the supervisory and administrative responsibility for all personnel actions applicable to the several components of the New York State Military Forces; the preparation and publication of all documents, both instructional, informational and directive in nature; the issuance, control and stocking processes for all state and federal forms and publications; and the maintenance of personnel records and records systems for all officers, warrant officers and enlisted personnel of the State Military Forces.

Statistical information reflecting the activities of this office are outlined in the appropriate inclosures of this report.

OPERATIONS AND TRAINING

The mission of this office is to coordinate all operations, training activities and intelligence matters as they relate to the state military forces. It is responsible for staff supervision of units of the New York Army National Guard with regard to organization, operations, training, alert and mobilization army aviation, communications and chemical, biological and radiological activities.

REORGANIZATION

Reorganization of the New York Army National Guard, announced by the Secretary of Defense, Mr. Robert S. McNamara, on 1 June 1967, was begun on 1 February 1968 and completed on 1 May 1968. The primary effects on the State of New York were the deactivation of the 27th Armored Division, the Headquarters and Headquarters Battery of the XVII Corps Artillery and the transfer of one of the three brigades of the 42d Infantry Division to the State of Pennsyl-

vania. Reorganization resulted in conversion of many units to different branches and the acceptance of technical support units.

In accepting the new troop structure, Major General A. C. O'Hara pointed out that the troop list will provide the units required to accomplish potential State missions. General O'Hara stated, "As for national Guard, we assume that the Department of Defense has determined, on the basis of information available, that the new organization is essential to support our contingency defense plans. For this reason we accept the proposal and will cooperate fully in its implementation."

The many side effects and ramifications of reorganization as they effect personnel, training and operations, logistics, and technician employment are contained in appropriate portions of this report.

Reorganization resulted in the complete revision of the Selected Reserve Force program. These are specially selected units, organized to full strength and equipment and trained and equipped for short notice mobilization and deployment for Federal missions. The organization of units into the new Selected Reserve Force II concept is as follows:

- 42d Infantry Division
- 102d Light Maintenance Company
- 172d Signal Company
- 247th Medical Company
- 646th Medical Company
- 669th Transportation Detachment
- 824th Dental Detachment

CIVIL DISTURBANCES

Continued emphasis was placed on the necessity of maintaining proficiency for operations in the event of civil disturbance. Thirty-two hours of training on a drill status was mandated for all units and sixteen hours for staff and command which was completed prior to annual field training. A minimum of sixteen hours was completed at field training. This provided an excellent opportunity for units to conduct intensive practice exercises, utilizing the special weapons and equipment which are being continuously received into the system.

During the spring of 1968, the Empire State Military Academy conducted a sixteen hour Junior Officer Civil Disturbance course for all first and second lieutenants of the Army National Guard. The course was conducted on weekends in Buffalo, Syracuse, Binghamton, Troy and New York City. It was instrumental in raising the standards of unit training in civil disturbance operations both at home station and during the annual field training periods.

TRAINING

Reorganization of units resulted in a complete re-evaluation of training levels which in many instances required reversion to basic advanced individual training levels in order to train individuals in the new skills required by their branch assignments.

Increased emphasis was placed on the performance of weekend assemblies instead of the usual four-hour weekly drill. Available outdoor training areas have therefore become increasingly important to training. Maximum year-round utilization was made of the principal areas such as Camp Smith, Camp Drum, Guilderland and O'Ryan in New York State and Fort Dix in New Jersey.

EMPIRE STATE MILITARY ACADEMY

The missions of the Empire State Military Academy are as follows:

Primary - To prepare selected individuals for appointment as commissioned officers and for duty as second lieutenants in the New York Army National Guard.

Secondary - To serve as a base to conduct such other courses of instruction as may be directed by competent authority, such as the Senior Noncommissioned Officer School, in conjunction with the active duty phases of the Academy.

The officer candidate program is conducted in three phases. Phases I and III are conducted at Camp Smith, Peekskill, New York. Branch School Number One is located at Camp Smith and is responsible for operation of both Phases I and III, as well as the conduct of the Senior Noncommissioned Officer School. This instruction is conducted during a two week period of Annual Field Training. Key personnel in the administrative and instructor fields are drawn from Branch Schools to support the active duty phases. This results in the maximum utilization of personnel who have experience in the program and assures economic operation.

Phase II is conducted at Branch Schools as listed in inclosures to this report. The training in this phase covers a period of twelve week-ends of instruction during the months of October through May.

The program of instruction for the officer candidate school is provided by the United States Army Infantry School, Fort Benning, Georgia, and is augmented by our own additional requirements explained below. Material provided includes instructor and student lesson guides, special text and examinations, which are graded by the Infantry School.

The current program consists of 296 hours of mandatory instruction and examination. To this has been added 88 hours of subjects and activities, for a total of 384 hours of intensive study and practical application. During Phase III, the candidate is provided the opportunity to apply fundamentals by practical application. It is here he receives practical experience through the medium of day and night field problems. Of the original enrollment of 433 Phase I students for the 1967 - 68 class, 178 were declared graduates and received their commissions. One hundred and fifty-nine (159) were commissioned second lieutenants and one was commissioned a first lieutenant (Judge Advocate General branch) in the New York Army National Guard. Nineteen (19) received commissions in the United States Army Reserve. Class attrition rate was 58.9% which is slightly higher than the national average of 50%.

The United States Military Academy at West Point, New York, furnished a total of thirty 1st Classmen who were utilized as Tactical Officers for the officer candidate school, Phases I and III.

During Annual Field Training 1968, (3-17 August), the Empire State Military accepted into training in the officer candidate school a total of eight members of the United States Army Reserve from New York State. This was the third year this has occurred and these candidates will be commissioned in the United States Army Reserve upon completion of the program.

A Senior Noncommissioned Officer School was conducted for enlisted men (grades E5 and E6) in conjunction with the Annual Field Training for the officer candidates. A total of 151 noncommissioned officers and specialists attend. Of this total, 145 were declared graduates, five were relieved during the course and one failed to graduate.

The program for Senior Non-Commissioned Officers was conducted under a new concept in 1968. In previous years the NCO School was designed to prepare personnel in the lower grades for potential service as capable non-commissioned officers.

This year the course was intended to further develop and improve the proficiency of grades E-5 and E-6. Emphasis was placed on their responsibilities and the importance of their duties. Also, contrary to past practice, no one was ordered to this course involuntarily.

The program of instruction for senior non-commissioned officers consisted of 132 hours in the following subjects:

SUBJECT	HOURS
Common subjects (study, parades, orientation, etc.)	48

Leadership	12
Drill and Command	7
Instructor Training	14
General Subjects	14
Weapons	9
Map Reading	14
Tactics	10
Riot Control	4
TOTAL	132

As of 31 December 1968, Phase II enrollment is: 88 - New York Army National Guard, five - United States Army Reserve, for a total of 93 Phase II students. It is anticipated that approximately 60 to 70 of these presently assigned students will enter Phase III in July 1969 with a graduating class of approximately 60 for commissions as second lieutenants.

General C. V. R. Schuyler U.S.A. (Retired), Commissioner, Office of General Services of the State of New York, and the former Chief of Staff of Supreme Headquarters, Allied Powers, Europe (SHAPE), visited the Empire State Military Academy during Annual Field Training and was the Reviewing Officer at the graduation ceremonies on 16 August 1968.

COMMUNICATIONS

The operation of the State Administrative Radio net continues to expand and improve. Eleven active stations strategically located throughout the State are in daily operation. These are at Albany, Camp Smith, Brooklyn, New York City, Hempstead, Syracuse, Buffalo (two stations), Rochester, Binghamton, White Plains (Air National Guard), and an additional station at Camp Drum which is operational during the Annual Field Training periods.

The stations at Albany, Camp Smith and Camp Drum are equipped with ancillary equipment permitting voice and teletypewriter operation.

The system has been augmented by the procurement of modern single sideband equipment now in operation in three locations. It provides a vital adjunct to communications requirements for the accomplishment of State missions.

ARMY AVIATION

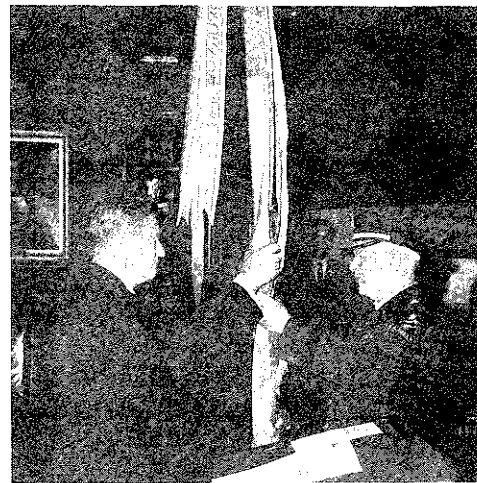

Army aviation activities are controlled by the Director of Operations and Training who has immediate supervision over the Staff Aviation Officer. The Staff Aviation Officer exercises direct supervision over three Flight Activities:

DEACTIVATION — 27th ARMORED DIVISION HHB XVII CORPS ARTILLERY

A MEMORABLE MOMENT - - in the history of the State Military Forces is depicted as Governor Nelson A. Rockefeller greets commanders of the two major units deactivated by the reorganization of 1 February. They are MG Collin P. Williams, 27th Amored Division (center) and COL Howard J. Kallman, Hq. XVII Corps Artillery. On the Governor's left is BG John C. Baker, Vice Chief of Staff to the Governor and Deputy Commanding General, New York Army National Guard.

THE FINAL MUSTER - - roll of the 27th Amored Division was recorded in historical volumes which "will live forever." MG Collin P. Williams and COL Joseph Weigel, Chief of Staff of the Division, proudly display the document.

A PROUD AND NOBLE HERITAGE - - compiled by thousands of New Yorkers on numerous battlefields, passed into history at the State Capitol on 29 January 1968, as MG Collin P. Williams, last Commanding General of the 27th Division handed its cherished colors to Governor Nelson A. Rockefeller for retirement in the State Military Museum.

Flight Activity #1: Zahn's Airport
P. O. Box 756
Amityville, New York 11701

Flight Activity #2: Niagara Falls Municipal Air-
port
Niagara Falls, New York
14304

Flight Activity #3: Albany County Airport
Albany, New York 12211

Each Flight Activity is commanded by a Flight Activity Commander who has overall responsibility for aviator training, aircraft and maintenance.

During the year 1968, Army aviators on flying status decreased from 79 to 70 in spite of a vigorous recruiting effort which resulted in 28 new Army aviators. But the lack of active Army school quotas for initial flight training, the elimination of officer aviators due to the provisions of the Reserve Officer Personnel Act and reorganization of the New York Army National Guard reduced the capability to prevent losses in the overall strength of Army aviators.

Twenty-eight Army aviators attended Army aviation service schools. These schools included aviation safety courses, transition to new category aircraft and standardization flight training for instructor pilots.

During 1968, flying hours performed at the three Flight Activities maintained in New York State totaled over 7,500 hours toward a programmed amount of 8,000 hours. The decrease in aviator strength accounted for the short fall in meeting programmed flying hours.

In 1968, two fixed wing aircraft were withdrawn from the assets of New York, without replacement by the active Army, to support active requirements. The total number of aircraft in the New York Army National Guard as of 31 December 1968 is 19 fixed wing and 10 rotary wing. Aircraft currently authorized is 120.

ARMY SCHOOLS

During calendar year 1968, significant changes in the Army Schools program affecting officer education were implemented through the media of the non-resident-resident program of instruction. These courses were developed as an alternate means of meeting the objectives of an officer education program, recognizing not all officers could take the time away from civilian employment for extended periods. The non-resident-resident programs were

instituted at the three major levels of the officer education program: Command and General Staff Officer Course, branch advance courses and branch basic courses. Concurrently, detailed guidance on all available programs was published.

The current means available to satisfy the requirements of nonresident-resident options for completion of the Command and General Staff Officer Course are as follows:

Command and General Staff Officer Course
Nonresident-Resident

Command and General Staff Officer Course
conducted in United States Army Reserve
Schools

Command and General Staff Officer Extension Course.

The Resident Associate Command and General Staff Officer Course was discontinued. In lieu of this course, the Commanding General, United States Continental Army Command established the Command and General Staff Officer Course, Nonresident-Resident, to be conducted at the United States Army Command and General Staff College. This course, under a new name, contains essentially the same subject content as the Associate Course.

The new method of gaining a Command and General Staff College diploma is the result of the Haines Board findings which evaluated all aspects of the United States Army officer schooling program. It was designed to provide an additional option for Reserve Component officers to accelerate their progress toward gaining a diploma from the Command and General Staff College. The subject content of the three programs are interchangeable as outlined below:

-The Command and General Staff Officer Course, Nonresident-Resident. (For Reserve Component officers not on active duty). This program consists of a period of nonresident instruction and resident instruction. The nonresident phase may be completed by extension course work or by participation in the United States Army Reserve School system. Upon completion of this nonresident phase, an officer may attend either a four or an eight week course of instruction conducted at the United States Army Command and General Staff College.

-The Command and General Staff Officer Course conducted in United States Army Reserve Schools. (Open to all components). This program consists of five years of study, each year having a reserve duty training (RDT) phase consisting of 24 assemblies, followed by an Annual Active Duty for Training phase of two weeks' duration. The final ACDUT-

RA phase of this program is conducted at the Command and General Staff College. All other ACDUTRA phases are programmed by the Army Commanders at various Army installations. Satisfactory completion of the final ACDUTRA phase at the Command and General Staff College results in the award of a diploma.

The Command and General Staff Officer Extension Course. (Open to all components). This program consists of 28 extension subcourses. Successful completion of these subcourses only results in the award of a certificate of completion. Officers who choose this method of completing Command and General Staff officer level instruction may elect options consisting of combinations of extension work and resident schooling.

Nonresident-Resident Options for Completion of Mobilization Advance Courses. The objective of the course is to prepare officers of the Reserve Components not on active duty for branch command and staff duties at battalion through brigade or comparable levels in both divisional and non-divisional units. This course is similar to the discontinued Associate Officer Career Courses, and will be used in the same manner in determining branch qualification and eligibility for promotion. It is designed to provide Reserve Component officers a faster means of obtaining their military education and qualification for promotion.

The Officer Mobilization Advanced Courses are currently being conducted at 15 Army Service Schools.

The concept of the course includes a nonresident phase of Army extension courses, which are equal to two weeks of resident instruction. The exact number of hours of nonresident instruction varies from school to school to school, and, in some cases, is subdivided into phases. This is followed by two phases of resident instruction which will generally be offered back-to-back to permit students maximum flexibility in arranging for attendance at the resident phases. Certain schools will provide two week blocks of instruction. The entire course must be completed within three years from date of enrollment. The flexible back-to-back concept permits completion of the entire course, including the extension course phase, in one year.

The ultimate goal of the program of instruction for this course is to make it interchangeable with the program of instruction in both the United States Army Reserve Branch Officer Career Course and the Mobilization Advanced Correspondence Course. Thus, an officer may complete his advanced level of education by means of any combination or options. With this liberalized approach, which permits officer

students to go on full time training duty to complete portions of the courses, a significant improvement in the quality of military education available to Reserve Component personnel is anticipated.

Nonresident-Resident Options for completion of Basic Branch Courses for Lieutenants. A major program of this headquarters was developed during calendar year 1968 on initial career guidance for lieutenants who had not completed the branch basic course.

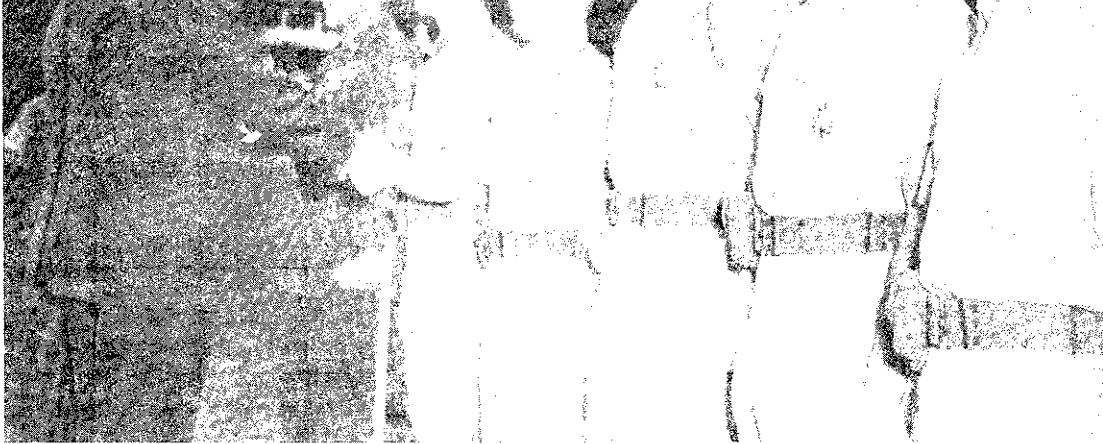

The purpose of this program is to provide guidance to commanders in counseling all newly assigned lieutenants towards completion of the basic branch course. The term "newly assigned", as used in this program, included all newly commissioned officers and those officers in the grade of lieutenant who have not completed a basic branch course.

While there is currently no military education requirement for promotion from second lieutenant to first lieutenant, the desirability of successful completion of the basic branch course through one of the methods available cannot be over emphasized.

The records of this headquarters indicate that since 1 January 1968, 11 officers successfully completed the Special Officer Candidate Schools conducted by the United States Army Infantry and United States Army Artillery Schools and were commissioned, while an additional 159 officers were commissioned in the New York Army National Guard on 16 August 1968 upon successful completion of the Empire State Military Academy. In addition, there are a number of officers in the grade of lieutenant who have not successfully completed a branch basic course.

The basic military development period of an officer is the first eight years of his military career. This is the period in which the officer becomes well grounded in the tactics, techniques and technical requirements of his basic branch, including a knowledge of material and equipment. More important, the officer learns the elements of leadership and the techniques of commanding troops. This period is considered critical in the development of an officer. It is here that the officer develops lasting traits, attitudes, standards of performance and a sense of duty which will influence his contribution throughout his career. All officers must develop branch qualification and professional competence to prepare and qualify them for high staff and command responsibilities. The basic military foundation for all officers is provided by successful completion of the basic branch course.

With a view towards establishing a program through which all newly assigned lieutenants shall complete their basic branch course within three

CONGRATULATING - - winners of awards at the Empire State Military Academy Graduation Review is General C. V. R. Schuyler, Commissioner of Office of General Services, NY State and former Chief of Staff, SHAPE. On the right of the line is SFC Harold Coon, a NY Guardsman who volunteered for active duty in Viet Nam where he won numerous decorations. He was presented the NY State Conspicuous Service Cross by General Schuyler.

THE UNFORESEEN - - aggressor forces keep these officer candidates of the Empire State Military Academy alert as they move very cautiously along a patrol route at Camp Smith during the third phase of their year-long program.

years of assignment, a program has been established to provide counseling on the methods available to satisfy this requirement. The commander who has background knowledge of the officer to be counseled and possesses adequate factual knowledge on the benefits of a military career is in a position to conduct a counseling interview that will be of benefit to these junior officers.

The current means available to satisfy this requirement are:

- Resident Branch Basic Course
- Mobilization Basic Course, Nonresident/Resident
- Branch Basic Extension Course

Prerequisites for attendance and/or enrollment in any of the courses listed above include the requirement that officers be in the grade of lieutenant who have been commissioned from any source other than the 23 week Regular Officer Candidate School.

Mobilization Basic Course (C1), Nonresident/Resident, was added in 1968. The objective of this course is to prepare officers of Reserve Components not on active duty for duty assignments at platoon-company-battery level. This course is similar to the present Resident Branch Basic Course and is used in the same manner in determining branch qualification and eligibility for promotion. The concept of this course includes a nonresident phase I of extension courses, followed by a mandatory Phase II of resident instruction. It provides a means of completing military educational requirements for those lieutenants who cannot attend the longer resident basic course.

EMERGENCY PLANNING OFFICE

GENERAL

The Chief of Staff to the Governor established the emergency Planning Office on 16 May 1968. LTC James B. Berkery was assigned as Director and given the responsibility of organizing the section.

The ever-increasing number of civil disturbances, throughout the country, and the ever-present possibility of the State Military Forces being employed in "Aid to Civil Authorities" dictated the requirement for a permanent planning office in the Division of Military and Naval Affairs.

The Military Support Plans Office was utilized as the base for creation of this new office, thereby placing the mission of Support of "Civil Defense" and "Aid to Civil Authorities" in one office.

MISSION

"Provide a permanent planning staff for performing long range planning, continuous review, study and coordination and to provide recommendations concerning all existing plans published by this headquarters, with special emphasis on emergency plans."

The Emergency Planning Office has primary responsibility for four (4) Emergency Plans that are referred to as our "Family of Plans." The purpose and mission of these plans are as outlined in an inclosure to this report.

INTELLIGENCE ACTIVITY

An additional function assigned to the Emergency Planning Office is the Intelligence responsibility for the Division of Military and Naval Affairs. This function generally includes planning and direction of the Intelligence effort to collect information, process it and disseminate resulting intelligence. Coordination is effected with all agencies in the intelligence chain, both military and civilian. All administrative functions relative to the intelligence effort are performed within the Emergency Planning Office.

OPERATIONAL FUNCTIONS

The Emergency Planning Office is responsible for periodic liaison activities with First United States Army, National Guard Bureau, Civil Defense Commission and Civil Law Enforcement agencies. Additional coordinating staff visits were made to the Third Naval District and to all Air Force Base installations within the State. Experience factors, emanating from civil disturbance operations, dictated a need for closer communications ties between active Army Headquarters, civil enforcement agencies and state military forces. To alleviate this problem, direct telephone and teletype installations have been established at several state armories and police operations centers for the purpose of instant communication between these agencies. Coordinating lines have been established with agencies concerned through the Emergency Planning Office.

The Emergency Planning Office personnel have participated in several planning (work shop type) conferences with municipal and law enforcement agencies in key cities within the State of New York.

Planning conferences have been scheduled with the New York City Police Department for the conduct

of a Joint Police and Army National Guard training exercise to be conducted in the Spring of 1969.

Major military headquarters of the DMNA are presently conducting a comprehensive review of Operation Plans which have been published to aid to civil authorities during a civil disturbance situation. Review of these plans includes verification of critical installations, key individuals to be contacted for assistance during a civil disorder, location of potential trouble areas and location of facilities which will be made available to National Guard and Federal Forces in aid to civil authorities.

Plans are under study to establish a rapid reporting system from key cities within New York State for information related to civil disorders. Early receipt and evaluation of this information will reduce reaction time in the event military support is requested.

EMERGENCY ACTIVITIES

Requests from various civil agencies for emergency use of troops, equipment and armories have been coordinated throughout the year. Early in January 1968 a cold weather emergency existed in New York City. Several NYC armories were used to house people because of lack of heat in tenements or apartments. For the most part, armories were used for approximately one week. Other than staff action, no troops were involved.

The Emergency Planning Office assumed responsibility for maintenance of recent files pertaining to aid to civil authorities. A list of these activities is included in the inclosures to this report.

The Division of Military and Naval Affairs Pamphlet Number 120-4, Emergency Use of Troops, Equipment and Armories of the New York State Military Forces, dated 18 March 1968, explains channels and coordination required. Distribution of this pamphlet to local chief executives has been accomplished for the purpose of expediting requests in a minimum period of time.

SPECIAL PROJECTS

Development of Standing Operating Procedures in Emergency Operations for the Division of Military and Naval Affairs provides for action of other than a routine nature, to include the Alert Plan for this headquarters. Test exercises are conducted periodically to insure the feasibility and accuracy of the plan. Standing Operating Procedures are published to provide routine operational instructions for the office.

Table of Distribution and Allowances, HHD, NYARNG and Emergency Operation Headquarters, NYARNG, have been revised and submitted to Chief, National Guard Bureau for approval.

A daily weather report is published and disseminated in written form to the staff.

Two officers completed the Industrial Defense and Disaster Planning Course conducted at Ft. Gordon, Ga. One officer completed the course, Executive Development Institute conducted by the Graduate School of Public Affairs, State University. Two officers attended courses at Staff College, Office of Civil Defense, Battle Creek, Michigan.

Attendance at service schools, civil defense schools and special schools will be programmed for Calendar Year 1969 to increase effectiveness of all personnel in their respective military occupational specialties.

BRIEFINGS

Briefings on the organization, mission and functions of the Emergency Planning Office were presented to the following forums:

Officers HHD NYARNG	24 Sep 68
Officers HHC EOH	1 Oct 68
Commanders & Staff NYNM	19 Nov 68
New York State Civil Defense Commission	20 Nov 68
District Director, Eastern District NYSCDC, Oneonta, NY	2 Dec 68

Briefings are proposed for the balance of the six Civil Defense districts during Calendar Year 1969.

Liaison between the military and civil defense is continuous with daily coordination maintained by the DMNA-CD Liaison Officer. Activities conducted by the CD Liaison Officer are covered in a separate report submitted by the DMNA Civil Defense Liaison Officer.

CHRONOLOGICAL EVENTS

- Participated in the following emergency actions:
- Cold weather emergency - NYC 9 Jan - 21 Mar 68.
 - Sanitation Strike - NYC 8 - 9 Feb 68.
 - Preparations for Snow Emergency - NYC 8 - 10 Feb 68.
 - Coordinated Installation of Federal emergency Telephones - NYC - Buffalo 16 - 25 Apr 68.
 - Because of continued racial tension, a 24 - hour Duty NCO was maintained during period indicated - 31 May - 3 Sep 68.

NEITHER COLD NOR RAIN - - deters the scheduled training of National Guardsmen during Annual Field Training. Firing on the machine gun range is the crew of Sgt. Edward Trombley (left) and Sgt. Arthur Paul, as PSG Irving Wilson (Center) observes. The men are with the Oneida unit of 1st Bn. 108th Inf.

IN THE AIR - - is the ejected shell casing and on the way toward its target is another round from a self - propelled 105 MM Howitzer as artillerymen from New York's 27th Brigade conduct service firing at Camp Drum.

f. The period 5 Sep - 31 Dec 1968 posed several emergency situations which could have required the use of New York State Military Forces. Although implementation was not required, the Emergency Planning Office had developed detailed plans to cope with each emergency.

g. Possible use of gasoline tankers for use in NYC fuel crisis 27 Dec 1968.

AIR DEFENSE

New York Army National Guard Air Defense Missile Units continued to operate during the past year in a highly competent manner, contributing to a major portion of the defense of the New York City and the Niagara-Buffalo Frontier.

All fire units again successfully conducted Short Notice Annual Practice, (SNAP) at McGregor Missile Range, New Mexico. All major inspections and evaluations conducted by Active Army agencies during 1968 were also successfully passed by all fire units, to include Technical Proficiency Inspections conducted by Headquarters U. S. Army Air Defense Command, where units demonstrate their ability to assemble air-to-surface missiles reliably in a safe and secure environment.

New York Army National Guard Air Defense Units earned five "Zero Defects Awards," two Certificates of Proficiency, and one Certificate of Achievement awarded by Active Army Commanders for outstanding performances during 1968.

In order to remain current on latest changes in equipment, techniques and doctrine, forty-seven air defense technicians of the New York Army National Guard attended various courses of instruction at Army Service Schools during the past year. These courses offered a coverage ranging from Chemical, Biological Warfare and Sentry Dog Handling through Warheading Procedure, Rocketry, Hydraulics and Electronics, some courses extending to 48 weeks in length. The number of students attending service school in 1968 is somewhat lower than in previous years due to the fact that a degree of back-up training in some of the more critical skills, which has long been a goal, has long been a goal, has finally been accomplished.

The years end produced a personal letter from Lieutenant General G. V. Underwood, Commanding General U. S. Army Air Defense Command to The Chief of Staff to The Governor, Major General A. C. O'Hara, expressing appreciation for the outstanding accomplishments of the Army National Guard on-site Nike-Hercules Units of the State of New York during 1968.

LOGISTICS

The Logistics Office is responsible for policy direction and program coordination of the following logistics agencies in DMNA.

United States Property and Fiscal Office
(Brooklyn)
State Maintenance Office (Brooklyn)
Logistics Service Branch (Albany)
Facilities Operations Branch (Albany)
Facilities Engineering Branch (Albany)

The office provides guidance and coordination in the field of materiel and services for all components of the State Military Forces to include cost and performance.

Major activities of the office and its agencies during 1968 involved:

Reorganization of the New York Army National Guard Facilities Inventory and Stationing Plan and Directives.
Supply Support Plan and Directives.
Maintenance Facility and Support Plan
Equipment Redistribution Plan and Directives.
Revision of Long-Range Facility Plans and PPBS.
New Equipment Distribution and Excess Withdrawals.
Introduction of New Supply and Maintenance Procedures.
Relocation and Reorganization of the State Quartermaster Office to Albany as the Logistics Services Branch.
Reorganization of the Construction and Maintenance Section and the Armory Management Section into the Facilities Engineering Branch and the Facilities Operations Branch.
Detailed reports of the logistical agencies follow with program statistical data and other information shown in appropriate inclosures to this report.

UNITED STATES

PROPERTY AND FISCAL OFFICE

GENERAL

During 1968 the USP&FO-NY was authorized one hundred forty four (144) federally paid technicians.

The Annual General Inspection rating for the the USP&FO-NY 1968 was Superior.

LOGISTICS

During the past year a significant increase in all logistical activities was experienced due to the reorganization of the New York Army National Guard. Some of the major highlights which were accomplished during calendar year 1968 are as follows:

- Deactivation of several units and subsequent pickup, receipt and storage of the property.

- Redesignation of several units requiring re-equipment.

- Conversion of unit property accounts to the Battalion Supply System.

- Receipt and issue of many new items of wheeled vehicle equipment to the newly constituted SRF II units.

- Completion of the Rifle Cal 30 M1 and Carbine exchange program for the entire State.

- Receipt and issue of many sensitive items identified with the civil disturbance training.

- The commencement of a program to issue winter clothing to all units which should be completed in 1969.

- The shipment to and receipt from other States of excess TOE and TA equipment, an excess created by reorganizations.

- Logistical support of 25,000 troops attending Annual Field Training 1968.

- Commencement of a program to purify all existing supply accounts in connection with equipment status reporting.

- The commencement of a Tank Combat M48 and M48A1 exchange program. This program should be completed during calendar year 1969.

AUDIT OFFICE

In the calendar year 1968 and concurrent with the reorganization, Battalion Property Book Accounting was initiated. This action required the transfer of 131 unit accounts into 28 Battalion Property Book Accounts. An additional 55 unit property accounts were deactivated.

The reorganization also resulted in 68 changes of unit Property Book Officers, requiring inventories and audits.

Supply and Accounting procedures for the Battalion Property Accounts were developed and published in the USP&FO-NY SOP. The Audit Office assisted the Logistics Division in a program of

purifying every property account for Equipment Status Reporting purposes.

During 1968, a total of 146 audit inventories were performed on the NYARNG property accounts. These audit inventories involved the processing of approximately 151,000 documents and traveling approximately 65,000 miles.

A statistical chart, illustrating by means of numerical quantities and monetary values, Relief Voucher activity within the New York Army National Guard for the current reportable period is an inclosure to this report. A method employed by the State in connection with its pecuniary responsibility to the Federal government for the proper care and control of Federal property issued to the State in support of the National Guard, is bonding of Responsible (Property Book) Officers. Bond procedures, as written into State Military Regulations, obligates this branch to claim reimbursement against the Position Bond of any responsible officer who fails to effect settlement of his pecuniary liability within ninety (90) days from the date of the initial request for payment. During this reporting period no claims were filed.

Due to the reorganization of the New York Army National Guard, effective 1 February 1968, property book accounts totaled 119. Previous to this reorganization there were 269 separate property accounts. This reduction, consolidation of supply system into battalion and separate unit property book accounts is reflected in Quarterly Droppage Reports (see statistical chart). Whereas the total value of equipment dropped exceeded previous year, this amount is not considered excessive.

AUTOMATIC DATA PROCESSING CENTER

The Automatic Data Processing Center (ADPC) continued to expand operations without significant increase in cost.

Fiscal accounting for all Federal funds allocated to the NYARNG has been completely mechanized. Additionally, military personnel strength accounting has been automated.

The volume of logistical source documents being submitted to the Center for processing has increased by 60% over the comparable period of 1967. 1968 production requirements were three times greater than that of 1966.

Machine utilization, measured in actual operating hours, has been expended from 661 to 1683 machine hours in the year ending November 1968. This increase of 1022 hours was partially offset by

357 hours of personnel overtime; however, revised organizational programming was necessary to accommodate the additional requirements.

Further substantial expansion cannot be obtained with the present first generation hardware and inadequate personnel staffing. Equipment of the Computer era is necessary to satisfy the accomplishment of the ever increasing demands of ADP service.

STATE MAINTENANCE OFFICE

The State Maintenance Officer is responsible for a maintenance program on a wide variety of equipment distributed in the NYARNG. It furnishes direct supervision to the three Combined Support Maintenance Shops (CSMS) and the Annual Field Training Equipment Pool. It furnishes technical assistance to the 45 organizational Maintenance Shops (OMS) in the State.

The reorganization of the NYARNG in February 1968 required planning and coordination with other staff elements of DMNA so that equipment transfers between units could be carried out with a minimum of turbulence. Except in isolated instances the goals were attained. As a result, however, routine maintenance production in the CSMS was deferred which resulted in a heavy maintenance backlog of both equipment and the manhours to do the job. This was partially relieved by overtime manhours which were allotted to the CSMS in November and December 1968.

During the reporting period the significant achievement was a 100% inspection of major items of equipment in the State. These inspections, made at the direction of the Chief, National Guard Bureau were necessary to ascertain the funds required for both personnel and repair parts to attain and maintain equipment at a high degree of readiness. An analysis of all inspections was made and submitted to the Chief, NGB in November 1968. It is noted that additional funds in the amount of approximately \$775,000. will be required through June 1970 to complete the program.

Also during the year various new equipment was received into the State. It was therefore necessary that each item be processed through the Combined Support Maintenance Shops prior to subsequent issue to units of the NYARNG by the USP&FO. Some phases of this program for certain types of equipment have been completed while others continue or are being programmed pending initial receipts of shipments.

Command Maintenance Management Inspections (CMMI) are conducted once each year by the three CSMS located in the State. Since the reorganization there are 188 units and 45 Organizational Maintenance Shops to be inspected each year. Because of the reorganization, CMMI were discontinued in December 1967 by approval of the National Guard Bureau. Thus, approximately 50% of units were not inspected. 5300 manhours were utilized for CMMI during the reporting period. From December 1967 to May 1968 inspectors were utilized in the technical inspection of equipment being transferred between reorganized units and equipment shipped out of and received in the State.

The mission of the NYARNG Annual Field Training Equipment Pool at Camp Drum, N.Y. is to receive, store, maintain and issue heavy equipment for use of organizations in the First Army Area who perform annual field training at Camp Drum. This installation employs 58 technicians on a year round basis. The State Maintenance Officer as Project Officer coordinates the equipment requirements and availability within major commands in each State in the First Army Area. Issues of equipment are subsequently made from available assets.

The State Maintenance Officer must inspect each OMS in the State at least twice each year. Two Organizational Maintenance Officers are provided on the staff of the SMO for this purpose.

A production analysis of the three CSMS is provided in an inclosure to this report. The analysis depicts in chart form the items of equipment completed in the various functional areas of the shops (i.e., Armament, Electronics and Communications and Automotive Sections).

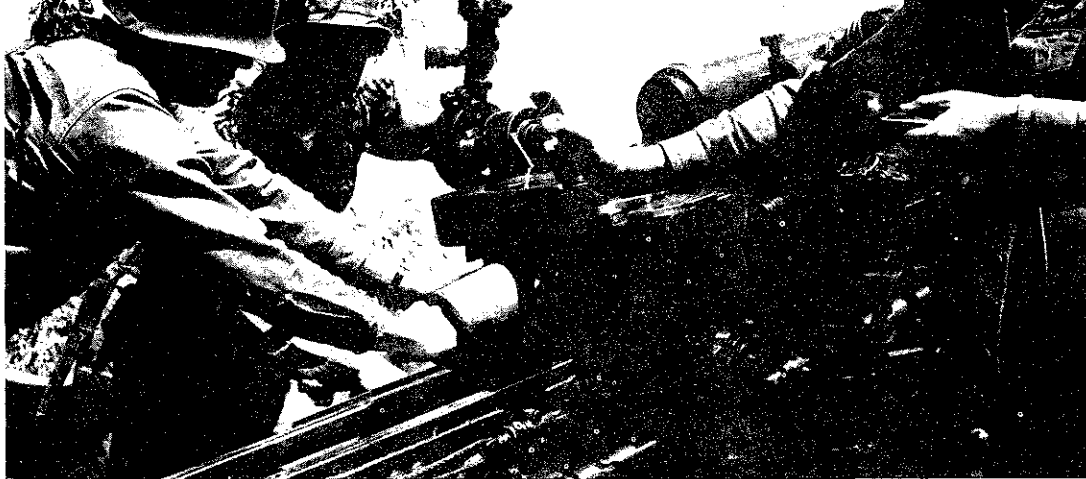

Two of our CSMS, located in Rochester and Brooklyn, are experiencing great difficulty in employing new personnel and retaining those already employed. The high concentration of industry in these two areas is the principal cause for this situation. The rates of pay for similar technical skills in industry and civil service are not competitive. Starting rates for automotive mechanics in the New York City area, as an example, exceed the civil service rates by as much as \$1800. per year.

LOGISTICS SERVICES BRANCH

GENERAL

This branch is responsible for the following primary programs:

Administrative actions in connection with

GETTING A BIG HAND - - is a 105 MM shell as an artilleryman of the 42nd Infantry (Rainbow) Division prepares to ram it into the breech of a Howitzer. The Guardsmen were involved in tactical field exercises at Camp Drum.

"MOVE OUT - - and keep your distance" directs a squad leader in the 42nd Infantry (Rainbow) Division at the start of an infantry attack during Annual Field Training at Camp Drum. The men are armed with the M1 Rifle.

non-military uses of armories.

State procurement of all supplies and materials used by the DMNA activities and facilities.

Receipt issue, inventory, distribution and warehousing of all State Military supplies and equipment in support of facilities and State Military Forces.

Accounting for State property issued to state armories, facilities and activities.

Processing all actions against the State and its military personnel for relief of responsibility for Federal and State property.

Accounting in coordination with Facility Operations Branch for State funds allocated in budget authorization for maintenance of armories and other facilities.

To accomplish its function this Branch has two units - Procurement and Services, and Property Control and Accounting. A principal Account Clerk assigned to the Branch is employed at the New York State Arsenal for liaison with the USP&FO.

During the year Logistics Services planned and executed its consolidation at DMNA, Public Security Building, Albany. This was done in three phases, and completed in October 1968. The following factors were involved in the consolidation:

Revision of property documentation procedures due to change in location from New York State Arsenal.

Selection and training of qualified personnel to fill positions in the Property Control and Accounting Unit in Albany.

Coordination with Directors, staffs and operating sections of DMNA, particularly Facility Operations Branch and Facility Engineering Branch has been greatly improved.

Direct coordination with the office of the Senior Army Advisor has improved processing of Federal Reports of Survey.

Refinement of procedures in all functions of the Branch will be reflected in revision of the pertinent State directives to include -

MR 14.1 - "State Property - Accounting and Supply Procedures."

MR 14 - "Federal Property - Responsibility and Accountability."

MR 17 - "Armories and other Facilities - Control, Operation and Use" (in coordination with Facility Operations Branch).

Other major property control and accounting activities include the inspection, survey and disposal of quantities of old, unserviceable small arms munitions. Warehouse stocks of post, Camp and station property were reduced by the transfer of bedding,

housekeeping and food service items to the Camp Smith account for the post's support of troop requirements.

Approximately 200 special purpose flags have been relocated to Albany for survey evaluation and disposition.

Several items of special civil disturbance equipment not available from Federal resources were procured with State funds and distributed to selected troop units or the Critical Item Pools in coordination with the Director of Emergency Planning.

During 1968 the number of State Flag requests from members of the armed services serving overseas nearly doubled the number for the previous year.

The Retired Records Activity located at the Brooklyn Arsenal was terminated in July 1968. All inactive Officer and Enlisted personnel records are now stored in the Office of General Services Records Retirement Bldg, State Campus, Albany.

NEW YORK GUARD PROPERTY

An intensive program was initiated in August 1968 to survey, inspect, evaluate and inventory stocks of uniforms and equipment stored at Camp Smith and various armories for the New York Guard. Tables listing items, quantities, location, serviceable, cost and disposition were prepared for the following categories:

Cadre stocks at Area Command location.
Supplemental items proposed for cadre.

Trainee requirements in event of mobilization.

Post, Camp and station requirements to support training at Camp Smith in event of mobilization.

Training equipment requirements at Camp Smith in event of mobilization.

Items considered obsolete, unserviceable or surplus. After determination of authorized requirements of the New York Guard to meet its current potential missions, the following actions will be programmed:

Disposition of obsolete, unserviceable and surplus stocks, sale value to be used for updating inventory.

Distribution issue and storage of uniforms and equipment by SQM and NYG organizations.

Revision of storage facilities at Armories.

Procurement of new items authorized.

FACILITIES OPERATIONS BRANCH

To provide a greater capability in the important

areas of project programming, overall operation of the below listed facilities, specialized studies and direct liaison between the Division and the field, the Facility Operations Branch was formed during the last quarter of 1968. This new Branch has assumed all the duties of the former Armory Management Section, and because of the number of assigned personnel, is able to place greater emphasis on more economical operation and management of the armories and accomplish more realistic programming of State and Federal Programs.

During the first half of 1968, the Armory Management Section continued its overall supervision of maintenance, management and general operations of armories. Programming for the armories' major requirements continued, with the Section primarily responsible for recommending to the Chief of Staff to the Governor, the Capital Construction, Rehabilitation and Improvements and new armory and non-armory projects included in his annual construction program.

The development of troop stationing plans and facility inventories to support the reorganization of the NYARNG required almost the complete attention and resources of the branch for the first 3 months of 1968.

The current inventory of facilities under control of the Division of Military and Naval Affairs is as follows:

ARNG Armories	83
Naval Militia Armories	13
Organizational Maintenance Shop Locations	36
AFTEP(Camp Drum)	1
Combined Support Maintenance Shops	3
USP&FO Facilities	2
Army Aircraft Maintenance Shops	2
Ranges	10
State Camp (Camp Smith)	1
TOTAL	151

Soon after formation, the Facility Operations Branch initiated studies on armory communication, new and replacement equipment, and vehicle storage and logistical support requirements. In addition, the Branch will work closely with the Division's Civilian Personnel Section on possible revisions of the Armory Staffing Pattern.

In December 1968, a survey of all armories was begun to determine over or under utilization by National Guard units, possible consolidation of some armories and the advisability and possibility of replacing others. It is anticipated that portion of this study pertaining to the Metropolitan New York

City Armories will be completed by March-April 1969.

FACILITIES ENGINEERING BRANCH

This Branch administers all construction, rehabilitation and maintenance programs for facilities under control of the Division of Military and Naval Affairs.

STATE FALLOUT SHELTER PROGRAM

The joint Division of Military and Naval Affairs - Civil Defense Commission Fallout Shelter Program was completed during the year with the exception of the Rochester Area Shelter, which is still in the Engineering Study Phase.

Work on installation of Fallout Shelter Generators scheduled for 56 locations at a total cost of \$393,689. was completed in 1968, with the exception of minor items.

FACILITY DISPOSAL AND REPLACEMENT

Various institutions are seeking use of armory sites for their expansion programs. They have offered replacement facilities for the following armories:

Troy-Rensselaer Polytechnic Institute	
New York City, 216 Fort Washington	
Avenue - Columbia Presbyterian Hospital	
Attempts have continued to obtain surplus	
Federal Real Estate in the Metropolitan New	
York City Area for possible new armory construction, with no success to date.	
Information relative to NYARNG Aviation	
Facilities requirements was provided to the	
Metropolitan Transportation Authority and is	
being given consideration for relocation from	
Zahn's to Republic Airfield.	

COMPTROLLER

GENERAL

The Fiscal Office is responsible for the budgeting, allocation, control, expenditure and accountability of State and Federal appropriated funds.

SELECTED - - Reserve Force physicals were required of all members of the 42nd Infantry Division during Annual Field Training at Camp Drum. The Division became a component of the Army's super-ready force upon the reorganization of 1 Feb 68.

HIGH AND MIGHTY - - with their heads in the sky and atop a powerful M-48 Tank are Pfc Dennis Powers of Niagara Falls (left) and Sfc John A. Johnson of Jamestown as they participate in firing exercises on a Camp Drum range.

DATA PROCESSING

In February 1968, the services of a commercial data processing consultant were retained to supply a complete data acquisition and updating system. The consultants were retained for a three month period in order to make minor programming changes due to the National Guard Bureau's data requirements.

During March, April and May, five pieces of information were collected for all enlisted men in the New York Army National Guard. A file was established and updating methods were devised and implemented. The results of the updating procedures were carefully examined and revised in order to forecast any problem areas that might arise in the full system.

An additional key punch operator was employed and a Quality Control Section was established during this period.

In April, an Electronic Data Processing Detachment of one officer and three enlisted men was established with Headquarters Company New York Army National Guard. This detachment was composed of computer programmers with at least three years experience. Their function was to provide programming support and to aid in the officers data collection.

An Officers Data Collection Form was designed and updating methods were perfected. The Data Processing Detachment and the Management Section of Headquarters New York Army National Guard attended the various annual field training periods and instructed the unit technicians in the proper method of filling out the forms and updating the records. Field personnel were also contacted and surveys made as to the possible use of electronic data processing at the unit level as a management tool.

In May, the Data Processing Detachment of the New York Army National Guard, programmed a system of furnishing Post Locator Cards for annual field training periods. The run was implemented and tested with the 42d Infantry Division. The test proved highly successful and will be implemented for the 1969 annual field training, where feasible.

The Data Processing Detachment of New York Army National Guard also programmed and tested several versions of the Military Occupational Specialty Test Roster Form 2165. This roster was initially sent to the field for information purposes to the Test Control Officers. The ensuing favorable reaction caused the staff to program a full system encompassing test aid booklet ordering, security clearance of Military Occupational Specialty tested per-

sonnel, work copies and DA Form 2165. During the month of November, the February 1969 Test Roster was prepared and sent to the field.

During the month of December, the Chief of Data Processing accompanied the Military Occupational Specialty Test Control Officer on a visit to the Military Occupational Specialty Test Center at Fort Benjamin Harrison, Indiana. The data processing systems at the Military Occupational Specialty Test Center were examined and a systems interface was arranged between the Division of Military and Naval Affairs and the Military Occupational Specialty Test Center. Programming modifications of the Military Occupational Specialty module were initiated with a tentative completion date of February, 1969.

From May to October, the Key Punch Section transcribed the officer data to cards. The enlisted file was also updated. Batch processing created a master tape file on officers and enlisted personnel. The Quality Control Section, in cooperation with the Military Personnel Office verified the Officers Data and collected data of information available only at the Division of Military and Naval Affairs.

From September to December, programs were written whereby data in the Division of Military and Naval Affairs' memory banks on officers were supplied to the National Guard Bureau in card formats for inclusion in the Bureau's Personnel Computer System. The Programming System was designed whereby all changes would automatically be prepared and forwarded to the National Guard Bureau.

During the month of November a position of Senior Programmer/Analyst was added to the electronic data processing staff. During 1968, the primary emphasis was placed on data acquisition. Many one-time reports were furnished throughout the year to various using agencies. The furnishing of these reports was comparatively costly in the overview of the total data processing system. During the coming year, the emphasis will be placed on recurring reports and aid to the field. In this manner, some of the workload will be eliminated from the field personnel and timely feedback will insure file integrity. The present program libraries will be continually modified as regulations and National Guard-Bureau policies change. The program modifications represent our greatest problem areas.

Program modifications are also planned to encompass new methods and capabilities inherent in the improvement of the Office of General Services Computer System and the International Business Machine Compiler System.

LEGAL OFFICE

The Legal Section is responsible for all legislation, legal activities, line of duty injuries and claims affecting the Organized Militia.

STATE LEGISLATION

Chapter 955, Laws of 1968, amended Section 217 of the Military Law relating to additional medical benefits for pensioned members of the State military forces. It provided medical care for further treatment of their service-incurred disability after a pension had been awarded for such medical care.

Chapter 953, Laws of 1968, added a new Section 235-a to the Military Law to provide indemnity by the State for attorneys' fees and court costs for any member of the Organized Militia in the event of a claim against such individual while he is in active State service.

The Chief of Staff to the Governor was requested by the Governor to comment on numerous bills not necessarily related to the operation of the Division of Military and Naval Affairs. In addition, advice was given on military matters to the two committees of the Legislature concerned with military matters.

FEDERAL LEGISLATION

The most important item of Federal legislation to the State military forces was the enactment of Public Law 90-486 (32 USC 709) making National Guard technicians employees of the United States with all of the benefits of Federal employment, including retirement.

LEGAL ASSISTANCE

The Legal Section assisted numerous members of the Army National Guard in connection with problems arising out of training activities and third parties. This required appearances, consultations and conferences with other State and Federal agencies, city and county attorneys and attorneys representing private individuals.

This Section also assists the Active Army Advisor personnel assigned to units of the New York National Guard with relation to personal legal problems. This is given without cost to such individuals as no Active Army Staff Judge Advocate is available in this area to provide this assistance.

CLAIMS

During 1968, under the provisions of Titles 32 and 38, United States Code, a total of 273 Line of

Duty Investigations were processed for injury and disease to National Guardsmen while engaged in training.

Approved LOD	229
Disapproved LOD	9
Pending NGB	16
Pending from Units	19

273

There were 58 motor vehicle accidents involving National Guard vehicles and third parties during 1968. Five of these claims are now in litigation.

On 9 June 1968 a member of Company C, 1st Battalion, 69th Infantry, NYARNG was killed in a vehicle accident during a training assembly. Assistance was provided to his family in accordance with all pertinent regulations and directives.

There are presently 11 disability pensioners on the rolls under the provisions of Section 217 of the Military Law. One pensioner died in 1968.

TECHNICIAN PERSONNEL OFFICE

The Technician Personnel Office is responsible for the administration of the New York Army National Guard technician program to include funding, manpower allocation and all phases of personnel management.

On 1 Jan 1968, the New York Army National Guard employed a total of 1421 technicians. At the start of FY68 (1 July 1967) the National Guard Bureau authorized a total of 1505 positions; however, when calendar year 1968 began, the Division was planning for reorganization of the New York Army National Guard, scheduled for implementation on 1 February 1968. Because of this, the Technician Personnel Office was obliged to plan for a reduction in technician strength due to a reduction in the number of units.

The reorganization was completed 1 February 1968 and all technicians who were employed at that time were retained. There was a minimum of personnel relocation.

A New York Army National Guard manning document was received on 28 Feb. 1968 which increased our technician manning to 1441 positions. Subsequently, additional manning documents were received;

a. 16 Aug 68, increasing the technician manning to 1479 positions.

b. 26 Nov 68, increasing the technician manning to 1506 where it remained thru the remainder of the calendar year.

In August 1968, a most important event occurred, which changed the entire technician program. Presi-

FIRE AND THUNDER - - burst from the mouth of a jeep- mounted 106MM Recoilless Rifle during training at Camp Drum, as a crewman protects his ears and looks for target destruction.

STUCK UP - - on purpose, is this "jeep" of the 27th Bde, 50th Armored Division as maintenance personnel practice vehicle recovery techniques with their heavy equipment at Camp Drum. A man-made mud hole provides the setting.

dent Lyndon Johnson signed into law, The National Guard Technician Act. PL 90-486 was the replacement legislation for Title II H.R. 2, mentioned in the 1967 report. This law confers federal employee status on all National Guard technicians, with all rights, benefits, and privileges attendant thereto. These benefits, rights and privileges cover:

- a. Retirement
- b. Old Age, Survivors and Disability Insurance.
- c. Unemployment Compensation
- d. Life Insurance
- e. Federal Employees Health Benefits

The new law PL 90-486 is most unique in that it designated technicians as federal employees as a matter of law and yet it provides for certain statutory administrative authority at the state level with respect to the administration of the technician program. Thus the law recognizes the military requirements and the state characteristics of the National Guard and designates the Chief of Staff to the Governor as the sole agent for employment and administration of the technician program under appropriate regulations prescribed by the secretaries concerned.

CIVIL DEFENSE LIAISON

A continuing plan, throughout New York State Armories, provides for the maintenance of eighty-three (83) Fixed Monitoring Stations. These stations are manned when required by two (2) qualified New York Guard officers assigned to each armory location.

Courses for New York Guard personnel are conducted on various dates each year at New York University, Cornell University and the New York State University, covering shelter management, radiological monitoring, radiological defense and relevant subjects. In addition fire and rescue training and related civil defense classes are conducted.

In cooperation with the Office of General Services, the New York State Civil Defense Commission and the Division of Military and Naval Affairs, Prepared and distributed a campus fallout shelter plan, titled "Evacuation Procedures in the Event of a Fire emergency, Alert, and/or a Nuclear Attack", in the Fall of 1968. This provides for evacuation of employees of the Division in the Public Security Building in Albany.

New York State military personnel continue to participate in all facets of civil defense training and civil defense exercises. They perform many assignments, such as monitors, observers and radiological officers, in all local, district, State and Federal

civil defense exercises.

The Annual Field Training of the New York Guard is conducted in the Fall of each year at Camp Smith, Peekskill, New York, and is partially supported by the Civil Defense Commission. During this training period all military radiological equipment issued by the New York State Civil Defense Commission is returned by the New York Guard Area Commands for exchange and calibration.

New York Army National Guard Officers, New York Guard Officers, as well as Officers of the Office of Emergency Planning attend the Office of Civil Defense Staff College at Battle Creek, Michigan, the New York State Civil Defense Spring (at West Point) and Fall Staff conferences and Civil Defense Directors meetings.

The Division of Military and Naval Affairs has cooperated with the Civil Defense Commission in natural and civil emergencies by opening to the public Division of Military and Naval Affairs armories and providing facilities to local, district and Civil Defense Directors for conduct of exercises or instruction.

The Armory Fallout Shelter Program is practically completed. There remains the construction of a shelter in Rochester, New York, which is presently being held in abeyance.

Installation of a National Warning System line in the Seventh Regiment Armory, New York City, is 97% complete. The installation of this line was coordinated between New York State Civil Defense Commission and the Division of Military and Naval Affairs and was provided for the use of the Governor in the event of an emergency.

New York State Civil Defense Commission provided funds for the installation of fifty-eight (58) generators in New York State National Guard armories with a corresponding number of fire extinguishers. In addition to the above, the Division of Military and Naval Affairs has installed five (5) emergency generators in modernized armories for the purpose of supplying light and electric energy for heating in the event of emergencies.

SENIOR ARMY ADVISOR

The mission of the U.S. Army Advisor Group (ARNGUS) New York, is to advise and assist in the training and administration of all Army National Guard units in the State of New York, to maintain the state of readiness and efficiency prescribed by Department of the Army. The Senior Army Advisor is assigned the additional mission of Liaison Officer

between the New York State Adjutant General and the Commanding General, First United States Army.

Every National Guard unit in New York State of battalion size or higher is authorized as advisor to render advice and assistance. Army Advisors accompany these units to Annual Field Training. In the reorganization of 1 February 1968 a number of units came into being for which no advisors were authorized. These include all units smaller than battalion size and the two provisional brigades of Emergency Operation Headquarters (EOH). These units receive advisor coverage as an additional duty from advisors assigned elsewhere.

With current authorized strength of 53 officers and 71 enlisted men, the New York Army National Guard Advisor Group is the largest authorized in the United States. Officer strength has remained quite low (18), while enlisted averaged (60) in 1968. Officer and enlisted advisors are provided to SRF II units on a higher priority than other units.

The Advisor Group is organized into five geographical area groupings under control of Area Advisors. Sub-groups parallel the National Guard chain of command in the 42d Inf Div & 27th Bde. Group Headquarters in Albany is the focal point for direction of all advisor activities.

GROWING BIGGER - - and better each year, Camp Smith acquired two more modern, new buildings in 1968. In continuation of the rehabilitation program, a new barracks with mess hall (lower right) and a completely equipped dispensary (lower center) were added to the West Camp complex.

AWARDS AND TOKENS - - of appreciation from his many friends throughout the State Military Forces were presented to Brig. Gen. Joseph E. Middlebrooks (center) upon his retirement as The Adjutant General of New York. Maj. Gen. A. C. O'Hara presents one of the citations. On the left is Mrs. Middlebrooks.

A SHORT CUT - - to the ground is demonstrated by SFC Colin J. Campbell, Co E, 19th Special Forces of Schenectady as he rappels down a rope at the New York State Fair in Syracuse as part of the Division of Military and Naval Affairs exhibit. Observing his technique are State Senator and Mrs. Earl Brydges and Maj Gen John C. Baker, Vice Chief of Staff to the Governor.

1957

NEW YORK YORK

NEW YORK YORK

AIR NATIONAL GUARD

GENERAL

1968 was highlighted by the call to active duty of two major elements of the New York Air National Guard. The 174th Tactical Fighter Group, located at Hancock Field, Syracuse, and the 107th Tactical Fighter Group, Niagara Falls, were mobilized at the order of President Lyndon B. Johnson in the wake of the Pueblo crisis of January 1968. The 174th Tactical Fighter Group had the unique experience of being mobilized and demobilized within the same calendar year. Three elements of the 107th Tactical Fighter Group, however, are still on active combat duty in South Vietnam as of the end of this year.

The forty-eight (48) units of the Empire State's Air National Guard are commanded by Major General Lewis A. Curtis. They are based at stations in Brooklyn, Roslyn, White Plains, Schenectady, and Syracuse. An airbase holding detachment is located at the Niagara Falls station of the 107th in anticipation of its return to Guard status following its demobilization, tentatively scheduled for mid-1969.

In addition to three C-97 heavy transport equipped military airlift units, the Air organization includes a highly skilled Tactical Control Group, electronics and communications units, professionally staffed aeromedical evacuation units, an Air Force band, and one Tactical Fighter Group on Guard status. The other Tactical Fighter Group, normally included in a description of units, is the 107th which, as mentioned above, is still on active duty. During 1968 all of the Guard status units carried out missions in direct support of USAF and US Army operations.

Military Airlift units carried approximately 2,691 tons of cargo, and 7824 passengers over some 2,595,633 total miles during 1968, without being mobilized for federal service.

PERSONNEL

Major General Lewis A. Curtis served as commander of the New York Air National Guard during 1968. General Curtis also continued to serve as Chairman of the Reserve Forces Policy Committee of the United States Air Force. Colonel Paul J. Hughes, New York Air National Guard Executive Officer was appointed a member of the MAC Air Reserve Forces Policy Committee during the year. Colonel Stanley M. Whalen, Assistant Director of Materiel, was appointed a member of the Air Force Communications Service Reserve Forces Policy Committee.

At the annual meeting of the Militia Association

of New York, the Governor's Trophy for 1968 was awarded for the second year in succession to the 109th Military Airlift Group of Schenectady, New York. The trophy is awarded annually to the best flying unit in the New York Air National Guard. The unit is comprised of 863 officers and men and is equipped with C-97G Boeing Stratocruiser aircraft. The 109th is commanded by Colonel John C. Campbell, Jr.

The Commander's Trophy is presented each year to the best all-around single unit in the New York Air National Guard signifying recognition as such by the NYANG Commander. Winner for 1968 was the 106th Supply Squadron commanded by Lt Colonel Andrew A. DiBernardo.

The New York State Medal of Valor was awarded posthumously to Captain Joseph L'Hullier of the 107th Tactical Fighter Group's 136th Tactical Fighter Squadron for heroism in Vietnam. Captain L'Hullier became the first New York Air National Guardsman to be killed in action while on active duty with a mobilized Air Guard organizational unit since World War II. He died while on a combat fighter support mission. Three other members of the 136th Tactical Fighter Squadron died in the service of their State and Nation in flying accidents during combat training prior to deployment to actual combat in Vietnam. 1st Lieutenants Raymond W. Reader and Robert R. Wolf were killed in a mid-air collision over Lake Erie in March 1968, and Major Richard E. Dye was killed during close air-ground support training in Florida in April.

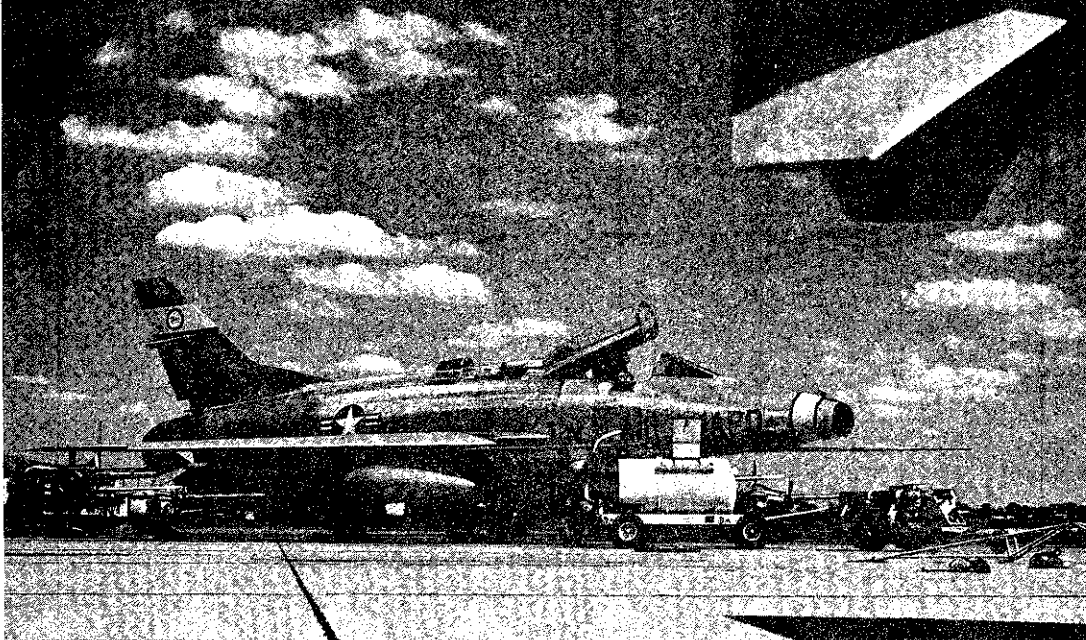

Replacing Lt. Colonel William Davidson as Information Staff Officer of Headquarters, New York Air National Guard, was Captain Frank C. (AI) Davis, formerly of Salt Lake City, Utah, and a member of the Utah Air National Guard.

Colonel Raymond C. Meyer was appointed Wing Commander of the 106th Military Airlift Wing in November 1968 following the retirement in March of the 106th Wing Commander, Brigadier General Raymond L. George. Colonel Meyer was appointed acting Wing Commander at the time of General George's retirement.

OPERATIONS

Again, one of the New York Air National Guard's major contributions to the Nation's military and defense program during 1968 was the performance of aircrews using the C-97 heavy transports in airlifting priority cargo and personnel throughout the world.

Airlift operations were supervised and directed

AIR GUARD POWER - - is exemplified by this F-100 Supersabre of the 107th Tactical Fighter Group, NYANG of Niagara Falls, as it is serviced and checked out for flight. This is the type of plane flown by the 107th's pilots to Viet Nam where they flew daily missions in support of U. S. and Allied Forces.

EASY DOES IT - - cautions Sgt James Evans as he checks the up-loading techniques of Airman Michael Williams, who gently positions a rocket under the wing of an F-86 jet of the 174th Tactical Fighter Group, NYANG "The Boys From Syracuse."

by the New York Air Guard's 106th Military Airlift Wing, commanded in the first quarter of the year by Brigadier General Raymond L. George. Following his retirement, Colonel Raymond C. Meyer, was appointed Wing Commander. The Wing's three operational Groups are the 106th Military Airlift Group, stationed at Floyd Bennett Field in Brooklyn and commanded by Lt Colonel Herbert Beers, the 105th Group of White Plains, commanded by Lt Colonel Robert C. Chambers, and the 109th Group, of Schenectady, commanded by Colonel John C. Campbell, Jr.

Flights to Southeast Asia in direct support of U. S. active military efforts continued unabated during 1968. In addition to these vital missions, flown by all military airlift units, all airlift groups flew missions to South America, Africa, Australia, Asia and Europe in support of the Military Airlift Command and the Joint Chiefs of Staff airlift (directed) missions.

The overseas flights also are in addition to a variety of airlift missions flown within the continental United States to include Alaska, Hawaii and Puerto Rico carrying personnel of the active military, Reserve and National Guard units to and from training sites, and a continuing series of joint exercises.

Acting in support of the Vietnam war effort since January 1966, the New York Air National Guard Military Airlift Groups have flown a total of 222 overseas missions in the three year period, including 138 to Southeast Asia. These missions have carried 10,181,562 million miles of cargo, and 3,596,550 million passenger miles, for a total of 18,531 thousand flying hours.

In addition to flying and flying support units, each military airlift group includes an aeromedical evacuation unit comprised of flight nurses and medical technicians trained in aerial transportation of military ill and wounded and their dependents on global mission. During 1968, New York Air Guard aeromedical evacuation personnel and aircraft were assigned to regularly scheduled aeromedical missions to Europe, Hawaii and Puerto Rico, assisting the regular Air Force with part of its workload.

Aircrew personnel of all military airlift groups are on year-around field training and accomplish their required ACDUTRA on short tours throughout the year in connection with performing scheduled domestic and overseas MAC support missions. Most of the qualified aircrew members performed many more than their required number of days in support of the accelerated number of airlift support missions requested by the Air Force. Only through the willingness and availability of volunteers was it possible for the airlift units to perform the high number of support missions

requested by the Air Force, without being mobilized into federal service. Annual two-week active duty training periods were scheduled and accomplished for ground support and non-flying personnel.

All NYANG personnel performed routine training during the year at 48 weekend unit training assemblies (UTA's) and during 15 days of annual field training. Aircrew members such as pilots, navigators, flight engineers, and loadmasters are authorized an additional 36 periods for flight training.

All Airlift Groups of the New York Air National Guard received National Guard Bureau and Military Airlift Command safety awards for an accident/incident-free operation while maintaining a high state of readiness throughout calendar year 1968.

COMPONENT UNITS OF THE NEW YORK AIR NATIONAL GUARD.

107th TACTICAL FIGHTER GROUP

The 107th Tactical Fighter Group of Niagara Falls was listed as a unit of the NYANG for only a few weeks of 1968, having been called to active duty on order of President Lyndon B. Johnson on 26 January 1968. However, it rates lead element of this report on operational units because it typifies the professional competence, the high level of training and capability, and the superb morale of all elements of the NYANG. The manner in which the 107th has carried out its mission as an active duty unit proves the value and qualifications of the members of the NYANG. It also demonstrates in the most effective manner the value of the Air National Guard as a back-up force to the country's regular armed forces.

The 107th, commanded by Colonel John E. Blewett, is equipped with F-100 "Supersabre" fighter aircraft, which is a single seat, day fighter capable of delivering rockets, bombs, napalm and 20mm ammunition in various configurations as well as having a nuclear weapons delivery capability. In 1967, the 107th Tactical Fighter Group was designated a Combat Beef unit and given additional training authorization, one of which was year round training authorization (Texas plan) similar to the airlift groups.

That the year-round training produced highly favorable results and contributed to a high degree of operational readiness is evident in the superior record which the 107th's 136th Tactical Fighter Squadron, 107th Camron (Consolidated Aircraft Maintenance Squadron), and group headquarters have rolled up on active duty in Vietnam.

Further evidence of the value of Air National Guard training and experience is presented in a report by a regular USAF maintenance officer on his personal experience in working with the men of the 107th. His report was published in a column in the November 8, 1968, issue of the Buffalo Courier-Express. The comments of Captain John Doherty first appeared in a National Guard Bureau report on all Air Guard units in Vietnam: "This is my first experience with the Air National Guard. They are thoroughly trained, extremely capable. I've never been associated with a group of people with their wealth of training. They were trained for such an occasion as this, and though many find it inconvenient to be pulled out of civilian life, I've heard no sour grapes or griping of any kind.

"One of the basic differences I find between the Air National Guard and the regular units is that all the Guardsmen are really professionals. There is also a certain comradeship in their unit that you don't find elsewhere. I can truthfully say I've never been with an outfit better qualified or with higher morale. They are more mature, and their knowledge replaces the attributes of the vigor of youth. The Wing has welcomed them with open arms!"

The words of Captain Doherty are supported by the exceptional statistical record the 107th has accumulated in its six months in combat. The 136th Tactical Fighter Squadron has flown almost daily combat missions. As of the end of this year, three members have been awarded the purple heart; one the distinguished flying cross; and 43 have received air-medals. One pilot has been killed in action (three were killed in combat training missions prior to going into combat); two others have been shot down and rescued unharmed. They have continued to fly regular missions. The 136th's leading pilot in terms of combat missions is Lt Colonel James Cook. He is 39 years old.

According to reports from the Defense Department, the 107th, together with all other Air National Guard and Air Force Reserve units are to be released from federal service before the end of June 1969 at which time they will revert to Air National Guard drill status.

174th TACTICAL FIGHTER GROUP

The 174th is commanded by Colonel Curtis J. Irwin and is equipped with F-86H Sabrejet fighter aircraft. The Group was alerted for active duty on 11 April 1968, partially mobilized on 13 May and deployed to Cannon Air Force Base, Clovis, N. M. The mission of the 174th was to train Forward Air Controllers (FAC) for service in Vietnam. The FAC

flies a light observation aircraft at low altitudes, visually observing enemy installations and movements and providing on-the-spot directions for fighters and bombers. The FAC dictates the type of ordnance to be delivered, observes the strike, and evaluates its effectiveness. The mission of the 174th was to give FAC's in training actual experience in fighter aircraft so that they would be fully apprised of the requirements of the men they would be directing in combat.

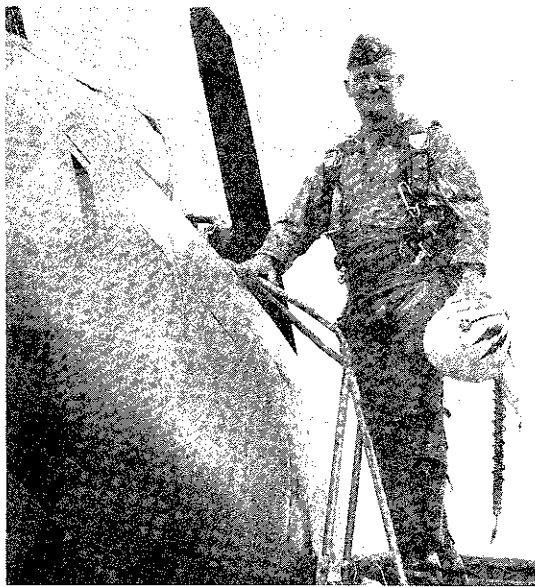

On arrival at Cannon AFB, and with their brother ANG Sabrejet fighter squadron from the Maryland ANG, the 175th Tactical Fighter Group, they comprised the 140th Tactical Fighter Wing. Originally based in Denver, Colorado, headquarters of the 140th moved to Cannon AFB with the deployment of the 140th Tactical Fighter Group to active duty in Vietnam. The 174th commander, Colonel Irwin was appointed Wing commander of the 140th Wing.

Not all members of the 174th Tactical Fighter Group were mobilized, however. Subsequent to the alert notice, a change directed mobilization of only the Group Headquarters, the 138th Tactical Fighter Squadron, and the 174th Camron. The remaining members of the 174th remained in Syracuse on a drill status during the eight months of mobilized service. The unit was deactivated as of 20 December 1968, and all members reverted to Air National Guard drill status.

152nd TACTICAL CONTROL GROUP

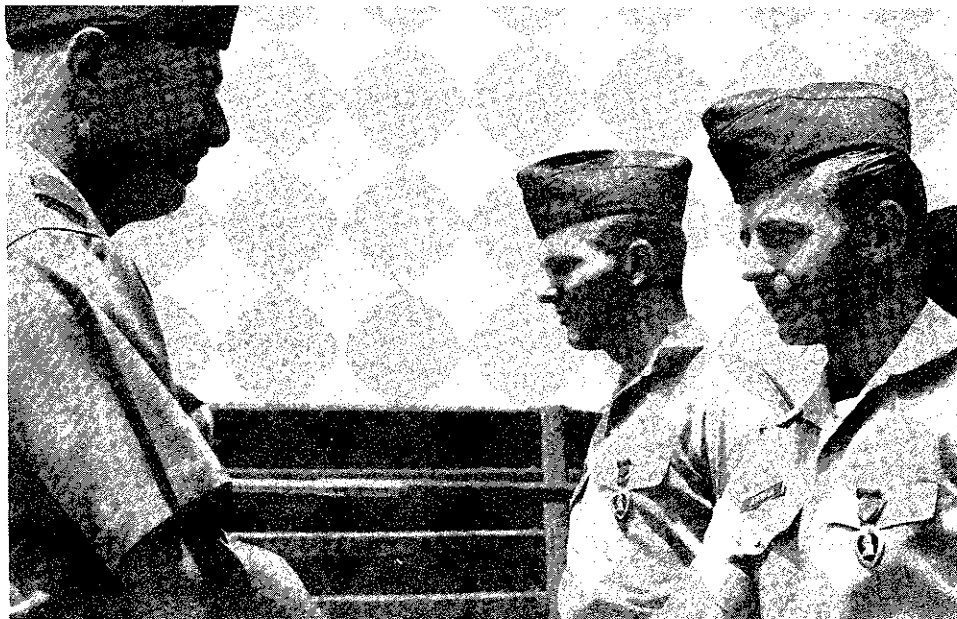

The group is commanded by Colonel Bernard Saul, and is stationed at Roslyn, Long Island. The 152d consists of a Group Headquarters, a Direct Air Support Squadron, two Tactical Control Squadrons, and four Tactical Control Flights. Component units are located in six eastern states from Massachusetts to Ohio, and are organized into two Tactical Air Control Systems (TACS).

Units of the group participated in a four-week, all-National Guard exercise during the summer months called Guard Strike II. Group Headquarters was responsible for compilation of a Group-wide Operations Order and its implementation, calling for a Tactical Air Control System to be in operation during the period 20 July to 3 August. Six units of the Group operated the TACS, with a Tactical Air Control Center at Griffiss AFB, NY and a Control and Reporting Center at Hancock, NY., with Posts at Youngstown, Ohio and Warsaw, N.Y. In addition, a Direct Air Support Center, operated by the 106th Direct Air Support Squadron (DAS), NYANG, at Camp Drum, N.Y. was set up to work close air support missions with both

READY FOR ACTION - - is LTC LaVerne J. "Dusty" Donner, Commander of the 136th Tactical Fighter Squadron, NYANG, of Niagara Falls as he pauses before climbing into the cockpit of his F-100 "Supersabre" to fly a bomb and strafe mission against the Viet Cong.

SHOT DOWN - - by ground fire in Viet Nam, Lt. Michael J. Laskowski, 136th Tactical Fighter Squadron, NYANG ejected safely from his crippled F-100 and was rescued from Viet Cong territory within 30 minutes by helicopter.

THE PURPLE HEART - - is presented to two New York Air National Guardsmen on active duty by Maj. Gen. A. C. O'Hara, Chief of Staff to Governor Nelson A. Rockefeller, during a visit with the 136th Tactical Fighter Sqdn in Viet Nam. Recipients are Sgt Gary E. McDannell and Sgt Ronald Senowech (right) of Niagara Falls who were mobilized with the 107th Tactical Fighter Group in January 1968. They were wounded during a sapper attack on their air base by Viet Cong.

Air and Army National Guard Flying units.

Group Headquarters Staff personnel selected the various sites for the Exercise and were directly involved in the myriad of problems attendant with operations from these locations. The Materiel Section supervised the erection of the TACC at Griffiss AFB, including shelters for the Air National Guard Staff and Eastern Army Headquarters Staff. Several hundred men were housed in tents erected at the TACC site.

Emphasis during the entire four weeks of field training was on Weapons Director Training, with particular attention on individual Director Mission accomplishment. Aircraft from a variety of Air National Guard units from various states were programmed to work with the TACS, along with ANG and Air Defense Command aircraft. Missions were designed to present tasks to the entire system with a variety of target assignments.

Communications personnel established and maintained complete communications with all sites used by group units. A great deal of valuable staff training was gained from participation in exercise Guard Strike II. Unlike the previous year, when the Group participated in Sentry Post I, Guard Strike II permitted personnel of the 152d to staff their own headquarters. The program was more realistic than previous exercises and adequately tested the headquarters and other elements of the 152d in their assigned mission.

The men of the 152d Tactical Control Group under the leadership of Colonel Saul continued to excel in their assignment during the calendar year, and were active in planning for the coming year to accelerate the development of greater capabilities in their mission.

Another tenant of the Roslyn NYANG facility is the 106th Direct Air Support Squadron, commanded by Lt Col Michael M. Ciraco. Its primary assignment is to provide a rapid reaction capability to satisfy immediate requests from ground forces for close air support, Tactical Reconnaissance, and the assault airlift effort which has been allocated to the DASC for use as required.

During the Calendar year the 106th DAS participated with the 152d in Gold Strike II. This field training exercise was considered to be a most productive and advantageous period for this unit, since it was the first such experience at an independent location, away from other TACS units. In addition to realistic, five experiences working with Forward Air Controllers and fighter aircraft, the problem of security of the DASC site was faced realistically with an unexpected night ground attack on the unit, which was successfully repelled.

Another unit within the control of the 152d Tactical Control Group is the 108th Tactical Control Squadron, located at Hancock Field NYANG base, Syracuse, NY. Lt Col Robert A. Gaughn commands the 108th. Its primary function is to install, maintain and operate radar, communication and control facilities in support of tactical air operations, provide administrative and operational control of a Tactical Air Control Center (TACC), a Control and Reporting Center (CRC), and radio relays. This unit also participated with the 152d in Guard Strike II.

213th GEEIA SQUADRON

The 213th GEEIA (Ground Electronics Engineering Installations Agency) located at the Roslyn ANG base is commanded by Lt Col Frank R. Healey. Composed of professional electronics men, its peacetime mission is to attain and maintain an optimum effective capability to install/rehabilitate general communications-electronics and meteorological facilities according to roles and tasks assigned in gaining command plans for utility in a national emergency.

The mobilization mission of the 213 GEEIA is as follows:

a. Installations and Installation testing of ground communications electronics meteorological (C.E.M.) equipment.

b. Repair, remove, and relocate ground (CEM) equipment on a programmed or emergency basis.

c. Perform mobile depot level maintenance.

During 1968 the 213th GEEIA Squadron accomplished:

Maintenance and repair of electronics equipment

Modification of telephone central office

Installation of base cable system

Rehabilitation of antenna farm

Maintenance of telephone central office dial equipment.

Splicing and testing of 1818 and 909 pair cables.

The annual field training of the 213th GEEIA Squadron is patterned after the regular Air Force counterpart. Teams of specialists were sent out to various locations at different times under the supervision of team chiefs. The training sites were:

Griffiss AFB, NY

McClelland AFB, Calif.

Roslyn ANG Station, NY

Loring AFB, Maine

Offutt AFB, Nebraska

Schenectady, ANGB, NY

274th COMMUNICATIONS SQUADRON

The 274th Communications Squadron, located at the Roslyn ANG Base, is commanded by Lt Col. William Sullivan.

The mission of the 274th Communications Squadron (TT) is to attain and maintain an optimum effective capability to install, operate and maintain Radio/Teletype Communications Tributary Terminals capable of being linked to a Radio Communications major relay center in support of USAF operations as depicted by Headquarters AFCS through Headquarters New York Air National Guard, and Headquarters 253d Communications Group, Massachusetts Air National Guard, and to support Tactical Air Force Operations.

The highlight of the operations and training year was participation in Guard Strike II. The eight officers and 167 airmen of the 274th Mobile Communications Squadron manned nine different sites during the Guard Strike II exercise, in Massachusetts, New Jersey, New York, and Pennsylvania, and worked effectively and harmoniously with comparable Air Guard Mobile Communications Squadrons from Georgia, Massachusetts and Maine.

201st WEATHER FLIGHT

The 201st Weather Flight, located at Zahn's Airport, Amityville, L. I., is commanded by Lt Col Ferdinand B. Lurkin.

The mission of the 201st Weather Flight (SA) is to provide staff weather support to the 42d Infantry (Rainbow) Division and aviation weather support to the 42d Aviation Battalion. During 1968, monthly drills were held at Zahn's Airport in Amityville, N.Y., which is the site of battalion flying operations. An AFT staff support was provided directly to G-2 while weather dissemination tailored to their specific needs was given aviation, artillery and CBR.

The highlight of 1968 Field Training was assignment to Detachment 4 of the 16th Weather Squadron at Tipton AAF at Ford Meade, Md. Following a week of working with Det. 4, the men of the 201st took over observation and forecasting duties of the station during the latter phase of field training.

The proficiency of the 201st was recognized in a commander's letter of Detachment 6 of Headquarters Army Weather Service when it was singled out for special attention. The 92.3 percent operational effectiveness achieved by the 201st Flight was the highest percentage of all ANG and ARNG units throughout the United States.

552nd AIR FORCE BAND

The New York Air National Guard is fortunate in having as a component unit the 552d Air Force Band. The Band, located at the Roslyn NYANG station, commanded by CWO Joseph Losh. The Band's mission is to provide music at concerts, reviews, parades, re-

views, formations and ceremonies for all units of the NYANG and the State of New York.

During 1968 the 552d AF Band provided music at the following military, state and civilian functions.

March

Retirement Review at US Naval Air Station, Brooklyn.

28 April

Loyalty Day Parade, Farmingdale, New York

30 May

Memorial Day Parade, Roslyn, New York

7 July

Concert, Port Washington, American Legion Post

21 July

Concert, Seaciff, New York

26 July

Concert, Syracuse, New York, American Legion Post

4 August

Concert, Roslyn Park

The Band received numerous commendations for its performances during the calendar year. In addition, its annual field training program was highlighted by several concerts, mentioned above, and participation in the annual meeting of the State American Legion.

In addition, a special retreat formation was held for two retiring ANG officers at the Roslyn ANG station, and a special appearance took place on the occasion of a testimonial program for Colonel Grabeski at the Huntington, NY, townhouse in late October.

The New York Air National Guard has approximately 5,000 people assigned to 47 different units located on five bases and one ANG station throughout the State.

CHRONOLOGY OF HIGHLIGHTS

January

107 Tactical Fighter Group of Niagara Falls called to active duty on orders of President Johnson in the wake of the Pueblo crisis.

Two outstanding members of the 106th DAS Squadron retired from the NYANG, Majors James Cook and Howard Sapenoff. Major Finley Deatcher was awarded the 15 year Distinguished Service Ribbon.

The 109th Military Airlift Group flew a special mission to the Pacific area to transport a USAF GEEIA

Inspection Team. The special mission visited USAF installations in the Philippines, Okinawa, Japan, and Hawaii and lasted a total of 30 days.

February

Captain Larry P. Hail was Federally recognized and thereby became the first rated pilot to join the 106th Direct Air Support Squadron.

Major Norma Erb, the Air National Guard's first nurse, retired in February ceremonies at Floyd Bennett Field in Brooklyn. Major Erb joined the NYANG as a member of the 106th Tactical Hospital in 1955. Her retirement culminated a distinguished career dating from early World War II when she served as an Army nurse. Major Erb holds the Air Medal, one of very few women to hold this decoration.

In cooperation with the Community Mayors of New York, a service organization, members of the 106th Military Airlift Group hosted a special party for 1600 crippled children from New York City.

An aircraft and crew of the 105th Military Airlift Group airlifted television newsmen to Niagara Falls to film members of the 107th Tactical Fighter Group after announcement of the unit's mobilization for active service. The 105th also accomplished a live aeromedical evacuation mission from Shaw AFB to the 105th base at Westchester County Airport. The patient was a female who had been severely injured in an auto accident and required immediate airlift to a medical center. Commercial carrier capability was not available.

March

Brigadier General Raymond L. George retired as Wing Commander, 106th Military Airlift Wing. He was replaced by Colonel Raymond C. Meyer, Deputy Wing Commander, who was named Acting Wing Commander.

Lt Colonel Thomas Sheldon of the 152d Tactical Control Group was promoted to that rank, filling a unit vacancy.

Brigadier General Andrews and Colonel Riddle of the 9th Air Force visited the Roslyn ANG complex on 26 March to see the installation and discuss operational readiness.

The 174th Tactical Fighter Group was awarded the National Guard Bureau Award in recognition of an accident free operation while maintaining a high state of readiness throughout calendar year 1967. During the period 4 February through 10 March, the 174th completed a special training deployment to MacDill AFB, Florida. Approximately 300 personnel participated.

Through coordinated utilization of Syracuse area Military Medical Resources, on March 10, the 376th Evacuation Hospital Reserve unit utilized the 174th TAC Dispensary to accomplish 60 periodic physicals for Army reservists. There has been a continual history of coordination and cooperative exchange of medical resources between 174th headquarters, the 642d USAF Dispensary, 428th Medical Services Flight, USAF reserve, Marine Corps medical reserve units and the Naval Reserve Medical Unit.

April

The 106th DAS Squadron held a military ball at the Penn-Garden Hotel in New York City to celebrate the 20 Anniversary of the unit.

The 201st Weather Flight commissioned an ROS (Remote Observation Station) at the Amityville Zahn's airport. It consists of a Heli-cop hut with TMQ-15 wind set and intercom, enabling communication with the base weather station.

The 552d AF Band received a Certificate of Merit by the G&E Linder Post #8031 of the VFW, for participation in their Patriotic Day Pageant on 10 June 1967.

The 152d TCC made an emergency power unit available to the Village of East Hills, L.I., and thereby helped avert what might otherwise have resulted in suspension of village operation in the emergency.

CMSGT Charles Butterfield, CBPO of the 174th Tactical Fighter Group was commissioned a Captain under the Special Appointment Program.

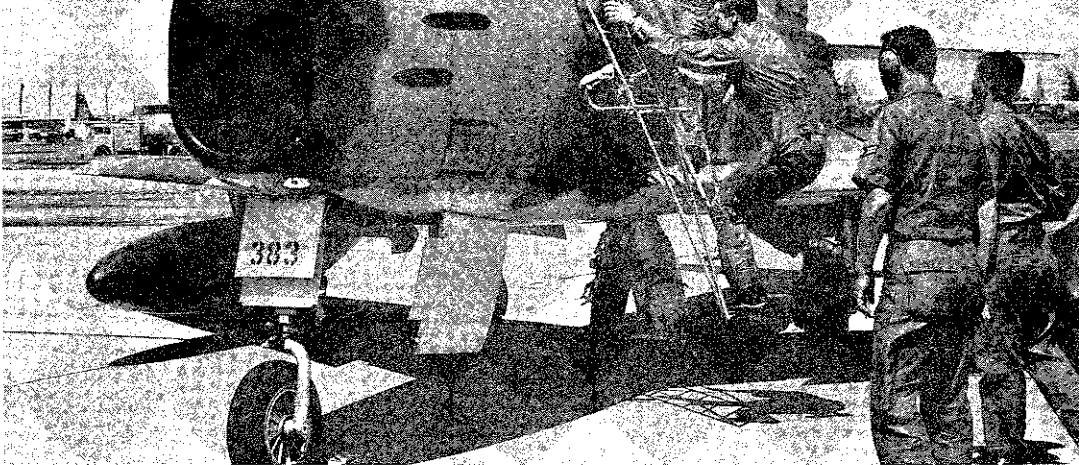

The 174th Tac Ftr Gp was alerted April 11 for mobilization. Starting with that date, activities at Syracuse accelerated with all of the various requirements which had to be fulfilled prior to actual deployment to active service.

May

An all-day planning seminar on Exercise Guard Strike II, the 1968 field training program was held at Hofstra University. Brigadier General Zink, New Jersey Air National Guard attended.

On 8 May, the 174th Tac Ftr Gp was notified that the following units would not be mobilized, and would remain in inactive, regular National Guard status: The 174th Combat Support Squadron; the 174th Supply Squadron; the 174th Tactical Dispensary; and the 174th Communications Flight.

The first of a series of quarterly information officers meetings was held at Hqs, NYANG, Westchester County ANG Base. Purpose of the meeting program is to improve communication between all

ENGROSSED WIVES - - of men in the 107th Tactical Fighter Group, Niagara Falls, view a film interview with one of the unit's jet pilots who was shot down and rescued under fire in Viet Nam. In the front row (nearest camera) is Mrs. Jules Thurn, wife of the pilot. MG A. C. O'Hara, following his visit with the unit in Southeast Asia, briefed over 200 women on the activities of their husbands and sons.

NYANG unit information officers and Hq NYANG information office.

Headquarters, 1st Air Force conducted an inspection of the COMSEC holdings and handlings procedures in 105th Military Airlift Group which resulted in the first "outstanding" rating given to a sub-account by Headquarters, 1st Air Force.

June

174th Tactical Fighter Group units activated in May completed deployment to Cannon AFB, N.M.

July

Commendation for performances of the 552d AF Band were received American Legion Post 509 of Port Washington, L.I.; the Village of Sea Cliff, N.Y., and American Legion Post 1112 of Syracuse, NY.

The 108th Tactical Control Squadron of Syracuse installed and operated a Tactical Air Control Center at Griffiss AFB during annual field training, and a control and Reporting Center (CRC) at its home station at Hancock Field, Syracuse. It exercised operational control over the Control and Reporting Post (CRP) #1, manned by personnel of the 112th Tactical Control Flight of the Pa ANG, at Camp Ryan, NY; CRP #2, manned by personnel of the 123rd TCFM, Ohio ANG at Youngstown, Ohio; and the Director Air Support Center, manned by personnel of the 106 Direct Air Support Squadron, NYANG, at Camp Drum, N.Y.

Two men of the 106th Military Airlift Group were awarded the Air Force Commendation Medal by the 21st Air Force: SMSGT Alex East, Jr., and TSGT George C. Peek. Both men are air advisors to the 106th Group.

August

Lt Colonel Alex Chyhai assumed command of the 106th Direct Air Support Squadron, transferring from the 105th Military Airlift Group, fulfilling the requirement that the 106th DAS Squadron commander must be a rated officer on flying status. Former commander, Lt. Colonel M. M. Ciraco was assigned Deputy Commander and communications Staff Officer.

Aircraft from all three Military Airlift Groups, the 105th, 106th, and 109th, participated in the transportation of 400 California Air National Guardsmen home from their annual field training sites at Griffiss AFB, New York, and Otis AFB, Mass.

September

The 201st Weather Flight received a commander's letter of commendation from Detachment 6, Headquar-

ters Army Weather Service. The 201st received 92.3 percent operational effectiveness report, the highest percentage of all National Guard weather units in the country, ANG and ARNG.

The 108th Tactical Control Squadron displayed an exhibit at the New York State Fair from 27 August to 2 September.

A former air advisor to the 274th Mobile Communications Squadron, MSGT D. J. Takac was re-assigned to the Squadron on 1 September following a tour of duty in the Philippines. Sgt Takac has been awarded the Air Force Commendation Medal for meritorious service as NCO in charge of the Pacific Air Forces Coordinating Network.

October

(no particular highlights)

November

The 108th Tactical Control Squadron celebrated its 20th Anniversary with a dinner-dance on 23 November.

The 552d Air Force Band performed at a review ceremony for decoration of two officers at Roslyn ANG Station.

The Air Force Commendation medal was awarded to Lt Colonel Michael M. Ciraco, Deputy Commander, 106th DAS, by Major General L. A. Curtis, NYANG Commander. Colonel Ciraco was decorated for his outstanding performance as Commander of the 106th DAS during exercise Guard Strike II.

Colonel Raymond C. Meyer was appointed Wing Commander, 106th Military Airlift Wing, from Acting Commander.

Lt Colonel Pizzo, Group Headquarters, 152d Tactical Control Group, was awarded the Air Force Commendation medal for his outstanding performance during Guard Strike II. He was decorated by General Curtis in the ceremony mentioned above.

On 12 November, men of the 152d performed an outstanding community service when an emergency was declared nearby. A wind and rain storm left the community of East Hills without electricity for three days. After the Mayor had declared an emergency, an emergency generator was supplied to the Village Hall and offices, which enabled it to stay in operation. The Dining Hall at Roslyn ANGB and other facilities were made available to local residents during the evenings, and arrangements were completed for local populace to sleep in the recreation hall in the event of a severe cold. Mayor Fleischer of East Hills wrote a letter to Colonel Saul expressing appreciation and commendation to the unit for its

fine assistance.

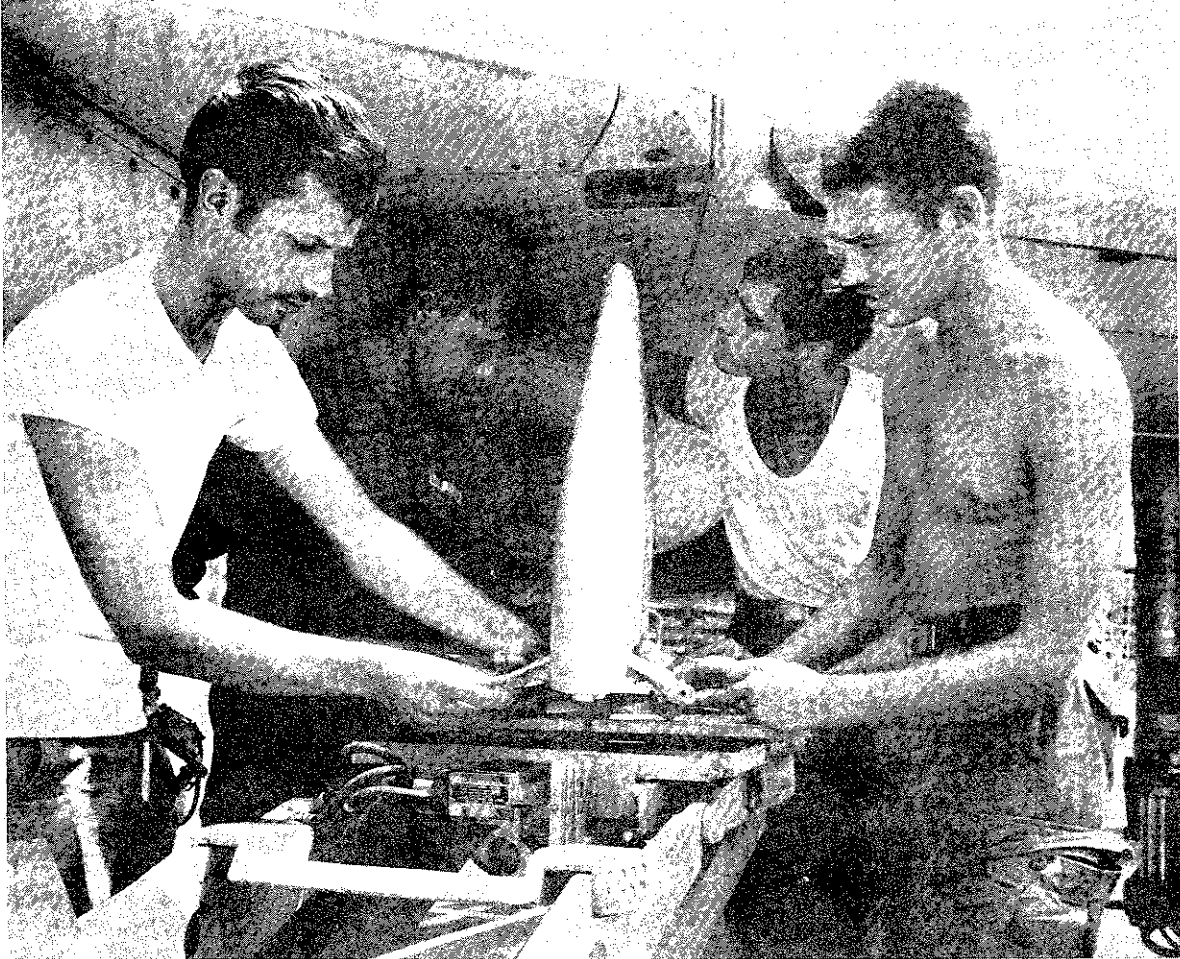

DECEMBER

In ceremonies conducted on 20 December, the 174th Tactical Fighter Group was relieved from Federal Active Duty and returned to State Status. Major General A. C. O'Hara, Chief of Staff to the Governor welcomed the unit back to the State on behalf of Governor Nelson A. Rockefeller. Major General L. A. Curtis welcomed the unit back to State

Status. Also participating was Major General T. F. O'Keefe, Commander of 9th AF, who exchanged the USAF flag, carried by a 174th color guard, for the New York State Flag. General O'Keefe represented General Momyer, TAC Commander.

Major Harold C. L. Beardsley was appointed operations officer, 108th TCS, replacing Major Willis W. Bryant, who retired.

Colonel Bernard Saul, commander 152d Tac Con Gp was appointed Vice Commander, "EASTACS" (Field Training Exercise Command.)

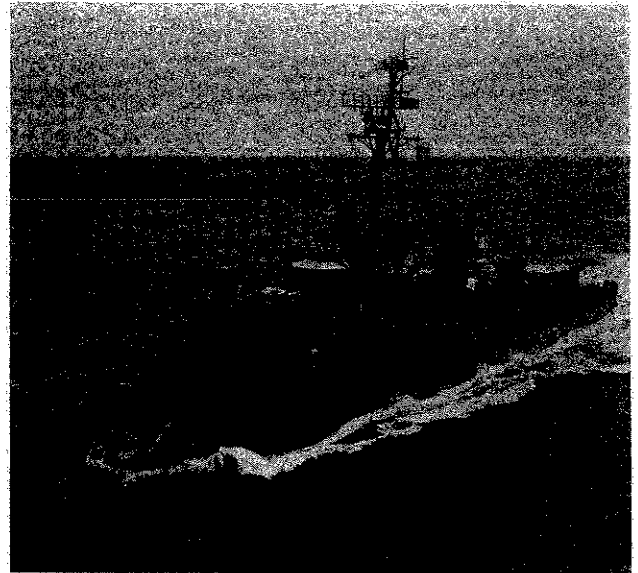

A BOMB CARRYING - - pylon is installed on the wing of a 'Supersabre' in Viet Nam by four mobilized Air National Guardsmen from Niagara Falls' 107th Tactical Fighter Group. 1970

NAVAL MILITIA

MISSION

The Naval Militia as the Naval component of the State Military Forces has a two fold mission. The State mission is to provide a disciplined body of naval troops available to the Governor, to defend the State in the event of attack, assist competent local authority in the preservation of local process, and support recovery operations in the event of natural disaster or civil defense emergency. The Federal mission is to provide trained units and qualified personnel to be available for active duty in the US Navy and Marine Corps in time of war or national emergency, and at such other times as the national security may require.

ORGANIZATION

The Naval Militia is composed of Naval and Marine Corps units, numbering approximately 5600 officers and men, located throughout the State, on or near all major waterways.

The Naval component trains as ships crews, in the Destroyer Escort and Fleet Division programs, and as individuals in the Surface program. The basic objective of each of these programs is to train and qualify men to augment fleet or shore installations of the Navy.

The acquired skills necessary to operate a vessel of the Navy, which is a self-supporting entity, are those which are most suited to the restoration of vital utilities and services, which might be disrupted as the result of natural disasters.

The Marine Corps branch conducts unit training, exclusively. All Marine Corps units are part of the 4th Marine Division or its supporting elements. One half of the Marine Corps personnel are schooled and qualified as communicators, while the balance are trained in the infantry skills.

PERSONNEL AND ADMINISTRATION

PERSONNEL

All officers of the Naval Militia serve a minimum of three years on active duty with the US Navy or the Marine Corps. Navy enlisted men each serve two years on active duty, training in a specific rate or specialty, while the Marine enlisted men serve from six months to a year depending upon their field and

the needs of their organizations. Upon release from active duty the Sailors and Marines rejoin the units from which they left, and complete their six year military obligation as reservists/militia men.

The tours of duty for Commanding Officers in both Navy and Marine Corps units are normally limited to two years, in order to provide more officers with the opportunity for command.

While this policy results in a significant number of command changes each year, it ensures the best qualified officers a path to the top.

ADMINISTRATION

The planning, programming and budgeting for the Naval Militia are executed by the Commander, New York Naval Militia, and his staff. The program activities include personnel management, facility maintenance, training, public information, logistic support, and inspections.

The management tools employed in the execution and supervision of the program activities are the electronic data processing personnel accounting system, seminars for commanding officers, staff visits, conferences with armory superintendents and officers in charge and control, formal inspections, and incentive awards to units and individuals.

OPERATIONS AND TRAINING

Special emphasis this year has been placed upon organization, planning, and training for employment in domestic disorder situations. Operation Plan SKYHAWK, issued by the Chief of Staff to the Governor, assigned specific missions to the Naval Militia, which would best utilize the special skills possessed by our personnel.

Joint planning conferences were held with major commanders and with the Commandant, Third Naval District and the Director, First Marine Corps District to develop sound operational plans, and establish special training programs. Plans have been developed and promulgated; civil disturbance training programs have been, and continue to be, conducted; and key staff and commanding officers have attended the US Army's Civil Disturbance Orientation Course at Fort Gordon, Georgia.

Conventional Training is organized and accomplished as developed below:

SURFACE PROGRAM

Within this program the stress is placed on in-

BRIGADE LANDING EXERCISE - - is executed by 2 Bn 25th Marines as they advance across Onslow Beach, Camp LeJune, North Carolina in a realistic setting during their Annual Field Training.

TOYS FOR TOTS - - an annual program conducted by the Marine Corps Reserve every Christmastime, was kicked off in the Capital District by MG A. C. O'Hara, Chief of Staff to the Governor; Capt Penn Steurwald, C. O., Co H, 25th Marine; Maj John Nichols, Inspector - Instructor in Albany; and LTC Lawrence Flynn, C. O. 2nd Bn 25th Marines, USMCR/NYNM.

dividual effort. The training cycle for each unit is fashioned to provide in-depth instruction and practical application in a number of basic and advanced naval specialties (machinist mates, electricians, radar technicians, etc.). Two weeks annual training duty is also scheduled individually at a specific navy school or at on-the job training in the man's mobilization billet.

DESTROYER AND FLEET DIVISION

The ships of the Destroyer Division continue to be the hard core of the Naval Reserve. These ships, which go to sea one weekend each month, are ready for immediate deployment with the active forces. They maintain stocks of food, fuel, and ammunition, and the assigned Reserve/Militia crews are fully capable of performing their assigned missions.

The Fleet Divisions also train at sea each month. While they are not scheduled for mobilization with their assigned training ship, as are the crews of the Destroyer Division, they are prepared to form the nucleus of, or to augment an existing crew, of a mine warfare vessel of the Navy.

These units perform two weeks training duty each year, as ships crews, with elements of the Fleet. (See enclosure)

MARINE CORPS BRANCH

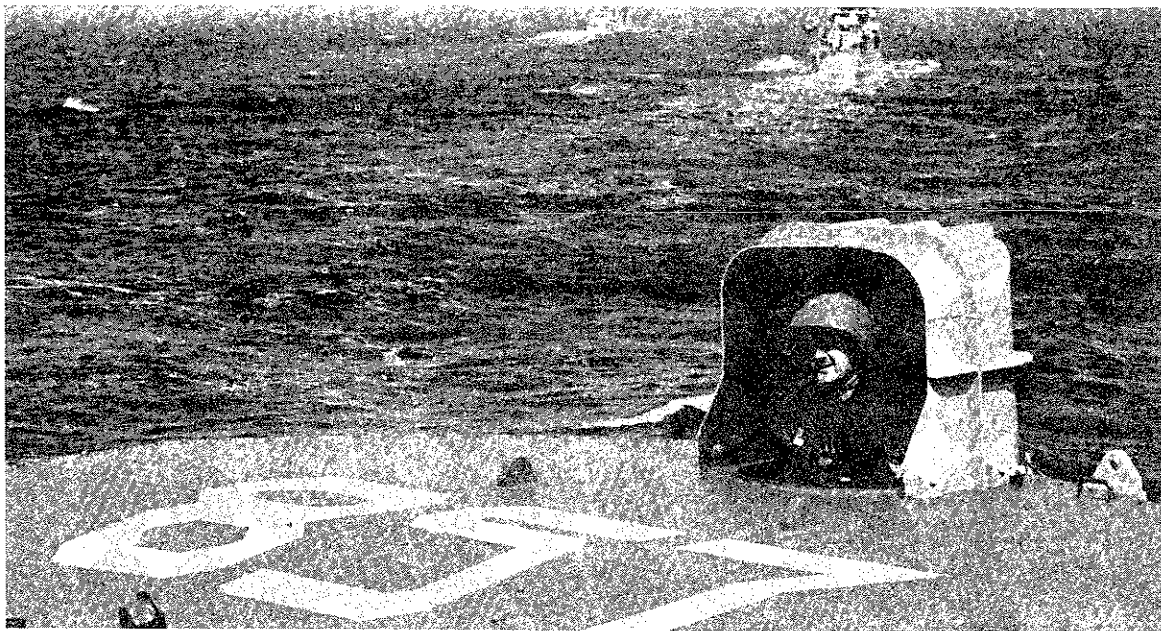

The Marine Corps units conduct weekend training exclusively. The majority of the training is conducted in a field environment, with the emphasis on counter-guerilla tactics and combined Air-Ground operations. During Annual Training Duty this year the entire Marine Corps Branch conducted a combined Air-Sea Landing Exercise at Camp Lejeune, North Carolina, supported by the Fourth Marine Air Wing.

LOGISTICS

The weapons, vessels and training equipment utilized by the Naval Militia, are supplied and maintained at 100% Federal cost. The cost of maintaining and operating the Naval Militia Armories is shared equally by the State and Navy under existing lease arrangements.

FISCAL

The Department of the Navy annually appropriates in excess of 5 million dollars to support the training activities of the New York Naval Militia. These funds are exclusive of the annual rentals paid to the New York State Treasury, or the repairs and rehabilitations performed on State owned buildings which are outlined in the logistic enclosures to this report.

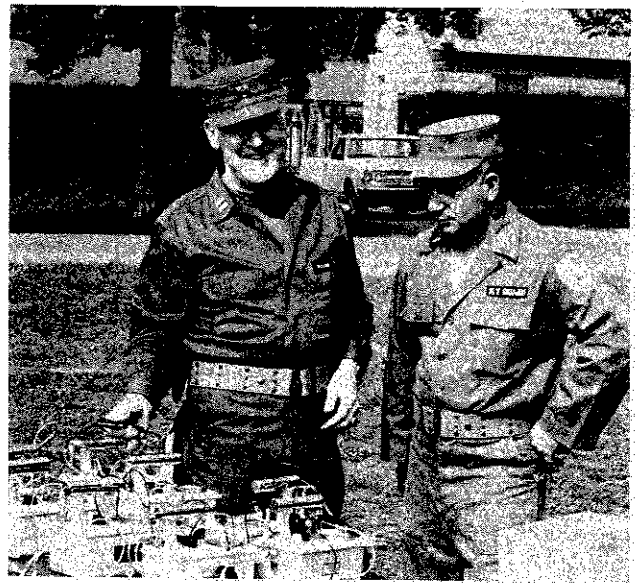

COMMENCE FIRING - - will be the next command to the gun mount captain shown aboard the Destroyer BRISTOL of the NEW YORK NAVAL MILITIA.

TOP SECRET

THE UNITED STATES GOVERNMENT

OFFICE OF THE SECRETARY OF DEFENSE

NEW YORK GUARD

TRAINING

Enrollment in the New York Guard Subcourse Program has increased to a figure of five hundred ninety six (596) officers and enlisted men. This indicates a great desire on the part of these individuals, to qualify for promotion and to increase their military knowledge.

One hundred and fifty New York Guard officers attended a Training and Administrative Conference at Albany, New York on 30-31 March 1968. Attendees included members of the Headquarters, New York Guard; Commanders of the Area Commands, Internal Security Battalions and their staffs as well as the Commanders of the Internal Security Companies.

a. Subjects covered in the General Conference were:

- (1) Martial Law
- (2) Command Responsibility
- (3) Public Information
- (4) Riot Control

b. Separate conferences were also conducted for officers responsible for specific areas of military matters by:

- (1) Deputy Commanding General, New York Guard
- (2) G1, Personnel and Administrative
- (3) G3, Plans and Training

Annual Active Duty for Training was conducted at Camp Smith, Peekskill, New York on 21-22 September 1968, with four hundred thirty-eight officers and enlisted men in attendance.

a. A County Fair type of instruction was conducted on 21 September with instruction including the following:

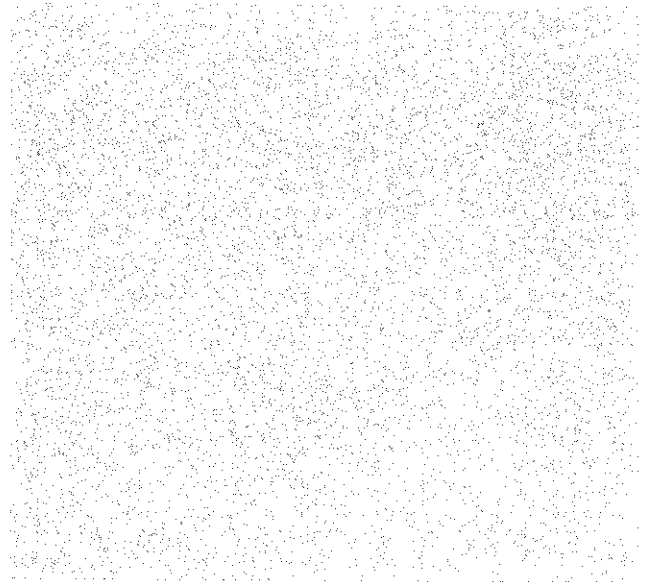

- (1) Civil Disturbances
- (2) Refuge Control
- (3) Radiological Decontamination
- (4) Drill and Ceremonies
- (5) Interior Guard

b. On 22 September, separate staff conferences were conducted to cover the entire spectrum of required New York Guard operation.

c. Mr. Raymond J. Barbuti, Deputy Director of the New York State Civil Defense Commission and Mr. William J. McGrath, Director of Civil Defense Warning and Communications, also made a two hour presentation concerning Civil Defense activities generally and specifically as pertaining to the New York Guard in the Guard's fulfillment of its Civil Defense missions.

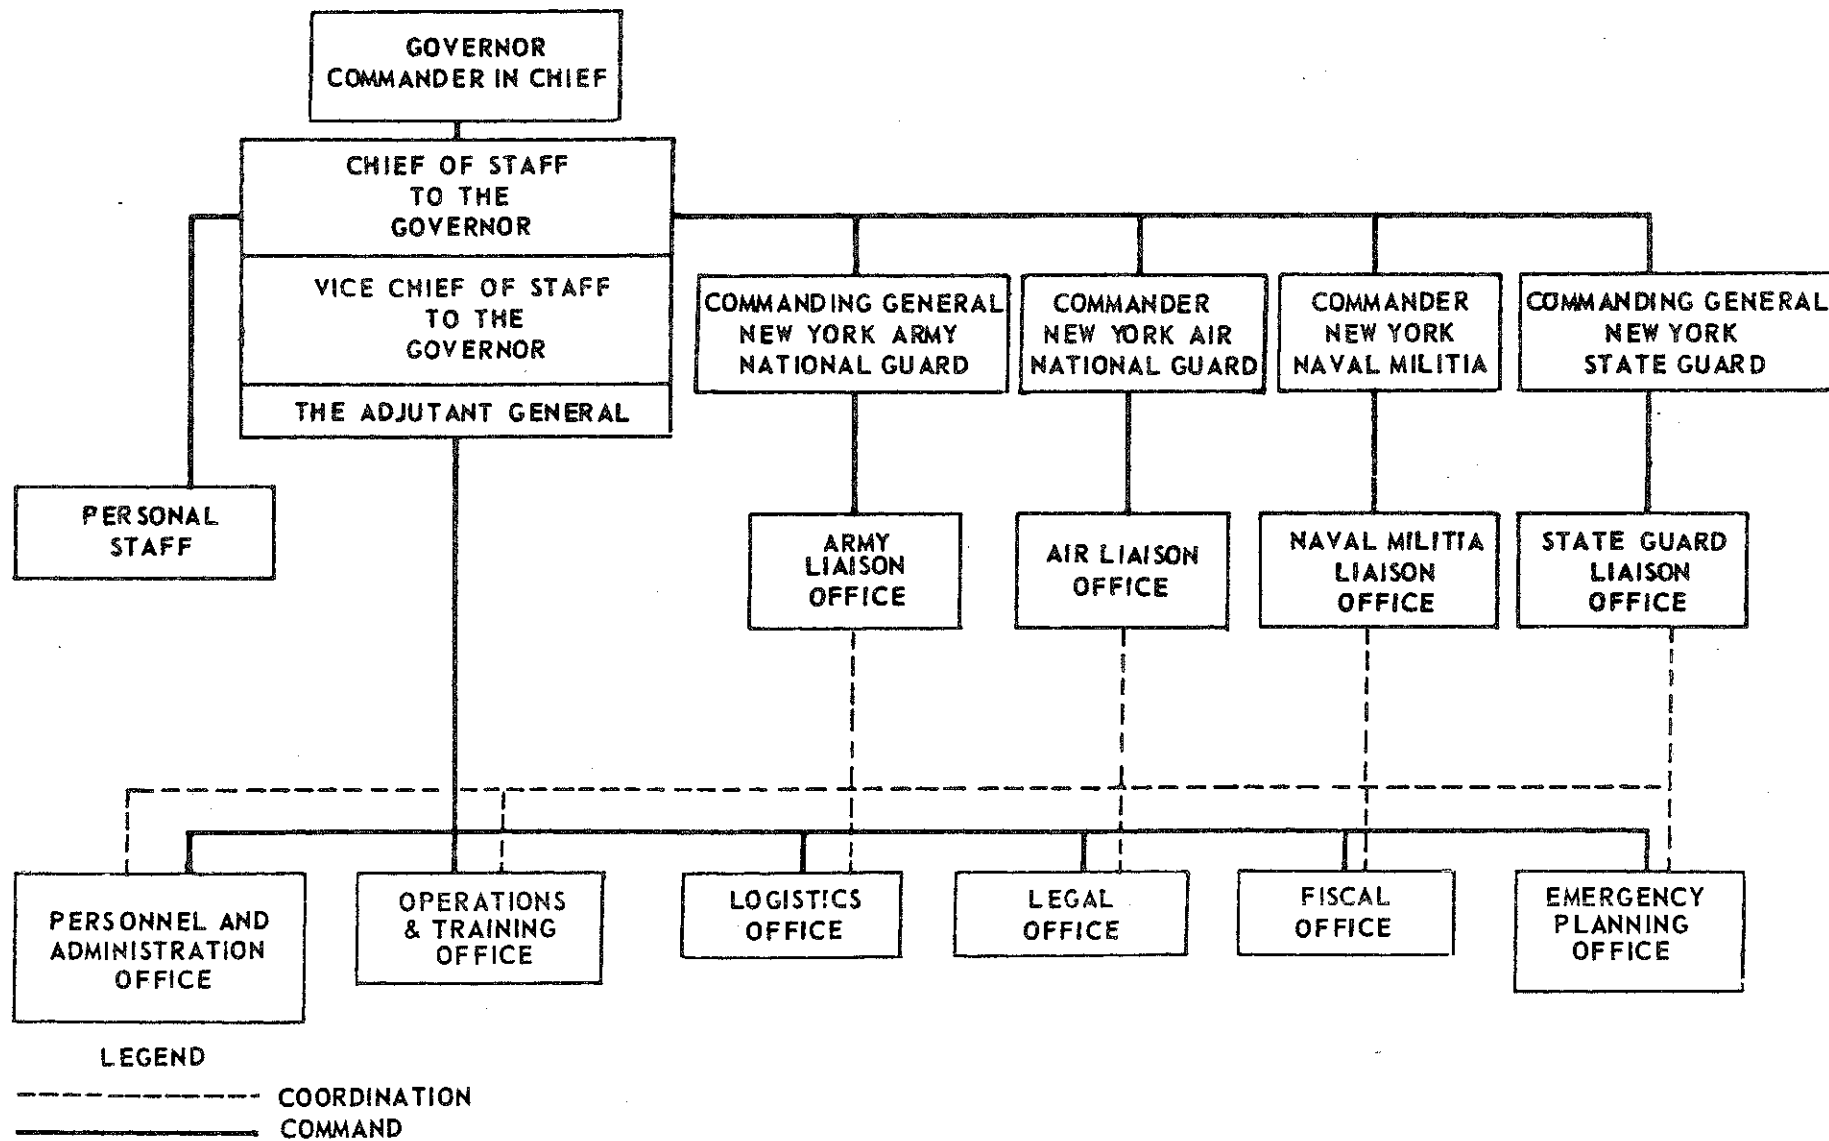

In continuation of qualifying Radiological Monitors to support the Civil Defense mission of operating Fixed Monitoring Stations in the armories throughout the State, emphasis was again placed on conducting the 16 hour RA-1 Course in each of the six Area Commands. One hundred twenty (120) officers and enlisted men received this training and were awarded New York State Civil Defense Commission certificates as having qualified as Radiological Monitors.

* USE ARMY NATIONAL GUARD FACILITIES

**CAMP SMITH
CONSTRUCTION**

REHABILITATION:

(1) Major Camp modernization projects completed in 1968 included the construction of a 300-man barracks building (#503) and a Post Dispensary building (#507). While both were scheduled for completion in early June, the structures were not available for actual troop use until September.

(2) To date, the Camp Smith modernization and rehabilitation program has resulted in the following new troop facilities:

(a) Administration Building (#501).

(b) Two (2) 600-man year-round enlisted men's barracks buildings with kitchen and mess hall facilities and combination classrooms and air raid shelters, (#504 and #505).

(c) Supply Building (#506).

(d) 300-man enlisted men's barracks and mess (#503).

(e) Post Dispensary (#507).

(3) The contract for construction of a new BOQ and mess is expected to be awarded in early 1969 with completion scheduled for April 1970.

(4) Currently in the planning stage are:

(a) An enlisted men's recreation building with PX, multipurpose auditorium and swimming pool; and

(b) A Post maintenance building to accommodate the State Garage, fire house, plumbing, carpentry and paint shops, etc.

MISCELLANEOUS STATE PROJECTS

(1) Window screen repairs, Buildings 501/5	\$1,345.00
(2) Emergency Repairs to pumping system	9,074.84
(3) Concrete bases for cannons	1,940.00
(4) Target carrier safety modifications	1,450.00
(5) Miscellaneous alterations to Buildings 501, 504, 505 and 506	36,525.84
(6) Temporary rehabilitation of Latrine #32	984.00
(7) Installation of water softening plant	17,140.66
(8) Installation of heat, Building #3	2,495.00
(9) Construction of rifle grenade targets	2,980.00
(10) Exploratory foundation work, Building 76	1,390.05
(11) Electric Service to training areas	1,417.00
(12) Construction of 12 pull-up bars, ESMA	960.00
(13) Reglazing of 408 windows - Buildings 501, 504 and 505	800.00
(14) Installation of screen door guards, Buildings 504 and 505	500.00
TOTAL	\$79,002.39

MISCELLANEOUS FEDERAL PROJECTS:

(1) Construction and installation of four (4) water tanks for bivouac areas	\$7,752.00
(2) New target house, Range #3	8,285.00
(3) Supply cage, Building #127 (ESMA)	1,130.00
(4) Painting of Buildings #1, #1A, #3 and #90	5,000.00
Total	\$22,167.00

**CAMP SMITH
FISCAL SUMMARY**

The total expenditure of State and Federal funds for the fiscal year 1967 - 68 is as follows:

PROGRAM	EXPENDITURE
State Purposes (100%), FY 1967 - 68	
Personal Service	\$ 115,235.00
Maintenance and Operation	35,597.00
Capital Construction Fund (100% State)	
Construction, Reconstruction and Improvements	500,000.00
Army National Guard Service Contract (25% State - 75% Federal) FY 1968	
Personal Service	59,121.00
Fringe Benefits	12,004.00
Maintenance and Operation	23,384.00
Army National Guard Annual Field Training Site Contract (100% Federal) FY 1968	\$ 127,777.00

EMERGENCY PLANNING OFFICE ORGANIZATION

INCLOSURE 19

* (- - -) Coordination, only

**EMERGENCY PLANNING OFFICE
EMERGENCY PLANS**

NEW YORK AREA COMMAND (NYACOM)

PURPOSE:

To provide Military Support to Civil Defense within the State of New York or contiguous states on order, in the event of a National Emergency involving conventional, Nuclear, Chemical or Biological weapons which require NYACOM to be activated.

MISSION:

Plan for, coordinate and control the employment of forces and resources of the Military services made available to provide temporary military assistance to civil authorities in a Civil Defense Emergency in the State of New York. Be prepared to execute independent actions when civil control is destroyed or inoperable; be prepared, on order to support civil defense emergency operations in adjacent states.

NEW YORK MILITARY EMERGENCY PLAN (NYMEP)

PURPOSE:

To provide for alert and mobilization of State Military Forces into active State or Federal Service.

MISSION:

Plan for the orderly alert and mobilization of all or part of the State Military Forces, coordinate and control the employment of forces and resources of the military made available to conduct domestic emergency relief operations or civil disturbance operations when requested by civil authority, when directed by higher headquarters, or when necessary to preserve order and protect lives and property.

ARMORY FALLOUT SHELTER UTILIZATION PLAN

PURPOSE:

The Armory Fallout Shelter Utilization Directive provides for the continuity of the State Military Forces during nuclear environment. All elements of the Division of Military and Naval Affairs are involved in the support of planning and execution of this program.

MISSION:

To provide individual fallout protection for personnel on the State Military Forces.

AID TO CIVIL AUTHORITIES - (OPERATION PLAN SKYHAWK)

PURPOSE:

To provide a plan for assistance to civil authorities in the event of civil disturbances and provide plans for rapid alert, mobilization and movement of troops to critical areas in order to control and prevent spread of disorders.

MISSION:

On order of the Governor of the State of New York, Military Forces of the State of New York will assist law enforcement agencies to maintain or restore law and order by rapid and positive action in the commitment of troops.

EQUIPMENT:

To provide mission capability, it was necessary to procure special "Riot Control" associated equipment over and above normal issued items. This equipment procurement was supported by both federal and state funds. A few examples of specialized equipment includes - special night lighting devices, special chemical items, and special purpose weapons. To enhance the communications capability, purchases of Single Side Band Radio Transceiver has been made and are presently incorporated in the State Administrative communications net. Single side band transceiver radios have been purchased with Federal funds amounting to approximately \$20,000.00.

Guidelines for special civil disturbance training, on a continuing basis, have been instituted with emphasis placed on special schooling for senior officers. In consonance with school training, the Department of the Army established a special one week course at the United States Army Military Police School, Ft. Gordon, Georgia. This school has been conducted concurrently on a weekly basis since 1 February 1968.

Attendees at the school represent the military, Federal, State and local law enforcement agencies throughout the United States for the purpose of learning ways and means of coping with civil disturbance problems. To date, a total of forty (40) military officer personnel of the Division of Military and Naval Affairs have attended this course and as quotas become available, participation in this program will continue.

COMPTROLLER

Budgetary funding for the NYARNG in FY 1967 was \$20,347,331. The FY 1968 funding was \$20,754,223. The Army National Guard drill payroll for FY 1968 was \$9,956,704.

During FY1968 there was an average of 1450 Federally paid technicians in the ARNG.

A total of 2,126 actions for supplies and services were prepared by this section for the total value of \$ 518,105.00.

Service contracts as follows and in the amounts indicated plus changes were prepared in part and issued:

Service Contracts (Air)	\$783,100.00
Army NG Svc Contracts (Various)	506,666.00
Army NG AFT Contracts (Various)	77,200.00

Construction contracts for various locations under both R&U program and AFT contract as follows:

25 each - money value	\$ 54,909.00
-----------------------	--------------

Contracts for other than constructions, such as laundry services, refuse removal etc., were prepared and issued as follows:

4 each	\$ 37,906.00
--------	--------------

Utilities contracts for Hercules Sites covering electric and water for which this office has administrative responsibility are as follows: (31 Dec 68)

Electricity 6 each	total money	\$110,364.00
Water 6 each	total money	4,509.00

Refuse contracts for Hercules Sites which had been consumated by this office to include administrative responsibilities are as follows:

5 each	total money value	\$ 7,547.00
--------	-------------------	-------------

Communications for all Federal telephone and TWX machines as follows: (31 Dec 68)

Telephones 34 each		
TWX Machines 2 each	total money	\$ 32,051.00
Switchboard 608A1 1 each		

INCLOSURE 24 (3)

A total of 161 medical and physical examination files were processed for this period for the total money value of \$13,093.00.

Charge accounts were prepared and issued to OMS in the amount of 196 each for a total money value of \$49,500.00.

Federal accounting is on a 1 July to 30 June Fiscal Year, therefore, statistics included below cover FY 1968.

Allotment of Federal Funds, totaling \$20,754,223 was received by this State from the National Guard Bureau during the Federal Fiscal Year 1968, of which \$20,701,390 was expended under the following projects.

UNITED STATES PROPERTY AND FISCAL OFFICE

STATE PROPERTY ACCOUNTING DATA

As of 31 December 1968, the following records were being maintained:

2,761 Active Stock Record Accountability Cards.

220 Memorandum Receipt Accounts. This includes 122 State Armory (SA) accounts and 98 State Guard (SG) accounts.

1,373 Cards in the Weapons Serial Number File.

621 Cards in the Typewriter Serial Number File.

3,399 Vouchers were processed during this period. Disposition of Unserviceable and Excess property during the period continued at a normal rate, indicating again, as in the previous period, that the State Quartermaster's policy for reducing the quantity of excess and obsolete property is a practical program and is achieving the desired results.

Regular and Special Inventories with Armory Custodians and State Guard Responsible Officers Amounted to 236 during 1968. Processing of these inventories required reconciliation with the records of the State Quartermaster and Adjustment of discrepancies, if any. A number of the Inspections and Surveying Officers reports accompanying the inventories required additional investigation, clarification or follow-up action.

Additionally, the Annual Droppage Allowance of \$25.00 authorized each Property Custodian for armories throughout the State for operational losses of minor non-expendable supplies amounted to \$1,133.90 in annual charges.

The redistribution and utilization of State property through publication of "Excess Serviceable Availability Listings" has proved quite successful. As a result of this activity, 145 line items (consisting of 2,079 individual articles) were reported as "excess - serviceable" during the current period. Of this total, 347 individual articles were laterally transferred to installations having a requirement for same.

MAN - HOURS UTILIZATION IN THE THREE PRODUCTIVE AREAS

JOBS COMPLETED IN THE THREE PRODUCTIVE AREAS

LOGISTICS SERVICES
NON-MILITARY USES OF ARMORIES

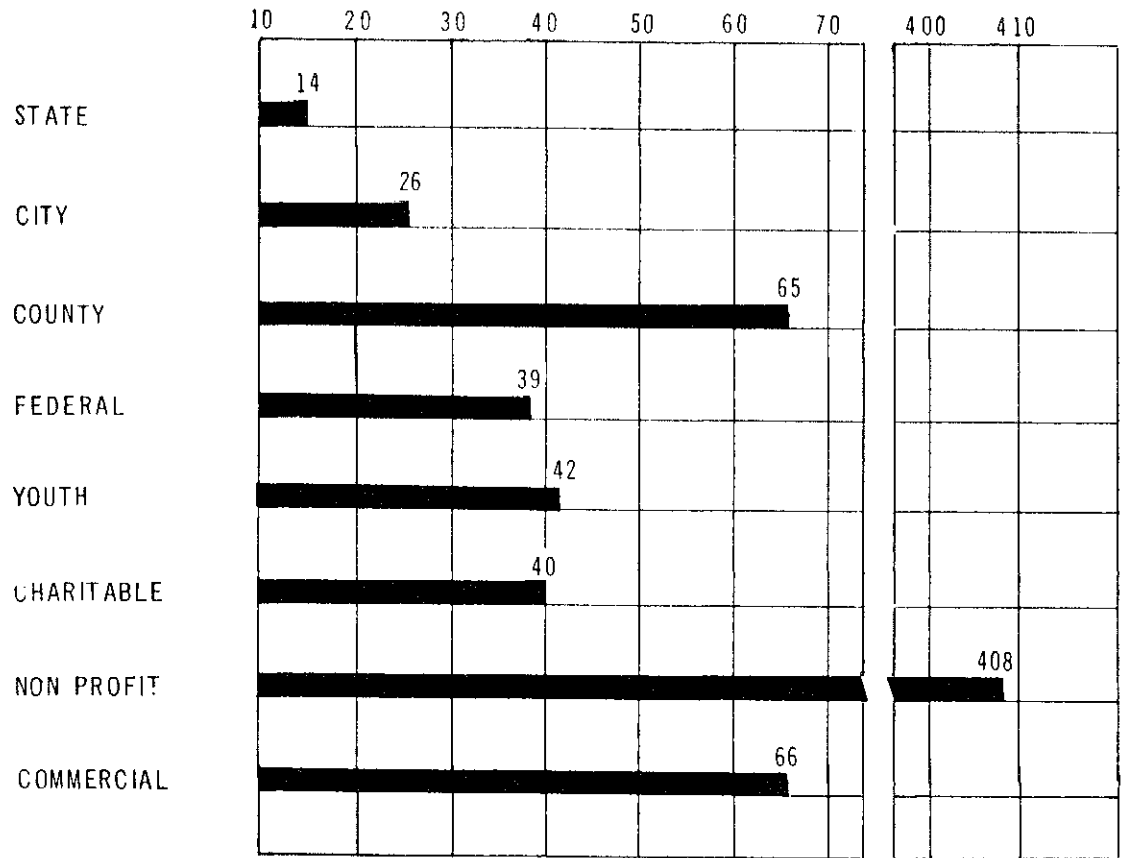

A total of 700 non-military use of armory Rental Agreements was received, processed and approved during the year involving some 89 installations.

Reports of Armory Rentals submitted by Officers in Charge and Control are screened quarterly in order to verify that all non-military uses of armories are covered by a formal agreement with applicable charges.

The Comprehensive General Liability Policy to protect the State of New York, in the amounts of \$ 1,000,000. for Public Liability and \$ 50,000. for Property Damage and Products Liability, purchased from the Travelers Insurance Company for all non-military use of armories and other facilities under the jurisdiction of this Division as renewed on a Fiscal Year basis (1 April - 31 March). The premium amounted to \$ 16,077., an increase of \$ 758. compared to last year's premium. This cost is recovered by charging the individual lessees a prorata share. Coverage does not relieve lessees from responsibility of providing in insurance for other protection, nor does it relieve them of the requirement to furnish a Surety Bond.

INCLOSURE 29 (1)

LOGISTICS SERVICES
NON MILITARY USES OF ARMORIES - 1968

LOGISTICS SERVICES STATE FLAG ISSUE

A total of 2,570 requests for various sized flags was received in 1968, from Federal agencies, other states, municipalities, organizations, and individual sources.

818 — Miniature New York Flags

1,705 — New York State and United States Flags (3' X 5' variety)

35 — New York State and/or United States Flags were issued on a loan basis.

12 — Requests were referred to the Office of General Services for appropriate action.

An increase of 778 requests for New York State Flags (3' X 5') over 1967, was due to the Division of Military and Naval Affairs policy of sending one free of charge, upon request from any member of the U.S. Military Forces serving outside the continental United States. Announcements in local newspapers and referral of constituents by legislators contributed to this increase.

It should be noted that purchase of flags for CY 68 exceeded CY 67 by 45%. Flags for CY 68 were purchased thru State Contract Award provided by Office of General Services at saving of 15% per flag.

REQUESTED

The Capital Outlay and the Rehabilitation and Improvements Programs submitted to the Division of the Budget for Fiscal Year 1969-1970 are as follows:

18 Capital Outlay Projects	\$ 2,730,000.
61 Rehabilitation and Improvement Projects	894,000.

Included in the Capital Outlay request is an item for continuation of the Camp Smith Modernization Program at \$1,890,000.

This consists of:

Officers Quarters-Mess Bldg.	\$ 153,000.
(This amount is to supplement the FY 68-69 allocation)	
Air Conditioning Basement Classrooms Bldgs No's 504 and 505	75,000.
Widening Main Entrance Road	200,000.
Enlisted Men's Service Building	1,000,000.
Modification to Existing Buildings	69,000.
Public Rest Facility	33,000.
Enlisted Men's Recreation Area and Grounds Improvement	360,000.
TOTAL	\$1,890,000.

In addition to the above, the sum of \$650,000. was again requested from the Civil Defense Commission to be used for the purpose of installation of emergency generators in 87 armories.

CURRENT

Funds made available by the Legislature in Fiscal Year 1968-1969 for Military Construction requirements are as follows:

Capital Outlay	\$ 1,376,000.
Rehabilitation and Improvements	760,000.
Camp Smith Modernization	500,000.
TOTAL	2,636,000.

During the year 1968, work continued on the Modernization of Camp Smith as follows:

Alterations to Buildings 501, 504, 505, 506 -- 100% Complete	\$ 36,526.
Superstructures 503 and 507 Dispensary -- 100% Complete	777,812.
TOTAL	\$ 814,338.

FACILITIES ENGINEERING CONSTRUCTION PROGRAM

STATE - FEDERAL

This program was suspended in December 1964, but the "freeze" was lifted and significant progress was made during the year in advancing the following projects:

321 Manor Road, Staten Island -- Conversion of Motor Vehicle Storage Building to 3 Organizational Maintenance Shops. Contracts were awarded for \$170,192. Construction is scheduled to be completed early in 1969.

321 Manor Road, Staten Island -- Alterations and Expansion of Existing Armory. Plans and specifications were approved by the National Guard Bureau and the project was advertised for bids in November, 1968. Bid opening is scheduled for January 1969, with completion of construction early in 1970.

125 West 14th Street, New York City - Construction of New Armory. Plans and specifications were completed and the project was advertised for bids in November 1968. Bid opening is scheduled for January 1969. Federal participation in this project had not been determined as of the end of 1968.

Annual Field Training equipment Pool, Camp Drum - Expansion of Maintenance Facilities. National Guard Bureau approved continuation of design. The project is included in the FY 69 MCARNG Program. It is expected that plans and specifications will be completed and construction work started in 1969.

Troy - Construction of Replacement Armory. This proposed project to replace the existing Troy and Cohoes Armories is included in the Federal FY 69 MCARNG Program at a Federal Share of \$399,000. Total estimated cost of the facility is \$2,500,000. Negotiations continued with Rensselaer Polytechnic Institute for the funds required to supplement the Federal Share, for which the school would receive the existing Troy Armory.

FEDERAL

ARMY NATIONAL GUARD FACILITIES

Support was authorized by the Federal Government during 1968, amounting to \$27,300. for minor projects at Organizational Maintenance Shops throughout the State.

NAVAL MILITIA FACILITIES

Small projects totaling \$71,548. were completed during the year at Oswego, Summerville, Yonkers, Troy and Brooklyn. The Navy hopes to construct new armories to replace the existing Naval Militia Armories at Staten Island and Brooklyn. The Staten Island Armory was approved as a Federal FY 1969 project. A site has been selected at Miller Field. The United States Navy will design and construct the facility. Funds have also been requested to construct a replacement facility at the 52d Street, Brooklyn site. Preliminary engineering studies are in progress for this project.
