ALBANY, NEW YORK 12226

NELSON A. ROCKEFELLER
GOVERNOR
COMMANDER-IN-CHIEF

MAJOR GENERAL A.C. O'HARA
CHIEF OF STAFF TO THE GOVERNOR

Honorable Nelson A. Rockefeller
Governor of the State of New York
Executive Chamber
State Capitol
Albany, New York

Dear Governor Rockefeller:

It is a privilege for me, as your Chief of Staff, to forward this Annual Report on the activities of the Division of Military and Naval Affairs for calendar year 1967.

It outlines the activities and accomplishments of your State Military Forces and clearly indicates their readiness for state and federal missions.

The truly dedicated efforts of many people have contributed to this status. I am proud of them and the fine reputation they have established as professionals in every sense of the word.

Respectfully,

A handwritten signature in cursive script, reading "A. C. O'Hara", with a long horizontal line extending to the right.

A. C. O'HARA
Major General, NYARNG

GOVERNOR NELSON A. ROCKEFELLER

COMMANDER-IN-CHIEF OF THE STATE MILITARY FORCE OF NEW YORK

MAJOR GENERAL A. C. O'HARA
Chief of Staff to the Governor
and
Commanding General
New York Army National Guard

BRIGADIER GENERAL J. C. BAKER
Vice Chief of Staff to the Governor
and
Deputy Commanding General
New York Army National Guard

Brigadier General J. E. Middlebrooks
The Adjutant General
of the State of New York
and
Executive Officer
Division of Military and Naval Affairs

MAJOR GENERAL L. A. CURTIS
Commander
New York Air National Guard

REAR ADMIRAL R. C. BURKE
Commander
New York Naval Militia

Major General A. J. Malatesta
Commanding General
New York Guard

CHAPTER I

THE DIVISION OF MILITARY AND NAVAL AFFAIRS

ORGANIZATION

GENERAL

The New York State Division of Military and Naval Affairs is responsible for the administration and supervision of the Organized Militia, the State Reserve List and the State Retired List, as well as all armories, arsenals, bases, camps, ranges and other Military Facilities of the State.

COMMAND

Governor Nelson A. Rockefeller was the Commander-in-Chief of the State Military Forces in 1967. Major General A. C. O'Hara, Chief of

Staff to the Governor, exercised control and directed the activities of the Division of Military and Naval Affairs and its components. He also served as Commanding General of the New York Army National Guard.

Brigadier General John C. Baker was Vice Chief of Staff to the Governor and Deputy Commanding General of the New York Army National Guard.

Brigadier General Joseph E. Middlebrooks was assigned The Adjutant General and Chief of Staff, New York Army National Guard, and appointed Executive Officer, Division of Military and Naval Affairs, effective 7 March 1967. He was promoted to Brigadier General on 23 June 1967.

MISSIONS

STATE

The Military Forces of the State of New York are available, on order of the Governor, for employment in local communities in the event of a disorder, disaster, or other emergency. Their state mission includes:

1. Defending the State of New York in the event of an attack.
2. Providing necessary personnel and equipment to support relief operations in the event of natural disasters and civil defense emergencies.
3. Assisting Civil Authority in maintaining law and order, controlling civil distur-

bances, and protecting life and property.

FEDERAL

In a national emergency, the federally recognized units of the State Military Forces are subject to mobilization by the President or the Congress of the United States, for active federal duty.

Their primary federal mission is to provide a trained reserve force, organized and equipped as designated by the Department of Defense and capable of participating effectively in combined military operations with the regular forces of the United States.

THE STATE MILITARY MUSEUM

The Chief of Staff to the Governor has jurisdiction over The State Military Museum located on the first and second floors of the State Capitol.

The Flag Room on the first floor has on display a collection of regimental colors from the Civil War, and other conflicts in which troops from the State have participated.

The display cases on the second floor contain weapons, military equipment and uniforms brought back by soldiers from New York

State who fought in the Civil War. Many brought back relics from Southern battlefields, while others contributed their own uniforms and equipment.

The Museum was started over one hundred years ago and the collection has grown until it is one of the largest of its kind in the country. Only a portion can be placed on display at any one time.

During the year 1967, 31 Civil War Colors were restored under our Civil War Restoration Program.

At the request of the State University, 18 of our Civil War Colors are on display in the Rotunda of the State University. 6 of our Civil War Colors are on display in the lobby of the Public Security Building at the State Campus. Also on display on the first floor of the Public Security Building at the State Campus is a collection of historical memorabilia from the Museum, properly encased. These displays are on

a rotation basis.

The national and regimental colors of the 11th Engineers were loaned to this World War I organization for their 50th anniversary celebration held in New York City in October.

Approximately 75,000 visitors were conducted on tours of the State Capitol during the past year, which includes a tour of the Museum.

CAMP SMITH

USE OF CAMP SMITH

The two new winterized barracks, completed last year, have afforded additional weekend periods when the Camp has been available to troops. Previously, the Camp was unable to open prior to 1 April and not able to accommodate troops after 31 October.

The New York State Matches were conducted at Camp Smith from 28 May to 2 June.

During periods when the facilities were not used by the troops, they were made available to the FBI and the New York State Police for the training of their respective agents and officers. In addition thereto, the FBI maintained schools of instruction for law enforcement officers from the States of New Jersey, Pennsylvania and other states throughout the New England area. It is expected the latter two agencies will continue their training and schools through November.

Additionally, the Camp furnished facilities for youth organizations and for overnight bivouacking of troops traveling to and from Camp Drum.

MODERNIZATION AND CONSTRUCTION

Camp Smith's new sewage disposal system,

the cost of which approximated \$250,000, was completed in July. The Camp, one of the first Hudson River Valley facilities to comply with the Governor's anti-pollution program, put its plant in operation on 24 July.

Work was completed this past August on the installation of new water lines in the vicinity of OMS "A" and Range #1. The cost of this project was \$64,000.

The foundations for the new 300-man barrack building and dispensary were completed. The contract for the construction of the upper structures of these two buildings has been awarded and it is anticipated the buildings will be ready for occupancy in time for the 1968 field training period.

Preliminary plans for the new officers quarters and mess, and for the rehabilitation of the Camp's narrow and steep entrance road are nearing completion. In addition, engineering studies are underway for the installation of a new water softening plant which will eliminate the problems in the new sophisticated cooking and heating equipment which resulted from the Camp's hard water.

A GIFT FOR THE GOVERNOR - - - from the MILITIAMEN drill team of Binghamton, is a rifle and bayonet used by the famed team in a performance on New York State Day at Expo 67 in, Montreal on 23 Aug 1967. Making the presentation to Governor Nelson A. Rockefeller is Capt George M. Borst, (center) commander of the unit.

NERVES OF STEEL - - - to match the blades of steel whirling by his head are demonstrated by Maj. Gen. A. C. O'Hara, Chief of Staff to the Governor, as he stands in the middle of New York's MILITIAMEN Drill Team at Expo 67 in Montreal. In a surprise move, the Team Commander had requested the General to stand in the center of the flashing bayonets.

CHAPTER II

THE DIVISION OF MILITARY AND NAVAL AFFAIRS AND HEADQUARTERS NEW YORK ARMY NATIONAL GUARD

Staff sections in the Division of Military and Naval Affairs office serve in a dual capacity commensurate with the dual role of the Chief of Staff to the Governor and Commanding General, New York Army National Guard. Staff

officers are responsible for coordinating activities of all components of the state military forces and for direct staff functions with relation to the Army National Guard, through the appropriate channels.

PERSONNEL AND ADMINISTRATION

The mission of this office includes the supervisory and administrative responsibility for all personnel actions applicable to the several components of the New York State Military Forces; the preparation and publication of all documents, both instructional, informational and directive in nature; the issuance, control and stocking processes for all state and federal

forms and publications; and the maintenance of personnel records and records systems for all officers, warrant officers and enlisted personnel of the State Military Forces.

Statistical information reflecting the activities of this office are outlined in the appropriate inclosures of this report.

OPERATIONS, TRAINING AND INTELLIGENCE

The mission of this office is to coordinate all operations, training activities and intelligence matters as they relate to the state military forces. It is responsible for staff supervision of units of the New York Army National Guard with regard to organization, operations, training, alert and mobilization, intelligence army aviation, communications and chemical, biological and radiological activities.

tional Guard troop structure had been accepted, in general, by the National Guard Bureau and by most state governors by the end of the year. Originally scheduled for implementation in the Fall of 1967, the resolution of minor objections and changes, will delay it until early 1968.

The announced objective of the Army's plan is to create a modern, up-to-date reserve force - manned, trained and equipped to carry out missions within a balanced force structure.

The Army National Guard will have a paid drill strength of 400,000 and will include 8 combat divisions and 18 combat brigades. It will also have the necessary service support units to provide essential maintenance.

In New York, the reorganization plan will mean deactivation of the famed 27th Division, a unit with a long and admirable heritage of service to state and nation. It will also result in loss of the XVII Corps Artillery Headquarters and one Brigade of the 42nd Infantry Division.

However, there will not be any reduction in personnel because of formation of other units not currently on the troop list and because all units will be at 90% or more of full strength. Currently many units are organized at only 50% strength.

REORGANIZATION

On 1 June 1967, the Department of Defense announced a realignment plan for the National Guard and Army Reserve. It was the culmination of a series of proposals, over a period of more than a year concerning a merger or reorganization of these components.

Division of Military and Naval Affairs staff officers had spent countless thousands of hours planning the myriad details of organization, stationing and equipping problems generated by these earlier plans, only to have them cancelled.

The new proposal, which will result in considerable changes in the New York Army Na-

CIVIL DISTURBANCE TRAINING

In June 1967 the Department of the Army issued a directive for immediate and expanded riot control training for the National Guard. This program included 32 hours of troop training and 16 hours of staff and command training. It was directed that this be given priority over all other training and mandated its completion by 30 September 1967.

The 42nd Infantry Division was directed to complete this training at Annual Field Training while accomplishing their other training requirements to the degree possible.

Units of the 27th Armored Division and XVII Corps Artillery completed the required training on consecutive weekends.

Since this was a crash program, inspired by serious rioting in Newark, New Jersey and Detroit, Michigan, it followed previous concepts, which have been found to be obsolete in many respects. New techniques are being developed and an acknowledgement on the part of the Federal government as to its responsibility in this type of disaster has resulted in increased logistic support and mutual planning processes.

The role of the National Guard in civil disturbance activities is expected to increase. It is anticipated that planning, training and operational exercises will place a considerable demand on available training time in the next few years.

ARMY SCHOOLS

The Army school system consists of all Army schools authorized by Headquarters, Department of the Army and provides the principal means for individual education and training for personnel. The Army school system is second in importance only to the troop units which are the fighting strength of the United States Army. It is the keystone of the Army's preparation for wartime duties and has assumed an increasingly important role in meeting the challenges posed by new concepts, missions and weapons.

The mission of the Army school system is to prepare selected individuals of all components of the Army to perform those duties which they may be called upon to carry out in war or in peace, to conduct research, to participate in the formulation of military doctrine, and to promote the highest standards of professional military competence. While it provides a balance between academics and leadership, the prime emphasis is on the art of military leadership. Its goal is to develop officers and enlisted men who

will be able to apply a sure knowledge of fundamentals to the complex situations of the future and who will demonstrate intelligence, versatility, imagination and initiative in their applications. These objectives are accomplished by a progressive system of branch and special schools and military colleges, together with troop duty assignments, on-the-job training, individual study, information programs, and precepts acquired from their commanders. A balance between methods is maintained to insure that school courses are not assigned objectives which can better be accomplished by the other means. Army colleges and schools conduct career development courses as well as specialist, mobilization, orientation and refresher courses.

School training for enlisted personnel is conducted on a requirement basis and in conformity with the personnel utilization envisaged by existing planning directives. The objectives of such training are to provide the skilled personnel required for operations of the Army in time of peace and to insure an adequate base for expansion in event of an emergency or war. Special emphasis is given to principles and aspects of leadership in school courses of instruction for actual or potential noncommissioned officers.

The policy of this headquarters is to encourage commanders at all levels to utilize resident instruction as the primary means of meeting the military educational and training requirements of their commands.

To insure adequacy of available funds, the following priority for attendance was announced:

Army Service Schools	
PRIORITY	TYPE OF INSTRUCTION
1	Attendance of second lieutenants at branch basic course within two years of date of commission.
2	All other career type courses.
3	Regular and Special Officer Candidate courses.
4	Requalification of personnel whose branch and/or MOS were changed as a result of reorganization. Includes any special courses as may be established by Chief, National Guard Bureau for qualification in the new branch/MOS.
5	Scarce and critical MOS courses with

CIVIL DISTURBANCE - - - training was intensified in the National Guard, as disorders disrupted major cities across the country. Extra hours were spent in perfecting techniques, to include actual exercises such as above at the Brooklyn Army Terminal with Guardsmen taking the role of rioters.

IT WAS SPRINGTIME - - - but the weather man ignored the calendar as the XVII Corps Artillery Headquarters encountered cold, snow, wind and sleet during its last Annual Field Training as a unit. These artillerymen await the order to load their 8-inch self-propelled howitzer during a live fire exercise at Camp Drum in May.

particular emphasis being given to those areas which cannot be trained at home station. This priority includes training of personnel occupying cadre positions designated on the unit Table of Organization and Equipment.

- 6 Other MOS and Prefix producing courses and qualification of Army National Guard technician personnel.
- 7 Refresher type training and non-MOS producing courses.

Army Area Schools and Air Defense Region Schools - Individuals may be authorized to participate in any course of instruction conducted and made available by the Army or Air Defense Region Commander provided such instruction will qualify the individuals for their present or planned military assignment or will increase the military proficiency of an individual's unit. Authorization for attendance will be subject to implementing instructions issued by this headquarters. Priority of use of funds will be given to attendance at NCO academies and the active duty phase of United States Army Reserve schools.

Attendance at Command and General Staff College Regular Course was exempted from priority assignment and nominations were based upon a combination of need and quota availability.

During calendar year 1967, in addition to service schools attended by personnel participating in the Reserve Enlisted Programs active duty training phase, 899 officers and enlisted men attended schools conducted by the active Army in a voluntary status. To support this activity, Federal funds in the amount of \$390,851 were expended for pay, allowances and travel for Army National Guard personnel.

EMPIRE STATE MILITARY ACADEMY

The Empire State Military Academy is charged with the responsibility of training officer and noncommissioned officer candidates. It is the greatest single medium of leadership training available to the New York Army National Guard. Graduates of the academy provide the National Guard with replacement officer and noncommissioned officer personnel necessary to carry out its mission. Since 1952 to date, The Empire State Military Academy has graduated 1911 lieutenants and over 2800 noncommissioned officer candidates.

The Program of Instruction for the officer candidate school is provided by the United States Army Infantry School, Fort Benning,

Georgia, and is augmented by our own additional requirements. Material provided includes instructor and student lesson guides, special text and examinations. Examinations are graded by the Infantry School.

The United States Military Academy furnished cadets who served as tactical officers for officer and noncommissioned officer candidates. These upper classmen of the United States Military Academy contribute greatly to the rounding out of the Empire State Military Academy students military education. In addition to tactical officers duties, they instruct in certain drill and command subjects. The opportunity of working with the staff and faculty of our school and being placed in certain operational positions of command is valuable experience for a cadet prior to his graduation and commissioning in the regular Army.

INTELLIGENCE AND SECURITY

The international and domestic situation during the past year has emphasized the need for ever increasing vigilance and proper actions at all levels of command in both intelligence and counterintelligence activity. Intelligence efforts of nations unfriendly to the United States are constantly directed toward the gaining of classified information of all types. In addition, recent violent civil disturbances in large metropolitan areas dictates that increased emphasis be placed upon prompt and adequate processing of domestic intelligence.

The proper handling and safeguarding of defense information is constantly stressed in both operations and training conducted within the New York Army National Guard. Orientation of troops, teaching of denial measures, and instruction in detection procedures are the tools in neutralizing efforts of a potential enemy in his quest for information. Classified information is handled only by persons who have been issued a security clearance.

Headquarters, New York Army National Guard, following guidance provided by the Department of the Army, issues direction on procedures, type training to be conducted, and provides the necessary supervision to effect proper handling and safeguarding of classified information, including the processing of security clearances for individuals.

Regulations in the field of communication security direct that detailed inspection of facilities be conducted by the Army Security Agency prior to permitting the establishment of cryptographic accounts and facilities. This

headquarters has issued necessary instructions to properly apply such control procedures.

ACTIVITIES

a. The promulgation, monitoring and updating of the New York Army National Guard Intelligence Directive (Pamphlet Number 381-1, Headquarters, New York Army National Guard) This directive is distributed to all company size units. The contents of the publication must reflect changes and conform to directives of Headquarters, First United States Army and the National Guard Bureau, as well as Department of the Army. Two major revisions were published during 1967.

b. Intelligence channels for exchange of information among this headquarters, major commands and non-divisional units were used during 1967 to clarify and interpret directives and provide assistance to organization intelligence officers.

c. Personnel security actions processed by the Administrative Services Section office of the Director of Personnel and Administration were coordinated to insure conformity with requirements for submission with directives of Headquarters, First US Army and those of this headquarters.

d. Security Control Officer duties during 1967 included briefing of all civilian employees of the division who hold clearances

for access to classified defense information. Close monitoring of the status of such clearances and compliance with safeguarding procedures of these personnel is accomplished.

e. Liaison with United States Army Intelligence Corps Command, New York State Police, the Federal Bureau of Investigation, and Deputy Chief of Staff, Intelligence, First United States Army.

f. Provided USP&FO-NY a recommended allocation of security filing cabinets obtained from surplus government sources for issue to New York Army National Guard units.

g. Performed the duties of Cryptosecurity Officer to insure compliance with directives regarding safeguarding of cryptomaterial prescribed in AR 380-40 and AR 380-41.

h. Presented formal security indoctrination to all assigned personnel of Headquarters and Headquarters Detachment New York Army National Guard, in accordance with AR 380-5.

i. Maintains a current file on all major command and non-divisional G2/S2's who are immediately subordinate to this headquarters.

j. Maintains current file on all crypto facilities and accounts held by organizations in the New York Army National Guard to include cryptosecurity officers, cryptocustodians and alternate cryptocustodians.

LOGISTICS

The logistics office supervises the operations of the various assigned sections. It provides guidance for all components of the state military forces and coordinates all activities in the field of materiel and services, to include cost and performance.

Statistical data and other information related to logistical activities may be found in the appropriate inclosures to this report.

CONSTRUCTION AND MAINTENANCE

This section plans and directs all construction, rehabilitation and maintenance programs for facilities under control of the Division of Military and Naval Affairs.

STATE - FEDERAL CONSTRUCTION PROGRAM

This program was suspended in December 1964 and funds are still being withheld by Federal authorities. Despite this, significant pro-

gress was made during the year in advancing the followings projects:

321 Manor Road, Staten Island - Conversion of Motor Vehicle Storage Building to 3 Organizational Maintenance Shops - Project request was submitted to the National Guard in January 1967 and was approved in June 1967. Plans and specifications were approved in August 1967. Advertising for bids is still deferred until the Federal Military Construction freeze is lifted.

321 Manor Road, Staten Island - Alterations and Expansion of existing armory. Project request was submitted to the National Guard Bureau in January 1967 and approved in October 1967. Plans and specifications have been submitted for approval. Federal funds have not been allocated.

125 W. 14th Street, New York City - Construction of New Armory. Project request was submitted to the National Guard Bureau in December 1967. Preparation of final plans and specifications has started.

FEDERAL CONSTRUCTION PROGRAM ARMY NATIONAL GUARD FACILITIES

Only minor maintenance support was authorized by the Federal Government during 1967, amounting to \$14,000, for minor projects at Organizational Maintenance Shops at Auburn, Lockport, Batavia, Oneida and Bronx (1122 Franklin Ave.), and at the Field Training Equipment Concentration Site, Camp Drum.

NAVAL MILITIA FACILITIES

Small projects totaling \$64,982 were completed during the year at Whitestone, Rochester and Buffalo..

The Navy hopes to construct new armories to replace the existing Naval militia Armories at Staten Island and Brooklyn. The Staten Island Armory was approved as a Federal FY 1968 project. A site has not been selected, but Miller Field and the State Armory, 321 Manor Road, Staten Island are being considered. Funds have also been requested to construct a replacement facility at the 52nd Street, Brooklyn, site. Preliminary engineering studies are in progress for this project.

AIR NATIONAL GUARD FACILITIES

See inclosures to this report for present (67/68) projects and future programs.

STATE FALLOUT SHELTER PROGRAM

The joint DMNA-CDC Fallout Shelter Program continued during the year as follows:

Albany, Washington Avenue (Complete)	\$110,000
Rochester Area	Engineering Study Phase

Work started on installation of Fallout Shelter Generators scheduled for 56 locations at a total cost of \$319,140. All work will be completed in 1968.

FACILITY DISPOSAL AND REPLACEMENT

Various institutions are seeking use of armory sites for their expansion programs. They have offered replacement facilities for the following armories:

Troy - Rensselaer Polytechnic Institute
New York City, 216 Fort Washington Avenue
- Columbia - Presbyterian Hospital.
New York City, 643 Park Avenue - (Drill Hall Only) Hunter College. No commitments have been made as yet.

Attempts have continued to obtain surplus

Federal Real Estate in the Metropolitan New York City Area for possible new armory construction, with no success to date.

Feasibility studies were initiated for the possible consolidation of aviation, armory and non-armory facilities of the various reserve components at Miller Field, Staten Island.

Information relative to NYARNG Aviation Facilities requirements was provided to the Metropolitan Commuter Transportation Authority for consideration of relocation from Zahns to Republic Airfield.

ARMY NATIONAL GUARD REORGANIZATION

Facility Inventory and Stationing Plans were prepared and approved for the reorganization scheduled to be implemented early in 1968.

ARMORY MANAGEMENT SECTION

During the year 1967, minor organizational changes were made in the Armory Management Section. The two State Inspection and Survey Officers were transferred from the Armory Management Section to the Comptroller's Section. To provide additional administrative support for the Armory Management Supervisor, a Principal Engineering Technician was assigned to the Section.

In addition to the overall supervision of maintenance and operation of the armories, the Section developed a five year projection of major projects required at each of the armories. This projection, accomplished in coordination with the Office of General Services, will serve as the basis for future armory budget requests and will be updated continually on a five year cycle.

Strong emphasis on better maintenance and management of the armories continues. The Armory Management Supervisor was designated a member of the Armory Superintendents Promotion Board, and in this capacity interviewed all applicants for the position of armory Superintendent wherever a vacancy occurred.

As in the past, one of the more important duties of the Section is to act as direct liaison between the Division of Military and Naval Affairs and the armories throughout the State. Continual announced and unannounced inspections by the Armory Management Supervisor serve the dual purpose of assisting the armory staffs in management, maintenance and personnel procedures and keeping the Chief of Staff to the Governor advised on the condition of the armories and the problems arising in them.

Future studies to be completed by the Armory Management Section include new equipment and communication requirements and an evaluation of all armories to determine those necessary for replacement, if consolidation in some areas can be accom-

GENERAL HAROLD K. JOHNSON - - Chief of Staff, U.S. Army visited the 42nd Infantry Division during its Annual Field Training at Camp Drum. His presence highlighted the 50th anniversary celebration of the famed Rainbow Division. Above, he stands with its commander, Maj. Gen. Martin H. Foery as the units pass in review. In a rare trip from Washington to a National Guard training site he acknowledged the professionalism of the Guardsmen and lauded their achievements. Speaking to the entire Division, he said: "I am especially happy to be able to pay tribute to a group of citizen-soldiers who devote so much of their time to preparing themselves to assist in preserving stability and restoring peace in this world."

plished and if, in the future, relocation or disposal of certain armories should be considered. This study, based on age, size and condition, troop housing and training capabilities, projected maintenance costs and geographic location in relation to the State mission of the Army National Guard is expected to take eighteen months to complete.

LOGISTICS ADMINISTRATIVE SECTION

This section is responsible for administration of armory rentals, purchasing for armory requirements, requests for state flags, state vehicles, blanket liability insurance for armories, issuance of credit cards, and preparation of cer-budget request.

ARMORY RENTALS

Information concerning rentals of armories for non military use is outlined in the inclosures to this report.

PURCHASING

This section is responsible for the processing of Purchase Orders initiated by facility superintendents for the procurement of supplies and or services required for the maintenance and operation of State armories. Approximately 6380 Purchase Orders were processed during the year. Awards, Requirements and Specifications issued by the Office of General Services are currently maintained on file and this section has the responsibility for distribution to all State facilities.

STATE FLAG ISSUE

The issue of various sized state flags, in response to requests, is detailed in the inclosures to this report.

STATE VEHICLES

Administration in connection with the operation of State trucks, sedans, vehicle insurance, pertinent correspondence, registration, gasoline, credit cards, Thruway plates etc. is also a function of this section. In addition, State Pool Car use is arranged for members of this Division when required.

STATE QUARTERMASTER

State accountable records of personal property assets of the Division of Military and Naval Affairs to include Armory, Facility and State Guard inventories, stock record and memorandum receipt accounts are currently posted.

Time and workloads precluded the accomplishment of several major projects it was anticipated would be initiated during the year. Deferred primarily because of the proposed reorganization of the Army National Guard was the revision of state directives relative to federal property responsibility and the establishment of a Table of Allowance for State Facilities. The Battalion Supply System as envisaged for the reorganization force created some gaps in the determination of property responsibility as relates to the Position Bond. This has now been resolved and upon reorganization will be embodied in the new state directive. The inspection of inactive records in the Records Retirement Center was suspended about September in order to commence preliminary work in conjunction with the deactivation of this activity and the transfer of all files to the Office of General Services Records Retirement Building at the State Campus, Albany. Further details in this connection will be noted in the report of the Administrative Branch. A considerable quantity of excess and unserviceable property still remains in facilities throughout the State, notwithstanding withdrawal and salvage activities during the year. Particular emphasis has deliberately not been given this program since almost all items are in use at armories and forced withdrawal based on a firm Table of Allowances would in turn create financing problems in the new Budget.

Effective April 1st, the Logistic Service Office at Albany was placed under the direction of the State Quartermaster. New procedures and forms were initiated in an endeavor to reduce and simplify administrative procedures in the preparation of annual budget requests for facility maintenance and operation. The Estimate Forms prepared at each facility were reduced from 16 submitted in duplicate to 1, submitted in original only - a net savings of 43.7% of effort, paper and postage charges.

The Furniture Repair Program originated in 1966 in conjunction with N.Y. State Vocational Institution at West Coxsackie for the repair of armory furniture was only successful to the degree utilized. One shipment was consigned, repaired and returned in a four (4) month period. Thereafter space and other factors apparently precluded the Institution from permitting more

of this type repair at cost.

To date 27 of the 41 typewriters authorized for replacement have been received.

New York Guard unit property accounting continues to be maintained at satisfactory levels. It is to be noted that property accounting procedures have materially improved throughout all units.

During the reportable year 278 Inventory Adjustment reports affecting the federal accounts of the USP&FO were approved. 225 of these IAR's pertained to the adjustment of accounts of various gasoline issue points throughout the state. Copies of the IAR's reflecting the differences resultant from annual or cyclic inventories are, in accordance with regulations, transmitted to the National Guard Bureau for information and file.

A total of \$8,625.00 was appropriated by the state for the maintenance and operation of the N.Y. State Arsenal in the state fiscal year 1967. Austerity measures continue to be maintained.

Service Contract funds (75% Federal - 25% State) for the facilities indicated below indicates an overall decrease in allocations as compared to the previous year.

	*ALLOTTED

* Federal Share

PROPERTY ACCOUNTING BRANCH

The Property Accounting Branch consists of Two (2) Sections: a Survey Section and a State Quartermaster Accounts Section.

The function of the Survey Section is to execute the Chief of Staff to the Governor's responsibility as the Appointing Authority in the Report of Survey system. The State Quartermaster Accounts Section has the responsibility of maintaining the State Quartermaster's accountable records and also the responsibility of accomplishing certain warehouse activities incident thereto.

The expanded training within the National Guard incident to the establishment of SRF Units, was again this period, as last period, reflected in the activities of the Survey Section by a slight increase in the number of Relief Vouchers received for processing. There was also increased activity in the State Quartermaster Section attributable to an accelerated

State Flag issue program, disposition and replacement of over age typewriters, and to the establishment of State Quartermaster accountability for State Armory Fallout Shelter supplies.

SURVEY SECTION

A Statistical Chart illustrating, by means of numerical quantities and monetary values, Relief Voucher activity with the New York National Guard for the current reportable period is an inclosure to this report.

As has been noted in previous reports, the State of New York is financially responsible for all Federal Property issued to the State in support of its National Guard. As an added protection in connection with this financial responsibility, the State bonds all responsible, (Property Book) Officers. Claims against this Position Bond are initiated in all instances in which Responsible Officers, (having no Federal pay due them), fail to effect settlement of their pecuniary liability within 90 days from the date of the initial request for payment. Two (2) such claims were filed during the period, the same number was filed last period. However, this period the total penalty was less -\$ 361.70 against \$595.13. One (1) claim in the amount of \$294.00 was settled by the bond carrier leaving one small claim of \$67.70 outstanding at the end of the period. Inasmuch as the latter claim is of recent activation, bond carrier settlement is proceeding normally.

Military Fund collections were up this period - two (2) totaling \$250.98, as against one (1) for \$37.95 last period. However, the rise in this category is not significant inasmuch as the greater part of this charge - 195.50, resulted from the State's assuming the pecuniary liability of one of its members.

The imposition of pecuniary liability as a result of report of survey procedure reached a new low when only 22 of a total of 140 reports receiving Final Action during the period, (approximately 15%), carried pecuniary charges. This compares favorably with last periods 21 of 117, or approximately 18%.

Appeals from pecuniary liability imposed by report of survey procedure reached an ultimate low with none being initiated during the period. This would indicate that the findings of the Reviewing Authorities have been equitable, justifiable - or that the individual who objected to the charges against them failed to contest the decision. One would hope that the former indication is the case.

Further, in the normal accomplishment of its mission, the Survey Section initiated 1,376 pieces of correspondence to units of the New York Army and Air National Guard, and to other

State, Federal, and civilian agencies.

In retrospect, the analysis of relief voucher activity, (Inclosure 23) supports the conclusion that proper care, control, and utilization of federal property throughout the Guard the past year was, for the most part, a realization. However, with the loss, damage or destruction of federal property not justified on 15% of the reports of survey submitted during the period, there is definitely room for improvement.

It is anticipated that there will be a material increase in the number of reports of survey initiated next year in conjunction with the reorganization of the Army National Guard. This is bound to be resultant from the many unit activations, deactivations, transfers of personnel and equipment and the turn-in of excess and unserviceable equipment.

In view of the limited number of advisors to act on Army Reports of Survey, the State Quartermaster in coordination with the Senior Army Advisor conducted a test procedure in an attempt to reduce the number of surveys that must be processed to the advisors throughout the State for survey action. The number that could be acted on at desk level by the Senior Army Advisor would reduce processing time and the field workload. A 90 day test period indicated that the number that could be acted on locally was a small percentage of the number in process and subsequently did not expedite or reduce the workload. Should reports of survey materially increase beyond the capabilities of limited number of Army Advisors to handle, action will be initiated to designate Army National Guard Officers as Survey Officers.

STATE QUARTERMASTER ACCOUNTS SECTION

Statistical data and other information reflecting the activities of this section are included in the inclosures to this report.

Regular and Special settlements with Armory Custodians and State Guard Responsible Officers amounted to 181, during the reportable period. Processing of these inventories required reconciliation with the records of the State Quartermaster and adjustment of discrepancies, if any. A number of the Inspection and Surveying Officer's reports accompanying the inventories required additional investigation, clarification or follow-up action.

Twelve (12) Reports of Survey covering State Quartermaster property, lost, damaged, destroyed, or otherwise unaccounted for, were received during the period. These reports have a total depreciated value of \$1,582.67 and are presently in the hands of State Surveying Offi-

cers for investigation and recommendation relative to pecuniary liability. The initial review by this office found a few incomplete for processing and these were returned to originating organizations for corrective action.

Additionally, the Annual Droppage Allowance of \$25.00 authorized each Property Custodian for armories throughout the State for operational losses of minor non-expendable supplies amounted to \$1,369.87. It is to be noted that the annual period for the droppage allowance is the calendar year - 1 January through 31 December.

Also, this activity has continued to generate a requirement for the distribution and utilization of State property through publication of "excess-serviceable" availability listing which is still successful. As a result of this activity, 175 line items (consisting of 1,238 individual articles) were reported as "excess-serviceable" during the current period. Of this total line items (consisting of 243 articles) were laterally transferred to installations having a requirement for same. The remaining items being excess to State requirements have been, or are in the process of being disposed of through the Office of General Services.

To accomplish its mission, the State Quartermaster Accounts Section issued a total of 2,854 pieces of correspondence to State armories, Federal and civilian agencies.

UNITED STATES PROPERTY AND FISCAL OFFICE

GENERAL

During 1967 the United States Property and Fiscal Office was authorized one hundred forty federally paid technicians.

The Annual General Inspection rating for the United States Property and Fiscal Office for Fiscal Year 1968 was Superior.

Planning has been initiated for logistical implementation of the Army National Guard realignment/reorganization.

AUTOMATIC DATA PROCESSING CENTER

In the past year the Automatic Data Processing Center has added the mechanization of payroll and Savings Bond procedures for all New York Army National Guard Technician Personnel, End of the Month personnel accounting and technician data files. Also, Budget and Fiscal Accounting has recently been fully mechanized. The new Automatic Data Processing logistical procedure was partially implemented during October. This system prescribes the use of pre-

punched "Request for Issue/Turn In" DA Forms 2765.

Other systems are to be fully mechanized in the near future. Some progress has been made in obtaining better Automatic Data Processing equipment and it is anticipated that the United States Property and Fiscal Office will be equipped with a computer system in late 1968.

AUDIT OFFICE

Pilot tests in upgrading and further development of Equipment Status Reports were performed for two (2) Nike-Hercules battalions.

The development of actions pertinent to the Office of the United States Property and Fiscal Office - New York, in connection with the forthcoming reorganization of the New York Army National Guard was achieved in a number of areas, i.e., units to be deactivated, units to receive a change in property responsibility and creation of Battalion Supply System type accounts. In addition, liaison has been established with the major commands in order to coordinate their actions with those of the United States Property and Fiscal Office-New York in regard to the "Reorganization Plan."

BUDGET AND FISCAL

Budgetary funding for the New York Army in Fiscal Year 1967 was \$20,347,331. The present Fiscal Year 1968 funding is \$18,946,783. The Army National Guard drill payroll for Fiscal Year 1967 was \$10,125,831.

During this period there were 1450 Federally paid technicians in the Army National Guard.

STATE MAINTENANCE OFFICE

The State Maintenance Office provides maintenance and supply support to 254 units/activities of the New York Army National Guard through three (3) Combined Support Maintenance Shops (CSMS) located in Brooklyn, Peekskill

and Rochester. Another activity, the Field Training Equipment Concentration Site, (FTECS) located at Camp Drum, provides support to the New York Army National Guard during two week training periods at this training site. The Field Training Equipment Concentration Site, also supports Army National Guard units from other States in the First U.S. Army area during their training periods at Camp Drum.

During the period the Combined Support Maintenance Shop's processed approximately 1,000 new 1/4 ton trucks for issue by the United States Property and Fiscal Office - New York. Various radio installations were also accomplished in these vehicles and this program is continuing on schedule.

Because of the impending reorganization of the New York Army-National Guard it was necessary to suspend Command Maintenance Management Inspections in December 1967. However, the man-hours thus saved were used to advantage in providing planning and technical assistance to units during the pre-reorganization period.

In addition to normal support to the Army National Guard the Field Training Equipment Concentration Site at Camp Drum provided support to elements of the 6th Armored Cavalry Regiment, U.S. Army at Camp Drum while training from 1 Sep 67 through 31 Dec 67. During this period approximately 100 combat vehicles were loaned to the 6th Armored Cavalry Regiment. The support (labor & repair parts) of this equipment was furnished under terms of an inter-service support agreement with the Commanding Officer, Camp Drum.

While manning tables for the various State Maintenance Office activities now authorize additional personnel, the funding support prohibits employment. Further, due to reorganization, new employment was frozen in November, 1967 and replacements could not be employed until after the re-organization. Needless to say, support maintenance production suffers accordingly.

FISCAL

GENERAL

The Fiscal Office is responsible for the budgeting, allocation, control, expenditure and accountability of State and Federal appropriated funds.

ARMORY INSPECTIONS

The following are the results of annual scheduled inspections of installations conducted

during the calendar year 1967:

	SUP	EXC	SAT	UNSAT
Air National Guard	3	3	-	-
Naval Militia	8	5	-	-
Army National Guard	46	31	7	2
TOTAL	57	39	7	2

In addition, limited inspections were conducted at eleven (11) miscellaneous installations not staffed by New York State maintenance employees, which were therefore not included in

A PRESIDENTIAL WREATH - - - is placed on the grave of Martin Van Buren, Eighth President of the United States, by Maj. Gen. A. C. O'Hara, Chief of Staff to the Governor. Assisting in the memorial are Mayor William Rothermel (right) of Kinderhook, where the cemetery is located and George Rockefeller (left) Commander of the American Legion Post. Gen. O'Hara did the honors for President Johnson in a program that provides for placing a wreath on the grave site of each former President on his birthdate.

PLENTY OF ACTION - - - highlighted the first Division of Military and Naval Affairs Statewide Basketball Tournament. After preliminary elimination contests among State Military Forces units, the four finalists met in Albany. The championship game was won by the Air National Guard's 274th Communications Squadron of Roslyn.

above statistics. Ratings based on State property records and use were as follows:

2 - Superior; 7 - Excellent; 1 - Satisfactory.

The format for preparing inspection reports was revised in April. The new format presents the results of inspections in concise and simple form, resulting in a considerable saving of time in preparation as well as reducing costs of paper and mailing. Elimination of lengthy forms containing predominately affirmative answers to stock questions will, hopefully, focus attention on deficiencies and result in corrective action. As of this date, insufficient opportunity to observe effects precludes positive assessment of benefits.

DATA PROCESSING

With the ever-increasing demands placed on this Division by the National Guard Bureau for special and recurring reports, and our desire to improve efficiency, a decision was made to explore the possibility of utilizing data processing equipment. It was determined that a majority of reports required in our Military Personnel Administration were adaptable to data processing. We are now in the process of converting our Military Personnel Records into an information system, using the data processing equipment presently available at the Office of General Services. The various reports generated from such a system would provide the forecasts necessary to accomplish prior planning and insure that field units accomplish timely and accurate actions. As a by-product, the system will generate various reports to the field units which will lift the burden of tedious clerical procedures from the field, giving the unit personnel an opportunity to handle the more important exceptions.

The services of a commercial data processing consultant were retained on 6 June 1967 to design and implement a pilot program to accomplish an indepth feasibility study. The project encompasses a preliminary study of the present manual methods of personnel information retrieval, the design and collection of personnel data and the programs to accomplish a file conversion and update.

On 20 July a Chief of Data Processing was appointed with the responsibility for the design and implementation of the pilot study and to act as liaison between the various sections of the Division and the field units in all matters pertaining to data processing.

The Data Processing Section launched the data collection phase of the pilot study during October. Fifteen units of the 42nd Division were selected as a base for the pilot study. The per-

sonnel data was collected and key punched for 2,300 officers and men. A position as key punch operator was filled and a machine rented for this purpose.

During the month of November, members of the Fiscal Section met in Washington with the National Guard Computer Task Force. The Division's data processing objectives were discussed in the light of the National Guard Bureau's planned and projected systems. Certain new data requirements were laid out so as to interface the Division's system with the planned Bureau system. Close liaison has been maintained with the Bureau so as to assure compatibility.

Upon completion of the study, the Division will be able to collect and store the various personnel data in our memory banks. At present, there are some 27 reports that can be generated from the Division memory banks without the necessity of going to the field. Many of these reports will be used to monitor present actions in order to insure prompt and accurate submissions from field units.

A data Processing Policy Committee was inaugurated in December to set up priorities and standards within the data processing effort. The Committee is composed of department heads of the Division.

RECORDS RETIREMENT TRANSFER

In an effort to improve our efficiency, the Division's storage requirements for inactive military personnel records was studied. Military law requires the State Adjutant General's Office to retain indefinitely all inactive military personnel records of the State Military Forces.

The records study indicated that it was feasible and economically wise to consider using the storage capabilities of the State records repository located at the State Campus in Albany.

A decision was reached in favor of utilizing the State repository and in October of 1967, work was initiated to transfer the 200,000 records from Brooklyn to Albany. Completion of this transfer was expected by 31 March 1968.

STATE QUARTERMASTER RELOCATION

A management study of the Division's organizational structure revealed that the centralization of the Division's various sections would improve efficiency and cut some personnel services cost. With this in mind, an indepth study was made on the State Quartermaster Section. The study recommended that consideration be given to transferring the State Quartermaster Section from Brooklyn to Albany. This move would entail relocating 13 individuals presently as-

signed to this section. This recommendation was approved and the completion of this move is scheduled for 1 April 1968.

RECLASSIFICATION OF CAMP SMITH POSITION TITLES

A study was conducted between our management personnel and the Division of Classification. This study was in line with our Camp Smith Modernization Program and was directed at developing the best possible organization with present manning authorization for Camp Smith to insure an effective maintenance system. The Division was desirous of reclassifying the post maintenance positions to titles and salary grades in the armory employee structure. This would eliminate another separate group of employees requiring separate rules and procedures, making it much more desirable from the standpoint of administration. Further, by changing titles to those of armory employees, considerable flexibility would be gained in the use of these employees due to the broad range of duties required to be performed by such armory employees. The study recommended reclassifying 26 positions.

The study was accepted by the Division and Classification and approved by the Division of Budget in April 1967.

TECHNICIAN PROGRAM

The Technician Personnel Office is responsible for the administration of the New York Army National Guard technician program to include funding, manpower allocation and all phases of personnel management.

On 1 January 1967, the New York Army National Guard employed a total of 1481 technicians with a total allotted funding for the federal Fiscal Year 1967 (1 July 1966 - 30 June 1967) of \$11,053,650. By 31 December 1967, total employment was down to 1442 technicians mainly because of a hiring 'freeze' imposed by the National Guard Bureau. Projected funding for Fiscal Year 1968 (1 July 1967 - 30 June 1968) remained stable at \$11,014,460 because of increased salary and Federal Insurance Contribution Act costs.

Chronology of actions affecting the technician Program:

January - The 'Technician Retirement Bill' is introduced as Title II, HR 2.

February - HR 2 is passed by the House of Representatives.

April - Wage Board increases (based upon wages paid similar skills in private industry) are authorized for some New York Army National Guard wage board localities.

May - National Guard Bureau holds a Technician Orientation Conference in Baltimore, Maryland for representatives of Army and Air technician personnel in the First United States Army area to acquaint them with the administrative requirements necessary to initiate and administer the technician program in accordance with the provisions of Title II, HR 2.

July - The remaining New York Army National Guard wage board localities receive Wage Board increases.

November - Senate Armed Services Committee withdraws Title II from HR 2 for further study.

December - National Guard Classified (NGC) technicians receive a 4.5% salary increase effective 17 December 1967.

National Guard Bureau upgraded six position categories involving 134 New York Army National Guard personnel and a total dollar salary increase in those categories amounting to \$76,499 per annum, or an average annual increase of \$570 for those involved. The upgraded positions were:

OCS Staff Assistant -	NGC 10 to NGC 12
Staff Adm Asst (Bh) -	NGC 8 to NGC 9
Sr Staff Adm Spec -	NGC 7 to NGC 8
Staff Adm Spec -	NGC 6 to NGC 7
Publication Sup Spec -	NGC 6 to NGC 7
Admin Spec (Air Def) -	NGC 6 to NGC 7

1967 was to be 'the year' for the long-awaited technician benefits bill; however, as mentioned above, the Senate Armed Services Committee withdrew Title II from HR 2 before passage in order to study the matter further. Early consideration of an alternate solution was promised for 1968.

LEGAL

The Legal Section is responsible for all legislation, legal activities and claims affecting

the State Military Forces. Legislative activities are outlined in the inclosure to this report.

NICE AND EASY - - cautions CWO John J. Price as he directs a portion of the second combined concert presented by the 199th Army, 42nd Infantry Division and 552nd Air Force Bands in New York City. Also conducting portions of the Army and Air Guard program were the 42nd's CWO Raoul F. Camus and the 552nd's CWO Joseph Losh.

RELOADING - - his M1 rifle, a Phase III officer candidate appears anxious to resume firing at an Aggressor position, as part of a tactical exercise over the rugged terrain of Camp Smith. The Empire State Military Academy provides separate but concurrent, summer programs for officer candidates and non-commissioned officers.

HOLD UP - - cautions a student squad leader as he suspects the presence of Aggressor troops during a tactical exercise of the Empire State Military Academy. Every technique, including the use of opposing forces is used to create realism for the officer candidates in the Academy.

STATE LEGISLATION

Chapter 307, Laws of 1967, amended Section 238 of the Military Law with relation to the unlawful wearing of uniforms, devices indicating rank, and using the name of a military or naval organization.

In addition to the above bill, the Chief of Staff to the Governor was requested by the Governor to comment on numerous other bills not necessarily related to State Military Activities.

The Chief of Staff to the Governor rendered advice on military matters to the Military Affairs Committee of the Assembly, the National Defense Committee of the Senate and other State Agencies.

FEDERAL LEGISLATION

The Reserve Forces Bill of Rights and Vitalization Act was composed of two parts. Title I dealt with Reserve reorganization; Title II with National Guard Technician retirement. The act was passed by the House in February 1967.

Title I was passed by the Senate in October 1967. Title II was not acted upon by the Senate, and is being held for further study during the second session of the 90th Congress.

LEGAL ASSISTANCE

The Legal Section assisted numerous mem-

bers of the State Military Forces in connection with problems arising out of training activities and third parties. This required appearances, consultations and conferences with other State and Federal agencies, local government and attorneys for private organizations and citizens.

The section provides judge advocate assistance to Active Army personnel assigned as advisors to New York Army National Guard Units. This is given without cost, as no Active Army Staff Judge Advocate is available in these areas.

CLAIMS

During 1967, under the provisions of Titles 32 and 38, a total of 268 Line of Duty Investigations were processed for injury and disease to National Guardsmen while engaged in training.

	Army NG	Air NG
Approved LOD	204	16
Disapproved LOD	13	3
Pending NGB	7	5
Pending from Units	<u>19</u>	<u>1</u>
Total	243	25

There were 69 motor vehicle accidents involving National Guard vehicles and third parties during 1967. Four of these claims are now in litigation in the Court of Claims.

There are presently twelve (12) disability pensioners on the rolls under the provisions of Section 217 of the Military Law. Two pensioners died in 1966.

MILITARY SUPPORT OF CIVIL DEFENSE

GENERAL

The Military Support Plan of Civil Defense was completed during the spring of 1967 by the Military Support Plans Section of the Division of Military and Naval Affairs. The plan was approved by First United States Army on 29 March 1967 with effective date of 1 September 1967 and distributed to all agencies concerned. The following information will clarify the relative positions of military and civil defense organizations in NEW YORK.

Army Regulation 500-70, dated 23 July 1965 entitled "Emergency Employment of Army Resources - Civil Defense" prescribes policies and responsibilities, and sets forth general guidance for providing military support to civil authorities during a national emergency. This directive established the mission set forth below and specifically charged each Adjutant General with operational responsibility in his respective State. The mission is stated in the

following manner:

"In the event of a national emergency involving a nuclear attack on the United States, the Armed Forces (active and reserve) will be prepared to employ all resources which are not engaged in or directly supporting offensive, defensive or self-survival operations to assist civil authorities to restore order and civil control and any other actions as directed to insure national survival."

In carrying out the above mission, the Chief of Staff to the Governor is responsible for developing plans which provide for full utilization of available military resources within the State. The Chief of Staff to the Governor will then coordinate such plans with civil defense and with the headquarters of the several military. Control and direction remain within military channels, and there will be no pre-planned attachments of military units to specific civil defense organizations.

FIRST UNITED STATES ARMY PLAN

Annex C (Civil Defense Support) to IA-CAP, First United States Army Military Assistance to Civil Authorities Plan, specifies military support as follows:

Military support to the civil defense program is an emergency mission of all active duty and reserve units of the military services and defense agencies. The availability of specific military forces for coordinated civil defense support operations will be determined following nuclear attack and will depend on their commitment to the following nuclear military operations: self-survival; assessment and reporting of residual capability; execution of required offensive or defensive combat operations; deployment; rehabilitation of essential military bases.

In the event of a nuclear attack, the Chief of Staff to the Governor and his staff will be mobilized with duty station in ALBANY, NEW YORK. The Chief of Staff to the Governor will be designated as New York Area Commander under the First United States Army and will exercise operational employment of all military resources in the State which have been made available to the military support mission.

The New York Area Command will accept requests for military support only from the State Civil Defense Commission when communications are effective. When the communications fail or are inoperative the local unit commander may respond to requests for assistance. Civil Defense authorities should not request assistance until all civilian resources and capabilities have been exhausted. Under this concept of operation, military support to civil defense can be provided in the most effective and efficient manner.

STAFF PLANNING

A special Military Support Planning Staff has been designated by Major General A. C. O'HARA under the direction of Colonel Frank R. Eyre for the purpose of all planning factors supporting this mission.

The staff planning group have been concerned with several projects related to the civil defense problem. They have at this time:

- (a) Prepared and published the Military Support of Civil Defense Plan (NYACOM).
- (b) Revised the civil defense portion of the New York Army National Guard training program so as to emphasize the mission of support to civil defense.
- (c) Coordinated the Military Support Plan with adjacent States.
- (d) Arranged for various officers and

non-commissioned officers to attend pertinent courses of instruction at the Civil Defense Staff College, BATTLE CREEK, MICHIGAN.

(e) Arranged for various officers to attend the Disaster - Recovery Course at FORT BELVOIR, VIRGINIA.

Military Support of Civil Defense is not a new concept, but the additional emphasis being placed on the activity is new. This concept of Military Support of Civil Defense as a priority mission for the State Headquarters of the New York Army National Guard and the National Guard of all states should be recognized as a major factor in the strategic policy of the Department of Defense.

ACTIVITIES

1. Participated in the following Civil defense Exercises:

- a. CDEX-66 28 November to 1 December 66
- b. Charlie 920 9 May 67

c. All members of the Military Support Plans Section participated in CD Exercises (CDEX-67). This headquarters had a total of eight (8) officers on a 24-hour operation throughout the exercise. In addition, two military liaison officers represented each district on a 24-hour basis. The New York Guard had a total of 29 officers participate in New York City and local CD offices.

2. Participated in the following emergency operations.

- a. Snow Emergency - New York City 7-10 February 1967.
- b. Fire Emergency - Yonkers, NY 27 February 1967.
- c. Fire Emergency - Olean, New York 14-15 March 1967.

3. Participated in the following conferences:

- a. Annual Civil Defense Directors Conference, Saratoga Springs, New York 17-20 October 1966.

b. Military Support Conference, First United States Army 28-30 March 1967.

c. Civil Defense Staff College Conference, West Point, New York 16-19 April 1967.

4. Completed the Army Survival Measures Program Survey of Armory Facilities and Alternate Assembly Area locations on 15 June 1967.

5. MSPO detailed to National Guard Bureau for a 30 day period, 13 February 67 to 12 March 67, as a member of a Military Support Study Group. The group was a follow-up on previous Adjutants General study making recommendations on the following:

- a. Post Mobilization duties and responsibilities - USP&FO.
- b. Relationship: Governor and Mobilized State Area Command.

c. Developing a TA and TD for HHD NYARNG and State Area Commands.

d. Technician Manning Criteria.

e. Training for State HHD, NYARNG.

6. In September, two mobile radio units were received and installed in Government sedans by communications personnel of HHD NYARNG.

CIVIL DEFENSE LIAISON

Via DMNA requests through NYS Civil Defense funding the Armory Fallout Shelter Program is just about complete - one(1) more remains to be constructed for a designated location in Rochester for \$250,000.

DMNA budgeting through Civil Defense will eventually have all key armories with generator capabilities in addition to each armory storing for local use mobile generators total expenditure \$875,000.

All State armories are equipped and furnished as FMS (Fixed Monitoring Stations for Radiological reporting). New York Guard assigned personnel have been and will be trained as Radiological Monitors.

Through funding by NYS Civil Defense, New York Guard Officers act as monitors and observers at all State - Local - Federal Civil Defense Training Exercises. In addition Civil Defense mutually sponsors Active Duty for Training, New York Guard, each year at Camp Smith, Peekskill.

New York State Armories will act as a warehouse for distribution of over 35,000 Radiological Dosimeters.

Civil Defense makes available surplus property items that could be utilized by State Military Forces. Through coordination with Local C.D. Directors NYS Armories have been furnished Federal Shelter Supplies.

A COMPOSITE COLOR GUARD - - - comprised of representatives from all components of the New York State Military Forces carried the National, State, Army, Marine, Navy and Air Force colors during ceremonies in front of the New York State Pavilion at Expo 67. Also participating was a combined Band of members from the 199th Army, 42nd Infantry Division and 552nd Air Force Bands - all National Guardsmen. The 102nd Military Police Bn of Utica, along with the Militiamen Drill Team, formed an honor guard as Governor Nelson A. Rockefeller visited the Pavilion on New York State Day.

CHAPTER III NEW YORK AIR NATIONAL GUARD

GENERAL

1967 was highlighted by the 20th Anniversary of the New York Air National Guard. A Military Ball was held on 29 April at the Biltmore Hotel, New York City in honor of this occasion. Various other functions were held by units of the Air National Guard throughout the State.

The Empire State's 48 Air National Guard units, commanded by Major General Lewis A. Curtis, are based in Brooklyn, Roslyn, White Plains, Syracuse, Schenectady and Niagara Falls. In addition to the Stratocruiser equipped airlift units, the Air organization includes two jet fighter groups, a highly skilled Tactical Control Group, Electronics and Communications units, and professionally staffed Aeromedical Evacuation units. Virtually all of these organizations carried out missions during 1967 in direct support

of the Air Force and Army operations.

Overall New York Military Airlift Command units carried approximately 12,699,103 ton miles of cargo and 9,211 passengers over some 28,668,370 miles during 1967, without being mobilized by the Air Force.

Brigadier General Michael C. Maione, Deputy Commander, New York Air National Guard, commanded the East Coast Tactical Air Force with headquarters at Otis Air Force Base, Massachusetts. This exercise "SENTRY POST I" was conducted during period 29 July to 26 August. Units from the United States Air Force, United States Army, Air and Army National Guard and Special Forces Units participated in this exercise.

PERSONNEL

The Commander of all New York Air National Guard units throughout the year was Major General Lewis A. Curtis. In addition, he continued to serve as Chairman of the United States Air Force Reserve Forces Policy Committee in Washington, D.C.

Several NYANG units were authorized increases in strength levels during the year in line with Air Force and National Guard Bureau efforts to maintain and improve their operational efficiency and readiness. In addition, all flying units continued their efforts to recruit pilots and other air crew personnel, particularly from among prior servicemen who already had been trained in the active forces.

The Governor's Trophy was awarded to the 109th Military Airlift Group, Schenectady, New York, as the best flying unit in the New York Air National Guard. The unit comprising 831 airmen and equipped with the C-97 Stratocruisers, is commanded by Colonel John C. Campbell, Jr.

The Commander's Trophy was awarded to the

102nd Military Airlift Squadron of Brooklyn, as the best all-around unit in the New York Air National Guard. The unit is commanded by Major John B. Conley.

Captain Charles M. Schwab was awarded the New York State Medal for Valor. Presentation was made by Brigadier General Michael C. Maione, Deputy Commander, New York Air National Guard. Captain Schwab chose to stay with his disabled F-86H Sabre Jet (in which he made a safe emergency landing) rather than bail out and thus averted a possible disaster in the heavily populated area over which he was flying.

1st Lt. Ernest L. Meyer, 109th Military Airlift Group, was selected for membership on the National Guard All-American Team. Ceremonies honoring the team members were held in Washington, D.C. This team was comprised of the most outstanding individuals in the Air National Guard nation-wide.

OPERATIONS

Global Airlift

The New York Air National Guard's major contribution to the nation's military and defense program during 1967 was the use of its four-engine C-97 Stratocruiser transport aircraft, to airlift priority cargo and personnel throughout the world.

The operations are supervised by New York's 106th Military Airlift Wing of Brooklyn, commanded by Brigadier General Raymond L. George, and the Wing's three operational groups: the 106th Military Airlift Group of Brooklyn, commanded by Colonel William Longa; the 105th Group of White Plains,

commanded by Colonel Paul F. Seifert; and the 109th Group of Schenectady, commanded by Colonel John C. Campbell, Jr.

During calendar year 1967, in addition to the Southeast Asia flights which continued throughout the year until September, the air transport groups flew missions to South America, Africa, Australia, Asia and Europe in support of the Military Airlift Command and the Joint Chiefs of Staff airlift (directed) missions. The overseas flights also are in addition to a variety of airlift missions flown within the

GENERAL GABRIEL DISOSWAY
- - - Commander Tactical Air Force Command, United States Air Force was a distinguished visitor to the Militia Association of New York Annual Conference in September. Maj. Gen. Lewis A. Curtis (left), Commanding General, New York Air National Guard introduced him to the assemblage.

A STEADY STREAM - - - of curious citizens filed through a C-97 transport of New York's 109th Military Airlift Group on display at Schenectady County Airport. The fourth of July open house was a big success as the unit allowed its neighbors to examine the huge cargo planes that fly continual global missions for the U.S. Air Force.

continental United States to include Alaska, Hawaii and Puerto Rico carrying personnel of the active military, Reserve and National Guard units to and from training sites and a continuing series of joint exercises.

In support of the Vietnam war since January 1966, the New York Air National Guard Military Airlift Groups flew 753 overseas trips of which 212 were to Southeast Asia carrying 43 million ton miles of cargo and 24 million passenger miles for a total 42 thousand flying hours.

Each of the New York Military Airlift Groups includes an aeromedical evacuation unit, comprising flight nurses and medical technicians trained in aerial transportation of military ill and wounded and their dependents on global missions. During 1967, New York medical personnel and aircraft were assigned to regularly scheduled aeromedical missions to Europe and Hawaii assisting the active Air Force with part of their workload.

All NYANG personnel performed routine training during the year at 48 weekend unit training assemblies (UTAs) and during 15 days of annual Field Training. Air Crew members such as pilots, navigators, flight engineers and loadmasters are authorized an additional 36 periods for flying training.

All Airlift Groups of the New York Air National Guard received NGB and MAC safety awards for an accident/incident free operation while maintaining a high state of readiness throughout calendar year 1967.

107th Tactical Fighter Group

The 107th Tactical Fighter Group of Niagara Falls is commanded by Colonel John E. Blewett and is equipped with F-100 "Super Sabre" fighter aircraft which is a single seat, day fighter, capable of delivering rockets, bombs, napalm and 20mm ammunition in various configurations, as well as having a nuclear weapons delivery capability. In 1967, the 107th Tactical Fighter Group was designated a "Combat Beef" unit and given additional training authorization one of which was year round training authority (Texas Plan) similar to our transport groups. The year-round field training produced highly favorable results and contributed to the high degree of operational readiness.

During calendar year 1967, elements of the 107th Tactical Fighter Group participated in Operation Sentry Post I from 29 July to 26 August. It provided realistic training for Air National Guard units in a tactical air environment and did much to improve the combat readiness of the Group. The Air Force Component Command Post (AFCCP) was established at Otis Air Force Base and executed the Command and Control of all participating elements. The exercise included planning deployment, Air Defense, air superiority, interdiction, closer air support, air assault, redeployment and evaluation and air refueling.

The operational readiness of the 107th Tactical Fighter Group, New York Air National Guard, Niagara Falls International Airport, was never more clearly demonstrated than when Tactical Air Command (TAC) selected the 107th to provide the air strike support for Exercise Gold Rush VI from 13 October to 22 October 1967.

The purpose of the exercise was to realistically execute the air support activities of the U.S. Army's overall Operation Big Bear II involving units of the 171st Infantry Brigade.

The 107th, commanded by Colonel John E. Blewett, deployed eight F-100 Super Sabre fighter bombers 3,000 miles non-stop to Elmendorf Air Force Base, Anchorage, Alaska. Elements of the 107th left Niagara Fall International Airport 13 October and returned 22 October. This operation tested the unit's capabilities during three separate mid-air refuelings which were provided by KC-97 tankers from the 126th Air Refueling Wing (ANG), O'Hare Field, Chicago. Colonel Blewett estimated that the flight took approximately eight hours.

Combat readiness was further tested when the unit participated in a joint live fire training exercise, 16 and 17 October, in support of Operation Big Bear II in the area of Fort Richardson and close support in the Nome, Alaska sector during the period of 18 through 20 October.

Airlift of the 100 support officers and airmen was executed by elements from Military Airlift Command, McChord Air Force Base and the 316th Air Lift Wing, Langley Air Force Base. Average flying time of the C-141 and C-130 transports was estimated between eight to ten hours.

Participation in Exercise Gold Rush VI afforded the 107th Tactical Fighter Group an excellent opportunity to again test its combat readiness under realistic and rugged conditions. Lengthy non-stop deployments and the use of live ordnance in close air support of infantry operations demonstrates the capabilities and the determination of the unit.

In addition to its fine flying record and maintaining a high state of readiness throughout calendar year 1967, the 107th Rifle Team again captured the major titles at the New York State Matches for the fifth consecutive time. Members of the team represented New York State in the National Rifle and Pistol Matches.

174th Tactical Fighter Group

The 174th Tactical Fighter Group of Syracuse is commanded by Colonel Curtis J. Irwin and is equipped with F86H "Sabrejet" fighter aircraft.

During calendar year 1967, the 174th Tactical Fighter Group participated in the following exercises: 28 January to 26 February training exercises were held at MacDill AFB, Florida.

From 18 thru 28 April, the Group participated in an all service amphibious and airborne exercise

A THIRSTY - - - F100C of the 107th Tactical Fighter Group, New York Air National Guard moves into position for refueling during a 3000 mile non-stop flight from the unit's Niagara Falls Base to Elmendorf Air Force Base, Anchorage, Alaska to participate in Exercise Gold Rush VI. The 107th pilots have flown their jets non-stop to a number of overseas bases in the past few years, without incident, to support military exercises.

LOADING UP - - - a 750 pound bomb and other ordnance is this ground crew of the 174th Tactical Fighter Group during Operation Clove Hitch III. The "Boys from Syracuse" participated in the multi-service exercise held in the Caribbean.

in the Caribbean at Ramey AFB, Puerto Rico. A 91 man detachment of unit pilots and support personnel participated (22 officers and 69 airmen). Twelve F86Hs participated with three C-130s for equipment and personnel. All types of tactical air missions were flown. Total sorties were 213 with total hours flown, 308. Special firepowers demonstration was accomplished with 20 sorties delivering 40 (750 lbs.) and 2000 rounds of 20mm fired.

Operation Sentry Post I was held from 31 thru 25 August 1967. This was Air National Guard - TAC Exercise. Twelve F86Hs were flown and our pilots worked with radar flying air-to-air and air-to-ground gunnery with and without FAC type missions. A total of 204 sorties and 245 hours were flown in this operation.

During the period 12 thru 28 November a Tactical Close Air Support was provided for the 9th Armored Division by the 174th. Sixteen officers and 31 airmen participated. Four F-86Hs were used. Our men worked with FAC dropping 24 (500 lb. snake-eyes) firing 168 (2.75 anti-tank) and 1200 rounds of 20mm. Total sorties were 12 and total hours flown were 16.

During CY 1967, the 174th received the NGB award in recognition of accident free operation while maintaining a high state of readiness, and on 28 October 1967 the 174th Tactical Fighter Group "The Boys From Syracuse" celebrated its twentieth anniversary.

152nd Tactical Control Group

The 152nd Tactical Control Group, Roslyn, L.I., is commanded by Colonel Bernard Saul and consists of a Headquarters, Direct Air Support Squadron, two Tactical Control Squadrons and four Tactical Control Flights. These units, located in six Eastern states ranging from Massachusetts to Ohio, are organizing into two Tactical Air Control Systems (TACS).

During this past year, units of the 152nd Tactical Control Group have participated in two exercises, Clove Hitch III and Sentry Post I. The former was a joint-Army-Air Force program conducted in Puerto Rico in June 1967. Personnel from three 152nd units were flown into the exercise area and participated in both the installation and operational phases. Personnel assigned to the Control and Reporting Center (CRC) were exposed to specialized activities such as Airborne Early Warning, Air Traffic Control in a battle area and operation of an Airborne Command Post. Personnel assigned to the Direct Air Support Center were integrated into the duty shifts and had the opportunity to work and observe.

1967 was highlighted by Sentry Post I, an all Air Guard Exercise conducted from 29 July to 26 August. The 152nd TACCONGP and the 253rd COMM Group were the two major elements in the exercise, being the key contributors in the planning stages and providing the largest numbers of person-

nel. Sentry Post I began with the formation of a "make-believe" tactical air force, staffed by officers representing the various units participating in the Exercise . . . communications, tactical air control air refueling, tactical fighter, air commando, photo renaissance. Most of the 152nd Headquarter officers wore two hats . . . as members of the Sentry Post I staff and as members of the participating 152nd. Headquarter personnel had the opportunity to train in staff positions, working with representatives of other units in planning, programming, coordinating, conducting and evaluating this exercise. For the first time in the 20-year history of the Air Guard, these citizen soldiers were tasked to create their own exercise, separate and apart from programs which are specifically designed by the Air Force and utilize, to a lesser degree, reserve forces. Sentry Post I enabled the 152nd to field a complete tactical air control system (TACS) stretching from Otis AFB, Massachusetts to Lake Ontario, controlling aircraft from Guard units as they participated in a variety of missions . . . air-to-air refueling, close air support combat air patrol, air-to-air gunnery, paratroops, photo recce. Since the exercise involved mythical opposing forces, it was possible to duplicate particular missions until the Exercise Commander was satisfied that all participants had successfully carried out their assignments. The training afforded controllers and comm personnel was excellent. Problems developed, were analyzed and overcome. Participants and advisors were impressed by the realism of the program and the capabilities of Air Guardsmen.

The 152nd TACCONGP and the other participants in this Exercise proved that a tactical air force could be created solely of Guard units and, tasked with a tactical problem, could cope with it in a professional manner.

Almost within the physical structure of the 152nd Tactical Control Group is the 106th Direct Air Support Squadron located at Roslyn, New York, and commanded by Major Michael M. Ciraco.

The primary function of the DAS Squadron is to provide a fast reaction capability to satisfy immediate requests from the ground forces for close air support, Tactical Air Reconnaissance, and that assault airlift effort which has been allocated to the DASC for use as required.

During Calendar Year 1967, the unit participated with the 152nd Tactical Control Group in CLOVE HITCH III and SENTRY POST I.

Also within the control of the 152nd Tactical Control Group is the 108th Tactical Control Squadron located at Syracuse, New York, and commanded by Lt. Colonel Robert A. Gaughn. The primary function of the 108th Tactical Control Squadron is to install, maintain and operate radar, communications and control facilities in support of tactical air operations. Provide administrative and operational control of a Tactical Air Control Center, a Control & Reporting

Center and radio relays. Under the control of the 152nd Tactical Control Group, the unit participated in Sentry Post I.

213th GEEIA Squadron

The 213th GEEIA Squadron (Ground Electronics Engineering Installations Agency) located at Roslyn, New York, is commanded by Lt. Colonel Frank R. Healey. It has a peace time mission to attain and maintain an optimum effective capability to install/rehabilitate general communications - electronics and meteorological facilities according to roles and tasks assigned in gaining command plans for utility in national emergency.

The mobilization mission of the GEEIA Squadron is as follows:

- a. Installation and installation testing of ground communications-electronics meteorological (C.E.M.) equipment.
- b. Repair, remove, and relocate ground (CEM) equipment on a programmed or emergency basis.
- c. Perform mobile depot level maintenance.

During 1967 the 213th GEEIA Squadron accomplished:

- a. Pressurization of the cable system at the Roslyn Air National Guard Station, Roslyn, N.Y. has been completed.
- b. Installation of a back-up underground cable system at Floyd Bennett Naval Air Station was accepted by the Base Comm. Officer.
- c. Depot level maintenance is being carried out in our Electronic Shop on Air Force Navigational Aid Components.
- d. Completion of the first Air Force floating coaxial cable at AVA site Griffiss AFB, Rome, N.Y.

The annual field training in the 213th GEEIA Squadron is patterned after our Air Force counterpart. Teams of specialists were sent out to various locations at different times under the supervision of team chiefs. The training sites were:

- McClellan AFB, California
- Griffiss AFB, New York
- Langley AFB, Virginia
- Andrews AFB, Maryland
- Roslyn ANG Station, New York

274th Communications Squadron

The 274th Communications Squadron located at Roslyn, Long Island, is commanded by Lt. Colonel William Sullivan.

The mission of the 274th Communications Squadron (TT) is to attain and maintain an optimum effective capability to install, operate and maintain Radio/Teletype Communications Tributary Terminals capable of being linked to a Radio Communications major relay center in support of United States Air Force operations as depicted by Head-

quarters AFCS through Headquarters New York Air National Guard and Headquarters 253rd Communications Group, Massachusetts Air National Guard.

Highlights of the operations and training year was the participation in Exercise "Sentry Post One" conducted at Otis AFB and Tributary team locations at Barnes ANG Base and Logan IAP, Massachusetts, Theodore F. Green MAP, Rhode Island, Camp Drum, Hancock Field, Syracuse, New York, Niagara Falls MAP and Atlantic City, New Jersey.

During period 12 through 26 August, unit participated in field training at the following locations:

Otis AFB, Massachusetts; Logan AFB, Massachusetts; Niagara Falls, New York; Syracuse, New York; Camp Drum, New York; Atlantic City, New Jersey; Hillsboro, Rhode Island.

201st Weather Flight

The 201st Weather Flight located at Zahn's Airport, Amityville, Long Island, is commanded by Lt. Colonel Ferdinand B. Lurken.

The mission of the 201st Weather Flight (SA) is to provide staff weather support to the 42nd Infantry (Rainbow) Division and aviation weather support to the 42nd Aviation Battalion. During 1967, monthly drills were held at Zahn's Airport, Amityville, which is the site of battalion flying operations. At AFT staff support was provided directly to G-2 while weather dissemination tailored their specific needs was given aviation, artillery and CBR.

Highlight of the 201st Weather Flight's Annual Field Training was the use of a mobile weather station during field training at Camp Drum, New York, while supporting unit of the 42nd Infantry Division with weather data.

552nd Air Force Band

The 552nd AF Band, located at Roslyn, New York, is commanded by CWO Joseph Losh. The Band's mission is to provide music at concerts, reviews, parades, retreats, formation and ceremonies for all units of the NYANG and the State of New York.

During 1967, the band provided music at the following military, state and civilian functions.

At Field Training, the following missions were accomplished: three Flight Line Honors Ceremonies; three Music Combo performances at Mess Hall; two Concerts at Otis AFB Open House; AFROTC Review; Dance Band Concert at NCO Club; Combined Band Concert with 88 Army Band at Diamond Hill, Rhode Island. This in addition to Unit Training.

9 April 1967 Combined Band Concert at Queens College with 199 Army Band and 42 Infantry Division Band.

29 April 1967 Review and Concert for 106th Military Airlift Wing at USNAS-NY Brooklyn, New York.

30 May 1967 Memorial Day Parade at Roslyn, New York.

4 June 1967 Parade in New Hyde Park, New

York.

22 July 1967 Band Concert for Town of Hempstead at Merrick Park, New York

22-23 August 1967 Two Concerts; Two Cere-

monies, and Parade at EXPO, Canada.

16 September 1967 Open House Review at Suffolk AFB, New York

CHRONOLOGY OF HIGHLIGHTS

January

107 Tactical Fighter Group at Niagara Falls deployed to Myrtle Beach, South Carolina for annual gunnery training for a period of one month.

Colonel Curtis J. Irwin, Commander, 174 Tactical Fighter Group represented the New York Air National Guard as an official escort of New York State Legislators at the Governor's Reception held in the Governor's Mansion.

105 Military Airlift Group passed their annual federal inspection conducted by 21st Air Force.

February

213 GEEIA Squadron participated in project "FAST RACE" assisting the United States Air Force in relocating communications equipment from France to other countries in Europe.

107 Tactical Fighter Group at Niagara Falls held their Military Ball in celebration of the 20th Anniversary of the New York Air National Guard.

March

The annual Military Ball was held by the 108 Tactical Control Squadron in Lakeland, New York.

The 4th annual New York Air National Guard bowling tournament was held in Garden City.

April

The New York Air National Guard observed the 20th Anniversary of its organization. Special parade and review was held at Floyd Bennett Field. A banquet was held at the Biltmore Hotel on 29 April highlighting this occasion.

109 Military Airlift Group was presented the Governor's Air Trophy by Major General A.C. O'Hara, Chief of Staff to the Governor at the New York Air National Guard 20th Anniversary Ball held at the Biltmore Hotel in New York City.

Lieutenant Ernest L. Meyer, 139 Military Airlift Squadron was selected as a member of the Army and Air National Guard all American Team.

The New York Air National Guard Commanders Trophy was presented to the 102 Military Airlift Squadron by Major General Lewis A. Curtis, Commander, New York Air National Guard.

May

New York Air National Guard units participated in the New York State Rifle and Pistol Matches at Camp Smith.

Units stationed at Roslyn Air National Guard Station participated in local Memorial Day Parade. Open house at Roslyn attracted over two thousand local citizens.

New York Air National Guard units participated in the Air National Guard bowling tournament at Hartford, Connecticut.

274 Communications Squadron won the 1st DM & NA basketball tournament.

213 GEEIA Squadron passed their annual federal inspection conducted by Headquarters GEEIA.

June

SSgt. Howard W. Connaughton Jr., was awarded the New York State Commendation Medal On 7 June 1967 for extinguishing a potentially dangerous fire.

139 Military Airlift Squadron won two "TIGER AWARD PAINTINGS" for expeditious off-loading of cargo in Southeast Asia.

109 Military Airlift Group pistol team won 52 individual awards against military and civilian pistol marksmen of New York and surrounding states.

Major James I. Meeker, a pilot with the 136 Tactical Fighter Squadron, was killed while attempting an ejection from his F-100C aircraft near Niagara Falls.

Colonel Curtis J. Irwin, Commander, 174 Tactical Fighter Group, attended a meeting with Onondaga City Office of Civil Defense for purpose of setting up medical supplies for emergencies that could arise due to increased air travel at Hancock Field.

July

TSgt. Kenneth Mullins, 213 GEEIA Squadron awarded the New York State Commendation Medal for extinguishing a potentially dangerous fire.

Major Charles Gilchrist, 274 Communications Squadron, appointed ISO and Protocol Officer to serve on East Coast Tactical Air Force Sentry Post I exercise commanded by Brigadier General Michael C. Maione.

Open house at Schenectady County Airport on 4 July. Attendance was a record crowd of thirty thousand people.

107 Tactical Fighter Group passed their annual federal inspection conducted by 9th Air Force.

A new unit insignia for the 174 Tactical Fighter Group was approved by the United States Air Force Heraldic Department.

August

213 GEEIA Squadron completed installation of under ground cable system at Floyd Bennett Field, Brooklyn.

Eight members of the 109 Military Airlift Group received the Military Airlift Command Flying Safety

LONG OVERDUE AND WELL DESERVED - - - recognition of its magnificent airlift support of the U.S. military commitment in Southeast Asia and around the world was finally accorded the Air National Guard and its volunteer flyers. At a ceremony in the Pentagon, representatives from 25 National Guard Squadrons were presented citations in appreciation of an outstanding effort. Among those in attendance were (left to right) Congressman Samuel Stratton, SSG Alexander Sheen, Congressman L. Mendel Rivers (Chairman of the House Armed Services Committee), LTC Philip E. Hosegood, and Maj. Alex Chyhai.

Award for 500 hours of accident free flying.

Former Air Force Advisor, 107 Tactical Fighter Group, Major George E. Day, was reported shot down and presumed captured during a mission in Vietnam.

September

106 Military Airlift Group passed their annual federal inspection on 21 September and the Operational Readiness Inspection on 23-24 September conducted by 21st Air Force.

102, 137 and 139 Military Airlift Squadrons received high honors at a Washington, D.C. ceremony for their magnificent support in Southeast Asia.

107 Tactical Fighter Group rifle team won the National Infantry Trophy Cup for the New York National Guard rifle team at the national rifle matches at Camp Perry, Ohio.

174 Tactical Fighter Group and the 108 Tactical Control Squadron passed their annual federal inspection conducted by 9th Air Force.

October

274 Communications Squadron passed their annual federal inspection conducted by the Eastern Communications Region.

An Air show was held at Schenectady County Airport on 29 October. Highlight of this event was the Canadian Red Nights.

107 Tactical Fighter Group participated in Operation "GOLD RUSH SIX" a joint Army/Air Force exercise at Elmendorf Air Force Base Anchorage, Alaska.

Representatives from each Air National Guard base and station attended a conference at the Air Force Accounting Center, Denver, Colorado for the purpose of a briefing on the new computerized pay system for the Air National Guard which will become effective 1 January 1968.

November

106 Military Airlift Group annual Military Ball was held on 10 November at the Baldwin. This was in honor of Colonel Eric A. Stuve, Commander, 106 Support Squadron, who will retire on 31 December 1967 after 33 years of conspicuous and faithful

service.

274 Communications Squadron 18th annual Military Ball was held on 2 November at the Baldwin.

Ssgt. Dominick A. Triolo was presented the New York State Commendation Medal by Major General Lewis A. Curtis, Commander New York Air National Guard.

201 Weather Flight passed their annual federal inspection conducted by Headquarters Air Weather Service.

108 Tactical Control Squadron Military Ball was held on 21 November celebrating the unit's 19th Anniversary of Federal Recognition.

105 Military Airlift Group passed their Operational Readiness Inspection which was conducted by the 21st Air Force.

174 Tactical Fighter Group at Syracuse donated items of need in form of ditty bags to the local chapter of the American Red Cross which were given to the wounded soldiers in Vietnam immediately upon arrival at a hospital.

December

106 Military Airlift Group at Floyd Bennett Field, Brooklyn acted as a host for a Christmas party in the Metropolitan area for handicapped children sponsored by the Community Mayors of New York State. More than two thousand children attended.

102 Military Airlift Squadron was awarded the Military Airlift Command Award for accident free flying during 1967.

152 Tactical Control Group, 106 Direct Air Support Squadron and 552 Air Force Band passed their annual federal inspection conducted by 9th Air Force.

The Nassau County Boy Scout Council presented a charter to Colonel Bernard Saul, OIC & C, Roslyn Air National Guard Station for a local Air National Guard sponsored troop.

Mr. Pete Williams, popular TV star from a Schenectady TV station, was featured at the annual children's Christmas party sponsored by the 109 Military Airlift Group at Schenectady.

SKILLED TECHNICIANS - - - are these New York Air Guardsmen of the 213th Ground Electronics Engineering Installation Agency Squadron of Roslyn, Long Island, A2C Aldridge and A2C Parness are assisting in the installation of a rigid coax cable for the Rome Air Development Center at Griffiss Air Force Base. Men from this unit also went to France to help NATO relocate communications equipment when the transfer was made to Belgium.

THE GOVERNOR'S AIR TROPHY - - - symbolizing the best in the New York Air National Guard, was presented by Maj. Gen. A. C. O'Hara, Chief of Staff to the Governor, (left) to Col. John C. Campbell Jr., 109th Military Airlift Group. The occasion was a military ball at the Biltmore Hotel in New York City commemorating the Air Guard's 20th Anniversary.

CHAPTER IV

NEW YORK NAVAL MILITIA

MISSION

The Naval Militia as the Naval component of the State Military Forces has a two fold mission. The State mission is to provide a disciplined body of naval troops available to the Governor, to defend the State in the event of attack, assist competent local authority in the preservation of local process, and support recovery operations in the event of

natural disaster or civil defense emergency. The Federal mission is to provide trained units and qualified personnel to be available for active duty in the US Navy and US Marine Corps in time of war or national emergency, and at such other times as the national security may require.

ORGANIZATION

The Naval Militia is composed of Naval and Marine Corps units, numbering approximately 5600 officers and men, located throughout the State, on or near all major waterways.

The Naval component trains as ships crews, in the Destroyer Escort and Fleet Division programs, and as individuals in the Surface program. The basic objective of each of these programs is to train and qualify men to augment fleet or shore installations of the Navy.

The acquired skills necessary to operate a

vessel of the Navy, which is a self-supporting entity, are those which are most suited to the restoration of vital utilities and services, which might be disrupted as the result of natural disasters.

The Marine Corps branch conducts unit training, exclusively. All Marine Corps units are part of the 4th Marine Division or its supporting elements. One half of the Marine Corps personnel are schooled and qualified as communicators, while the balance are trained in the infantry skills.

PERSONNEL AND ADMINISTRATION

Personnel

All officers of the Naval Militia serve a minimum of three years on active duty with the US Navy or the Marine Corps. Navy enlisted men each serve two years on active duty, training in a specific rate or specialty, while the Marine enlisted men serve from six months to a year depending upon their field and the needs of their organizations. Upon release from active duty the Sailors and Marines rejoin the units from which they left, and complete their six year military obligation as reservists/militia men.

The tours of duty for Commanding Officers in both Navy and Marine Corps units are limited to two years, in order to provide more officers with the opportunity for command.

While this policy results in a significant number of command changes each year it ensures the best

qualified officers a path to the top.

Administration:

The electronic data processing system, a major tool in the Naval Militia personnel management program, has been further refined to provide a complete historical record for each separated militiaman, with no increased input of information. This added function has materially reduced required record keeping and research.

Management seminars for Officers-in-Charge and Control, Commanding Officers and armory Superintendents were conducted in Rochester and New York City. These seminars provided an excellent vehicle to both disseminate information and guidance, and to gather material for inclusion in the Planning, programming and Budget System submission.

OPERATIONS AND TRAINING

Operations:

The understanding and active support of the business community are necessary prerequisites for the militiaman to fulfill his military obligation without undue personal hardships.

Toward this end a community relations program was begun in 1967, which established a Civilian Advisory Board, at each installation, composed of leaders from industry, labor, local government, church groups, and the press. Through the vehicle of these boards, the local communities are being

appraised of the mission, the training, and the activities of the unit and the requirements placed on the individual. Based on this understanding the cooperation of employers will be sought to enable the militiaman to perform his duty in the most expeditious manner.

To inaugurate the program, the Commander attended a formal meeting of each board in the Northern Area and delivered key-note addresses. Similar plans are scheduled for the Southern Area.

ONE MORE TIME - - - is the consensus of opinion as these men of the New York Naval Militia raise their right hands again to add still more time to the total of 110 years of dedicated service they represent. Cmdr. Bud Holman (left) does the honors for (left to right) Master Chief John J. Daly, Sr. Chief James M. Olsen, Chief Albert E. Ageno and Chief Erwin L. Baker. They are all members of Naval Reserve Surface Division 3-53 in Brooklyn.

HITTING THE DECK - - - and taking the enemy under fire are 2 Leathernecks from New York as they participate in training exercises, using U. S. Marines helicopters, at Little Creek, Virginia. The men are members of 2nd Bn, 25th Marines USMCR/NYNM stationed in Garden City, Long Island.

Surface Program

Within this program the stress is placed on individual effort. The training cycle for each unit is fashioned to provide in-depth instruction and practical application in a number of basic and advanced naval specialties (machinest mates, electricians, radar technicians, etc.). Two weeks annual training duty is also scheduled individually at a specific navy school or at on-the-job training in the man's mobilization billet.

Destroyer and Fleet Division Program

The ships of the Destroyer Division continue to be the hard core of the Naval Reserve. These ships, which go to sea one weekend each month, are ready for immediate deployment with the active forces. They maintain stocks of food, fuel, and ammunition, and the assigned Reserve/Militia crews are fully capable of performing their assigned missions.

These units perform two weeks training duty

each year, as ships crews, with elements of the Fleet.

Marine Corps Branch

The objective of each unit of the Marine Corps Branch is to create a "mirror-image" of its counterpart on active duty in both organization and tactical capabilities.

In view of the present type of employment of Marine Corps Forces in the Republic of Vietnam, great emphasis is being placed on Air-Ground, and counter-guerilla training. Elements of the Fourth Marine Air Wing have joined with our infantry and communications battalions twice in the past year for combined exercises at West Point and Camp Lejeune, North Carolina.

The combat readiness of the Fourth Marine Division, of which our units are a part, is considered by the Department of Defense to be at the highest point in history.

LOGISTICS

The weapons, vessels and training equipment utilized by the Naval Militia, are supplied and maintained at 100% Federal cost. The cost of maintaining

and operating the Naval Militia Armories is shared equally by the State and Navy under existing lease arrangements.

FISCAL

The Department of the Navy annually appropriates in excess of 5 million dollars to support the training activities of the New York Naval Militia. These funds are exclusive of the annual rentals paid

to the New York State Treasury, or the repairs and rehabilitations performed on State owned buildings which are outlined in the logistic enclosures to this report.

A TASTE OF NAVY - - - life at sea was experienced by MG A. C. O'Hara and MG Lewis A. Curtis, along with several of their staff officers, when they joined the crew of the USS John R. Pierce for a training cruise on the Atlantic Ocean. RADM Robert G. Burke (left) was host for the day of briefings and inspections on the Naval Militia Destroyer. Others in the photo are Capt George Scaboo (rear) and (left to right) Capt Joseph Farley, Capt Robert Larsen, Col Paul Hughes and Col Stanley Whelan.

CHAPTER V

NEW YORK GUARD

MISSION

Subject to orders of the Governor, thru his Chief of Staff, the New York Guard will be prepared to:

1. Provide logistical coordination between the New York Army National Guard and the New York Civil Defense Commission, during Post Attack Phase.

2. Replace the New York Army National Guard when it is called into Federal service and is no longer available for State service.

3. Provide military assistance to the New York State Civil Defense Commission.

4. Furnish aid to Civil authorities in the event of disaster, emergency or domestic disturbance.

5. Render support to Sister States who are signatories to the Interstate Compact of Mutual Military Aid and Assistance.

ORGANIZATION

A New York Guard unit is located within each New York Army National Guard Armory in New York State. In event of activation and removal of National Guard units from the State of New York, the commanding officer of a New York Guard unit or units affected will then assume the responsibilities of the former National Guard Commander as pertinent to the Armory involved.

The New York Guard currently organized in cadre form, is composed of: Headquarters New York Guard; Six (6) Area Commands; Nineteen (19) Internal Security Battalion; Seventy-one (71) Internal Security Companies; for a total of ninety seven (97) units.

The 50th Anniversary of the New York Guard was noted 3 August 1967. On 3 August 1917, General Orders Number 37 was issued by the Adjutant General's Office which created the New York Guard, on the eve of America's entrance into WW I.

TRAINING

Increased enrollment in the New York Guard

Subcourse Program, now reflects a figure of five hundred fifty-four (554) officers and enlisted men. This membership represents not only a great interest in qualifying for promotion but also in acquiring greater personal knowledge in the military.

Sixteen (16) New York Guardsmen participated in the New York State Rifle and Pistol Matches, 28 May - 2 June 1967. The six (6) man teams did best in the matches placing 3rd in the O'Toole Memorial, 2nd in the National Guard and 3rd in the State Match.

Five hundred and thirty officers and enlisted men of the New York Guard participated in the Annual Tour for Active Duty for Training 16-17 September 1967 at Camp Smith, Peekskill, New York.

a. Personnel received instruction in the following areas:

- (1) Vital Installation Security
- (2) Liaison Officer Duties
- (3) Shelter Management
- (4) Use of Shotgun-Riot Control
- (5) Refugee Control
- (6) Fixed Monitoring Stations

b. The NYS CD Commission conducted a two hour conference during which the following was discussed.

- (1) LT GEN. M. J. ASENSIO
Relationship of NYG Liaison Officers and the CD, CD exercises and a variation of pertinent subjects.
- (2) MR. IRVING M. MILLET
Manpower reports, requests and processing.
- (3) MR. WILLIAM F. TROLENBERG
RADFF referenced to FMS, kits, logistical support and operation re monitoring.

CIVIL DEFENSE ACTIVITIES

Sixth Statewide Conference, Local CD Radiological Section Chiefs, Syracuse, N.Y.,

CONGRATULATIONS - - with pleasure, are extended by Maj. Gen. Andrew J. Malatesta (right), Commanding General, New York Guard to Brig. Gen. John R. Brown of the Sixth Area Command as Brig. Gen. Mortimer J. O'Kane, Deputy Commanding General looks on. Gen. Brown's Command was awarded the Maj. Gen. W. Reynolds Carr Trophy as the most outstanding during field training activities at Camp Smith.

A COUNTY FAIR - - system of instruction was utilized by the New York Guard during its field training week end at Camp Smith. Each Area Command was responsible for conducting a class on one of the subjects prescribed. The subjects included radiological monitoring, fallout shelter management, security of vital installations and refugee control.

18-20 January 1967. A conference for Section Chiefs to promote Technically Proficient Radiological Sections. Three (3) NYG Officers attended to further their own knowledge and coordination with the Civil Defense.

NYS Civil Defense Course conducted at Niagara Falls was attended by eight (8) NYG Officers. This was a nine (9) hour course conducted for the Sheriff's Dept., local police and military personnel of the Regular Army and the National Guard.

Radiological Monitoring Instruction conducted at the Newburgh Armory was attended by twenty-four (24) officers and enlisted men 17-24 June 1967.

Members of the New York Guard have participated as observers, instructors and as active participants in Hospital Training Exercises with the Civil Air Patrol and in the presentation

of Shelter Management and First Aid Courses.

Exercise CDEX-67, 27-29 October - Twenty eight (28) qualified officers and non-commissioned officers of the New York Guard participated, performing duties as requested by the NYSCD Commission.

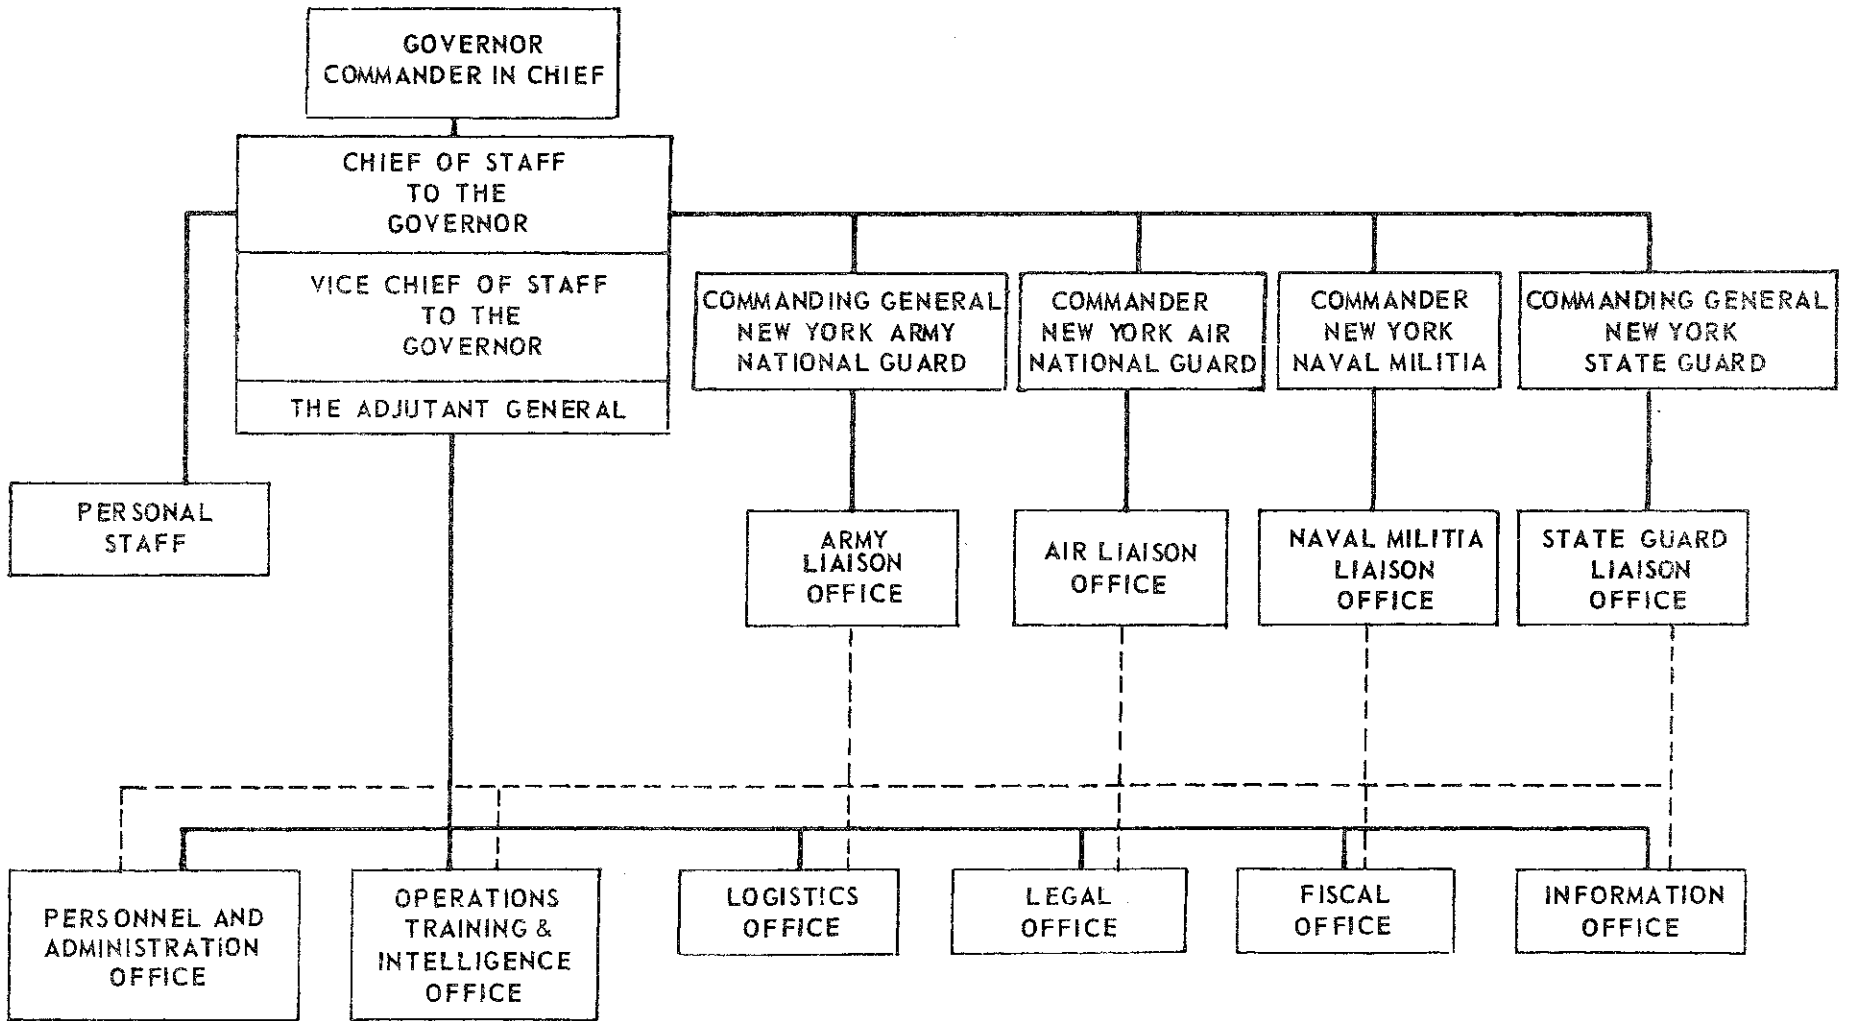

Courses conducted by the New York University, NYC were attended by some individual members of the New York Guard as indicated below.

- a. Radiological Monitoring Instructor Course - 2
- b. Radiological Defense Officer Instructor Course - 1
- c. Shelter Manager Instructor Course - 1.

SCHENECTADY:	Dispensary Rehabilitation, Parking Lot Paved, Exterior Painting, POL Construction, Hanger Roof Insulation Repair.	\$ 39,340.00
NIAGARA FALLS:	Refueling Vehicle Parking Apron, Alterations, Group Hq Bldg., Vehicle Parking Area, Miscellaneous Projects.	23,775.00
SYRACUSE:	Segregated Ammo Storage Bldg., Painting and Repair of Buildings, Heat Recirculators, Aircraft Hangar.	49,400.00
WESTCHESTER:	Hangar Roof Repair, Warehouse Door Replacement, Dinning Hall Grease Trap, Alteration Base Supply Offices	33,935.00
BROOKLYN:	Re - Roofing of Buildings, Heating Boilers, Pointing and Waterproofing of Buildings, Vehicle Parking Area, Administration Building Modifications, Correction of Maintenance Dock Deficiencies.	213,100.00
ROSLYN:	Rifle Range, Security Fencing, Hq. Building Rehabilitation, Septic System Repair.	<u>23,900.00</u>
	TOTAL	\$ 383,450.00

NOTE: Figures are for Federal Fiscal Year, 1 July 67 - 30 June 68

ARMORY RENTALS

A total of 801 non-military use of armory Rental Agreements was received, processed and approved during the year involving 89 installations. This represents an increase of 4 over calendar year 1966.

The Standard Rental Rate Schedule has proven there will be no conflict with commercial enterprise.

Reports of Armory Rentals submitted by Officers in Charge and Control are screened Quarterly.

The comprehensive general liability policy to protect the State of New York, in the amounts of \$100,000,000 for Public Liability and \$50,000 for Property Damage and Products Liability, purchased from the Traveler's Insurance Company for all non-military use of the armories and other facilities under the jurisdiction of this Division, was renewed and placed on a State Fiscal Year basis (1 April - 31 March).

The premium amounted to \$15,314.00 a reduction in cost of \$1,143.00 compared to last year's premium.

This cost is recovered by charging the individual lessees a pro-rata share. Coverage does not relieve lessees from the responsibility of providing insurance for other protection, nor does it relieve them of the requirement to furnish a Surety Bond.

STATE FLAG ISSUE

A total of 1038 requests for various sized flags was received in 1967, from Federal agencies, other states, municipalities, organizations and individual sources.

101 - Miniature New York Flags.

927 - New York State Flags (3' X 5' variety).

10 - New York State and/or United States
Flags were issued on a loan basis.

The increase of 500 requests for New York State Flags (3' X 5'), as compared to 1966, is attributable to the Division of Military and Naval Affairs policy of issuing these flags gratuitously on request of New York State residents serving in the Armed Forces in Vietnam.

STATE QUARTERMASTER FUNDING

Funds appropriated by the State for the maintenance and operation of the New York State Arsenal, exclusive of personal services for the State fiscal year 1967, totaled \$ 8,625.00, as compared to 9,725.00 for the preceding year. The increase can be attributable to increased unit costs.

Service contract funds (75% Federal - 25% State) for the maintenance and operation of facilities listed below, administered by the Officer in Charge and Control, New York State Arsenal, were allotted and obligated for the Federal Fiscal year 1967-68 as indicated:

	* ALLOTTED
New York State Arsenal, Brooklyn, New York	\$ 73,515.00
CFM Shop B, New York State Arsenal, Brooklyn, New York	9,208.00
USP&FO Sub-Warehouse, Rochester, New York	43,721.00

* Federal Share Only.

() This information extracted from USP&FO - NY records for evaluation purpose only.

INCLOSURE
23(1)

As customary, this tabulation includes similar data brought forward from the previous report, making possible through a comparative analysis of Relief Voucher activity, an evaluation of the effectiveness of state-wide programs to achieve supply economy within the New York National Guard through the proper care, control, and utilization of supplies and equipment.

Analysis of the data reveals a sizable decrease in both the total quantity and monetary value of Reports of Survey received during the period. On the other hand, the remaining categories of relief vouchers - collections not involving reports of survey, and Quarterly Reports of Operational Losses - show sizable increases. While it would have been desirable to report decreases in all categories, the overall picture does indicate that the status quo was maintained. However, if a favorable trend is to be gleaned from this analysis, it is that there is an indication that more persons are voluntarily accepting pecuniary liability for their property responsibility shortcomings, and in that responsible officers are turning more and more to avenues of relief available to them, other than reports of survey, thereby saving the government the expense of processing a report of survey.

Reports of Survey involving vehicle damage indicated a small increase this period as 60 of the 137 reports received were in this category. (Last period it was 56 out of 155.) The total monetary value of the 60 reports was \$20,428.72. These surveys broke down further as follows:

Mechanical failure	31	\$10,795.72
Accidents	25	7,465.96
Other Non FWT	4	2,167.04

Nine (9) of the accidents, with a total damage value of \$1,238.59, involved civilian cars and drivers.

Nine (9) of the 60 damaged vehicles, having a total estimated damage value of \$5,378.68, were found to be uneconomically repairable and accordingly transferred to a Federal Property Disposal Officer.

INCLOSURE 23(2)

One statistic which may be of constructive value, is highlighted here. 31 vehicles, (more than half of the damaged vehicles, reported), suffered materiel failure. (Cracked blocks, seized engines, piston rods through crank cases, etc.) In every case, the evidence supporting the report of survey indicated that proper maintenance, and "before operation driver checks" had been performed. No pecuniary liability was imposed in any of these cases. The pertinent vehicles were in the "12 to 15 years old" category, and further, many of these vehicles had but limited mileage put on them during the greater part of the year.

INCLOSURE 23(3)

STATE QUARTERMASTER

ACCOUNTS

As of 31 December 1967, the following records were being maintained:

2,583 Active Stock Record Accountability Cards.

(These cards represent an inventory of 716,851 items.)

237 Memorandum Receipt Accounts.

(This total breaks down to 134 State Armory (SA) accounts and 103 State Guard (SG) accounts.)

1,766 Cards in the Weapons Serial Number File.

563 Cards in the Typewriter Serial Number File.

2,254 Vouchers containing 45,080 line items were processed during this period. This activity, considering the requirement for posting to Stock Record Cards, Memorandum Receipt Accounts and Serial Number Cards, represents a sum total of approximately 90,160 line item entries.

Disposition of unserviceable and excess property during the period continued at a normal rate, indicating again, as in the previous period, that the State Quartermaster's policy for reducing the quantity of excess and obsolete property is a practical program and is achieving the desired results. 6,535 individual items were disposed of under this program. A number of items having salvable value found buyers, thereby returning the State the sum \$138.25. Property having no salvable value was disposed of through destruction at no expense to the State.

The State Quartermaster procured 350 new Projectiles, Tear Gas, 1.5. A total of 279 of these Projectiles were distributed to fifty three armories through the State. Also in connection with this program, a total of 109 Projectiles which had become unserviceable by reason of the expiration of the manufacturer's period of unserviceability, were turned over to the New York City Police Department for training purposes.

SUPPORT OF CIVIL DEFENSE

FALLOUT SHELTER SUPPLIES

The programmed activity in support of Civil Defense for the Fallout Shelter Supplies inaugurated in 1966 continued. As of 31 Dec. 1967, 43 of the 75 designated fallout shelter armories had received supplies as follows:

- 43,579 lbs. of Biscuits, Survival
- 25,982 lbs. of Carbohydrate Supplement
- 30,681 lbs. of Crackers, Survival
- 3,482 Drums, Water
- 3,616 Liners, for Drums
- 144 Kits, Medical Type "A" and Type "C"
- 22 Kits, Radiological, Shelter
- 413 Kits, Sanitation, Type III and IV.

The remaining thirty two armories will be reporting the receipt of the fallout Shelter Supplies in the near future. It is to be noted that Medical Kits, Type "A" and Type "C" have been provided with various amounts of Phenobarbital, a narcotic derivative, which required special handling and control. Although a component of the Medical Kits, the Phenobarbital has been listed as a separate component and picked up on stock record until such time as it will be expended. Also check lists have been devised by the State Quartermaster to facilitate reporting of these items.

In addition, arrangements were coordinated with the Office of Civil Defense to effect calibration of Radiological Kits now being utilized by units of the New York Guard. Delivery of 95 Radiological Kits, CDV-777 in use by the New York Guard were turned over to Civil Defense and recalibrated instruments with new batteries delivered by that office on 17 September 1967 at Camp Smith, Peekskill, New York. It is anticipated that this will be an annual event thereby insuring units of the New York Guard who operate these Kits of always maintaining up-to-date calibrated radiological instruments.

STATE QUARTERMASTER

PERSONNEL ACTIONS

During the reporting year 1,667 travel orders were prepared and issued for federally-paid Administrative Specialists, Staff Assistants, Organizational Technicians, State Maintenance personnel and USP&FO personnel as compared to 1,525 travel orders issued in 1966. Federal travel funds in the amount of \$80,133.15 were obligated during the reporting year to cover individual per diem at the rate of \$16.00 per day and transportation costs authorized in connection with travel of federally-paid personnel. This compares to \$74,086.51 obligated during 1966 for similar purposes.

Other administrative duties included, but were not limited to maintenance of leave records, time and attendance reports, compensation reports for 33 State-paid and service contract employees, typing of form letters, correspondence and reports for the Commanding Officer, State Quartermaster and Assistant Adjutant General, processing and publication of switchboard schedule, weekend duty roster, office memoranda, issuing of local parking permits, answering credit inquiries and preparation of drill reports for Headquarters Detachment (Arsenal Section.)

In addition, this section, consisting of two clerks, furnished 12 man-hours per week in support of Record Retirement Section activities.

Also, upon the resignation of the State mail room clerk, this section processed all incoming and outgoing State mail.

RECORDS RETIREMENT SECTION ACTIVITY

12,272 enlisted records and allied documents were received during the year, to be integrated into the master files which now total approximately 200,000 records.

In addition to the above continuous activity, 813 call slips from the Military Personnel Section, Division of Military and Naval Affairs, Albany, were processed on a one-day basis. Also, 23 additional call slips were personally submitted by investigators from various Federal and State Intelligence agencies.

1,585 Army National Guard Pay Voucher Summary Sheets (NGB Form 67) were received from the Finance Officer, First United States Army, for integration into the three-year active file. Concurrent action is taken to withdraw and destroy outdated summary sheets.

34 New York Army National Guard units and 10 Air National Guard units transmitted organization historical records for permanent filing in accordance with the provisions of New York Army National Guard Memorandum 345-1, August 1964.

INCLOSURE 26 (1)

All operations of this section are accomplished by one file supervisor with assistance from one clerk from Personnel Section, on a part-time basis, until the latter part of September at which time two temporary clerks were employed to assist in the integration and packing of files for transfer to the Record Retirement Building, General Services Office, State Campus, Albany.

WAREHOUSE - CAMP SMITH

Continuing efforts are being made to reduce space requirements at Camp Smith. In addition to New York Guard emergency clothing and equipment which must be stored, considerable quantities of Post, Camp and Station property for facility and troop use are on hand, State Quartermaster and weapons are afforded security storage.

Approximately 800 sq. ft. of space has been earmarked in Building 75 to temporarily receive excess property or provide interim storage for property resultant from the deactivation of the State Armory at 34 Street and Park Avenue, New York City possibly late in 1968 or early 1969. Provisions for storage space at this time will expedite the closing of that facility when it is directed.

Documentation, receiving, shipping, packing, sorting, inspection and actual delivery throughout the State is accomplished by one storekeeper.

It is estimated that approximately 40% of the repacking program has been accomplished. All clothing and individual items of equipment packed in cardboard cartons some fifteen - twenty years ago are being repacked in standard size wooden boxes with fresh moth repellent chemicals.

Excess items are available for inspection by Property Custodian who may have a requirement for lateral transfer.

The storekeeper made 24 motor deliveries totaling in excess of 5000 miles during the year to pick up or deliver 41,000 lbs of property to State installations.

Stored items of Post, Camp and Station property was issued on Memorandum Receipts on 11 occasions to support organizations such as the New York Guard, State Rifle Team, Old Guard of the City of New York etc., using Camp Smith facilities on weekends.

STATE MAINTENANCE OFFICE

The State Maintenance Office provides maintenance and supply support to 254 units/activities of the NYARNG through three (3) Combined Support Maintenance Shops (CSMS) located in Brooklyn, Peekskill and Rochester. Another activity, the Field Training Equipment Concentration Site, (FTECS) located at Camp Drum, provides support to the NYARNG during two week training periods at this training site. The FTECS also supports ARNG units from other States in the First U.S. Army area during their training periods at Camp Drum.

During the period the CSMS's processed approximately 1,000 new 1/4 ton trucks for issue by the USP&FO-NY. Various radio installations were also accomplished in these vehicles and this program is continuing on schedule.

Because of the impending reorganization of the NYARNG it was necessary to suspend Command Maintenance Management Inspections in December 1967. However, the man-hours thus saved were used to advantage in providing planning and technical assistance to units during the pre-reorganization period.

In addition to normal support to the ARNG the FTECS at Camp Drum provided support to elements of the 6th Armored Cavalry Regiment, U.S. Army at Camp Drum while training from 1 Sep 67 through 31 Dec 67. During this period approximately 100 combat vehicles were loaned to the 6th Armored Cavalry Regiment. The support (labor & repair parts) of this equipment was furnished under terms of an inter-service support agreement with the C. O., Camp Drum.

While manning tables for the various SMO activities now authorize additional personnel, the funding support prohibits employment. Further, due to reorganization, new employment was frozen in November, 1967 and replacements could not be employed until after the re-organization. Needless to say, support maintenance production suffers accordingly.

The densities of maintenance significant items supported by the three Combined Support Maintenance Shops are listed below by general groupings:

Small Arms	30,687
Artillery (Towed & Self - Propelled)	356
Instruments	4,198
Combat Vehicles	173
Tactical & Support Vehicles	6,213
Electronic & Communication	9,978

The densities of major maintenance significant items located at Field Training Equipment Concentration Sites are as follows:

Tank, Main Battle	149
Armed Personnel Carrier	97
Mortar, Self - Propelled	25
Command Post Carrier	39
Howitzer, 105 MM Self - Propelled	6
Howitzer, 155 MM Self - Propelled	6
Recovery Vehicle, Full Track	5
Crane	1
Bulldozer	4

The operational costs of the three Combined Support Maintenance Shops are shown in the following chart,

COMBINED SUPPORT MAINTENANCE SHOPS
 OPERATION COSTS

UNITED STATES PROPERTY and FISCAL OFFICE

LOGISTICS - GENERAL

During the past year significant logistical activities included receipt of 661 new M151A1 ¼ Ton Vehicles of which 321 have been distributed and 529 M416 ¼ Ton Trailers of which 285 have been distributed. The balance of these vehicles will be distributed after reorganization of the NYARNG. We are turning in the M38 Model ¼ Ton Vehicles and we are temporarily retaining the M38A1 Models.

3,000 Carbines in the 42d Infantry Division have been replaced by M1 Rifles. As more M1's become available, Carbines in other units will also be replaced.

During FY 1967 equipping of the SRF Forces was completed.

175 depot rebuilt M48A1 Medium Tanks were received in exchange for earlier series M48. Units of the 42nd Infantry Division received 4 M48A2 Medium Tanks in exchanges for 4 M48A3's (Diesel powered). 29 M48A1 Medium Tanks are due in the immediate future to replace the M41 Light Series Tanks. 15 M577A1 Command Post Carrier, APC, Vehicles have been received, 19 more are due in. 9 Carriers 81MM Mortar M125A1's are also due in. We have received 24 - 25 Ton Semi Trailer Low Beds M172A1. During the period February - March, the Brooklyn and Rochester Warehouses accomplished the relocation of all equipment and supplies by groups and classes.

AUDIT SECTION

During the calendar period 1 January to 31 December 1967 a total of 271 audit-inventories were performed upon the property accounts of the NYARNG.

The Field Audit Control File processed approximately 140,000 documents, utilized in supply and accounting transactions between the USP&FO-NY and Property Book Officers of the NYARNG.

COMPTRROLLER January 1967 - 31 December 1967

A total of 2,433 actions for supplies and services were prepared by this section for the total money value of \$535,889.00.

Service contracts as follows and in the amounts indicated plus changes were prepared in part and issued:

SERVICE CONTRACTS (AIR)	\$ 610,100.00
ARMY NG SVC CONTRACTS (VARIOUS)	316,000.00
ARMY NG AFT CONTRACTS (VARIOUS)	105,664.00

Construction contracts for various locations under both R & U program and AFT contract as follows:

12 each - money value	\$ 43,771.00
-----------------------	--------------

Contracts for other than constructions, such as laundry services, refuse removal etc., were prepared and issued as follows:

4 each -	\$ 29,264.00
----------	--------------

Utilities contracts for Hercules Sites covering electric and water for which this office has administrative responsibilities are as follows: (31 December 1967)

Electricity	6 each	total money	\$ 81,549.00
Water	6 each	total money	\$ 2,731.00

Refuse contracts for Hercules Sites which had been consumated by this office to include Administrative responsibilities are as follows:

5 each	total money value	\$ 5,419.00
--------	-------------------	-------------

Communications for all Federal telephone and TWX machines as follows:
(31 December 1967)

Telephone	32 each)	\$ 25,620.00
TWX Machine	3 each)	

A total of 515 medical cases for this period are on file in this section, total medical care costs to date on such cases is \$4,500.00. Physical examinations files total 501 each for a total money value of \$5,100.00.

Charge accounts were prepared and issued to OMS in the amount of 145 each for a total money value of \$31,550.00.

WAREHOUSE

The following table indicates by Warehouse the incoming and outgoing shipments handled by Warehouse personnel during the past year.

* Federal Fiscal Year July 1966 - June 1967

FEDERAL BUDGET AND FISCAL SECTION - ARMY NATIONAL GUARD

Federal accounting is on a 1 July 1966 to 30 June 1967 Fiscal Year, therefore statistics included below cover FY1967.

Allotment of Federal Funds, totaling \$20,347,331, was received by this State from the National Guard Bureau during the Federal Fiscal Year 1967, of which \$20,205,835, was expended under the following projects.

ARMY NATIONAL GUARD:

Pay and Allowances, Active Duty
for Training, Officers \$ 1,081,904.

Basic Pay	\$ 824,589.
Basic Allowance for Quarters	145,336.
Basic Allowance for Subsistence	61,716.
Other ACDUTRA Pay (Hazardous duty pay, etc)	13,272.
Contribution to FICA	36,991.

Pay and Allowances, Active Duty
for Training, Enlisted Personnel \$ 2,999,862.

Basic Pay	\$ 2,538,928.
Basic Allowance for Quarters	329,499.
Basic Allowance for Subsistence	12,545.
Other ACDUTRA Pay (Hazardous duty pay, etc.)	5,366.
Contribution to FICA	113,524.

Individual Clothing and Uniform
Gratuities, Officers \$ 60,100.

Initial Allowance	\$ 49,800.
Maintenance Allowance	10,300.

Individual Clothing and Uniform
Gratuities, Enlisted Personnel \$ 106,080.

NON-SRF	\$ 104,182.
SRF	1,898.

FACILITIES

CURRENT STATE APPROPRIATIONS

Funds made available by the Legislature in Fiscal Year 1967 - 1968 for Military Construction requirements are as follows:

Capital Outlay	\$ 400,000
Rehabilitation and Improvements	\$ 502,000
Camp Smith Modernization	\$ 500,000
	<hr/>
TOTAL	\$ 1,402,000

During the year 1967, work continued on the Modernization of Camp Smith as follows:

Rehabilitation of Water Service Lines - 100% Complete	\$ 78,601
Sewage Disposal System - 100% Complete	\$ 269,559
Foundations 503 Barracks and 507 Dispensary - 100% Complete	\$ 93,350
Alterations to Buildings 501, 504, 505, 506 - 40% Complete	\$ 25,000
Superstructures 503 Barracks and 507 Dispensary - 15% Complete	\$ 760,570
	<hr/>
TOTAL	\$ 1,227,080

INCLOSURE 33(1)

FACILITIES

REQUESTED STATE APPROPRIATIONS

The Capital Outlay and the Rehabilitation and Improvements Programs submitted to the Division of the Budget for Fiscal Year 1968 - 1969 are as follows:

13 Capital Outlay Projects	\$ 1,850,000
98 Rehabilitation and Improvement Projects	\$ 1,098,000

Included in the Capital Outlay request is an item for continuation of the Camp Smith Modernization Program at \$ 765,000. This consists of:

Officers Quarters / Mess Bldg.	\$ 517,000
--------------------------------	------------

(This amount is to supplement the FY 67 - 68 allocation).

Widening Main Entrance Road	175,000
Modifications to existing buildings	40,000
Public Rest Facility	33,000

TOTAL	\$ 765,000
-------	------------

In addition to the above, the sums of \$ 543,000 were requested from the Civil Defense Commission to be used for the purpose of installation of emergency generators in 87 armories and \$ 250,000 for construction of a Fallout Shelter in the Rochester Area.

TECHNICIAN PROGRAM
MAJOR BUDGET PROJECTS

The New York Army National Guard technician program operates within five major budget projects, utilizing two major pay systems, i.e., National Guard Classified (NGC) and National Guard Wage Board (NGW), and approximately 125 separate job titles. A brief description of the personnel assigned in each project and their responsibilities follows:

1. Training Operations - Includes the administrative and clerical personnel necessary for the administration, supply and training of New York Army National Guard units.

2. Air Defense - Includes the administrative and operational personnel responsible for maintaining NIKE sites in a continuous state of readiness.

3. Logistics Support Includes -

a. Mechanics required to accomplish first and second echelon maintenance on assigned automotive, powered, artillery, signal and small arms equipment.

b. Personnel qualified to perform higher echelon maintenance and repair of organizational equipment in the combined support maintenance shops.

c. Personnel assigned to assist the United States Property and Fiscal Officer in the issue of, and accountability for, all federal property and funds assigned to the National Guard in the State.

d. The personnel responsible for the repair and maintenance of the aircraft assigned to the New York Army National Guard.

4. State Headquarters - Personnel assigned to Headquarters New York Army National Guard to assist the Commanding General in the conduct of the several programs required of the Army National Guard by the Department of the Army.

5. Military Support Plans Office - Provides the personnel necessary to coordinate the possible military resources available in the State for supporting the Civil Defense mission.
