Mr. Seth Hill,
Greenfield Ctr., N. Y.

Dear Sir:-

We are just in receipt of advice through our local agent Mr. D. M. Clokie of your town that you are interested in a Water Supply System, therefore, we take pleasure of sending, under separate cover, catalog of our Milwaukee Air Power Water Systems which we trust will be of interest to you.

You will note from reading the printed matter over that this system embodies several features not found in any other system. The principal one being that the water is always furnished direct from the source to the faucets, thus eliminating all storage water from the tanks. The water is also always furnished at an equal pressure, which can be set to conform with the general requirements. Another feature which is of great importance is that the system can be installed in any location as the tank contains nothing but air, there is no possibility of freezing. All you have to protect is the water pipes from the source to the supply. There are also many other features which you will find mentioned in our catalog.

We trust you will read over the printed matter carefully and whenever you are ready to take up the matter that we may have the pleasure of doing so through our local agent. We are the largest dealers of this class of goods in the East and are in position to handle any size contracts with guaranteed results at most favorable prices and terms of payment.

Very truly yours,

BRACKETT, SHAW & LUNT CO.,

E. P. Jillson
Branch Manager. *per L. Shaw,*
